Mr. CURTIS. Mr. President, I cannot yield my time back because win or lose we cannot consent to letting the gross error propounded by the other side of the aisle go unchallenged.

The distinguished majority leader is a very brilliant man, but he reached out for an argument this time that will look ridiculous. The idea of our having a rule here that a certain minimum number have to be here to listen or when a motion is made or something or other is unconstitutional is just about as ridiculous as you can get.

My amendment does not change the rule as to quorums. You can still insist that a quorum be present for a vote as you do in a committee. Many committees have done that. They have said that you cannot take testimony unless there is a committee member from each party present.

Now, imagine going out over the country and telling the people, "We were unable to do anything about absenteeism and getting Senators present because it is unconstitutional; that the Constitution prescribes a quorum, and we can go on the assumption that a quorum is present," when everyone knows that maybe there are not more than two Senators present.

I think the leadership is viewing its task as too difficult. I think after a few weeks' trial on this they would find it very easy.

I even heard it said at the beginning of this session of Congress that the Senate ought to have a non-Senator permanent Presiding Officer because it was difficult to get enough Senators to preside. How ridiculous can we get.

Mr. President, this goes to the heart of the ethics matter. The purpose of the code of ethics is to establish the confidence of the country in this body. I know there are a few people on the outside who accuse all of the Senators of being crooks, but those who know the facts know that is not true. But there is a feeling on the part of many that we need to do something to establish more public confidence.

With all the hundreds of people who come here in the Gallery and watch and listen, including the students, what do they go home and tell about if two or three Senators are on the floor, if a bill is passed and not very many people are here?

Furthermore, Mr. President, we are not doing a good job at legislating because a Member is discouraged from preparing his case for or against legislation or for or against an amendment because he stands up and talks to himself.

It is not unreasonable to say that we ought to have 25 Senators here. I think with a conference of the Senators who are chairmen of the committees it can be easily arranged that a fourth of the Senators could be here all the time. I do not think it would be an overburdensome job for the minority to have 10 people here and the majority 15.

Mr. President, I realize a motion to table is kind of a convenient escape hatch; that somehow we can go back home and tell the people, "Well, this was a procedural thing and we have to support the establishment."

But the fact remains a vote to table will be a vote to continue legislating by absenteeism.

We talk about absentee landlords——

Mr. STONE. Mr. President, will the Senator yield for a unanimous-consent request for 1 minute?

Mr. CURTIS. Yes.

Mr. STONE. I ask unanimous consent for Pam Weller of my staff be allowed the privileges of the floor during the votes and proceedings on this bill.

The PRESIDING OFFICER (Mr. HARRY F. BYRD, Jr.). Without objection, it is so ordered.

Mr. STONE. I thank the Senator from Nebraska.

Mr. CURTIS. Mr. President, I am satisfied that if we could get a straight up and down vote on this I do not think there are a majority of the Senators who would oppose this idea. This gimmick of a motion to table may provide an escape hatch so that there will be enough arm twisting to defeat it.

Mr. NELSON. Mr. President, will the Senator yield for a question?

Mr. CURTIS. But I just challenge those in charge of this bill to refrain from a motion to table.

Mr. ROBERT C. BYRD. Mr. President, will the Senator yield?

Mr. CURTIS. I will be happy to yield.

Mr. ROBERT C. BYRD. The challenge has been accepted.

Mr. CURTIS. Very well.

Mr. ROBERT C. BYRD. The same thing may take place on one of these pay raise amendments one of these days.

I have heard Senators say, "I want a vote up or down on the pay raise." Then they turn around and vote against a motion to table amendments rejecting or repealing the recent Federal pay increase. One of these days we may see how many Senators are willing to vote on the Federal pay raise, up or down.

Mr. CURTIS. It will not bother me.

Mr. ROBERT C. BYRD. It will not bother me either.

Now, I plead with the manager of the bill to discount anything I said earlier in asking him to move to table this amendment. I plead that he disregard my earlier wishes. I want to give the able Senator from Nebraska a vote up or down on his amendment.

May I say also, in defense of the leadership and in defense of the Senator from Nebraska, there are only at this time 3—let me count—11 Senators on the floor.

Mr. CURTIS. It has doubled in the last 3 minutes.

Mr. ROBERT C. BYRD. Well, it has doubled because they heard the Senator was orating.

Mr. CURTIS. No.

Mr. ROBERT C. BYRD. But the galleries have been filled, they have been listening attentively and with admiration to the distinguished Senator from Nebraska as he has so eloquently orated.

If his amendment were already in effect, the Senator knows the Presiding Officer would have had to count; there would not have been 25 Senators on the floor; and the galleries would have

missed this excellent speech they have listened to today by the able Senator from Nebraska. They might have read it in the CONGRESSIONAL RECORD, but the visitors in the galleries would have been denied the one opportunity they have now had——

Mr. CURTIS. Mr. President, whose time is it?

Mr. ROBERT C. BYRD. My own time.

The PRESIDING OFFICER. The Senator from Nebraska has the floor.

Mr. CURTIS. On whose time is this?

The PRESIDING OFFICER. On the time of the Senator from Nebraska.

Mr. CURTIS. I refuse to yield further.

Mr. President, how much time do I have remaining?

The PRESIDING OFFICER. The Senator from Nebraska has 11 minutes remaining.

Mr. CURTIS. The longer this goes the more foolishness comes from that other side. They spend most of their time saying it is unconstitutional to have Senators present to legislate. Imagine that. Is that not ridiculous? Now they say that if we require 25 to be present there would be no meeting. There would be no meeting. I just do not think that is true. I think West Virginia, Tennessee, and Kansas would elect Senators who would attend. I believe they would.

Mr. ROBERT C. BYRD. The Senator leaves me speechless.

Mr. CURTIS. The Senator's arguments are ingenious to the extreme, almost as ingenious as they are erroneous.

Mr. President, I am prepared to yield back the remainder of my time.

Mr. NELSON. Mr. President, I have not agreed to that request by our leader. Did the Senator ask for, an up or down vote? Is that what the Senator said he wanted?

Mr. CURTIS. Yes.

Mr. NELSON. I cannot agree to it. I will give the Senator a down vote but not an up vote. I do not know whether I want to agree to that. I have never had so much power before. Here is the leader begging me to allow, as the Senator puts it, an up or down vote. Lord Acton was correct. He described us correctly:

Power tends to corrupt and absolute power corrupts absolutely.

If the Senator is prepared to yield back his time so that the manager of the bill does not have to listen to any more debate on this question, I will agree to an up or down vote with me voting it down.

SEVERAL SENATORS. Vote! Vote!

Mr. CURTIS. On those conditions I yield back the remainder of my time.

Mr. NELSON. I yield back the remainder of my time.

The PRESIDING OFFICER. The question is on agreeing to the amendment of the Senator from Nebraska. The yeas and nays have been ordered.

The clerk will call the roll.

The second assistant legislative clerk called the roll.

Mr. CRANSTON. I announce that the Senator from Missouri (Mr. EAGLETON), the Senator from Washington (Mr. MAGNUSON), the Senator from South Dakota (Mr. ABOUREZK), and the Senator from Florida (Mr. CHILES) are necessarily absent.

I further announce that the Senator from Hawaii (Mr. INOUYE) and the Senator from Michigan (Mr. RIEGLE) are absent on official business.

I also announce that the Senator from Colorado (Mr. HASKELL) is absent attending the funeral of a friend.

I further announce that, if present and voting, the Senator from Michigan (Mr. RIEGLE) and the Senator from Washington (Mr. MAGNUSON) would vote "nay."

Mr. STEVENS. I announce that the Senator from Arizona (Mr. GOLDWATER), the Senator from Oregon (Mr. HATFIELD), and the Senator from Oregon (Mr. PACKWOOD) are necessarily absent.

I also announce that the Senator from Michigan (Mr. GRIFFIN) is absent on official business.

The result was announced—yeas 22, nays 67, as follows:

[Rollcall Vote No. 90 Leg.]

YEAS—22

Allen	Garn	Schmitt
Baker	Hansen	Scott
Biden	Hatch	Stafford
Bumpers	Hayakawa	Thurmond
Chafee	Heinz	Tower
Curtis	Helms	Wallop
Dole	McClure	
Domenici	Roth	

NAYS—67

Glenn	Morgan	Zorinsky
Gravel	Moynihan	

NOT VOTING—11

Abourezk	Griffin	Magnuson
Chiles	Haskell	Packwood
Eagleton	Hatfield	Riegle
Goldwater	Inouye	

So Mr. CURTIS' amendment was rejected.

Mr. NELSON. Mr. President, I move to reconsider the vote by which the amendment was rejected.

Mr. ROBERT C. BYRD. Mr. President, I move to lay that motion on the table.

The motion to lay on the table was agreed to.

Mr. NELSON. Mr. President, I call attention to the absence of a quorum.

The PRESIDING OFFICER. The clerk will call the roll.

The second assistant legislative clerk proceeded to call the roll.

Mr. NELSON. Mr. President, I ask unanimous consent that the order for the quorum call be rescinded.

The PRESIDING OFFICER. Without objection, it is so ordered.

UP AMENDMENT NO. 125

Mr. NELSON. Mr. President, I yield to the Senator from North Carolina.

Mr. MORGAN. Mr. President, I send an amendment to the desk and ask that it be stated.

The PRESIDING OFFICER. The amendment will be stated.

The assistant legislative clerk proceeded to read as follows:

The Senator from North Carolina (Mr. MORGAN) proposes unprinted amendment No. 125.

Mr. MORGAN. Mr. President, I ask unanimous consent that further reading of the amendment be dispensed with.

The PRESIDING OFFICER. Without objection, it is so ordered.

The amendment is as follows:

On page 30 after line 19 amendment UP-118 insert:

"6. (a) The supervisor of an individual who performs services for any Member, committee, or office of the Senate for a period in excess of four weeks receives compensation therefor from any source, other than the U.S. Government, shall report to the Select Committee on Ethics with respect to the utilization of the services of such individual.

"(b) A report under subparagraph (a) shall be made with respect to an individual—

"(1) when such individual begins performing services described in such subparagraph;

"(2) at the close of each calendar quarter while such individual is performing such services; and

"(3) when such individual ceases to perform such services. Each such report shall include the identity of the source of the compensation received by such individual and the amount or rate of compensation paid by such source.

"(c) No report shall be required under paragraph 1 with respect to an individual who normally performs services for a Member, committee, or office fo less than eight hours a week.

"(d) For purposes of this rule, the supervisor of an individual shall be determined under paragraph 12 of rule XLV.".

Mr. MORGAN. Mr. President, this amendment would simply require that the supervisor of an individual who performs services for any Member of the Senate or for any committee of the Senate or any officer of the Senate, who receives compensation from sources other than the U.S. Government, shall be required to file a report with the Ethics Committee with regard to the utilization of such services; provided that the person performs as much as 8 hours a week and for a period of more than 4 weeks.

What this is designed to do, Mr. President, is let the Ethics Committee and the Senate and the public know who is performing services for a Member of the Senate or a committee of the Senate that is not being paid by the taxpayers. There is no prohibition against it, but it simply occurs to me that it is wise for us to know who is performing those services.

For instance, there are many foundations that create fellowships for individuals to work in the congressional offices and most of them perform useful services. Nevertheless, there are occasions when it seems to me that people can be involved in such services and be seeking to put across a given point of view. I might cite an example, and I do not say there is anything wrong with it.

When I was first elected to the Senate, I was approached by a foundation as to whether I would be willing to accept in

my office, as a member of my staff, a member of the medical profession of my State for a period of a year. Such member of the profession was to be compensated by the foundation, which was funded primarily by sources from the medical profession and governed, to a certain degree, by the American Medical Association.

If I am willing to accept those services, I think it is perfectly all right, although I was not quite willing to do that. I am not saying that I am passing judgment on the propriety of another Member's doing it, but I do think that my fellow citizens should have known if I had accepted such services. My fellow Senators should have known that he was on my staff and I think they would have been willing to look a little more closely perhaps, at my positions on health care, and so forth.

I use that as a given example, but I think we all know that there are many, many foundations and fellows on Capitol Hill—most, I think, with the best of motives. But we are all human and we are all subject to our own biases.

I have discussed this with the manager of the bill, the distinguished Senator from Wisconsin, and with the distinguished Senator from South Carolina (Mr. THURMOND). They both have indicated to me that they are agreeable to it.

The PRESIDING OFFICER. Who yields time?

Mr. NELSON. Mr. President, I have read the amendment. I think it makes good sense. The Senator pretty clearly described what he was talking about. I am prepared to yield back the remainder of my time.

Mr. HELMS. Will the Senator yield for a question?

Mr. NELSON. Yes.

Mr. HELMS. I will address this question, Mr. President, to either of the Senators.

We now have such a rule limited only by compensation, is that not correct, $15,000, more or less?

Mr. NELSON. I did not get the question.

Mr. HELMS. I understand that what the able Senator from North Carolina is seeking is to make applicable all across the board, regardless of compensation paid to an employee of the Senate, what is now applicable only to employees paid more than $15,000, is that correct?

Mr. NELSON. No. All the amendment does, as I read it, is simply to provide that anyone who works for a Member and is not compensated by the U.S. Government, but is compensated by another source, shall report the facts to the Ethics Committee so that the information will be public.

Mr. HELMS. Will the Senator indulge me on his time for a brief quorum call so that I can check this with him?

Mr. MORGAN. Yes.

Mr. HELMS. Mr. President, I suggest the absence of a quorum.

The PRESIDING OFFICER. The clerk will call the roll.

The assistant legislative clerk proceeded to call the roll.

Mr. HELMS. Mr. President, I ask unanimous consent that the order for the quorum call be rescinded.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. HELMS. Mr. President, I want to commend my distinguished colleague from North Carolina on this amendment and with his permission I ask unanimous consent to be a cosponsor of this amendment.

Mr. MORGAN. I am happy to have the Senator as a cosponsor.

The PRESIDING OFFICER. Without objection, it is so ordered.

Has all time been yielded back?

Mr. MORGAN. Mr. President, I yield back the remainder of my time.

Mr. NELSON. I yield back the remainder of my time.

The PRESIDING OFFICER. The question is on agreeing to the amendment of the Senator from North Carolina.

The amendment was agreed to.

The PRESIDING OFFICER. Who yields time? What is the will of the Senate?

Mr. HELMS. Mr. President, I suggest the absence of a quorum with the time to be charged equally.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. NELSON. What was the request?

The PRESIDING OFFICER. The time to be equally divided.

The clerk will call the roll.

The assistant legislative clerk proceeded to call the roll.

Mr. NELSON. Mr. President, I ask unanimous consent that the order for the quorum call be rescinded.

The PRESIDING OFFICER. Without objection, it is so ordered.

The Senator from Montana.

Mr. METCALF. Mr. President, section 3 of proposed rule 48 directs Senate offices to file copies of newsletters and other informational mailings with the Secretary of the Senate on an annual basis. In turn, the Secretary is directed to make the mail matter along with other relevant information available for copying, to provide for public disclosure.

I wish to address a couple of questions to the managers of the resolution.

Is it the understanding of the managers that any Senator who wishes to do so can file his newsletters and other informational mailings as they are sent out rather than filing all of them on a specified annual date?

Mr. NELSON. That was my interpretation of the resolution; and since it said annually, I suppose different interpretations are possible. But if one wants to file monthly or immediately after sending out a newsletter, in my judgment that would meet the standard of the requirement. My interpretation is that the 1 year means that one must file at least once a year whatever publications and mailings were made the previous year; but if one wishes to file more often, it is perfectly permissible.

Mr. METCALF. Therefore, any Senator who chose to do so and who filed every such mailing as it was sent out would be considered to be in compliance with the registration requirements of section 3?

Mr. NELSON. That would be my interpretation. The Ethics Committee may develop some standards on that.

Mr. METCALF. A Senator would be required to file at the end of every year.

Mr. NELSON. There is no question about that.

Mr. METCALF. But if a Senator filed periodically when he sent out his mailings and filed them monthly or semimonthly or on the other dates, that would be considered to be in compliance?

Mr. NELSON. Yes. I would consider that the annual requirement is the minimum requirement in the resolution. If someone wants to file more often than annually, as the newsletters are sent out, that is perfectly acceptable under the rule.

Mr. METCALF. I raise these questions, Mr. President, because I am convinced that most Senators will eventually discover that disclosure as a continuing, routine function will eliminate a number of problems that may arise in fulfilling these requirements.

Disclosure as a Senator mails will make it unnecessary for the Senate office to maintain files and recordkeeping, for instance. There will be no need for the preparation and presentation of a bulky, annual report containing all the items mailed for an entire year. There can be no question that a newsletter or other mailing went out but somehow got lost in filing or otherwise failed to get reported.

As a further convenience for those who wish to exercise this option, could the Senate Service Department—perhaps in consultation with the Ethics Committee—arrange through appropriate regulations to forward the matter mailed to the Secretary's office automatically as a routine operation in fulfillment of this requirement?

The Senator may not be able to respond to this definitively here, but his comments on the suggestion will be helpful.

Mr. NELSON. I think it is a good suggestion to the service department. I suppose that the Ethics Committee would have the authority, under the provisions, to direct the service department to do that, in any event. I believe it is a good idea.

Mr. METCALF. I thank the Senator from Wisconsin.

Mr. ALLEN. Mr. President, will the Senator yield?

Mr. NELSON. I yield.

Mr. ALLEN. I understand this possible arrangement with the service department would still leave the Senator the option of the annual filing if he saw fit.

Mr. NELSON. Yes. I trust that would be the way to do it, if that is the way the Senator wanted it done; or, if the service department were appropriately directed, the Senator could request that his be filed annually.

Mr. ALLEN. I understand. I thank the Senator.

Mr. NELSON. Mr. President, I suggest the absence of a quorum.

The PRESIDING OFFICER (Mr. ABOUREZK). The clerk will call the roll.

The second assistant legislative clerk proceeded to call the roll.

Mr. NELSON. Mr. President, I ask unanimous consent that the order for the quorum call be rescinded.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. NELSON. Mr. President, I ask the Chair whether this is correct: I had made a request the other day that the quorum calls be charged equally to both sides.

The PRESIDING OFFICER. The request was made at that time for that particular quorum call. There is no record at the desk of a permanent request by the Senator from Wisconsin.

Mr. NELSON. Mr. President, I suggest the absence of a quorum, and I ask unanimous consent that the time be charged against the other side.

The PRESIDING OFFICER. Is there objection? The Chair hears none, and it is so ordered.

The clerk will call the roll.

The second assistant legislative clerk proceeded to call the roll.

[There was a disturbance in the galleries.]

The PRESIDING OFFICER (Mr. ABOUREZK). The clerk will suspend until the Sergeant at Arms can restore order in the galleries.

The second assistant legislative clerk resumed the call of the roll.

Mr. ROBERT C. BYRD. Mr. President, I ask unanimous consent that the order for the quorum call be rescinded.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. ROBERT C. BYRD. Mr. President, the distinguished minority leader and I have attempted to get Senators to the Chamber to ascertain if we can get amendments called up and disposed of. We have reached the conclusion that the best thing to do is have a live quorum and have Senators come to the Chamber to see which Senators have amendments and then call them up so the Senate can act on them.

Mr. BAKER. Mr. President, will the Senator yield,

Mr. ROBERT C. BYRD. I yield.

Mr. BAKER. I think that is a good idea. The majority leader and I discussed that matter a little while ago and agreed that the best thing to do under the circumstances was to have a quorum that would become live at around 2:30 p.m.; and at that time it would be my hope that the majority leader and I, with the consent of our colleagues, could establish not only who else has amendments but what the schedule of presentation on those amendments would be.

In the case of the Dole amendments and the Hansen amendments time limitation agreements have already been established. If we can establish a sequence for them and then inquire of our colleagues if there are other amendments, I think everyone then will be on notice as to the available remaining time, his opportunity to present amendments, and the fact that after we finish today there is no more time remaining because the time available tomorrow is provided for already.

So I certainly join with the majority leader in hoping that our colleagues will stay in the Chamber while we try to establish the sequence of events for the remainder of this day, and whenever he is ready I am ready to do that.

Mr. President, to conserve time and to make sure we do not cut anyone out of the opportunity to offer his amendments, I ask unanimous consent that when we have the quorum and it goes live, that quorum and the rollcalls attendant thereto not be charged against either side.

Mr. ROBERT C. BYRD. Very well. That is agreeable with me.

The PRESIDING OFFICER. Without objection, it is so ordered.

QUORUM CALL

Mr. ROBERT C. BYRD. Mr. President, I suggest the absence of a quorum.

The PRESIDING OFFICER. The clerk will call the roll.

The second assistant legislative clerk called the roll, and the following Senators entered the Chamber and answered to their names:

[Quorum No. 15 Leg.]

Abourezk	Goldwater	Pell
Allen	Hart	Schmitt
Baker	Helms	Scott
Brooke	Kennedy	Stafford
Bumpers	Leahy	Talmadge
Byrd, Robert C.	Long	Thurmond
Case	McGovern	Wallop
Curtis	Morgan	
Eastland	Nelson	

Mr. ROBERT C. BYRD. Mr. President, I move that the Sergeant at Arms be instructed to request the attendance of absent Senators, and I ask for the yeas and nays.

The PRESIDING OFFICER. Is there a sufficient second? There is a sufficient second.

The yeas and nays were ordered.

The PRESIDING OFFICER. The question is on agreeing to the motion of the Senator from West Virginia. The yeas and nays are ordered, and the clerk will call the roll.

The legislative clerk called the roll.

Mr. CRANSTON. I announce that the Senator from Missouri (Mr. EAGLETON), the Senator from Washington (Mr. MAGNUSON), the Senator from Iowa (Mr. CULVER), the Senator from Alaska (Mr. GRAVEL), the Senator from Kentucky (Mr. HUDDLESTON), the Senator from Minnesota (Mr. HUMPHREY), the Senator from Georgia (Mr. TALMADGE), and the Senator from Mississippi (Mr. STENNIS) are necessarily absent.

I further announce that the Senator from Hawaii (Mr. INOUYE) and the Senator from Michigan (Mr. RIEGLE) are absent on official business.

I also announce that the Senator from Colorado (Mr. HASKELL) is absent attending the funeral of a friend.

Mr. STEVENS. I announce that the Senators from Oregon (Mr. HATFIELD and Mr. PACKWOOD) are necessarily absent.

I also announce that the Senator from Michigan (Mr. GRIFFIN) is absent on official business.

The result was announced—yeas 81, nays 5, as follows:

[Rollcall Vote No. 91 Leg.]

YEAS—81

Abourezk	Bayh	Bumpers
Allen	Bellmon	Burdick
Anderson	Bentsen	Byrd, Harry F., Jr.
Baker	Biden	Byrd, Robert C.
Bartlett	Brooke	Cannon
Case	Hollings	Proxmire
Chafee	Jackson	Randolph
Chiles	Javits	Ribicoff
Church	Kennedy	Roth
Clark	Laxalt	Sarbanes
Cranston	Leahy	Sasser
Curtis	Long	Schmitt
Danforth	Lugar	Schweiker
DeConcini	Mathias	Scott
Dole	Matsunaga	Sparkman
Domenici	McClellan	Stafford
Durkin	McGovern	Stevens
Eastland	McIntyre	Stevenson
Ford	Melcher	Stone
Garn	Metzenbaum	Thurmond
Glenn	Morgan	Tower
Hansen	Moynihan	Wallop
Hart	Muskie	Williams
Hatch	Nelson	Young
Hathaway	Nunn	Zorinsky
Hayakawa	Pearson	
Heinz	Pell	

NAYS—5

Goldwater	McClure	Weicker
Johnston	Metcalf	

NOT VOTING—14

Culver	Hatfield	Packwood
Eagleton	Huddleston	Riegle
Gravel	Humphrey	Stennis
Griffin	Inouye	Talmadge
Haskell	Magnuson	

So the motion was agreed to.

The PRESIDING OFFICER. With the addition of the Senators voting who did not answer the quorum call, a quorum is now present.

Mr. ROBERT C. BYRD. Mr. President, may we have order in the Senate?

The PRESIDING OFFICER. Will the Chamber come to order?

The Senate will suspend until the Chamber is in order. I ask all Senators who are conversing to remove their conversations from the Chamber.

The Senator will not continue until the Chamber is in order.

The Senate Chamber will please come to order.

Mr. ROBERT C. BYRD. I thank the Chair.

Mr. President, tomorrow the Senate will vote on final passage of the Code of Conduct after it disposes of an amendment which will be called up by Mr. BAKER. All time is allotted with respect to the Code of Conduct as far as tomorrow is concerned. It is anticipated that the final vote on the passage of Code of Conduct will occur somewhere between the hours of 11 a.m. and 11:15 a.m., or thereabouts.

The Senate came in early today, at 9:30 a.m., as a matter of fact, in an effort to accommodate all Senators who had amendments and who wanted to call them up. I think it is conservative for me to say that we have wasted at least an hour today waiting on Senators to present themselves and call up their amendments. Of course, I realize there were some committee meetings going on during the first 2 hours of the day. So part of the delay is understandable.

In the interest of expediting action on whatever amendments remain, the distinguished minority leader and I have decided we would have a live quorum, ask Senators to indicate if they have amendments that they yet want to call up, which would have to be called up today, and try to establish a sequence, if we can, in which those amendments will be called up so the Senate can expedite action thereon and not be in too late into the evening.

Mr. BAKER. Mr. President, will the Senator yield?

Mr. ROBERT C. BYRD. I yield.

Mr. BAKER. I thank the majority leader for summarizing the situation as we find it.

On my side of the aisle I have notations that two Senators remain, and possibly three Senators, who yet have amendments. They are Senator DOLE, Senator HANSEN, and possibly Senator WALLOP, although I understand from Senator WALLOP that his amendment may be incorporated into one of the Hansen amendments.

Mr. CURTIS. Mr. President, will the Senator yield,

Mr. ROBERT C. BYRD. I yield.

Mr. CURTIS. I have an amendment No. 75 which I would like to call up.

Mr. ROBERT C. BYRD. Now may I ask if there are any Senators on this side of the aisle who have amendments?

Mr. MUSKIE. Mr. President, I have several amendments at the desk. I do not intend to call up any of them. I would like to inquire whether there will be some time after all amendments have been considered for some general debate. I would like about 5 minutes, no more, at that time.

Mr. ROBERT C. BYRD. Would that be today?

Mr. MUSKIE. It might be. I am caught up in the Budget Committee right now, but it may be that later in the afternoon I might be able to be free.

Mr. ROBERT C. BYRD. Very well. Do any other Senators on this side of the aisle wish to call up amendments or have some time for debate?

Mr. BUMPERS. Mr. President, I do not have any amendments to bring up, but I would like to take the opportunity to have about 3 or 4 minutes, subject to the same conditions the Senator from Maine has stated.

Mr. ROBERT C. BYRD. I see no other Senators on my side, I state to the distinguished minority leader, who indicate any intention to call up amendments or who want time for further comments.

Mr. BAKER. If the majority leader will yield, may I inquire if there is anyone else on my side?

The Senator from New Mexico (Mr. DOMENICI) indicates he would like 5 minutes to make general remarks, but not to call up an amendment.

Is that correct?

Mr. DOMENICI. That is correct.

Mr. McCLURE. The Senator from Idaho would like at least 5 minutes on general debate this afternoon.

Mr. BAKER. Are there other amendments on our side, or other requests for time?

Mr. CURTIS. Mr. President, will the Senator yield?

Mr. ROBERT C. BYRD. Yes.

Mr. CURTIS. The Senator from Nebraska is willing to agree on a 10-minute limitation for my presentation and I am ready to start at any time within the next 30 seconds.

Mr. ROBERT C. BYRD. Is the Senator's amendment germane?

Mr. CURTIS. It will be as soon as the Senator agrees to the 10 minutes.

Mr. ROBERT C. BYRD. I understand. That is why I asked the question.

Mr. CURTIS. It is germane. It deals with ethics.

Mr. ROBERT C. BYRD. Will the Senator from Nebraska tell us the title of the amendment and the number thereof?

Mr. CURTIS. The number is 75. It begins:

That the Standing Rules of the Senate are amended by designating rule XLV as XLVI, and by inserting after rule XLVI the following new rule.

Mr. ROBERT C. BYRD. Mr. President, if the Senator's amendment is germane under the order that has been entered already and as governed by the passage of the original resolution, Senate Resolution 36, I believe it was, the time limitation is fine. I would not want to agree to a time limitation on a nongermane amendment.

Mr. CURTIS. Mr. President, I ask recognition on my amendment.

Mr. BAKER. Mr. President, will the Senator withhold that for one moment?

Mr. CURTIS. Yes.

Mr. BAKER. Mr. President, will the majority leader yield long enough for me to make a final inquiry?

Mr. ROBERT C. BYRD. Yes, I yield.

Mr. BAKER. Unless there are other requests, to recapitulate, I have requests for amendments from Senators DOLE, HANSEN, and CURTIS, plus certain other requests for time to speak in general debate.

I thank the majority leader.

Mr. ROBERT C. BYRD. I thank the distinguished minority leader.

May I ask, how many amendments by each of those Senators does the minority leader anticipate?

Mr. BAKER. According to the notations I have, there are five to be offered by the junior Senator from Kansas.

May I inquire if he still has five amendments he intends to offer?

Mr. DOLE. I think some of those can be disposed of in an exchange with the distinguished Senator from Wisconsin. One we might have a vote on, maybe two.

Mr. BAKER. I have a notation of six for the distinguished Senator from Wyoming.

Mr. HANSEN. The minority leader is correct. However, I understand two of them are acceptable and will be accepted by the distinguished manager of the bill, so I actually only have four.

Mr. BAKER. If the Senator will yield further, could the distinguished senior Senator from Wyoming indicate whether or not he feels he will need the full 80 minutes on each of the remaining four?

Mr. HANSEN. If I were to answer candidly, I suspect I might need more than that if I were to persuade all Members here of their true merit. I have no hope of doing that, so I do not propose to take that long.

Mr. BAKER. I thank the Senator.

The only remaining one is that of Senator CURTIS, and we are still hopeful of a time limitation on that.

Mr. CURTIS. Mr. President, it is my opinion, if the Senator will yield, that it is germane. But what is germane in this body is somebody's guess other than mine. I really think it is germane.

Mr. ROBERT C. BYRD. Mr. President, the Senator certainly has a right to call up his amendment.

What is the time limitation the Senator would suggest?

Mr. CURTIS. Well, I think I could present the argument for germaneness in 2 hours, but if I can present the amendment, I shall settle for 10 minutes.

UNANIMOUS-CONSENT AGREEMENT

Mr. ROBERT C. BYRD. Mr. President, I ask unanimous consent that the following Senators be recognized to call up their amendments: That Mr. CURTIS be recognized to call up his amendment and that there be a time limitation thereon of 20 minutes, to be equally divided; that he be followed by Mr. HANSEN to call up his amendments; that he be followed by Mr. DOLE to call up his amendments; and that during the afternoon, Mr. BUMPERS, Mr. MUSKIE, Mr. DOMENICI, and Mr. McCLURE each be recognized for not to exceed 15 minutes on this measure. Mr. NELSON has two amendments, which he can call up. Mr. NELSON will call up his amendments prior to the general debate.

Mr. JAVITS. Mr. President, reserving the right to object, and I shall not object, there are two things I want the majority and minority leaders to take care of. One is amendments to amendments, and the other is not to shut off amendments by this unanimous consent if any Member has an amendment. He may not have any time, but at least he can present it.

Mr. ROBERT C. BYRD. That will be honored, and I think it is taken care of by the general order.

The PRESIDING OFFICER. Is there objection to the request?

Mr. BAKER. Reserving the right to object, Mr. President, just to follow up the query of the senior Senator from New York, as I understand it, this is just our effort to sequence the remaining amendments, to identify the remaining amendments, but what we are doing now is not in abrogation of the general provisions, the special order, and the provisions of Senate Resolution 110.

The PRESIDING OFFICER. The Senator is correct.

Mr. ROBERT C. BYRD. That is correct, but I hope the Senators will be here to call up their amendments so we shall not have to spend further time in quorum calls.

Mr. JAVITS. I thoroughly agree with the Senator. My inquiry was just directed to protecting rights.

Mr. BAKER. Mr. President, it is my full intention, having done now everything that I know how to do to let our colleagues know that the time remaining is the time today and that they had better get their amendments in now or there is not going to be time, that when the flow of business stops, it will not be my purpose to object to our going out until tomorrow.

Mr. ROBERT C. BYRD. Exactly. May I say further, and this is not intended as anything by way of threat—it is merely a reminder—that under the resolution, a nondebatable motion can be made to re-

duce the time. That has not been done; I have no intention of doing it. I merely say that so that Senators will be encouraged to call up their amendments and let us try to get reasonable time thereon and proceed with the business without too much more delay.

I yield 1 minute to Mr. CHURCH.

EXTENSION OF TIME FOR FILING ANNUAL REPORT—COMMITTEE ON AGING

Mr. CHURCH. Mr. President, I ask unanimous consent that the Senate Special Committee on Aging be given until April 7 to file its annual report. This additional time is needed because the Senate has not yet acted on a resolution to authorize the printing of additional copies of the committee's annual reports. Without this action, the cost of printing these additional copies will be greatly increased.

The PRESIDING OFFICER. Is there objection? Without objection, it is so ordered.

Mr. ROBERT C. BYRD. I yield to the Senator from Connecticut 5 minutes.

REORGANIZATION ACT OF 1977

Mr. RIBICOFF. Mr. President, I ask the Chair to lay before the Senate a message from the House of Representatives on S. 626.

The PRESIDING OFFICER (Mr. ABOUREZK) laid before the Senate the amendment of the House of Representatives to the bill (S. 626) to reestablish the period within which the President may transmit to the Congress plans for the reorganization of agencies of the executive branch of the Government, and for other purposes.

(The amendment of the House is printed in the RECORD of March 29, 1977, beginning at page 9366.)

Mr. RIBICOFF. Mr. President, the House on Tuesday approved by a vote of 395 to 22, S. 626, legislation to renew the President's general reorganization authority. The Senate previously passed the bill on March 3, 1977, by a unanimous vote of 94 to 0.

The bill as passed by the House is identical in most respects to the Senate passed bill. The House bill preserves the principle that a plan proposed by the President shall become effective unless one House or the other approves a resolution of disapproval within 60 days. The few changes the House made in S. 626 are fully consistent, in my view, with the intent and spirit of the legislation approved by the Senate.

I ask unanimous consent that a summary of the differences between the House and Senate passed versions of S. 626 be inserted in the RECORD.

Mr. President, I recommend that the Senate adopt S. 626 as amended by the House. Final congressional action on this important legislation today will enable Congress and the executive branch to turn as quickly as possible to the crucial task of reorganizing and improving the way the Federal Government operates.

There being no objection, the summary was ordered to be printed in the RECORD, as follows:

EXECUTIVE REORGANIZATION AUTHORITY—COMPARISON OF SENATE AND HOUSE VERSION OF S. 626

The Reorganization Act Authority passed by the House is identical to the Senate passed bill in most respects.

The following are the substantive differences:

(1) The House bill requires the Governmental Affairs Committee in the Senate and the Government Operations Committee in the House to report either favorably or unfavorably a resolution of disapproval for each plan proposed by the President. In order to assure that in each case there will be a resolution for the committee to act on, the House bill requires the Chairman of the respective committees, or their designates, to introduce by request a resolution of disapproval whenever a reorganization plan is submitted.

The Senate passed bill requires that within 45 days the respective committees in the Senate and the House must report their recommendations on each plan submitted. However, if the committee favors a plan, it may simply file a report with the full House and Senate so stating, instead of reporting unfavorably a resolution of disapproval. Consequently, the Senate does not require the introduction of a resolution of disapproval in each case.

(2) The House provides that if the committee has not acted upon a resolution of disapproval in 45 days, the committee will be automatically discharged from further jurisdiction of the resolution and the resolution placed on the calendar of the House or Senate. The Senate bill has no such automatic discharge provision. If the committee fails to report a resolution, a discharge petition may be filed in either the House or Senate, and a majority vote of the House or Senate is required to discharge the resolution.

Once the committee has reported a resolution, or been discharged from further jurisdiction over a resolution, the procedures in the two bills for full House consideration are the same. The resolution is placed on the calendar and may be made the pending order of business by a majority vote of the appropriate House.

(3) The House bill specifies that no more than three reorganization plans may be pending in the Congress at any one time. The legislative history of the bill in the Senate expressed the expectation that the President would not undermine the ability of Congress to review each proposal in an orderly manner by submitting too many plans at one time. The Senate legislation, however, contained no prohibition on the number of plans that could be submitted at any one time.

(4) The House bill retains the wording in the 1971 Act requiring that each plan submitted deal with only "one logically consistent subject matter." The Senate wording placed slightly more flexible restrictions on what a single plan could contain. It specified that each plan must deal with only one logically consistent subject matter, "or any policy matters coordinated therewith."

(5) The limitation on the use of reorganization plans to abolish functions is worded slightly differently in the two bills. The House bill provides that a reorganization plan may not be used to abolish any enforcement function or "statutory program." The Senate bill prohibits use of a plan to abolish an enforcement function or any "function conferring a substantial programmatic benefit on the public."

(6) The House bill provides that a plan may become effective prior to the end of the 60 day period provided for Congressional consideration, if both Houses prior to that date have defeated a resolution of disapproval. The Senate bill contained no comparable provision.

(7) The provisions requiring committee consideration of each proposed plan within 45 days is enacted in the House passed bill as a function of the rule-making authority of the two Houses. Consequently, either House may alter these procedures by changing their rules. The Senate bill does not provide that these procedures are enacted as part of the rule-making authority of the two Houses. Consequently, legislation amending the reorganization Act itself might be necessary to alter the procedures for committee consideration of the plans.

Mr. RIBICOFF. Mr. President, I yield to the distinguished Senator from Illinois.

Mr. PERCY. Mr. President, I was very pleased to work with Senator RIBICOFF on this matter. I can certainly indicate that members of the minority worked without partisanship in this regard to give the President this authority.

Now that the House has acted, we have carefully reviewed, the House amendments and have circulated them to all members of the minority on the Governmental Affairs Committee.

Mr. President, I support the House amendments to the Reorganization Act of 1977 and hope that the Senate will concur in them. The bill passed by the House of Representatives is almost exactly the same as the bill originally passed by the Senate and the few changes the House made, I feel, improve the legislation.

As passed by both Houses, this legislation:

Extends the President's authority to submit reoganization plans for 3 years. The 3-year extension was accepted in the Senate on an amendment by Senator JAVITS, and I am pleased the House concurs.

Specifies that the President cannot abolish executive departments or regulatory agencies but only realine functions within them.

Mandates that reorganization plans specify any reduction or increase in expenditures. I offered this amendment in the Senate and am pleased the House concurs.

Gives the President the right to amend reorganization plans within 30 days after they are submitted to Congress and allows him to withdraw them entirely.

States that reorganization plans become effective 60 days after transmittal to the Congress unless either House vetoes the plan.

There are seven basic changes in the House bill from the Senate, all of which I think improve on the Senate bill, and which were advocated by Members of the minority in the Senate.

The House bill changes are:

First. No more than three plans may be pending in Congress at any one time. The Senate bill provided no such limitation on the number of plans. Senator JAVITS in committee markup offered an amendment to limit the number of plans that could be pending at any one time but it was not accepted. I am very pleased that the House bill now contains such a limit.

Second. The House bill retains the wording in the 1971 act that any reorganization plan must deal with one logi-

cally consistent subject matter. The original Carter proposal contained no such language which I felt very strongly should be included in the reorganization authority.

I offered such an amendment in the Senate which was accepted but with some additional wording. The House language is clear and precise and is most acceptable.

Third. The House bill states that a reorganization plan cannot abolish any enforcement function or any "statutory program." This is clearer language than the Senate had and is most acceptable.

Fourth. The House bill requires that a resolution of disapproval must be reported either favorably or unfavorably from the Senate Governmental Affairs Committee or House Government Operations Committee thus giving the full House or Senate the opportunity to work its will. This is a modified variation of an amendment I offered in committee requiring at least a report to the floor on each reorganization plan. The House language goes further and actually requires the resolution of disapproval itself to be filed which I think strengthens Congress ability to be assured of a vote on any given reorganization plan.

Fifth. The House provides, as the Senate bill did not, that if the committee fails to take action within 45 days the committee will be automatically discharged from further consideration of the resolution of disapproval. Again, this is a strengthening of the Senate and House ability to be sure to be able to consider the resolution on the floor.

Sixth. The House bill provides that a plan may become effective prior to the end of 60 days if both Houses prior to that date have defeated a resolution of disapproval. There is no comparable Senate provision.

Seventh. In the House version, the provisions requiring committee consideration of each proposed reorganization plan are enacted as a function of the rulemaking authority of the two Houses. The Senate bill enacted them as amendments to the Reorganization Act itself.

Lastly, Mr. President, I am pleased that the House has accepted Senate language offered by Senator ROTH declaring the intent of Congress that the President should provide appropriate means for broad citizen advice and participation in restructuring and reorganizing the executive branch.

I feel that renewal of the reorganization authority is justified to provide an efficient way of dealing with many of the problems of duplication and overlap among the thousands of Federal Government departments, agencies, commissions, advisory committees, and other bodies. I think that the bill, as amended by the House, does balance the roles of the President and the Congress in the area of governmental reorganization, and I urge acceptance of the House amendments.

Mr. RIBICOFF. I yield to the distinguished Senator from New York, but before doing so, I pay special tribute to the Senator from Illinois and the Senator from New York for their constructive work on this measure. Their complete cooperation made this a meaningful bill.

It is ironic, most of the House amendments really are patterned after various amendments offered before the Senate committee by Senator JAVITS and Senator PERCY.

I yield to the distinguished Senator.

Mr. JAVITS. I thank my colleague very much.

Mr. President, these amendments are satisfactory. I will add one bit of addenda, I will not repeat any remarks that have already been made.

We must remember, three plans can be pending within any 30-day period. But it is a fact that there is continued in what we will now enact the requirement that each plan shall address itself to one unitary subject. That somewhat relieves the danger of simply being overwhelmed by the amount we have to deal with, so we have to deal arbitrarily.

Mr. RIBICOFF. If the Senator will yield, it was understood by the director of OMB, that before submitting a plan he would speak with the distinguished Senator from Illinois and myself.

So the Senate will not be faced with a problem of having too many plans before it at any one given time.

Mr. JAVITS. I thank my colleague.

The PRESIDING OFFICER. The 5 minutes have expired.

Mr. RIBICOFF. Mr. President, I move that the Senate concur in the House amendments to S. 626.

The PRESIDING OFFICER. The question is on agreeing to the motion of the Senator.

The motion was agreed to.

OFFICIAL CONDUCT AMENDMENTS OF 1977

The Senate continued with the consideration of the resolution (S. Res. 110) to establish a Code of Official Conduct for the Members, officers, and employees of the U.S. Senate; and for other purposes.

AMENDMENT NO. 75

Mr. CURTIS. Mr. President, I call up amendment No. 75 and ask for its immediate consideration.

The PRESIDING OFFICER. The amendment will be stated.

The assistant legislative clerk read as follows:

The Senator from Nebraska (Mr. CURTIS) proposes an amendment numbered 75.

The amendment is as follows:

In lieu of the matter proposed to be inserted, insert the following:

That the Standing Rules of the Senate are amended by redesignating rule XLV as XLVI, and by inserting after rule XLVI the following new rule:

"RULE XLV

"SENATORS' CODE OF ETHICS

"1. On the first day of each session of Congress, each Senator shall subscribe to and, upon his honor as a Senator, agree to abide by the following Code of Ethics:

"(a) I will not cast a vote in a committee or in the Senate, or refrain from casting a vote, in return for anything of value from any person, firm, association, organization, committee, or corporation.

"(b) I will not accept any money or anything of value for performing or not performing any official act as a Senator.

"(c) I will not influence or attempt to influence any other Member of Congress or any officer or employee of the Federal Government in the discharge of his duty in return for anything of value or of expected value.

"(d) I will not accept any honorarium or fee or any compensation of any kind for any speech, act, service, sale of goods, or otherwise in return for taking a position or casting a vote for or against any legislation or for supporting or opposing any legislation.

"(e) I will not accept any gift or entertainment of any kind or description in return for casting a vote for or against any legislation, or in any other way supporting or opposing legislation, or in return for any official act as a Senator.

"(f) I will not accept a campaign contribution for myself or for any other person or candidate or for any committee, nor will I permit any political committee operating in my behalf to accept a campaign contribution, in return for voting for or against any legislation or for performing or not performing any official act as a Senator.

"(g) I will not perform any act or refrain from performing any act which would cause an unlawful payment to be made from the United States Treasury.

"(h) I will not violate any law or engage in any conduct which would bring discredit upon the Senate or which is unbecoming to a Senator.

"(i) I will not misuse the franking privilege or other Government facilities or services which are available to me for the efficient and effective performance of my duties. I will not use the franking privilege or other facilities or services for personal gain or political purposes.

"(j) (1) If I am charged with the violation of any part of this Code, or the violation of any law, by a majority vote of the Select Committee on Ethics, I will cooperate fully with the investigation of such charges and I will freely disclose all information, facts, figures, documents, and data pertaining thereto requested of me by the Select Committee.

"(2) I hereby waive any immunity or any privilege against self-incrimination afforded to me by any law or by the Constitution of the United States with respect to any matter which may constitute a violation of this Code.

"2. A Senator who is found guilty, by a majority vote of the Senate, of violating any part of the Code of Ethics may, at the discretion of the Senate, be punished by—

"(a) censure;

"(b) forfeiture of any part of his pay as a Senator;

"(c) forfeiture of any part of his retirement benefit attributable to his service as a Senator;

"(d) expulsion from the Senate; or

"(e) any combination of the foregoing.".

Mr. CURTIS. Mr. President, I thank the distinguished majority and the distinguished minority leaders for using the power of their office, their prestige, their standing, and superior learning in getting a crowd over here so that I could make a speech.

I thought for a while I would have as many as 25. I will not quite make it, but I am, indeed, grateful.

My amendment is in the nature of a substitute. The present bill is something I would not criticize the committee for. They had a very difficult task in writing it, but I believe it has the wrong approach.

It calls for a great amount of disclosure, reporting, rules, and I am not

too sure that after it is all done it is going to raise the purity of this body.

I am quite convinced that there will be a number of individuals who ought to give time to the public service, outstanding individuals who have made successes in private life ought to serve in this body, but subject to all this regulation they may decline. I think that is a real possibility.

We have before us 11,000 words of regulations. I want to read one of them:

"(2) The Comptroller General shall, during each six-year period beginning after the date of enactment of this Act, audit at least one report filed by each Member of the Senate except that no such audit shall take place during the calendar year such Member is up for reelection.

That exempts 1 year from purity and high ethics because they cannot audit during that year.

In other words, we have 11,000 words writing a code of conduct.

Why, it took Moses only 400 words to set forth the Ten Commandments.

This is an excellent example of spending several weeks washing the outside of the cup.

Here is what I propose in lieu thereof.

At the present time, we have a procedure for reporting honorariums. They are made public. We have a procedure for filing a limited financial statement and our tax returns with the Committee on Ethics. That should go on.

But instead of all of these rules and regulations, I propose we have a code of ethics like the Boy Scouts do. They hold up their hands and they take an oath. Here is what this prescribes:

On the first day of each session of Congress, each Senator shall subscribe to and, upon his honor as a Senator, agree to abide by the following Code of Ethics:

I will not cast a vote in a committee or in the Senate, or refrain from casting a vote, in return for anything of value from any person, firm, association, organization, committee, or corporation.

I do not think that would be difficult to agree to.

(b) I will not accept any money or anything of value for performing or not performing any official act as a Senator.

(c) I will not influence or attempt to influence any other Member of Congress or any officer or employee of the Federal Government in the discharge of his duty in return for anything of value or of expected value.

In other words, I am saying that I will not go down and help some crony get a national bank charter and make some money out of it. This is a code of ethics.

(d) I will not accept any honoraria or fee or any compensation of any kind for any speech, act, service, sale of goods, or otherwise in return for taking a position or casting a vote for or against any legislation or for supporting or opposing any legislation.

Mr. President, how much time have I consumed?

The PRESIDING OFFICER (Mr. HUDDLESTON). The Senate has used 4 minutes. The Senator has 6 minutes remaining.

Mr. CURTIS. I yield myself 4 additional minutes.

(e) I will not accept any gift or entertainment of any kind or description in return for casting a vote for or against any legislation, or in any other way supporting or opposing legislation, or in return for any official act as a Senator.

This is a good code of ethics. This is not a rule that is going to call for a lot of reports and one thing and another.

This resolution might well be labeled a public works resolution, because it is going to put a lot of clerks and auditors to work. A lot of buildings will have to be built in which to file their works. Imagine how much space it is going to take for copies of all the newsletters. Perhaps we can arrange to file them in the stadium.

(g) I will not perform any act or refrain from performing any act which would cause an unlawful payment to be made from the United States Treasury.

(i) I will not misuse the franking privilege or other government facilities or service which are available to me for the efficient and effective performance of my duties. I will not use the franking privilege or other facilities or services for personal gain or political purposes.

Mr. President, that is a code of ethics. This is where it really has teeth:

If I am charged with the violation of any part of this Code or the violation of any law, by a majority vote of the Select Committee on Ethics, I will cooperate fully with the investigation of such charges and I will freely disclose all information, facts, figures, documents, and data pertaining thereto requested of me by the Select Committee.

Here is something else in this Code:

I hereby waive any immunity or any privilege against self-incrimination afforded to me by any law or by the Constitution of the United States with respect to any matter which may constitute a violation of this Code.

Then it says:

A Senator who is found guilty, by a majority vote of the Senate, of violating any part of the Code of Ethics may, at the discretion of the Senate, be punished by—

(a) censure;

(b) forfeiture of any part of his pay as a Senator;

(c) forfeiture of any part of his retirement benefits attributable to his service as a Senator;

(d) expulsion from the Senate; or

(e) any combination of the foregoing.

Mr. President, here is a code of ethics that prohibits all things that could lead to corruption, conflict of interest, or conduct unbecoming a Senator. I think it takes in the whole realm. It requires a Senator to waive his immunity and to cooperate and disclose.

The PRESIDING OFFICER. The time of the Senator has expired.

Mr. CURTIS. I reserve the remainder of my time.

Mr. SCOTT. Mr. President, will the Senator yield briefly?

Mr. CURTIS. I yield 30 seconds to the Senator.

Mr. SCOTT. Mr. President, I wonder whether the Senator would amend his resolution to eliminate subsection (c) of paragraph 2, on page 4, which relates to retirement benefits. I am prepared to support the Senator's amendment, but I think something like this should be covered by general law and not by a code of ethics.

Mr. CURTIS. I do not think it will be used very often. But suppose we did find a crook in here who gained a million dollars or so unlawfully. I do not think the taxpayers should go on paying his retirement. This is a code of ethics that covers the waterfront, and it has teeth in it.

The PRESIDING OFFICER. The 30 seconds have expired.

Mr. CURTIS. I reserve the remainder of my time.

The PRESIDING OFFICER. Who yields time?

Mr. SCOTT. Mr. President, will the Senator yield very briefly?

The PRESIDING OFFICER. Does the Senator from Wisconsin yield?

Mr. NELSON. Mr. President, when all time has expired, I will move to table this substitute amendment.

I must say, in all frankness, that I would not think of casting a vote for anybody, for any office—town clerk, county board, city council, dog catcher—if I thought it was necessary for him to promise not to commit a crime. It is the most outrageous thing I ever heard of.

Every item in here already is a crime. The Senator says that you have to sign an oath that you will not take a bribe. If anybody is running for office and I thought he had to sign such an oath, I would not vote for him. Nobody should vote for him. What kind of nonsense is this, to clutter up the code with a whole series of crimes that are on the statute books now?

I will not cast a vote in committee or in the Senate, or refrain from casting a vote, in return for anything of value from any person, firm, association, organization, committee, or corporation.

It is a crime to do it.

I will not accept any money or anything of value for performing or not performing any official act as a Senator.

It is a crime to do that. It is already on the statute books.

I listened to the Senator from Nebraska talk about cluttering up the statutes and about too many words in the resolution. Well, I never saw a worse collection of unnecessary words.

I will not accept any honorarium or fee or any compensation of any kind for any deeds, acts, service, sale of goods, or otherwise in return for taking a position or casting a vote for or against any legislation or for supporting or opposing any legislation.

That is bribery, for one to do that. It already is illegal.

Why are we wasting time with a silly resolution such as this? I cannot imagine anybody seriously proposing a proposition which says we have to sign an oath that we will not commit any crime. The Senator may know somebody who thinks it is necessary to do so. I do not. If a person is that crooked, he will sign the oath and commit the crime anyway. [Laughter.]

When are we going to get over this children's day?

Mr. SCOTT. Mr. President, will the Senator yield?

Mr. NELSON. I will yield some time from the time of the Senator from Nebraska.

Mr. CURTIS. I have a minute and a half.

Mr. NELSON. I yield time for a question or a speech.

Mr. SCOTT. Neither a question nor a speech.

I have an amendment to offer to the amendment, but I just want to explain what I propose to do, if the Senator will yield me a moment before he yields back the remainder of his time.

Mr. NELSON. I yield 30 seconds to the Senator from Virginia.

Mr. SCOTT. Mr. President, I agree with the distinguished floor manager of the resolution that this is a matter in which we would be agreeing not to commit a crime. Yet, I am concerned that the Ethics Committee of the Senate could determine that someone had violated some portion of this amendment, without any additional regular due process of law.

So, at the appropriate time, I intend to offer an amendment to delete section 2(c) whereby a Member of the Senate would lose his retirement benefits.

Frankly, I have 36 years of Government service, and I would not want the Committee on Ethics to arrive at a decision that would take away something like that. I would want it to be done, if it were to be done at all, in a court of law, not by a committee of the Senate.

So, unless the distinguished Senator is agreeable to accepting this as an amendment, I do want to offer an amendment when all time has been yielded back.

The PRESIDING OFFICER. Who yields time?

Mr. CURTIS. Mr. President, I yield myself my remaining time.

The point of this is it does cover the waterfront on all offenses, but it goes farther than those things that violate the law. It says, "I will not do anything unbecoming to a Senator."

But the real point of this is you waive your immunity. Like the people back home, they have no immunity here. If anybody brings charges against you, you agree to cooperate and make all the things available and not claim immunity.

This will not provide the work force that this bill will. This proposal of the committee's is filled with ridiculous things. For instance, the idea of prohibiting an audit when somebody is up for reelection, what kind of ethics is that?

A couple of days ago I pointed out this bill was so ridiculously drawn that if a young lady subject to this bill received an engagement ring under certain circumstances, she would have to make a full disclosure of it. Is that ethics?

Mr. THURMOND. Mr. President, will the Senator yield?

Mr. CURTIS. That is washing the outside of the cup; that is, trying to fool the people back home, the people who are honest and ethical, and so on. It is making work.

Mr. President, I am not unaware that I do not expect the support of Common Cause for my code of ethics; I do not expect the support of the powerful majority leader; and I do not expect the support of that very distinguished and able Senator from Wisconsin who is in charge of this bill.

Therefore, I am going to save the taxpayers the expense of printing a rollcall. Insofar as I am concerned I shall not ask for a rollcall vote because these powerful forces are against me.

The PRESIDING OFFICER. The Senator's time has expired.

Mr. THURMOND. Mr. President, first, I would like to explain this. I do not know whether the Senator was in the Chamber earlier during the day but we passed an amendment this morning taking care of the ring proposition.

I have a young lady in my office engaged to a lobbyist. I think it would be unfair to her or her fiance to tell how much that ring cost, so we have corrected that.

Mr. President, I want to say there is nobody in the Senate for whom I have greater respect than the able Senator from Nebraska. He has offered a code of ethics here which, I think, would read well to anybody, and which sets high standards for Senators.

However, I want to say this: On January 18, 1977, just a few months ago, the Senate adopted Senate Resolution 36. This resolution—it is printed in the hearings on the Senate Code of Conduct at page 198 where it begins—reads this way:

SEC. 2. (a) It shall be the function and duty of the special committee to conduct a complete study of all matters relating to standards of conduct of Members, officers, and employees of the Senate in the performance of their official duties, and to recommend to the Senate a Code of Official Conduct for Members, officers, and employees of the Senate. Such study and recommended Code of Official Conduct shall include, but not be limited to, standards for—

(1) annual public disclosure of income, assets, debts, gifts, and other financial items,

(2) restrictions on, or the elimination of, outside income from honoraria, legal fees, gifts, and other sources of financial or in-kind remuneration,

(3) conflicts of interest arising out of investments in securities, commodities, real estate, or other sources,

(4) office accounts, and excess campaign contributions,

(5) Senate travel,

(6) engaging in business or professional activities or employment, or other remunerative activities, so as to avoid any conflict with the conscientious performance of official duties.

Mr. President, the members of this Code of Ethics Committee had no choice; it was our duty under this resolution to bring in a code of conduct which included these points, and that is what we did. We had an obligation.

I again say that what the Senator from Nebraska has offered here as a code has many fine principles and high ideals expressed in it.

But we were instructed by the Senate—this resolution passed the Senate on January 18, 1977, and because of that resolution the responsibility was on the members of the Special Committee on Official Conduct to bring in such a code. That is what we did. We have a code now that includes public disclosure and all of these other matters.

I want to explain that because some of the Members do not seem to understand that. They seem to think the Members went out and expressed their own opinions and wrote what they wanted to just to get a code of ethics.

Mr. CURTIS. Mr. President, will the Senator yield just very briefly?

Mr. THURMOND. I will be pleased to yield.

Mr. CURTIS. I want the Senator to understand that I have no criticism of the committee. I stated earlier they were assigned an impossible task, and I think they have done very dedicated and careful work, and have really worked on a most difficult task, and I am fully aware of the problems involved and the instructions given, and I commend the Senator for his dedication to the task.

Mr. THURMOND. I wish to thank the distinguished Senator from Nebraska.

I want to say, however, that all of the polls which have been taken have shown that the public wants a public disclosure, they want some memorandum to show gifts the Senator has received, where he has received them. They want other provisions in a code to disclose his behavior while in office.

I really feel that when we adopt this code—and I feel sure we will—it will help to instill more public confidence in the Members of the Senate.

(At this point Mr. DURKIN assumed the chair.)

Mr. SCOTT. Mr. President, will the Senator from South Carolina yield briefly?

Mr. THURMOND. Mr. President, I would be pleased to yield to the distinguished Senator from Virginia.

Mr. SCOTT. Mr. President, I appreciate the Senator's yielding.

If I understood the Senator from Nebraska correctly, he indicated he was not going to ask for a rollcall vote on this matter and, therefore, I will not offer the amendment I had proposed.

But since looking at the amendment whereby any Senator could be deprived of his retirement benefits by action of the Senate or on the recommendation of the Committee on Ethics, why, it just seems to me there are many provisions here, such as waiving rights under the Constitution, with respect to any matter that may constitute a violation of the code, where it looks to me like this bill in many respects is a denial of due process such as we understand it, and while I agree with the distinguished Senator from Nebraska that this is basically something all of us should adhere to, I hate to vote for anything that, under the guise of a code of ethics, would deprive anyone of rights he would possess under the laws or the Constitution of the country.

Therefore, I am going to vote against the distinguished Senator's amendment. I appreciate the Senator's yielding.

Mr. THURMOND. I thank the Senator.

Mr. President, in response to the distinguished Senator from Virginia, I want to say generally the courts have held that the Senate is the judge of its own Members. The Constitution provides that, and provides for punishment of its Members, and so forth. Whether or not the courts will go so far as to deprive a Senator of his retirement, if the Senate so voted, is a question that would have to be determined by the courts.

I do think the Senator has raised a very valid point because I am not too

sure that the courts would allow the Senate to go that far. But it is a matter that would be subject to decision by the courts.

Mr. SCOTT. If the Senator will yield further, as to the section here on page 2 "I will not accept any money or anything of value for performing or not performing any official act as Senator" we are probably speaking of a felony. I have not done any checking of the law, but I feel sure it would be a felony to do what the Senate pledges not to do here. I do not believe a person should waive his constitutional rights before a committee of the Senate. This is a well-intentioned matter, but to me it is a bad amendment.

Mr. THURMOND. The Senator is speaking to page 2 of the amendment of the distinguished Senator from Nebraska.

Mr. SCOTT. Yes.

"I will not accept any money or anything of value for performing or not performing any official act as Senator." We are talking about bribery here.

Mr. THURMOND. That amendment has not been adopted, of course.

Mr. SCOTT. I realize it has not, and I hope it will not be.

Mr. THURMOND. It will be voted on now.

I move to table the amendment.

Mr. NELSON. He said he will withdraw it.

Mr. CURTIS. I will not withdraw it. I will not ask for a rollcall vote.

Mr. THURMOND. We yield our time back, if the distinguished Senator will yield the remainder of his time.

Mr. CURTIS. I do not have any. I am happy to yield back that which I do not have.

Mr. THURMOND. I move to table the amendment.

The PRESIDING OFFICER (Mr. STEVENSON). Does the Senator from Wisconsin yield back his time?

Mr. NELSON. I yield back the remainder of my time.

Mr. THURMOND. I move to lay on the table the amendment of the Senator from Nebraska.

The PRESIDING OFFICER. The question is on agreeing to the motion to lay on the table the amendment of the Senator from Nebraska [putting the question].

Mr. CURTIS. The "nays" have it. [Laughter]

The PRESIDING OFFICER. The "ayes" appear to have it.

The motion was agreed to.

AMENDMENT NO. 171

Mr. HANSEN. Mr. President, I call up my amendments and ask that they be stated.

The PRESIDING OFFICER. Does the Senator call up amendments en bloc?

Mr. HANSEN. I shall call up my six amendments and discuss them one at a time, Mr. President.

Mr. NELSON. Mr. President, what was the request?

The PRESIDING OFFICER. Only one amendment can be pending at a time except by unanimous consent.

Mr. HANSEN. Very well. I call up my first amendment and ask that it be stated.

The PRESIDING OFFICER. The amendment will be stated.

The legislative clerk read as follows:

The Senator from Wyoming (Mr. HANSEN) proposes amendment numbered 171.

On page 6, strike out line 20, and insert in lieu thereof the following: "of such purchase, sale, or exchange, except that (1) any gift to any tax-exempt organization described in section 501(c)(3) of the Internal Revenue Code of 1954 involving such a transaction need not be reported, and (2) any transaction solely by and between the reporting individual, his spouse, or dependents not be reported.".

Mr. HANSEN. A parliamentary inquiry, Mr. President.

The PRESIDING OFFICER. The Senator will state it.

Mr. HANSEN. How much time do I have on this amendment?

The PRESIDING OFFICER. The time on each amendment is 80 minutes equally divided. The Senator has 40 minutes.

Mr. HANSEN. I thank the Presiding Officer.

Mr. President, I wish to make a few observations with regard to the hypocrisy which has led us to believe that the ethics code is a piece of legislation which the public has demanded of this body. I believe we have misread public sentiment, either because we have listened to the wrong voices or because we have imagined the voices we would like to hear.

THE WRONG VOICES

We hear a great deal about the polls which showed the decline in public confidence in America's legislating institutions. If we must place such great reliance on polls, Mr. President, let me then cite from the latest Harris poll printed in the Washington Post on March 14, 1977. It says that for the first time in a number of years, confidence in the leadership of the Nation's major institutions has begun to rise. However, the resurgence of public faith in the Government is selective and appears to be the result of, among other things, new leadership in Congress. The survey also notes, interestingly enough, that there is one exception to this rise in confidence. Confidence in television news shows has leveled out, and with respect to the printed media, public confidence has dropped. Given these results, who then is responsible for the call that we enact a new ethics code?

The voices we are listening to are the voices of those who would not be satisfied with anything we might do. Common Cause, as the leading proponent of this code would have us eliminate any outside income. Two representatives of Common Cause testified at the hearings before the Senate Special Committee on Official Conduct, Mr. David Cohen, President, and Mr. Fred Wertheimer, vice president for operations. Mr. Cohen stated before the committee,

The fact that the public believes the cleaning up of corruption in government should be the top priority of the new Congress is a terrible indictment of the state of congressional ethics.

He ended his testimony with—

Don't misread the public's views. Don't let us down.

Mr. President, I submit that we have misread the public's views. Most of the witnesses who appeared before the committee were representatives of public interest groups; yet none of them was as openly critical of the Senate's performance as the two representatives of Common Cause. I submit that Common Cause, with its own self-avowed goal of protecting the public interest, is no different from any other group seeking to influence Congress.

I believe Senator PACKWOOD accurately recognized that this ethics proposal is nothing more than a Common Cause code. On Tuesday I watched in dismay as the U.S. Senate capitulated under the pressures of Common Cause and the American free press. My greatest concern now is where this will all end. Will we next submit to complete public financing of our congressional elections, as the Senator from Oregon has suggested will be the case? Where will we draw the line? When will the individual Senators recognize their constituents are not the Common Cause lobbyists or the members of the media? Let them promote their concerns and interests by electing their own advocate to serve in this body. They are entitled to no less and no more representation than every other special interest group in this country. As for this Senator, I represent the interests of the people of the State of Wyoming as best I can. And I will continue to speak for and to listen to, as well as to receive advice from, all those who share my concerns and the concerns of the people of my State, regardless. To do otherwise would be a violation of their trust and confidence in me. Any less, and I would be remiss in executing my sworn duty as a U.S. Senator.

Yes, Mr. President, we have been listening to the wrong voices. This is where we have failed in my opinion. Now we are reacting, and we will listen to those who would have us isolate ourselves from our constituents and legislate ourselves right out of our constitutional responsibility to represent those constituents. To deny that we each have special concerns and special interests is to deny our very constituency—it is to deny that purpose for which we were sent here.

As Alexander Hamilton noted in the Federalist Paper No. 53:

No man can be a competent legislator who does not add to an upright intention and a sound judgment a certain degree of knowledge of the subjects on which he is to legislate. A part of this knowledge may be acquired by means of information which lies within the compass of men in private as well as public stations. Another part can only be attained, or at least thoroughly attained, by actual experience in the station which requires the use of it.

IMAGINED VOICES

Mr. President, we have, as well, imagined the voices we would like to hear. Last month we had the opportunity to vote against increasing our salaries. Yet we lacked the courage to do so and by a procedural device we allowed these increases to go through. Thus, at the same time we asked the American people to

tighten their belts against inflation, to hold the line against ever increasing wages and prices, we increased our own salaries by nearly 30 percent.

Needless to say, the American people were infuriated and they beseiged this body with cards and letters demanding to know our justifications. And suddenly our conscience welled up inside of us and we came to believe that only if we enacted an ethics resolution the public would be stilled and their anger dissipated.

The people of America do not need a Senate resolution to judge how moral, how ethical, how upright are the men and women who represent them. Mr. President, for over 50 years the people of this Nation have, by direct election, made decisions as to the character of the Senators whom they elect.

Let there be no mistake, this is not a code demanded by the American people. It is a code brought forward in an attempt to justify accepting the pay raise without displaying the courage to vote directly upon that issue.

THE REAL PROBLEM

There are real concerns by the American people about real problems. Yet today, we are reacting negatively when we should be legislating positively with regard to these problems. I believe that among the greatest concerns of Americans are inflation and unemployment. However, we do not have the courage to face up to these problems. We are notorious for seeking easy solutions. As H. L. Mencken noted,

> For every difficult and complex problem, there is an obvious solution that is simple, easy and wrong.

We consistently offer up new social experiments and persist in throwing money at our problems.

A recent example is the Tax Reduction and Economic Stimulus Act which virtually guarantees a $50 tax rebate for all Americans earning less than $30,000 a year. I have no illusions about the effectiveness of this measure economically or politically. We have a habit of increasing social security payments in an election year, and failing to increase taxes to cover those benefits until the following nonelection year.

We lack the courage to level with the American people. It is difficult to go home and tell your constituents that taxes must be increased and social spending cut. But if Congress is held in low public esteem, as we are being led to believe, it is our own fault. We overpromise, we cannot produce, and public confidence drops.

Governors Jerry Brown and Mike Dukakis won national attention not from promising the people of their States more, but less. They realized that government could not keep doing more, that the individuals would have to assume a greater responsibility and tighten their belts. We have failed to balance our budget. We have not even made an honest attempt at it. If the American people had more confidence in our ability to rectify some of this country's economic ills and reorganize our priorities, perhaps they would be less critical of our own salary adjustment.

I am a realist and I know I may be whistling in the wind when I hope that the Senate would take a long hard look at what it is trying to do. We may have an ongoing problem of credibility and we may need to work a bit harder at restoring public confidence in this institution, but writing a code of ethics does not guarantee ethics. Ethics is not something which can be legislated. In a recent editorial, Jack Germond and Jules Witcover noted that the real corruption in Congress is not so much a matter of money as it is a matter of attitude. They note that a new code of ethics is no assurance of a superior wisdom in the House or the Senate. We must lead, rather than react.

Mr. President, I wish, at this time, to discuss my amendments. I am pleased that some of my concerns have already been resolved by amendments brought forward by Senator STEVENS with regard to the receipt of gifts, by Senator WALLOP with regard to the outside-earned-income clarification, and by Senator PERCY with regard to professional services for compensation.

DISCLOSURE

As I have already related, I have supreme confidence in the ability of the American people to make decisions with regard to the ethics of the men and women whom they send to this body. Thus, I favor a disclosure section which gives them the opportunity to make such a judgment.

However, I feel that there are a few minor deficiencies which must be corrected if this disclosure section is to serve its purpose without imposing intolerable burdens upon those who must meet its requirements.

One of my amendments would apply the exception from reporting that exists with regard to transactions in securities or commodities futures to the purchase, sale, or exchange of any interest in real property. I believe that this change is necessary for consistency, since a transaction in real property seems analogous to a transaction in securities or commodities futures.

A second amendment would eliminate all categories over $500,000 for the reporting on real property held, personal property held, personal liability owed, securities and commodities transactions, and purchase, sale, or exchange of real property. I do so with one purpose in mind: The personal safety and well-being of the spouses and families of those who serve this body.

We all know of friends in whose family tragedy has struck because of publicity as to personal wealth. It is unfortunate that there are, in this great country of ours, those who would seize upon these disclosure reports as a shopping list for crime or a source of lucrative kidnap victims. Yet, such is the case.

However, it is a risk which we need not undertake in our desire to achieve effective and full disclosure. The holdings are still listed; the liabilities are still there. Does it matter that they are listed as being over $500,000, rather than between $1 and $2 million? I think not. Any difference is minimal, and any good which might flow from such detail could not offset the risk which it poses for the loved ones of those who serve the Senate.

One of my amendments would remove from any reporting requirement the spouses and dependents of officers and employees of the Senate. It is my belief that the Members of this body made a conscious decision to enter public life and to subject ourselves to the public scrutiny which we knew would follow. We made this decision and were joined in it by our wives who knew the sacrifices which would be demanded of them. While one might fully expect the disclosure requirements which this resolution demands of Members and their wives on an entry into public life, the same cannot be said for those who serve us here.

The officers and employees of the Senate have made no such decision and their spouses have not either. They have undertaken certain very real obligations and burdens, but it cannot be said that one of these burdens is to expose to the public the lives of their husbands and wives.

It is my belief that we make sufficient demands of the time, energy, and dedication of our officers and employees without placing on their lives the additional strain that would flow from the disclosure requirements made of spouses.

The two additional changes which I would make in the disclosure section relate: First, to the release of financial disclosure reports by the Secretary of the Senate; and second, to the notification of individuals of whom an investigation is undertaken by the Select Committee on Ethics. My amendment would require the Secretary of the Senate, rather than to merely permit him, to obtain from any person receiving a copy of a disclosure statement, the name and address of the individual and the name of the person or organization on whose behalf the report is requested. Also, my amendment would require, when the select committee votes to investigate an individual, and prior to the transmittal of the tax returns from the Comptroller General's Office to the select committee, that the concerned individual be notified of the committee's vote and of its request for his tax returns.

These are both minor changes but they are necessary to insure, in the first case, that the reports are utilized for the proper purpose and, in the second case, that the rights of the reporting individual are protected.

OUTSIDE EARNED INCOME

I cannot speak as eloquently to the subject of outside earned income as my colleague from Maine. Yet, I feel the points must be raised again. Allow me a brief philosophical discourse on this question of the occupational origins of those who come here to serve their country.

No serious student has ever suggested that America is perfect, but most fair-minded people would agree that despite all her shortcomings and weaknesses, America does things better than most of her neighbors.

I, for one, am not ready to abandon the concept of private ownership, com-

petition and business enterprise for another less proven system. As a consequence, I think that every legitimate group, every honest endeavor deserves a chance to be represented in Congress. Thus I am concerned with the objectives of Common Cause that some Members of Congress seem determined to achieve in a head-long rush. I submit, that we will not have a stronger America, a better America, an America where most will live better, by following the Pied Pipers of Common Cause. Rather, we will discourage initiative, we will sacrifice freedom of choice and we will submerge ingenuity by listening only to that drummer.

While they do not say so, I cannot escape the conclusion that somehow, woven through their precepts is the philosophy that business is bad and a universal desire to live better and pass on to one's children a better chance than their parents had is not in the public interest. This philosophy, fully implemented legislatively will certainly discourage people with ability from seeking public office. Common Cause will not stop at the point they have reached thus far. As the Senator from Maine stated recently with regard to outside earned income: "They will get the rest of you, they will get after your incomes, your outside incomes." And they will. They truly will.

The mainspring of our country's success has been the fact that our concepts of government and enterprise have been organized so as to take full advantage of these natural and universal aspirations of man. It is true that we need to lay out the parameters of conduct to obviate shortcuts some would take by transgressing on the rights of others. But it does not follow that we will improve the life of the average American by insulating and isolating elected representatives from the valuable input that the doers of America have to offer.

CONFLICT OF INTEREST

I would strike sections 9 and 10 of the rule on conflict of interest. The report recognizes the right of a former Member to earn a living in any manner in which he sees fit. Yet, it indicates that the possible conflicts of interest must be prevented, at least during the time when the individual could have the most influence.

Let us look at what this resolution is really saying through this report. It is not saying that a former Member or employee is unethical in seeking employment with or as a registered lobbyist after leaving this body. It is saying that we are unethical when we listen to him. It is saying that we are engaged in a conflict of interest by hearing him out.

If we can serve this body, if we can represent the people of our State, then we can certainly make a decision as to the relative merit of a cause which anyone brings to our attention whether it be a former Member or the farmer from back home. Let us strike these provisions and admit that we have the honor and the courage to listen to anyone and make an independent decision. If we do not, then this rule will not protect us and will merely destroy what the report states it does not wish to destroy, the ability of a former Member or staffer to earn a living in any way he sees fit.

Mr. President, I believe that the logic of Senator MUSKIE's comments with regard to the outside-earned-income provision is unassailable. However, after the vote of this body on the amendments offered by the Senator from Maine and the Senator from Connecticut, I harbor no illusions as to the success of any attempt to delete from this resolution the limitation on outside earned income.

Accordingly, I have deleted any reference to the rule on outside earned income.

Mr. President, my amendments would have the following effect:

Amendment No. 171 would apply the exception from reporting that exists with regard to transactions in securities or commodities futures to the purchase, sale, or exchange of any interest in real property.

Amendment No. 174 would delete all categories over $500,000 for the reporting on real property held, personal property held, personal liability owed, securities and commodities transactions, and purchase, sale, or exchange of real property.

Amendment No. 173 would eliminate the requirement that officers and employees report on their spouses and dependents.

Amendment No. 172 would change on line 22 the word "may" to "shall" requiring the Secretary of the Senate to obtain the name, address, and possibly organization of those requesting a copy of any financial disclosure report.

Amendment No. 175 would change the language so as to require that after the Senate Select Committee votes to investigate an individual and requests from the Comptroller General the envelopes containing the reports filed with the Comptroller General, that the concerned individual be notified prior to the transmittal of those envelopes. Presently the requirement is merely "within a reasonable time."

Amendment No. 176 would eliminate any prohibition against a Member, staff employee or committee employee lobbying certain specified individuals in the Senate for a period of a year.

I note that the distinguished manager of the bill is present, Mr. President. Therefore, I ask if he would be willing to accept my first amendment which would apply the exception for reporting which exists with regard to transactions in securities or commodities futures to the purchase, sale, or exchange of any interest in real property.

Mr. NELSON. That is amendment No. 171?

Mr. HANSEN. That is right.

Mr. NELSON. That amendment is acceptable to the manager of the bill.

Mr. HANSEN. I thank my distinguished colleague.

If I may, I would like to call up the other amendments and maybe we can dispose of the two upon which I understand we are in agreement, and have votes on the other four, or at least dispose of them.

Mr. NELSON. But do we not have to vote on amendment No. 171? We cannot vote on two amendments at once.

Mr. HANSEN. That is correct.

Mr. NELSON. Mr. President, I yield back the remainder of my time.

Mr. HANSEN. Mr. President, insofar as my first amendment, which has been called up, I return the remainder of my time. Mr. President, I move the adoption of the amendment, amendment No. 171.

The PRESIDING OFFICER. The Senator is correct.

The question is on agreeing to amendment No. 171.

The amendment was agreed to.

Mr. HANSEN. Mr. President, I move that we reconsider the vote by which the amendment was agreed to.

Mr. NELSON. Mr. President, I move to lay that motion on the table.

The motion to lay on the table was agreed to.

AMENDMENT NO. 175

Mr. HANSEN. Mr. President, next I call up my amendment No. 175 and ask for its immediate consideration.

The PRESIDING OFFICER. The amendment will be stated.

The legislative clerk read as follows:

The Senator from Wyoming (Mr. HANSEN) proposes an amendment No. 175.

On page 16, line 12, strike out "Within", strike out lines 13 and 14 and insert in lieu thereof "After such recorded vote has been taken, but prior to the transmittal to the Select Committee of the envelopes containing such reports, the individual concerned shall be informed".

Mr. HANSEN. Mr. President, I yield back the remainder of my time.

Mr. NELSON. Mr. President, this is an acceptable amendment. I yield back the remainder of my time.

Mr. HANSEN. Mr. President, I move the adoption of the amendment.

The PRESIDING OFFICER. The question is on agreeing to the amendment.

The amendment was agreed to.

Mr. HANSEN. Mr. President, I move to reconsider the vote by which the amendment was agreed to.

Mr. STONE. Mr. President, I move to lay that motion on the table.

The motion to lay on the table was agreed to.

AMENDMENT 174

Mr. HANSEN. Mr. President, I call up my amendment No. 174.

The PRESIDING OFFICER. The amendment will be stated.

The legislative clerk read as follows:

The Senator from Wyoming (Mr. HANSEN) proposes an amendment

On page 9, line 9, strike all after "$500,000" and insert in lieu thereof a period.

Mr. HANSEN. Mr. President, this amendment would strike all categories above $500,000. I would like to have a rollcall vote on this one. I ask for the yeas and nays.

The PRESIDING OFFICER. Is all time yielded back, first? Is there a sufficient second?

The yeas and nays were ordered.

The PRESIDING OFFICER. Does the Senator yield back his time?

Mr. HANSEN. I yield back my time.

Mr. NELSON. Mr. President, I yield back the remainder of my time.

Mr. President, I move to lay on the table the amendment of the Senator from Wyoming.

Mr. HANSEN. If the Senator would withhold for one minute, my colleague from Wyoming is here.

Does my colleague wish to make any observations on this amendment?

We are talking about amendment No. 174 which would strike the disclosure categories above $500,000.

Mr. WALLOP. I would, yes.

Mr. HANSEN. Will the Senator from Wisconsin let me take back a little of my time, so I may yield to my colleague from Wyoming?

Mr. NELSON. Yes.

Mr. HANSEN. Mr. President, I yield such time as my colleague may desire.

Mr. WALLOP. If the Senator from Wisconsin would indulge me for just a moment, I think the point that my colleague (Mr. HANSEN) has made is worth reiterating.

I think that we are doing something to the families of Members without accomplishing anything for the public. If we read the report of the transactions of the committee on page 21, it says:

> Therefore, the use of categories of value fully meets the legitimate public purpose of identifying potential conflict and the magnitude of those conflicts, while not requiring a yearly appraisal of each holding and also minimizing the invasion of privacy involved.

I do not think we have achieved that at all. The reason I do not think we have achieved it is that we have pretty well carried it out beyond the limits of most people who will be here. I am sure there will be people who are worth $500,000 or more, and are right now, but I think we will have categorized virtually every Member quite specifically.

Also, those who deal in cash and stocks and bonds and liquid securities do not understand the difference between those kinds of holdings and holdings of land and the misperception that some crazy people in this society have about people who hold land. They seem to think that if you have land holdings that are worth a million dollars, you are instantly worth a million dollars. There has moved to our part of the world something that the rest of this country has had for a long time: People who find that there are benefits to be gained by taking members of a family for ransom, or taking items of value for ransom.

The other day, the able Senator from New York was on the floor of the Senate saying that we should not identify art works by value because it exposed them to risk. Yet we are sitting here and saying, "Well, we do not want to expose art works to risk; somebody might come in and steal them; but it is all right if they come and take your children or your wife or your aging father and hold him for ransom."

I do not see the distinction. That colloquy clearly indicates that this body is trying to make a distinction that a piece of art is worth more than a member of one's family. I fail to understand that.

Furthermore, there is no public purpose served. How does this information serve the public, beyond a given category?

I am certain that some are not even listening to these arguments. They fully intend to follow the line of Common Cause, and they sit there paying no attention. Nobody seems to care what is being said here. The arguments are extraneous. This is the way the bill has gone right from the beginning. The committee has made all the decisions, and there are no reasons for any of us to be down here arguing. There are people who have real concerns, real concerns for their families and the families of Members of this Senate. Yet these concerns seem to be cast idly by.

You know that you have the votes and you are going to reject the argument without any sensitivity, without even bothering to listen to the reasoning that is trying to be presented.

With that, I yield back my time to my colleague from Wyoming.

Mr. NELSON. May I have 2 minutes to reply?

Mr. HANSEN. Yes.

Mr. NELSON. In the first place, I say to the junior Senator from Wyoming, I was being asked a question by the distinguished Senator from South Carolina about this issue I have heard, probably 10 times, exactly what the Senator has said, so I know what the debate was. I was listening, and the Senator from South Carolina wished to ask me a question. I know what the argument is. I am not insensitive to it.

The wealthiest people in Congress are all well-known, or almost all well-known now. Everybody in the country knows that the Kennedy family is wealthy, and the Heinz family is wealthy.

We looked and considered all the issues that have been discussed here by the distinguished Senator from Wyoming. There is no question that there used to be debates here, and Senator Dirksen used to lead them, about the right of privacy, against any public disclosure. There is an argument to be made for that.

The qusetion is, is there an overriding public interest in knowing what the investments, what the economic interests are of the people who vote and pass legislation affecting everybody in the country?

I think, myself, that there is, and I would guess that most of the people in the country believe that, with whatever handicaps go with it—and there are some—in the important positions in public life, the public should know what the interests of its elected officials are. It is necessary mostly so that they can be reassured, in my judgment, but at least so that they can make a judgment as to whether or not the elected official is voting the interest of the public or, in some rare instances—not nearly so often as some people may think— the personal selfish interest of the elected official. So we decided upon a disclosure by category section.

The executive branch is following that procedure. We passed a similar procedure with different levels last year. The House passed this procedure. And I am well aware that no procedure, no category of disclosure, nothing that any one of us might design, would be the same as what another Member in the House or Senate designed. So it is a question of balance in the whole picture. If we are going to have disclosure of one's interests, how much disclosure do we have and what level?

Certainly, one can argue that $5 million is the wrong level. It is argued by the distinguished senior Senator from Wyoming that $500,000 is enough.

I am not saying the conclusion the committee came to is perfect. I happen to support the $5 million.

I think a disclosure is adequate to indicate the general categories of investment and interest, economic interest of the Members. Although there are critics of that, who think it ought to go to precise dollar figures and to however many millions, that a Member would have, the Senator from Connecticut (Mr. WEICKER) was on the floor attacking the disclosure as totally inadequate saying that we ought to have to show a net worth rather than have general categories.

We had another Member on the minority arguing that this was totally inadequate.

I am sure the two Senators from Wyoming feel strongly about their position and I understand it. I am not saying the position of the committee, or mine, is any better on the merits than theirs. But I personally believe that the disclosure envisioned by the Senator from Wyoming would be inadequate.

The PRESIDING OFFICER. Who yields time?

Mr. NELSON. Mr. President, I do not know what time I took, but for the last time I will yield back all my time.

The PRESIDING OFFICER. The Senator's time has been yielded back.

The Senator from Wyoming.

Mr. HANSEN. Mr. President, I ask unanimous consent that I may change the amendment to do what I intended to accomplish by modifying the language. The amendment now reads, "on page 9, line 9, strike all after $500,000 and insert in lieu thereof a period."

My intention was to cut off the disclosure categories at $500,000, that is at greater than $500,000.

What I should have said was: "on page 9, strike lines 9 through 15 and insert in lieu thereof (7) greater than $500,000."

What it would do would be to knock out points 8, 9, and 10 which provide for categories up to greater than $5 million.

I am not trying to pull any fast ones. I simply make the amendment do what I intended and thus strike the balance of that section relating to categories.

The PRESIDING OFFICER. Is there objection to the amendment being so modified?

Without objection, the amendment is so modified.

The amendment, as modified, is as follows:

> On page 9, strike lines 9 through 15 and insert in lieu thereof "(7) greater than $500,000.".

Mr. HANSEN. I thank my colleagues.

Mr. President, I appreciate the comments by my distinguished colleague from Wyoming. I would observe that Senator HAYAKAWA, the junior Senator from California, in talking about some of

the problems of unemployment, has stated that one of the unique things about America is the great middle class that is represented in ever greater abundance in our country.

As a consequence, it seems to me that my amendment would support the contention that we will strengthen America as we permit representatives of that great middle class to be represented in this body, to make certain their voices shall be heard, to make certain that those who share their experiences will be here to speak directly to many of their concerns.

I think that is precisely what this does. I do agree it goes at cross purposes with what I understand some of the proponents of Common Cause would have us do. They would like us to become a kept body, to represent no one, to have our elections paid for out of the public treasury, to be able to make no outside income, to be able to have no outside investments of any kind, and thus to be absolutely subservient to those persons who would presume to speak for the body politic.

Such a philosophy, it seems to me, is entirely foreign to what this country stands for. It rejects the very elements of strength that I think account for our country's excellence.

I think we need more people who are willing to accept the challenge of individual responsibility, who know that the mainspring of human progress is a universal desire to improve upon one's station in life. While the system has never been perfect, while no one can ever say with any degree of certainty that there are not some things which need to be corrected in this country, it is my contention that nowhere else in all the world can we find any system of government which has yielded the results that we find in the American system.

I think we are not going to strengthen this country, not going to make for more people who are willing to try to accomplish something, in order to make this country stronger and better by denying the right for all of our voices to be expressed here.

One of the things that concerns me about the trend we seem to be taking now is that we are renouncing this very important, very vital, very vibrant part of America. We are renouncing it by saying that we will not hear from those voices and we will be concerned only with people whose campaigns are paid for by the public treasury, who have said they will earn no outside income, who will do nothing else except becoming legislators, 12 months out of every year.

If we make the fatal error, in my opinion, Mr. President, of going down that road, we will be following in the footsteps of some other countries whose hour of twilight has come and who have only darkness ahead of them.

I hope Senators will not fall prey to the soothsayers who suggest that all business is bad, that all of this inherent human instinct is wrong, who would have us become kept citizens insisting that we close our ears and our eyes to all others. To do so, Mr. President, would be to do great violence to the American dream which has not yet been fulfilled, a dream that can only be fulfilled as we encourage all our people to aspire to a better life, to be willing to accept the responsibilities that we should willingly take upon ourselves. I think these interests deserve to be represented. Americans need to have people who have experienced these concerns, these anxieties, these worries which are common to the business life of America today. It seems to me that we should not take the step of saying that you can have no other outside interests.

I hope this amendment will receive the consideration of Senators. I yield back the remainder of my time.

Mr. ALLEN. Mr. President, will the Senator yield me 2 minutes?

Mr. HANSEN. I yield.

Mr. ALLEN. Mr. President, I have listened to the distinguished Senator from Wyoming with great interest. As I understand it, his amendment would cut off the disclosure of total assets at $500,000 or in excess of that. That would be the last item.

I have supported the committee on nearly every position it has taken with respect to these amendments, but I believe that the amendment of the distinguished Senator from Wyoming has merit. I feel that if a Senator discloses that he has property and assets of more than $500,000, he has made sufficient disclosure. I do not regard that much in assets as making a person very wealthy. I do not think there is any necessity of going beyond that figure. I believe that is sufficient disclosure. I do not feel that it would be necessary to go beyond that figure.

Even though I have supported most of the committee's positions, I feel that on this matter I will have to support the amendment.

Mr. HANSEN. I thank the Senator from Alabama. I am not certain whether he was present in the Chamber when my distinguished colleague from Wyoming was speaking a little earlier, but he made the point that this amendment is prompted by our mutual concern for the welfare of members of a Senator's family. If a person were contemplating a public career, a role that might someday lead to his becoming a Member of this body, a real deterrent to his assuring such a role has to be the concern that he would have for the welfare of his family. I think it is a very legitimate concern.

I appreciate very much the observations of my good friend from Alabama.

Mr. President, if no one else wishes to be heard on this matter, I will yield back the remainder of my time.

Mr. THURMOND. Mr. President, will the Senator yield?

Mr. HANSEN. I yield to the Senator from South Carolina as much time as I have remaining.

Mr. THURMOND. Mr. President, I have supported this code of ethics very strongly, and I feel keenly about the importance of adopting a strong code of ethics. I do feel, however, that the amendment by the distinguished Senator from Wyoming has great merit.

The able Senator from Wyoming (Mr. WALLOP) brought out a point which I think is exceedingly important. On page 9 of the resolution the categories are set out, and item 7 reads: "Greater than $500,000 but not more than $1,000,000."

As I understand it, this amendment would put a period after the "$500,000," so that if anybody had investments, he would have to show they were more than $0.5 million. But when you pass that, the next category is greater than $1 million. One million dollars today is not what it was some years ago. At any rate, when we refer to a millionaire, people still look upon him as a man who is extremely rich, extremely wealthy.

I am concerned about a Senator—I do not fall in the category of a millionaire—who is in that category, who will have to check that column, "more than $1 million," or the next column, which says "more than $2 million."

Some people know about the Kennedys and about the Heinzes; but there may be many others here who have worked hard and saved and, through their earnings, have accumulated $500,000 or $600,000 or perhaps $800,000 or $900,000.

Suppose they have little children? When they check "more than a million dollars," is that not going to put an idea in somebody's head—perhaps it will, perhaps it will not—that this is where he can get some money? I have four little children. The oldest is 5 years of age. I have some farmland. Right now, it would not be worth more than $700,000, but I hope that some day it will be worth a million dollars.

I do not think I ever will be classed as a millionaire; but if that land ever went up and I were classed as a millionaire, I would fear the results if I had to check off that that land was worth a million dollars. There are people who kidnap little children. I am concerned about having to point out millionaires.

I have spent my life working for the working people. I worked on a farm when I grew up. I worked in a textile mill during my college years. I have worked all my life. But I am not against a man who has made a million dollars. I think it is to the credit of any man in this country who can rise and save and climb if he can.

We brag about Abraham Lincoln, who was born in a log cabin and became President of the United States. We should brag equally about a man who was born in poverty and can work his way up through his talents and hard work and ingenuity and become a millionaire. But why do we want to point him out? Why do we want to make him subject to having his children kidnaped or make them the subject of attacks? For that reason, I am going to support this amendment. I do not believe it has much chance of adoption, but I am trying to look at this matter from a sound, practical standpoint.

I feel that, for the good of the public and for the good of Senators who someday might fall into this category, if a Senator checks off $500,000 or more, that should be enough.

The next category, $1 million or more, I repeat, may subject him to an attack. It may subject him to being kidnaped, his wife to being kidnaped, his children to

being kidnaped. I see nothing to gain by having him check any figure above $500,000.

There is something magic about the word "millionaire"; and once a man has to check a figure of $1 million, it puts him in a different world. I think it is important that we not subject any citizens in this body to an attack of that kind.

Mr. HANSEN. Mr. President, I thank the Senator from South Carolina for his observations.

Believing that an earlier colloquy that took place has relevance, I should like to read from the RECORD of March 28, 1977, on page 9183.

Senator JAVITS and the distinguished floor manager of the bill were engaged in a colloquy, and I shall pick up quoting what Senator JAVITS said at that time. He said:

Mr. JAVITS. I am not quoting any longer. I am speaking.

It is my understanding that, by this provision I have just read, the committee intended to establish a broad exemption to the reporting requirements for certain items of personal property of a household nature. These include but are not limited to household goods, such as paintings, antique furnishings and jewelry which are acquired for personal use but which may also be good investments.

I would like to again read that in order that Senators will understand that there are other ways besides investments in land in which the total worth of a person may be held. So I read a second time what Senator JAVITS said:

These include but are not limited to household goods, such as paintings, antique furnishings and jewelry which are acquired for personal use but which may also be good investments. Thus, even if the sale of such items might produce substantial income, or if they have substantial potential for appreciation, they are not required to be reported unless the reporting individual is in a trade or business of buying and selling such items for profit.

Mr. NELSON. The Senator from New York states the interpretation which had been my interpretation all along. It does not seem to me that it is any particular concern if someone inherited some furniture that turned out to be or was an antique, or if somebody liked a picture and purchased it and over the years it became more valuable. This Senator has never been concerned about that.

If one is in the business of investing in antique furniture, the business of investing in paintings, art, or in the business of investing in antique jewelry for the purpose of making a profit, that is a business activity.

I would ask my good friend from Wyoming if he might give the Senate the benefit of his observations as he interprets the thrust of this colloquy between the distinguished Senator from New York (Mr. JAVITS) and the distinguished Senator from Wisconsin (Mr. NELSON) as it touches upon my amendment to cut off disclosure categories at $500,000 or greater.

Would the Senator from Wyoming respond to that request?

Mr. WALLOP. I would be happy to respond to my colleague. The plain fact is that unless we adopt the amendment of the Senator from Wyoming we are putting a greater value on a painting, an object, or a possession, than we are on a child, a mother or a wife. You can interpret it no other way.

In the report itself it says:

Thus, a painting in a home would not have to be listed even though the painting when sold might produce substantial income.

I presume the Ethics Committee might see fit not to require the listing of a loan if you had to make it to pay a ransom on your children. The plain fact is the only way this can be interpreted is this Senate is putting more value on things, touchable things, than on their families. You lose a painting, and you lose some money, but you lose a child, or wife, or mother, and I suggest it just is not quite the same. We have put a greater value on material objects, which is apparently suitable to the greater god Mammon that we seem to worship in this body, than we do on families of Members of the Senate right here.

I believe my colleague from Utah would like to be yielded to at this point.

Mr. HANSEN. I would be happy to yield to my colleague from Utah in a moment.

May I say, in response to my good friend from Wyoming, there is, too, as I attempted to point out, what I think is a seeming untenable distinction between the fact, as Senator JAVITS says—and I am paraphrasing him now—that you might have some jewelry or a painting or antique furniture, and not only would it be a possession to which you would attach considerable importance, but it could also be a good investment.

However, under this bill as drawn that does not have to be reported unless you happen to be in the business of selling antiques, paintings, or jewelry.

If you want to have a ring that may be be worth a very substantial amount of money or buy a ring that is worth a very substantial amount of money, confident it is not going to depreciate in value—and that seems to be the case today—then you do not have to disclose that. It might be worth $100,000, conceivably it could be worth $500,000 or more. But, as I read this colloquy, that does not have to be disclosed.

Mr. WALLOP. That is exactly right, it does not have to be disclosed. But it is putting those things in a more special category than human lives.

Mr. HANSEN. I agree with my friend from Wyoming.

Mr. WALLOP. If I had my way I would strike the whole section, for it really is rather ridiculous. It lists holdings of not more than $5,000, and greater than $5,000 but not more than $15,000, and from $15,000 we go to $50,000, and $50,000 to $100,000, and from $100,000 to $250,000, and then we double it. It is not going to tell the public anything that is in its best interest to know. I am willing to leave the $500,000, but I honestly believe at this moment that the Senate is bowing to materialism over human life.

Mr. HANSEN. I agree with my colleague from Wyoming.

I yield to my distinguished colleague from Utah.

Mr. HATCH. I feel the same way as my colleagues from Wyoming.

I feel constrained to tell you that I am not a millionaire, but I would be if it was not for my running for the U.S. Senate.

The reason I ran for the U.S. Senate was because I was sick and tired of the hypocrisy we see that does occur in the U.S. Senate, not the least of which has been a great deal of what has occurred here over the last week or so.

It seems very strange to me that the greatest body in the world, the U.S. Senate, has bowed for 2 weeks before the altar of Common Cause. I think Common Cause does some good things. I think without it we might have had maybe less intent to be ethical in our society and maybe we would not have had some of the good things that have come.

But I think we have wasted 2 weeks here when disclosure should be the rule and not 11,000 words, as Senator CURTIS seems to say.

I have six children who are worth all the millions that anybody else in this body owns. I can tell you this: I think anybody who loves children and who has children and who wants to raise them to maturity and give them everything they need has to look at this particular provision, among others, and just say it is ridiculous.

I also have a lot of art. Maybe some day that will make me a millionaire, but the fact of the matter is there is not a piece of art that I have—and I treasure what I do have—that I would not gladly give up to prevent any molestation of my children. I think this is an important matter.

But maybe more important is another reason why I ran. I never ran for public office before, but I came into this running for the U.S. Senate because I believed we need change in this society; we need people who will solve society's ills. I do not know a man in this Senate whom I do not regard highly. I do not know a man in this Senate whom I do not feel is an honorable man. I do not know anyone here whom I think would do any malicious, unethical act to demean his office in the U.S. Senate.

But I can tell you this: I know a number of them who would not even have run if they knew they had to lay everything they have had, everything they have done, and all they have worked for all their lives, out in the public laundry to wave in front of everybody.

I can tell you I am not so sure I would have run.

I am a little disturbed that we spend this kind of time when we have the ills in this society that should be solved.

I commend my two colleagues from Wyoming because I know they feel the same way, as do Senator THURMOND, Senator CURTIS, many other men here, Senator MUSKIE.

Senator MUSKIE was criticized by one of the major newspapers in this country because he raised some very, very valid points.

I can tell you that one of the major reasons why I think this whole ethics thing is a sham and a deleterious aspect to future potential candidates is because it is going to act as a deterrent for good people to come into public life. I think we need more people right out of the pri-

vate sector who have not held office before, who are citizen candidates in the sense that Jefferson spoke of, who want to come here and help try to effectuate change for the benefit and betterment of all mankind and not just for the betterment and benefit of a few self-seeking individuals here in Washington, D.C.

Those who have had to work hard all their lives for what they have earned and who have neither inherited it nor had it given to them are very loath to tell the world what they have done. I think that comprises quite a few of the men in this body.

All I can say is this: I think it is far more important to encourage good people to run than it is to have this type inadequate, defective, harmful, and inharmonious disclosure.

Mr. CURTIS. Mr. President, will the Senator yield?

Mr. HATCH. I am delighted to yield.

Mr. CURTIS. I commend the Senator for his remarks. I am thoroughly convinced the passage of this resolution is going to deter a great many men who should give time to public service but they simply do not want to go through that ordeal. Public officials are on the defensive a considerable amount of time anyway. I do not believe that all of these pages will prevent a dishonest person from continuing to be dishonest. But I think that great injury will come to other people.

I am not critical of the committee, but, as I said a while ago, they worked on an impossible task.

Just listen to this language:

> The Comptroller General shall, during each 6-year period beginning after the date of enactment of this Act, audit at least one report filed by each Member of the Senate except that no such audit shall take place during the calendar year such Member is up for reelection.

Can the Senator guess an explanation of that?

Mr. HATCH. I certainly can.

Mr. CURTIS. I thank the Senator.

The PRESIDING OFFICER. All time on the amendment has expired.

The yeas and nays have been ordered.

Mr. HANSEN. Mr. President, I know the distinguished floor manager of the bill is off the floor at the moment. I was hoping that he might be persuaded to give me an up-and-down vote on this.

Mr. ALLEN. Mr. President, I suggest the absence of a quorum and ask unanimous consent that the time be equally charged to both sides. I make that request on behalf of the manager of the bill.

The PRESIDING OFFICER. Without objection, it is so ordered.

The clerk will call the roll.

The second assistant legislative clerk proceeded to call the roll.

Mr. NELSON. Mr. President, I ask unanimous consent that the order for the quorum call be rescinded.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. NELSON. Is all time yielded back?

The PRESIDING OFFICER. Yes, all time is either used or yielded back.

Mr. NELSON. Mr. President, I move to table the amendment and ask for the yeas and nays.

The PRESIDING OFFICER. Is there a sufficient second? There is a sufficient second.

The yeas and nays were ordered.

The PRESIDING OFFICER. The question is on agreeing to the motion of the Senator from Wisconsin to lay on the table amendment No. 174, as modified, of the Senator from Wyoming.

On this question the yeas and nays have been ordered, and the clerk will call the roll.

The legislative clerk called the roll.

Mr. CRANSTON. I announce that the Senator from Missouri (Mr. EAGLETON), the Senator from South Dakota (Mr. ABOUREZK), the Senator from Minnesota (Mr. HUMPHREY), and the Senator from Washington (Mr. MAGNUSON) are necessarily absent.

I further announce that the Senator from Hawaii (Mr. INOUYE) and the Senator from Michigan (Mr. RIEGLE) are absent on official business.

I also announce that the Senator from Colorado (Mr. HASKELL) is absent attending the funeral of a friend.

I further announce that, if present and voting, the Senator from Minnesota (Mr. HUMPHREY), the Senator from Michigan (Mr. RIEGLE), and the Senator from Washington (Mr. MAGNUSON) would each vote "yea."

Mr. STEVENS. I announce that the Senator from Oregon (Mr. HATFIELD), the Senator from Oregon (Mr. PACKWOOD), the Senator from Texas (Mr. TOWER), and the Senator from North Dakota (Mr. YOUNG) are necessarily absent.

I also announce that the Senator from Michigan (Mr. GRIFFIN) is absent on official business.

I further announce that, if present and voting, the Senator from Oregon (Mr. HATFIELD) would vote "yea."

The result was announced—yeas 55, nays 33, as follows:

[Rollcall Vote No. 92 Leg.]

YEAS—55

Anderson	Gravel	Muskie
Bayh	Hart	Nelson
Biden	Hathaway	Nunn
Brooke	Heinz	Pearson
Bumpers	Hollings	Pell
Burdick	Huddleston	Percy
Cannon	Jackson	Proxmire
Case	Javits	Ribicoff
Chiles	Kennedy	Sarbanes
Church	Leahy	Sasser
Clark	Mathias	Stafford
Cranston	Matsunaga	Stevenson
Culver	McGovern	Stone
Danforth	McIntyre	Talmadge
DeConcini	Melcher	Weicker
Durkin	Metcalf	Williams
Ford	Metzenbaum	Zorinsky
Garn	Morgan	
Glenn	Moynihan	

NAYS—33

Allen	Eastland	Randolph
Baker	Goldwater	Roth
Bartlett	Hansen	Schmitt
Bellmon	Hatch	Schweiker
Bentsen	Hayakawa	Scott
Byrd, Harry F., Jr.	Helms	Sparkman
Byrd, Robert C.	Johnston	Stennis
Chafee	Laxalt	Stevens
Curtis	Long	Thurmond
Dole	Lugar	Wallop
Domenici	McClellan	
	McClure	

NOT VOTING—12

Abourezk	Hatfield	Packwood
Eagleton	Humphrey	Riegle
Griffin	Inouye	Tower
Haskell	Magnuson	Young

So the motion to lay on the table was agreed to.

Mr. NELSON. Mr. President, I move to reconsider the vote by which the motion was agreed to.

Mr. ROBERT C. BYRD. Mr. President, I move to lay that motion on the table.

The motion to lay on the table was agreed to.

The PRESIDING OFFICER. The Senator from Wyoming.

AMENDMENT NO. 172

Mr. HANSEN. Mr. President, I call up my amendment No. 172 and ask for its immediate consideration.

Mr. NELSON. Mr. President, could we have order?

The PRESIDING OFFICER. The Chair was just about to ask for order. The clerk will suspend until there is order in the Chamber. The Senate is not in order.

The amendment will be stated.

The assistant legislative clerk read as follows:

> The Senator from Wyoming (Mr. HANSEN) proposes an amendment numbered 172:
> On page 13, line 22, strike out "may" and insert in lieu thereof "shall".

Mr. HANSEN. Mr. President, the purpose of this amendment is to remove from the responsibility of the Secretary of the Senate the requirement that he make a judgment on obtaining the name, the address, and possibly the organization of those requesting a copy of any financial disclosure report.

The language in the bill now says that the Secretary of the Senate may require of the person who wants this information his name, his address, and the organization that he might be representing.

It seems to me there is merit in saying that this is a rule that ought to be applied uniformly, with complete objectivity. If it is determined that we are going to ask some people who they are, and to give their address, when they want information on the private financial dealings of a Senator, then we ought to require it of all people. I can see no reason to place upon the Secretary of the Senate the responsibility for making such a decision. It seems to me that if we said, "He shall do this," there would be no question about it, and it would be applied uniformly. Everyone would know when he goes to the Secretary of the Senate and wants to see a disclosure report he is going to have to say who he is, where he lives, and if he represents an organization.

I should think all Senators would welcome the assurance that would come from the knowledge that this sort of disclosure will be treated in a very even-handed manner. I would hope that the Senate would accept this amendment.

I yield such time as my distinguished colleague from Wyoming may require to speak on this particular amendment.

Mr. WALLOP. Mr. President, I thank my colleague from Wyoming for yielding to me.

This is another area in which I have to express a sense of real malaise, a sense that something arrogant is taking place within this Senate. I have been informed by my staff that there will be a move to

table this amendment. Again I point out that the distinguished Senator from Wisconsin seems to pay little attention to arguments, seems to have his mind made up on this matter.

Mr. NELSON. May I say to the Senator from Wyoming I have heard that argument twice. Ninety percent of the time when I have been speaking on this resolution the Senator from Wyoming has not been present. I am just a little bit tired of the personal reference. I have listened to more arguments on this issue than anybody in this Senate. I am getting a little tired of the lecture from the Senator from Wyoming that every time he utters an if, and or but the whole world should stop and listen.

Mr. WALLOP. I was not asking for the whole world but the attention of the distinguished floor leader of the bill. As I understand it, it is his obligation to follow the arguments and make judgments with some rationale, and not take it for granted that everything the committee had come up with was an act of God.

Mr. NELSON. May I say to the Senator I have not taken it for granted. I have led fights on this floor to knock things out of this resolution with which I disagreed.

Mr. WALLOP. And apparently this is another one that will take place.

I would suggest that there is an argument being made here that would bear listening to. The argument is that if there is discretion at all, then there is no reason for it ever to be required. The argument has been made to me that some of the staff of the committee think that this would be intimidating, that somehow or another we would intimidate somebody if we asked him to file his name, address, and the organization for whom he was requesting this information.

If that argument holds water, then we would have to say that, as fair as he is, the Secretary of the Senate is a creature of the majority. Not always will the majority be the Democratic Party, I would presume. If he is such a creature, then we lay on him either an intolerable burden, or the choice as to whether or not to intimidate members of the public who are coming to look for disclosure statements of his own party or disclosure statements of the other party.

If there is any validity in requiring it at any time, then there surely is validity in requiring it every time. If not, the section does not even belong here. The plain fact is that the committee report contemplated that it would be a requirement.

I read from page 28:

permits the Secretary of the Senate to require—

But—

The information on who has examined a financial disclosure form will also be a matter of public record.

If that is true, why should it not be uniformly applied to anybody who comes to inspect? If it should not be uniformly applied, it should not be applied at all.

I yield back to my distinguished colleague from Wyoming. Perhaps we can get some answers from the other side.

Mr. NELSON. Mr. President, will the Senator yield? I may be able to save some time.

Mr. HANSEN. I am happy to yield.

Mr. NELSON. I suggest to the junior Senator from Wyoming that it might save time and be the better part of wisdom to at least inquire to find out how a Member stands on an amendment before giving a lecture implying criticism of how he does stand. It so happens that I favor the amendment.

Now, let me say something on this: There is one State in the Union—just one—that has an open income tax return. You can go to the department of taxation—for the past 50 years, since 1923, when the law passed under John Blaine as Governor, which provided that a citizen can go to the tax department and ask for the tax return of any corporation or any citizen—everybody who files—and get the whole tax return.

In 1955, the Republican majority in the State legislature led a fight to close the returns. I, as the leader of the Democratic Party, led the fight against it. We ended up with a compromise position, in which the law no longer would permit, after 1955, a disclosure of the whole return. But it did permit a disclosure of the taxes paid.

So, as of this day, you can go to the tax department of the State of Wisconsin, pay $2, give your name and address, and the tax department will disclose my taxes or the taxes of any citizen, big or small, or any corporation, large or small—taxes paid. Then the tax department sends a postcard to the person whose tax is looked at, which says, "Mr. John J. Jones, representing himself"—or whoever he represents—"has sought and secured the taxes paid."

So let me say to the Senator from Wyoming, it is an old, old practice in Wisconsin. That is why the returns are so honest in the State of Wisconsin, because people do not dare cheat. There is less cheating in Wisconsin on income taxes than in any State in the Union. I think it is a good provision, because I think taxes are public moneys. So I think it is a fine amendment.

The junior Senator from Wyoming need not have lectured me at all, although I enjoy his lectures once in a while—but once a day, not twice.

Mr. President, I am prepared to take the amendment.

Mr. HANSEN. Mr. President, I appreciate what the distinguished Senator from Wisconsin, the floor manager of the bill, has said. With his assertion that he is prepared to take the amendment, I yield back the remainder of my time.

Mr. NELSON. I yield back the remainder of my time and move the adoption of the amendment. I want a little credit.

The PRESIDING OFFICER (Mr. MORGAN). The question is on agreeing to the amendment.

The amendment was agreed to.

AMENDMENT NO. 173

Mr. HANSEN. Mr. President, I call up my amendment No. 173 and asked that it be stated.

The PRESIDING OFFICER. The amendment will be stated.

The assistant legislative clerk read as follows:

The Senator from Wyoming (Mr. HANSEN) proposes an amendment:

Page 10, line 10, delete "and (3)" and insert in lieu thereof ", (3), and (4)".

Page 10, following clause (3) insert a new clause (4) to read:

"(4) No report shall be required with respect to the interests of a spouse or dependents of any reporting individual who is an officer or employee of the Senate.".

Mr. HANSEN. Mr. President, I shall take only a few minutes to discuss this amendment.

The purpose, it seems to me, is clear. We are simply trying to say that we do not think that the same rules that apply to Members of the Senate ought to be imposed upon employees of the Senate. There are instances where either a man or a woman may take a position with a Senator. The spouse can very well be engaged in some other activity. It may be a professional person or any kind of business person. To impose the financial disclosure report requirements on the spouse of an officer or of an employee seems to me to be going a little too far After all, those persons have not run for election; they have not placed themselves in the position of asking public support at the polls for what they are doing.

It occurs to me that if we do not adopt this amendment we would likely restrict the competence of persons who would be available to serve on Senate staffs simply by the burden that would be imposed on the spouses of those persons. I hope that the distinguished floor manager of the resolution will find some merit in this amendment and, if he were to say he would be willing to accept it, I would be listening most intently.

Mr. NELSON. Let me say to my good friend, the distinguished Senator from Wyoming, I do find some merit in the amendment, but very little. Therefore, I am not going to support it.

Mr. HANSEN. I have a little difficulty hearing my good friend from Wisconsin. I did not think he said what I was hoping he would say.

Mr. NELSON. This disclosure is required concerning a spouse of a staff member, which staff member has a salary of $25,000 or over. It requires, as the Senator knows, only that the spouse, if the spouse is employed, disclose the name of the employer if the spouse makes over $1,000—not the amount of the salary or, if the spouse is a professional person, not the amount of the income; just the law firm with which the spouse is associated. So that disclosure is very modest, in the sense that it does not disclose the amount of income made by the spouse.

As to assets, as the Senator knows, the Member is only required to report what the Member knows of the assets of his spouse. If he does not really know what his spouse's assets are, the Member is not required to even seek to find out. We discussed that in colloquy the other day.

I think that if there is a reasonably justifiable reason for requiring disclosure of a spouse's assets, if known by the Member, and the spouse's employer, if employed and earning over $1,000—if there is a reasonably justifiable reason

for that being required of Members, I think it is reasonably justified also to be required of staff members who are at a salary level of over $25,000.

Perhaps it may be argued that it is not as compelling a reason, although I suppose one might say, with regard to certain staff members, staff directors in very powerful positions, drafting legislation that has an important impact, in many instances, that there may very well be, in many instances, as sound a reason or an even more compelling reason for disclosure of assets of spouse or employment of spouse. In any event, we went through it at some length in committee and, as the Senator knows, I do support the committee position on that disclosure with respect to the staff.

Mr. HANSEN. Mr. President, unless someone else wishes to be recognized on my time, I am prepared to withdraw this amendment.

The amendment was withdrawn.

AMENDMENT NO. 176

Mr. HANSEN. Mr. President, I call up my amendment No. 176 and ask that it be stated.

The PRESIDING OFFICER. The amendment will be stated.

The assistant legislative clerk read as follows:

The Senator from Wyoming (Mr. HANSEN) proposes an amendment:

On page 29, strike out lines 13 through 25.
On page 29, strike out lines 1 through 7.

Mr. HANSEN. Mr. President, the purpose of this amendment is to eliminate any prohibition against a Member, staff employee, or committee employee lobbying certain specified individuals in the Senate for a period of 1 year after that Member, employee, or committee employee has terminated his employment.

I must say that one of the reasons it seemed to me to make sense that we strike this 1 year prohibition is that it is a pretty difficult thing to determine when a Member may be lobbying or when it could be contended that a former Member of the Senate were lobbying a present Member.

It is a time-honored tradition that former Members of this body have access to the floor. I suppose if some former Member were to come upon the floor and make an inquiry about the weather, or health of his friend, or members of the family, someone could read very sinister motives into such an innocuous inquiry.

I have already talked with my good friend from Wisconsin, the distinguished floor manager of the resolution, and have been apprised that he would not be willing to accept this amendment. Is there any different situation on that?

Mr. NELSON. The answer is a very polite "no."

Mr. HANSEN. Mr. President, in view of the continuing position of my good friend from Wisconsin, and fully aware of the realities of life and not unfamiliar with the problems that seem to fall upon the shoulders of those of us who are oftentimes in the minority in one way or another, I withdraw my amendment.

The PRESIDING OFFICER. The amendment is withdrawn.

Mr. NELSON. I thank the distinguished senior Senator from Wyoming who has demonstrated himself to be a magnificent strategist.

Mr. President, I suggest the absence of a quorum and I ask unanimous consent that the time be charged equally to each side.

The PRESIDING OFFICER. Without objection, it is so ordered.

The clerk will call the roll.

The assistant legislative clerk proceeded to call the roll.

Mr. DOLE. Mr. President, I ask unanimous consent that the order for the quorum call be rescinded.

The PRESIDING OFFICER. Without objection, it is so ordered.

UP AMENDMENT NO. 126

Mr. DOLE. Mr. President, I send to the desk an unprinted amendment.

The PRESIDING OFFICER. The amendment will be stated.

The assistant legislative clerk read as follows:

The Senator from Kansas (Mr. DOLE) proposes an unprinted amendment numbered 126:

On page 53, line 10, insert the following new section:

SEC. 309. The Committee on the Judiciary shall, within one hundred and eighty days after the day on which this resolution is agreed to report to this Senate on the constitutionality of the effect of the provisions of the code of conduct which have the effect of discrimination between various classes of Senators on the basis of outside income (whether earned or unearned).

Mr. DOLE. Mr. President, this amendment would replace the amendment the Senator from Kansas had contemplated proposing to the Senate. There may or may not be a question on the constitutionality of discriminating among classes of Senators insofar as earned or unearned income is concerned.

This amendment would simply direct the Committee on the Judiciary to make a study of that specific question. I think the manager of the bill is willing to accept this amendment.

The recent court case of Buckley against Valeo made it clear that the equal protection clause was included in the fifth amendment right to due process. What this means is that the Federal Government, as well as State governments, must not discriminate or engage in other activity contrary to the equal protection clause.

Our rights as Americans are protected against the discriminatory actions of our Government. Also, the Federal courts have jurisdiction to consider matters dealing with congressional rules, as indicated in the case which the Supreme Court heard in the late 1960's concerning Adam Clayton Powell. Since Federal courts have this jurisdiction, since the fifth amendment protects Americans against discriminatory actions of the Federal Government, and since the way in which this bill treats earned income in in relation to the way it treats unearned income is discriminatory; then it appears that there may be a question as to the constitutionality of this bill.

Recently, the Court has indicated that it will balance the Government interest along with the rationality of the means to get at those Government interests against the burden imposed by the rule. Since the means adopted in this bill are not directly related to the problems that concern us all, and since this will be a very heavy burden upon Senators without investment income, the Senator from Kansas believes that this bill may very well be unconstitutional.

Certainly, this resolution will have a chilling effect on citizen participation in the Senate selection process—a concern which is mirrored in Supreme Court rulings in this area and something which bothers this Senator as well.

Mr. NELSON. Mr. President, I say to the Senator from Kansas that the amendment directing that study is acceptable to the manager of the bill.

I yield back the remainder of my time.

Mr. DOLE. I yield back the remainder of my time.

The PRESIDING OFFICER. All time on the amendment has been yielded back. The question is on agreeing to the amendment of the Senator from Kansas.

The amendment was agreed to.

Mr. DOLE. Mr. President, I ask the Senator from Wisconsin to comment on this. Yesterday, the Senator from Kansas offered an amendment on committee attendance. I think that this matter can be resolved without further discussion of that amendment. The Senator from Kansas does not propose to offer that amendment.

In addition, the Senator from Kansas has submitted to the Ethics Committee staff certain questions relating to air travel. Those questions and the answers should provide for further clarification of this new code of ethics.

The examples used are, in effect, an extension of those questions raised by the Senator from Alaska (Mr. STEVENS). We are in the process of getting responses to that, so the Senator from Kansas will not offer that amendment.

Having said that, if the Senator from Wisconsin concurs and we can resolve the committee time and attendance question without any amendment, the Senator from Kansas has no further amendment.

Mr. NELSON. This deals with the amendment offered last night on the attendance record question. I am informally advised that the problem raised by the Senator from Kansas can be resolved without any committee amendment.

Mr. DOLE. The Senator from Kansas is satisfied that it can be resolved, and I see no purpose in pursuing it further.

With respect to the matter of transportation, that, I believe, is in the process of being scrutinized by the staff, and we hope that we will reach some agreement on that, so the Senator from Kansas has no further amendment.

UP AMENDMENT NO. 127

Mr. NELSON. Mr. President, I send an amendment to the desk.

The PRESIDING OFFICER. The amendment will be stated.

The assistant legislative clerk read as follows:

The Senator from Wisconsin (Mr. NELSON) proposes an unprinted amendment numbered 127.

Mr. NELSON. Mr. President, I ask unanimous consent that further reading of the amendment be dispensed with.

The PRESIDING OFFICER. Without objection, it is so ordered.

The amendment is as follows:

On page 25, delete lines 19 through 24 and delete all on page 26, and insert in lieu thereof the following:

"3. (a) For purposes of this rule, the term 'outside earned income' shall, subject to the provisions of subparagraph (b), mean any income earned by an individual (other than the salary received as a Senator or officer or employee of the Senate) which is compensation received as a result of personal services actually rendered.

(b) For purposes of subparagraph (a), the term "outside earned income" does not include:

(1) Advances on books from an established trade publisher under usual contract terms;

(2) Royalties from books;

(3) Proceeds from the sale of creative or artistic work;

(4) Any "buyout" arrangement from professional partnerships or businesses which is reasonably related to the fair market value of the partnership or business interest in the enterprises at the time of the sale of such interest, payable within a reasonable period of time, and not related to future services or profitability of the enterprise;

(5) Income from family enterprises, if the services provided by the Senator or officer or employee are managerial or supervisory in nature, necessary to protect the interests in the family enterprise and do not consume significant amounts of time while the Senate is in session; and

(6) Distributive shares of partnership income if the distributive share received represents not more than a pro rata return on the capital invested in the partnership and the services provided by the Senator or officer or employee are managerial or supervisory in nature necessary to protect the interests in the partnership and do not consume significant amounts of time while the Senate is in session.

Mr. NELSON. Mr. President, it has become clear that the outside earned income limitation has resulted in some confusion. This confusion stems in part from the extreme complexity of the issue and the difficulty of applying a general rule to the innumerable cases which can be imagined. But the confusion also stems, I believe, from the way the rule is drafted.

For this reason, a portion of rule XLIV was redrafted with the assistance of the staff of the Joint Committee on Taxation. I am prepared to offer this new language as an amendment in the form of a substitute to paragraph 3 of rule XLIV. The amendment does not make substantive changes in the rule, but it is drafted in a way that I believe will eliminate some of the confusion which has surrounded this issue.

Under the amendment, paragraph 3(a) sets forth the basic concept of the rule:

Outside earned income means wages, salaries, professional fees, honoraria, stipends, and other amounts received or to be received as compensation for personal services actually rendered.

This is, and always has been, the essence of the rule. If compensation is being received for personal services rendered, that income is subject to the income limitation.

Paragraph 3(a) eliminates the reference to the idea of services which are "material income-producing factors." This concept, which has a very narrow meaning in the Internal Revenue Code, was thought by the committee to provide a fair test within rule XLIV, but the discussion on this measure has shown that it is not a concept which significantly clarifies matters in our context. Under the amendment, the crucial test would be whether compensation was being received for personal services. The Obey commission in the House reached the same conclusion, also after testing other alternative approaches to the problem.

Subparagraph (b) of the amendment lists a number of items which are not to be included in "outside earned income." While the resolution takes the same approach, in subparagraph 3(c), there is an important difference. In the resolution an attempt was made to spell out a large number of items which would ordinarily not be considered earned income. As a result of this list, however, two misconceptions were possible:

First, that the list included each and every possible example of income that would not be earned income; and

Second, that if income took one of the forms mentioned, it would in every case be outside the income limitation, even if personal services were involved. For this reason, the amendment takes the approach that the definition in paragraph 3(a) is decisive. If income is not received as compensation for personal services, then it is not earned income. Therefore, the amendment does not explicitly mention all the items listed in the original resolution; rather, this amendment lists exclusions from earned income which might raise more serious questions: Advances on books from established publishers; royalties; proceeds from the sale of creative or artistic work; income received from a "buyout" arrangement; and income from unincorporated family enterprises. The only substantive change was made in response to a suggestion by the Joint Committee on Internal Revenue Taxation: The salary of a Senator or officer or employee of the Senate is specifically excluded from outside earned income.

This amendment has been discussed and cleared by both sides. It contains no substantive changes, but it represents a significant improvement nonetheless.

Mr. LONG. Mr. President, will the Senator yield?

Mr. NELSON. I yield.

Mr. LONG. As I understand it, there were certain things listed which were not included in the definition of outside earned income, such as interest income. That is clearly not outside earned income. It was felt that it is not necessary to include those items within it, because there is no doubt that those items are not outside earned income; but there are certain specific items that the amendment indicates are not to be outside earned income, and those listed are those about which it is felt there might be some doubt.

Mr. DOLE. Mr. President, the amendment has been cleared on this side.

Mr. NELSON. The amendment has been cleared on both sides.

Mr. President, I yield back the remainder of my time.

Mr. HATHAWAY. Mr. President, I support the pending amendment offered by the Senator from Wisconsin. His amendment, which is quite similar to an amendment I offered on Monday, would greatly improve and simplify the definition of outside earned income contained in rule 44. It modifies the basic definition of outside earned income to include any amount received or to be received for personal services actually rendered. Most importantly, it eliminates, as did my prior amendment, the additional words, "if such services are material income producing factors."

These words were of dubious value and created a potential loophole which could have allowed a Senator or staff member to ignore totally the necessary limitation on outside earned income. That definition could have arguably allowed the rendering of personal services which generated significant amounts of income so long as such income when reviewed proportionately to the total income of the business as a whole, did not constitute a material element of the total business income.

For example, a Senator might have been permitted under the original definition to accept a $50,000 payment from a multinational corporation as a result of personal services rendered in the form of advice on legislative matters. This income would arguably be exempt from the limitation since the services were not material income producing factors to the business. Further, the report, in describing what was intended with reference to a family business to be viewed as "a material income-producing factor", stated:

For example, if the Senator or employee is making substantially all of the managerial decisions for the enterprise or spending substantial amounts of time with it, then the income so derived should be considered personal services income.

The Senator from Wisconsin's amendment eliminates these interpretive problems and simplifies the definition of outside earned income to include any amounts received for personal services. This is as it should be and thereby preserves the essential distinction between earned and unearned income. The Senator's amendment does contain certain exemptions, with which, as I indicated during debate on Monday, I was not entirely in agreement—namely family enterprises and partnerships.

But these exemptions are drafted in a careful manner so as to indicate that the fundamental purpose of the exemptions is to allow a Senator or employee with an interest in a partnership or a family enterprise to receive income which is directly related to prior investment. The definitions of the exemptions clearly limit the personal services which may be rendered so that they do not consume significant amounts of time while the Senate is in session and thereby do not conflict with the conscientious performance of official duties.

Since admittedly these principles involve a large gray area, I particularly appreciate the Senator's citing of a number of examples with respect to family enterprises and partnerships which clarify that his intention is to allow such income as a return on investment and not as compensation for personal services.

I support this amendment as eliminating considerable confusion in this area, and tightening the legislative language to insure that it properly reflects the intentions of this body to subject outside personal services income to 15 percent oi salary and to limit any exemptions from this rule to income which is basically unearned.

I am pleased that my efforts at pointing out the problems inherent in the original language have been worthwhile and that the issues have been resolved in a satisfactory manner.

The PRESIDING OFFICER. Is all time yielded back?

Mr. DOLE. I yield back my time.

The PRESIDING OFFICER. The question is on agreeing to the amendment of the Senator from Wisconsin.

The amendment was agreed to.

Mr. NELSON. Mr. President, I move to reconsider the vote by which the amendment was agreed to.

Mr. DOLE. I move to lay that motion on the table.

The motion to lay on the table was agreed to.

Mr. NELSON. Mr. President, I call attention to the absence of a quorum. I am not aware of any more amendments, but there was agreement that the Senator from Maine (Mr. MUSKIE), the Senator from Idaho——

The PRESIDING OFFICER. The Chair is advised that Senator BUMPERS, Senator MUSKIE, Senator MCCLURE, and Senator DOMENICI have time to speak.

Mr. ROBERT C. BYRD. Mr. President, I suggest the absence of a quorum.

The PRESIDING OFFICER. On whose time?

Mr. ROBERT C. BYRD. Both sides on the resolution.

The PRESIDING OFFICER. The clerk will call the roll.

The assistant legislative clerk proceeded to call the roll.

Mr. ROBERT C. BYRD. Mr. President, I ask unanimous consent that the order for the quorum call be rescinded.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. ROBERT C. BYRD. Mr. President, we will shortly, I think, be able to inform our Members as to whether or not any additional rollcall votes will occur today.

Mr. President, I take the floor at this time—and I yield myself such time as I may require from the time on the resolution—to inquire as to whether or not any Senators have further amendments on which rollcall votes would be ordered and, if not, we can inform our colleagues that there will be no more rollcall votes today.

Does the distinguished minority leader have anything to suggest in that regard?

Mr. BAKER. Mr. President, if the Senator will yield——

Mr. ROBERT C. BYRD. Yes, I yield.

Mr. BAKER. I have inquired on our side and I know of no other amendments to be called up and offered on this side.

We do have two requests for general debate. Beyond that we have no other requests and, therefore, I join with the majority leader in saying I know of no such requests and, therefore, I surmise there will be no further votes tonight.

Mr. ROBERT C. BYRD. Very well.

APPOINTMENT BY THE VICE PRESIDENT

The PRESIDING OFFICER. The Chair, on behalf of the Vice President, pursuant to Public Law 86-380, appoints the Senator from Florida (Mr. CHILES) and the Senator from Maine (Mr. HATHAWAY) to the Advisory Commission on Intergovernmental Relations, in lieu of the Senator from Maine (Mr. MUSKIE) and the Senator from South Carolina (Mr. HOLLINGS).

ORDER FOR STAR PRINT—S. 1152

Mr. BENTSEN. Mr. President, I have a unanimous-consent request I would like to present to the Senate.

Due to certain errors in the original print of S. 1152, I ask unanimous consent that a star print of the bill be authorized.

The PRESIDING OFFICER. Without objection, it is so ordered.

REMOVAL OF INJUNCTION OF SECRECY—EXECUTIVE G, 95TH CONGRESS, FIRST SESSION

Mr. ROBERT C. BYRD. Mr. President, I, as in executive session, ask unanimous consent that the injunction of secrecy be removed from the protocol with Canada to amend the Convention for the Protection, Preservation, and Extension of the Sockeye Salmon Fisheries in the Fraser River System, as amended (Executive G, 95th Congress, first session), transmitted to the Senate today by the President of the United States, and that the treaty with accompanying papers be referred to the Committee on Foreign Relations and ordered to be printed, and that the President's message be printed in the RECORD.

The PRESIDING OFFICER. Without objection, it is so ordered.

To the Senate of the United States:

With a view to receiving the advice and consent of the Senate to ratification, I transmit herewith the Protocol between the Government of the United States of America and the Government of Canada to Amend the Convention for the Protection, Preservation and Extension of the Sockeye Salmon Fisheries in the Fraser River System, as Amended, signed at Washington on February 24, 1977. I also transmit, for the information of the Senate, the report of the Department of State with respect to the Protocol.

The present Protocol increases the size of the Advisory Committee to the International Pacific Salmon Fisheries Commission from six members from each country to seven members from each country. The additional positions will enable the United States to provide for a native Indian adviser while continuing to have representatives on the Committee from all the presently represented parties.

An Indian adviser is particularly necessary at this time in light of recent court decisions dealing with Indian fishing rights. I recommend that the Senate give early and favorable consideration to the Protocol and give its advice and consent to ratification.

JIMMY CARTER.

THE WHITE HOUSE, *March 31, 1977.*

AUTHORIZATION FOR THE COMMITTEE ON RULES AND ADMINISTRATION TO FILE REPORTS ON SENATE RESOLUTION 5 AND CERTAIN OTHER RESOLUTIONS UNTIL 5 P.M. ON APRIL 8, 1977

Mr. ROBERT C. BYRD. Mr. President, I ask unanimous consent that the Committee on Rules and Administration have until 5 p.m. on Friday, April 8, to report Senate Resolution 5, sponsored by the Senator from West Virginia (Mr. ROBERT C. BYRD) and Senate Resolutions 6, 7, 8, and 9 sponsored by the Senator from Oregon (Mr. HATFIELD), Senate Resolution 10, sponsored by the Senator from Maine (Mr. HATHAWAY), and Senate Resolutions 11 and 12, sponsored by the Senator from Alabama (Mr. ALLEN), and which were ordered to be reported from that committee by April 4. They were all required to be reported by the Committee on Rules and Administration by April 4. The committee will be unable to report them by April 4. Hence the reasons for the request to extend the date to 5 p.m. on April 8.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. ROBERT C. BYRD. May I say while the Senate will not be in session on the 8th, the measures will have been reported hopefully, by then, and the commitee may require the additional time in order to file its report.

ORDER OF BUSINESS

Mr. ROBERT C. BYRD. Mr. President, before I proceed further I should state that on tomorrow the program will be as follows—I believe there is one order for the recognition of a Senator tomorrow, Senator BARTLETT.

Mr. BAKER. Mr. President, if the Senator will yield, it is my understanding that the junior Senator from Oklahoma now requests the same time with a special order Monday, and I have a request from the senior Senator from Utah (Mr. GARN) for the same time tomorrow.

Mr. ROBERT C. BYRD. For the same time tomorrow but not Mr. BARTLETT.

Mr. BAKER. Yes.

ORDER FOR RECOGNITION OF SENATOR GARN TOMORROW

Mr. ROBERT C. BYRD. Mr. President, I ask unanimous consent that the name of Mr. GARN be substituted for Mr. BARTLETT in the order for recognition tomorrow.

The PRESIDING OFFICER. Without objection, it is so ordered.

ORDER FOR RECESS UNTIL 9:15 A.M. TOMORROW

Mr. ROBERT C. BYRD. Mr. President, I ask unanimous consent that when the

Senate completes its business today it stand in recess until the hour of 9:15 a.m. tomorrow.

The PRESIDING OFFICER. Without objection, it is so ordered.

OFFICIAL CONDUCT AMENDMENTS OF 1977

The Senate continued with the consideration of the resolution (S. Res. 110) to establish a code of official conduct for the Members, officers, and employees of the U.S. Senate; and for other purposes.

Mr. MUSKIE. Mr. President, I appreciate this opportunity to take a few moments to state my intentions with respect to the final vote on the pending resolution. I expect to vote against it for reasons I shall briefly outline.

I do not intend to spend an extended amount of time going over those reasons, because I suspect whatever I say tonight is simply a capstone on what I have said earlier in debate on this resolution.

First of all, Mr. President, may I emphasize I think it is well for the Senate and Congress to undertake to establish an ethical standard for the conduct of Members of Congress. I have no objection to that at all. I am sorry it is necessary, in terms of public perception of our conduct and behavior, to reestablish a spirit of trust and confidence between us and our constituents. However, it does appear to be necessary, and I support the effort to do so.

Second, there are many provisions in this bill which I can support. I think in some respects we may find them to be overly burdensome and restrictive, but it is in the nature of the legislative process to support legislation notwithstanding such misgivings. I think full public financial disclosure is a must in this day and age. This pending resolution does not provide for full and complete financial disclosure in the literal meaning of those words but, nevertheless, it does adopt the principle of disclosure, and I applaud it for doing so.

I think it is appropriate to impose limits on gifts that Senators and staff members may receive. I think some limitation on the practicing of a profession or the rendering of professional services is appropriate. I think the proposed limitation on so-called unofficial office accounts is appropriate. I think the prohibition of so-called lameduck travel is appropriate. The proposed restrictions on the use of the frank, I think, are appropriate. So, on the whole, there are many provisions in this bill, Mr. President, I can support.

However, the floor manager, the distinguished Senator from Wisconsin (Mr. NELSON), the majority leader, members of the committee, and others who support the resolution have made it clear they consider the centerpiece of this resolution to be the limitation on outside earned income. I have stated my views on that provision at length; and I am not going to belabor it. But I do want to restate the elements of my disagreement with the supporters of this restriction at this time. My silence on previous occasions was used, in the course of the debate on this resolution, to suggest I had, in effect, acquiesced in previous limitations.

I did not acquiesce, and I certainly intend to make it clear I do not acquiesce now. So, because this is regarded as the centerpiece of this resolution, I find it necessary to make my decision on voting for or against it on that point. Therefore, I shall vote against the resolution, notwithstanding my support of the provisions which I have outlined above.

Why do I oppose the restriction on outside earned income in this resolution?

First, I think it is harsh and discriminatory.

Second, I think it is unnecessary, and in my judgment of doubtful constitutionality.

Third, it is based upon an assumption with respect to the role of a U.S. Senator to which I take strong exception.

The majority leader, for example, in his argument on my second amendment, had this to say:

> Mr. President, reference has been made to the necessity of the lecture circuit to further the public dialog. That will not be hampered by the 15-percent limitation on outside earned income. A public dialog is now focused on the floor of the Senate. The days of the Chautauqua circuit are gone forever. The national news media now reports events simultaneously with their occurrence. This is the finest and the best speech forum in the world.
>
> Right up there sits an entire gallery of press media. The printed media, the television and radio media are at hand. We have our opportunities to get on the Sunday shows: Face the Nation, Issues and Answers, Meet the Press, and so on. We have every opportunity to get our views out to the public.

Mr. President, I just do not view speeches here in Washington, whether from this floor or in the studios of the national networks, as a substitute for getting out among our people at the grassroots. President Carter understands this, and through these first days and weeks of his administration has driven that point home with emphasis and with increasing acceptance on the part of our people.

I think it is a part of the role of a Senator to speak to the people where they are. I have always regarded it in that way. The majority leader says:

> Well, all we are doing is restricting the income that you can earn from speaking around the country.

Putting that point aside for the moment, the argument has been that speaking around the country takes time away from our duties as Senators. So, implicitly, even if we were to receive no income from making speeches, it is the intent of this resolution to chill or inhibit or restrain the role of a Senator in speaking to the people of this country.

I just do not happen to agree with that. I have found it possible, in my own experience, to build public awareness of issues and problems by speaking around the country. I shall continue to do so. And I have not always done so for a fee. I have spoken to groups where I thought my message should be made for no fee or for a small fee, because I think that is a part of the role of a Senator. I see nothing wrong, when a group offers a fee for doing that sort of thing, with supplementing my income by accepting it. But the income part of it is not what I am talking about.

Not so long ago, Mr. President, Lou Harris did a poll that is very revealing on this point about public knowledge of Government and those who serve within Government. The poll showed these things, among others:

While 63 percent of the people felt that the Federal Government affected their lives personally a great deal, only 40 percent felt that they were up to date on what was going on in the Federal Government in Washington. In other words, 60 percent of the people felt that they did not know what was going on at the level of Government that a majority felt had the most direct impact on their lives. And this notwithstanding the enormous role of television and radio as well as the print media in disseminating information around the country.

The public official who was the best known in the country, except for the President, was the Governor—89 percent of the people could name their Governor. He was there at the grassroots. He traveled among them.

Only 59 percent could name one of their Senators. Forty-six percent could name their Congressmen, and only 39 percent could name their second Senator.

Another test Harris used was to find out how much people knew about the makeup of the Congress—that it was made up of two Houses. Only 62 percent of the people answered that the Congress was made up of the House of Representatives and the U.S. Senate. An astonishing 20 percent answered that the Congress was made up of the House, the Senate, and the Supreme Court.

Harris also surveyed State and local officials including Governors and mayors to determine the means they used to keep in touch with the people. More of them said they used speeches and appearances on a regular basis—88 percent—than any other kind of activity to keep in touch with their constituents. This notwithstanding television and the availability of the print media.

Mr. President, I hope we never assume that our only role as Senators is to sit in this Chamber or in our committee rooms on a 12-month basis legislating and talking to our people only through the press gallery, the television studios, and the radio studios. I hope we never assume we know what the people are thinking about, what they are talking about, or what their views are on that basis. And yet that limitation on that role in this resolution adds another driving force to that tendency. It tends to nail us down to this place by frowning not only on the earning of incomes from that activity—which I still insist is an honorable profession—but frowning upon the taking of time from our work here to do that work.

I think being a U.S. Senator from any State imposes this responsibility on each of us to speak to the people wherever they are in this country when we have appropriate opportunities to do so. We should not be so isolated as to speak only in Washington; we should not be so parochial as to speak only to our constituents. They expect us to be national leaders. For 200 years Members of this body have acted as national leaders by speaking to our people where they are, where they can ask us questions, where they can assert points of view.

Now we are told we have to restrict that in the future. We are as responsive to incentives as anybody. If we have to do this free of charge, how many of us are going to miss votes, incur the displeasure of our constituents, dissipate energy and the time by traveling to, for example, San Diego, Key West, Anchorage, or points in between, at the invitation of groups of citizens who are interested in hearing what we have to say?

I told the Senate the other day, the day my amendments were rejected, when I went back to my office my staff told me I was in receipt of several invitations from student organizations in colleges and universities to come to their campuses to lecture. On what? On this new Senate code of ethics.

Am I to tell them the Senate considers it unethical for me to give them the time, let alone accept the fee they offer, to speak on that subject to them? How ridiculous can we get?

Of course, there is a temptation to abuse this lecture circuit in terms of the time we devote to it or the money we get from it.

The PRESIDING OFFICER (Mr. STONE). The Senator's 15 minutes have expired.

Mr. MUSKIE. Just 1 more minute, please.

Mr. ROBERT C. BYRD. I ask unanimous consent that the Senator may proceed for 2 additional minutes.

The PRESIDING OFFICER. The Senator is recognized for 2 additional minutes.

Mr. MUSKIE. I thank the distinguished majority leader.

But I think the abuse is controllable and does not exceed the risk of abuse that pertains to other forms of outside income.

May I say in closing, Mr. President, I understand why the majority leader has felt he had to take the position he took. I do not challenge his motivation in doing so, or the sense of duty which prompted him to do so. I disagree with him on this for the reasons I have stated. I feel very deeply about it.

I am sorry that to some segments of the press my position has been interpreted as evidence of greed on my part. Well, if I were greedy, I would not be a Senator, because I have not gained much by whatever effectiveness I have demonstrated in my 19 years in this body.

People who have disagreed with me have chosen to misunderstand the reason why I have taken the position I have.

I hope in these closing remarks, and I do not intend to have anything further to say on this subject in the course of this debate, I may have put my position into a somewhat broader perspective for those who are interested in a fair assessment of what it is.

I appreciate the recommendation of the majority leader in extending the exemption for this kind of activity. I think that gives the entire Congress time to reassess the wisdom of the policy we are about to adopt.

In voting against the resolution, I hope the majority leader does not assume I am not appreciative of that change in the resolution. But I still cannot bring myself to vote for the resolution, the centerpiece of which has been described as a limitation on this kind of activity. I thank the majority leader and I thank the Senate for listening to me.

Mr. ROBERT C. BYRD. Would the Senator allow me to ask unanimous consent that I may speak for 1 minute?

Mr. DOMENICI. I yield.

Mr. ROBERT C. BYRD. Mr. President, I have listened with great care to the distinguished Senator from Maine (Mr. MUSKIE).

May I say there is no Senator in this body for whom I have a greater admiration and in whom I place a higher trust, and for whose integrity I have such high faith and confidence.

There is only one thing I must say, and I respect his viewpoint and respect his reasons for voting against the code of ethics: I do not believe I ever said that the limitation on outside income was the centerpiece. I may have. In fact, the fact that the Senator said that I said that makes me doubt as to whether or not I am correct.

I am confident that I said that that was a centerpiece, because I have felt that there were several centerpieces in this legislation. Some of them have been named by the distinguished Senator from Maine. Among these were the financial disclosure areas, the provisions dealing with gifts, the provisions dealing with lame-duck travel, and so on.

If I have at any point said that the limitation on outside earned income was the centerpiece, it was not a precise statement of my viewpoint. I have felt that it was a centerpiece.

I have said, however, that it was perhaps the most symbolic area of the entire measure, which is perhaps unfortunate. I have felt that the public and the press perhaps viewed that as the most symbolical provision in the resolution, and perhaps the litmus test of the resolution, which I think is unfortunate, because there are other equally important areas of the measure, as far as I am concerned.

Mr. MUSKIE. Will the Senator yield for just a moment?

Mr. ROBERT C. BYRD. Yes.

Mr. MUSKIE. I, of course, accept the majority leader's definition of his position on the bill. What happened and what was said in a moment of emotionalism on the debate I think ought to be carefully reviewed. So I accept his definition. I do not challenge it at all.

I may have misstated what the Senator intended to do earlier. I appreciate the majority leader's remarks and personally I believe that our disagreement on this matter is over and I feel relatively more relaxed.

Mr. ROBERT C. BYRD. I thank the distinguished Senator, my friend from Maine.

Mr. DOMENICI. Mr. President, a parliamentary inquiry.

The PRESIDING OFFICER. The Senator will state it.

Mr. DOMENICI. How much times does the Senator from New Mexico have?

The PRESIDING OFFICER. The Senator from New Mexico has 15 minutes.

Mr. DOMENICI. Mr. President, I probably shall not use the full 15 minutes, but I just wanted to make a few observations.

First, let me comment on the last conversation that occurred here on the floor between the distinguished majority leader and the senior Senator from Maine. I think that it is quite obvious that when people like the good Senator from Maine oppose in principle parts of this resolution and vote their consciences against it, it is appropriate that he and the majority leader discuss, as they did, what that really means.

As I watched the debate evolve on the issue that concerned the Senator from Maine most, it appeared to me that, based on my 4 years in this institution, there is not a Senator that was better equipped, that is more entitled than he to make the argument that he made, because there can be no doubt that he feels strongly. His record proves that he did his work in this institution as a Senator; his reputation for integrity and absence of conflict of interest is beyond reproach and second to none. His diligence and time spent and rare missing of committee meetings is legislative history. What he has done here proves that he was able to do that and do it well, and yet carry on what he thought was in his and his family's best interest by way of the position that he has taken as a Senator on the issue of outside earned income.

I thought no one better could take the issue to the Senate and no one could argue it better so as to get a true vote without any of the prejudices that come from the special interests that are involved in this resolution. For there are groups involved in it, just as there are in almost all legislation that we consider.

While I do not necessarily agree with him on that position, I want him to know and I want the record to reflect that as far as this Senator is concerned, that has nothing to do with what he thinks about senatorial ethics and the demand that each man or woman who comes to this institution impose on himself or herself a code of conduct that is beyond reproach, as he has. And he did not need a code of ethics to do it.

I want to say, however he votes and whatever his position is, it certainly should not be taken that the senior Senator from Maine is, by some stretch of the imagination, less for a code of conduct and ethics than are others who vote contrary to him, because he need not have one to open his record of 19 years here to scrutiny.

I wanted to say that first.

Mr. MUSKIE. Will the Senator yield?

Mr. ROBERT C. BYRD. Will the Senator yield?

Mr. DOMENICI. I am delighted to yield.

Mr. ROBERT C. BYRD. The distinguished Senator from New Mexico has said, far better than I can say, exactly how I feel with respect to the distinguished Senator from Maine (Mr. MUSKIE).

Mr. MUSKIE. Thank you very much. I say to the distinguished majority leader (Mr. BYRD) and to my good friend from New Mexico, the Senator from New Mexico is in a position to match my attendance, because he serves on two of the subcommittees which occupy so much of my time.

I want to say to the Senator that I particularly appreciate that compliment from him. It means a great deal.

Mr. DOMENICI. I thank my good friend.

Now I want to say a few words about my own feelings on this.

I am going to vote for the code of ethics. Perhaps I have not been as motivated to consider the amendments in detail and the code in great detail. Maybe I should have. But I came to the Senate out of a mayorship of a city that paid very little, if anything, for the services I rendered to it and for it. I had, when I came here, eight children. I made a commitment to my constituents and my family—and incidentally, the good Senator from Maine asks if there have been any additions since that time. There have not. They are all prepartisan politics, my children.

I made a commitment to my wife, my constituents, and my children that we were not going to involve ourselves—certainly, I was not—in trying to have an outside income of any substance. I did a little bit of honorarium work, never excessive. I never tried to make it very much. We made, I guess, what one might consider, without knowing all the details of this job and living here, a commitment that we were going to be satisfied with what the institution paid us. So I have not been concerned.

I made a commitment to disclose everything. I filed my income taxes, I filed net worth statements indicating the property I owned when I came here. It is obvious to my citizens that in order to get by, I have to sell something about every 2 years and use that diminution in any net worth to get by.

So, in a sense, many of the arguments in this regard I have not been properly sensitive to. But I do understand that there are good people in this institution and that they are genuinely worried about the institution.

I, too, worry about it. I hope that if we pass this code of ethics, it will not be the inhibitor to good people seeking a position in the Senate, as some indicate it will. I hope it will not. After they get here, if they are elected, I hope it will not be such an inhibitor that it makes it more difficult than being a Member already is.

Being a Member of this institution is tough. The job has grown beyond all proportions. The Federal Government is so big now that 100 Senators, no matter how we try, really cannot handle the work. At least, we have not found out how. And we certainly cannot handle it without doing to ourselves grave injustice in terms of the abuse of ourselves, the abuse of our time, and, yes, the abuse of our minds.

We very rarely have enough time to sit and think. One Senator, the other day, reminded me, after sitting at a 1-hour briefing on energy—to which 30 Senators were invited and only 5 could make it—he said, "You know, we have grown to where we are almost embarrassed that we would spend an hour talking to experts about a multifaceted problem with many different approaches to its solution. We almost feel this is wasting our time, when, as a matter of fact, that is what we would have to have available and spend more time at."

What is the episode of the last 2½ weeks? I said the senior Senator from New Mexico would like to make this a part of the record. I want to use this next 3 or 4 minutes to remind the Members of the U.S. Senate that we have spent all of these days on literally scores of amendments, hours of debate. We have devoted literally day after day of Senator floor time for this particular code of ethics. We have listened attentively to what many Senators have to say about the burdens that it is going to place on them, how this interpretation versus that interpretation is going to wreak havoc on this side or do good on that side.

But, Mr. President, how many times in the past few years have we had before the Senate a bill to regulate activities of the American people—small business, average Americans, those who produce pollution, those who produce toxic substances—how many times have we had bills before us three times as filled with content and substance as this one? And how many times have we taken 2 hours and passed it? Never a concern about what those people that we are regulating might have to say about how it is going to be interpreted. Rather, always saying, "Oh, don't worry, the commission that is doing the work will take care of it by regulating. Don't worry about it, we have been fair"—all the time listening only to a few and then passing it and washing our hands of it and saying, "We have now regulated."

The point I make is that I hope this will be a lesson to us, that we ought to consider regulations and rules that are going to flow from laws that are going to be imposed on the American people, or American business, or American schools, or whatever it may be. That we ought to consider with as much concern, with as much depth, with as many questions, what it does to them and what their genuine concerns are about those interpretations and impacts as we have so willingly done when these regulations are going to apply to us.

Yes, we have been concerned. I will call another difference to the attention of the Senate. We are concerned and our own peers are going to regulate us, for six Members of this body will be our Committee on Ethics. But how many bills have we passed, as I described, when those to be regulated and ruled against and interpreted about are not going to have their own peers sitting on the commission or sitting on the agency? Frequently, it is quite to the contrary.

Almost by design, we will put an antagonist to the interests we are regulating, or in the interest of fairness, and ignore the concerns of those who tell us much the same thing that has been told us about the regulations that this will impose, that in some instances are going to be arbitrary, ludicrous, unneeded, as has been said far better than I for the past 10 or 15 days.

I hope that those who have seen the impact of regulations on their lives via a code of conduct will, as we proceed through the regulatory process in considering more laws and new laws and changes in laws, take a lesson and a chapter out of this one and listen and learn more, take a little more time, debate it a little more thoroughly, assume that the contentions of people have a little bit more reality than we have in the past, and not so quickly assume that it will all work out when we have not been very quick to assume this one will all work out when our own peers will be our judges, when we do not even have to go to the other body or to the President to change this. It is our own. Yet, look at the concern.

So I close by saying that I have concern about this code. I am going to vote for it. I hope we watch it carefully. I do believe it has some good and has some things not so good. But all in all, from this Senator's standpoint, I am willing to try. It seems to me that if it serves the purpose of letting the American people know we are genuinely interested, are concerned, trying to pick up our morale a bit, then it will have served a useful purpose.

Mr. President, how much time do I have remaining?

The PRESIDING OFFICER. The Senator has 1 minute remaining.

Mr. SCHMITT. Will the Senator let me have 1 minute?

Mr. DOMENICI. I yield my remaining 1 minute to my colleague from New Mexico.

The PRESIDING OFFICER. The Senator from New Mexico.

Mr. SCHMITT. Mr. President, I wish to compliment my colleague and good friend from New Mexico on his remarks, particularly those related to the considerations that we should give to the regulatory process as it comes before this body.

I think the Senator is absolutely right, has hit the nail right on the head, I hope we can have comparable debate on some bills that I am sure we will be considering in this session.

I will vote against the bill for many reasons which I have already articulated in other days and at other times before this body. But I do wish to say he is exactly right in the short shrift we give the regulatory process. I commend him on his remarks.

Mr. DOMENICI. I thank the Senator from New Mexico. I am pleased that he

commented and pleased to have him as my new colleague from New Mexico.

Mr. President, I yield back the remainder of my time.

Mr. McCLURE. Mr. President, first of all, let me compliment my friend the Senator from New Mexico for the comments he has just made.

Mr. FORD. Will the Senator yield for a question?

Mr. McCLURE. Certainly.

Mr. FORD. How much time will the Senator take?

Mr. McCLURE. About 15 minutes.

Mr. FORD. I thank the Senator.

Mr. McCLURE. Mr. President, I not only commend him for the perception which he brought to this question, as he often does, a unique perception that sometimes is not brought to bear upon problems in this Senate, but also thank the Senator from New Mexico for his comments concerning the opposition that was expressed by the Senator from Maine, because I, too, share the feelings he expressed about the Senator from Maine's right to raise those issues.

I am concerned that when this vote is taken, the reasons why a person may have voted against the bill will be lost in the paper blizzard at home as to the faults that are in the legislation, rather than looking at the criticisms in the light of constructive criticisms in favor of ethics.

I am concerned about some of the arguments that have been made and I will address myself first to one specific area of disagreement with what has happened here and then some rather broader comments.

During the entire debate about the question of outside income—and sometimes it got muddied in the discussions between earned and unearned income—it seems to me that the entire basis for trying to limit outside income from whatever sources boiled down to about three particular areas.

One was the conflict or possible conflicts because of the source of the income, whether it be honorarium, or income from property, or income from stocks, or income that might be affected by the actions of the Congress of the United States.

The second question was in regard to conflicts because of the time it might take from a Senator's busy schedule to earn the money or to manage the portfolio of stock or manage the real estate that might be involved.

The third reason given by proponents of this bill was because of political activities, because they indicate that sometimes the time it took to earn honorariums also involved political activities.

Indeed, they are right in every instance. Whether it is earned or unearned income, there can be conflicts because of the source of that income. There can be conflicts because of the time that it takes. There can be conflicts because of the political activity that is involved.

Yet, this bill, which is bound to pass tomorrow, does not really address any one of those problems.

If the Congress were to subject itself to the same test that we have required in the truth in packaging and truth in labeling, this Congress would be guilty of a criminal violation of the law because this bill is a fraud.

We say that we are acting in behalf of the American people by raising the ethical standards of this Congress, and I say that this resolution does not really do that and only does a little of it. It allows more to be concealed than is required to be revealed. We do that in the name of ethics. We do it because we are told the public demands it. Well, if we are really concerned about the conflict of time, then I should have offered an amendment which I had prepared but which I will not offer because the pattern has been very abundantly demonstrated that there will be no serious consideration of many of the amendments that have been offered. The amendment I had prepared, which I will not offer, simply says that it shall be against the rules of the Senate for any sitting Member of the Senate to be a candidate for the office of President or Vice President of the United States.

If we are concerned about a conflict of time and the demand upon the time of a Senator, I ask the Members of the Senate, or anyone else who cares, to look at the time that has been taken away from this body by Members of this body who, within the last 2 years, have been candidate for the office of President or Vice President of the United States.

The record is adequate, I am certain, that far more time has been devoted by Members of the Senate to seeking other political office—Vice President or President of the United States—than has been taken away from this body by those who earned large honorariums. Yet, nothing is said about that conflict of interest.

It is said that we must adopt a code of ethics that confines the areas of political activity because we are servants of the public and not political officers, not seeking political office. Yet, what greater conflict is there than the abuse of this office and the time that we take to seek other office? How many Members of the Senate, within the last 2 years, sought other office at the time they were supposed to be discharging duties in this office?

If we are really concerned about the conflict of time, if we are really concerned about the conflict of political activity, then this body would be interested in purging itself of that apparent conflict by adopting an amendment which would prohibit any Member from running for the office of President of the United States or Vice President of the United States.

Mr. President, I do not have any illusions that that amendment would be adopted in this body, and therefore I am not going to offer it. I mention it only because of the very apparent hypocrisy in approaching some but not all of the questions of unethical activity and the obvious hypocrisy in some of the arguments that have been given with regard to the reasons why we are adopting this code.

The resolution before us does not meet the demands of the public so far as the elimination of the appearance or the reality of conflicts of interest are concerned. It does not require disclosure in kind and form that would allow the public to judge whether or not there is a conflict of interest. It very carefully avoids doing that. Yet, we tell the public that we have done something about disclosure when precisely the opposite is the case.

It says that we have a conflict of interest because of time, but it has never yet addressed the question of how much of our time is required for public service in this job and how much of our time is permitted us to do other things at our discretion. Perhaps we should have a time clock at the door, and we can check in and chcck out. Perhaps we should have a timeclock at the door of the committee sessions, and we can check in and check out. Perhaps we should have a timeclock at the door of our office, and we can check in and check out. Then we can add up to see whether or not we have given 40 hours a week or 45 hours a week or 50 hours a week; and we can compare, by some very precise standard, which Members of the Senate have lived up to their responsibility to devote their time to their office.

I am not certain that we can really tell whether they have slept when they were in their office or whether they paid attention when they were in the committee room. whether they listened or participated in debate on the floor; but at least we would know whether they were there—and apparently whether they are there is important to somebody at least in judging other people but not themselves.

I am not sure that we know how much time we can require. I am not sure that we can write arbitrary rules that define how much time we require of each Member. I am not sure that we can write, as this resolution attempts to write, the very arbitrary definitions we seek to define the difference between official conduct as a Senator and political activities by a political officer.

If any political activity ever were conducted by a Member of the U.S. Senate that is higher than the political activity in which we are engaged right now, I would like to know what it is; because all this debate on ethics is being done in the name of giving politics a better name. It is done in the name of giving us a better image to the American people. It is done to enhance the reputations of individual Members of the Senate. That is a political activity. Yet, we are told that we must have an ethics measure that carefully separates political and nonpolitical activities. But I think that is obviously impossible.

We are told that we must adopt this resolution, and we will, because they expect it; because it is expected of us; because we have a low reputation with the American people; that any sampling of public opinion indicates that the Congress of the United States is not held in the high regard that many of us desire that it should be held.

Yet, it is not because of the individual ethics or lack of ethics of individual Members that Congress as a whole is held in low esteem. It is not because of individual activities in politics for hon-

orariums or outside earnings or conflicts of interest or apparent conflicts of interest that Congress is held in low esteem. It is because the American people do not perceive that the Congress of the United States is dealing with the basic problems that afflict this country.

The people of the United States have looked at our activities and have said, "We don't care about what you are doing; you're not devoting yourself to the real problems of this country," whether it be the problem of the environment and how we meet it without destroying our society; whether it is the question of whether we have an energy policy, after years of debate in the Congress of the United States, and obviously we have not.

Is it a question of whether or not the Congress of the United States is aiding or hurting economic recovery? The people of this country are concerned about the problem of oppression within this country, about the loss of their individual freedoms. They are concerned about the growth of big business authority and power in this country. They are concerned about the abuse of authority and power by big labor. They are concerned about the growth of big government. What is Congress doing about any of those basic problems?

The reason why the Congress of the United States does not enjoy a good reputation is not the ethics of the Members but the ability of the Members to focus on the important issues and to come up with meaningful answers to the problems that confront this country. No amount of playacting in the name of ethics reform is going to remove that feeling from the minds of the American people. That can be solved only by effective, affirmative, positive, constructive action in the kinds of laws we pass, the way we reform the bureaucracy, the way we meet the problems that are basic in this country, and not in the sham, the facade, the fraud of the measure we are about to agree to, and then sit back and relax and say, "We have now done our duty. The people will now respect us."

Respect must be earned in a much more direct and a much more difficult manner than that.

Mr. President, I yield back the remainder of my time.

ADDITIONAL STATEMENTS SUBMITTED ON SENATE RESOLUTION 110

Mr. STONE. Mr. President, on Thursday and Friday of last week I missed a number of rollcall votes on the resolution to establish a Senate Code of Official Conduct because of a long-standing commitment to be in Florida on those days. For the benefit of my constituents I would like to indicate how I would have voted on these amendments if I had been present.

I. HONORARIA

Amendment No. 124 offered by Senator DURKIN—similar to an amendment which had previously been defeated—would have restricted the groups from which Senators may receive speaking fees to those which are not registered lobbyists or which do not maintain a political action fund. While I do not accept fees, other than transportation reimbursement, for speaking engagements, I realize that many of my colleagues do. The resolution already contains severe limitations on honoraria—limits total amount that can be received in a year and limits to $1,000 the amount that can be received for any one speech. These limits will sufficiently guard against a Senator being unduly influenced by honoraria without imposing the added burden of checking out each group that requests a Member to speak before them. If present I would have voted with the majority to table amendment No. 124.

II. DISCLOSURE

Schmitt amendment No. 90 would have required an annual statement of net worth and disclosure of basic Federal income tax information. While I make it a practice to disclose this information, I think that the detailed disclosure required by the Nelson committee resolution, which stops short of requiring Members and staff to have their assets appraised in order to arrive at a net worth figure, provides sufficient information to allow the voters to judge whether potential conflicts of interest exist. Had I been present I would have voted with the majority to table the amendment.

Schmitt amendment No. 153 requires disclosure of a financial interest of a spouse or dependent only if the interest is in the constructive control of the reporting individual. Constructive control is found if the enhancement of the interest would substantially benefit the reporting individual. I would have voted with the majority for this amendment as it presents a sensible guideline for determining when the interests of a spouse or dependent need to be publicly disclosed in order to give an accurate picture of any potential conflict of interest that might arise for the reporting individual.

III. OUTSIDE EARNED INCOME

A. Durkin amendment No. 103 would have excluded from the definition of "outside earned income," income from a family-owned farm which did not employ more than 10 employees, if the services rendered by the Member or employee are not a material income-producing factor. I would have voted to table the amendment as I see no need to make a special exception for family farms over other family businesses and even less reason to only apply it to farms with less than 10 employees. If the criteria for determining what outside earned income will be limited is how much time the Member or employee devotes to the business, additional qualifications on the type and size of a family enterprise are unnecessary.

B. Tower unprinted amendment No. 96 would have prohibited any Senator or Senate employee making $35,000 or more from accepting any Federal subsidy or any income from an enterprise which is regulated or financed by the Federal Government. Had I been present I would have voted with the majority to table this amendment. While the intent of the amendment was commendable, as drafted it went much too far in trying to avoid remote conflicts of interest. It would have prevented anyone employed by the Senate from having a savings account in a federally regulated bank. Senate Resolution 110 provides ample protections against real conflicts of interest.

For the same reasons, I would have voted to table a similar Tower amendment—unprinted amendment No. 97—which would have placed a limit on the amount of subsidy or income from a Federally regulated enterprise that a Member or employee could accept.

IV. CONFLICTS OF INTEREST

Durkin amendment No. 104. The resolution currently prohibits a Member, officer or employee from introducing or aiding the progress of legislation if a principal purpose of it is to further his pecuniary interests. The Durkin amendment would have broadened it so that if any part of a bill had this effect, the Member, officer, or employee could not in any way aid in its passage. I would have voted to table the amendment had I been present. The code sufficiently safeguards the public from the kind of self-interest legislation by the provision this amendment would have changed and by the detailed disclosure provisions.

V. UNOFFICIAL OFFICE ACCOUNTS

Stevenson amendment No. 146 would have prohibited Members from using excess campaign contributions for office expenses. Such prohibition would have gone into effect 30 days after the Senate expanded the uses for which official funds could be used. Had I been present I would have voted against the motion to table the amendment. This amendment would have mandated that political funds be used only for political purposes and that official funds be used only for official purposes. It seems to me that this is a basic separation of funds that should have been made a long time ago.

VI. ENFORCEMENT

Roth amendment No. 100 would have established an outside three-member commission to investigate serious allegations of wrongdoing against Members or Senate officers or employees. Its findings would be referred to the Senate Ethics Committee which could make any additional investigation it felt was necessary and would recommend appropriate action to the Senate. I would have voted with the majority to table the amendment because no hearings have been held on the concept of an outside group composed of retired Member's of Congress investigating current Members' conduct. There are serious constitutional as well as practical questions which need to be studied in connection with this proposal before it can be voted on in the Senate.

THE TREATMENT OF TRANSPORTATION UNDER THE RULES REQUIRING FINANCIAL DISCLOSURE AND RECEIPT OF GIFTS FROM CERTAIN INDIVIDUALS

Mr. NELSON. Mr. President, Senate Resolution 110 requires the disclosure of transportation received with a value in excess of $250 unless that transportation is part of personal hospitality or is received from a relative.

In the report accompanying Senate Resolution 110, the committee has tried to be very clear about what type of trans-

portation must be reported and what type of transportation is not required to be reported. With respect to the transportation included in personal hospitality, the report is sufficiently precise. Transportation on a pleasure boat owned by an individual which someone is visiting or other transportation provided by an individual but not substituting for commercial transportation, would be included in personal hospitality. For a more detailed discussion of personal hospitality, one should refer to the report.

The rules on financial disclosure and gifts are attempting to require the reporting of or the regulation of transportation which is provided as a gift. A detailed definition of what is a gift can be found in each of these rules. If money is received as a reimbursement for other than necessary expenses, this is a gift. Thus, if a Senator is going to speak in California and the group he is speaking to not only pays for his plane flight to California but also his plane flight on to Hawaii for the weekend and back, the reimbursement received for the transportation to and from Hawaii would be other than a necessary expense and therefore a gift. However, the reimbursement for the cost of transportation necessary to get to and from the speaking engagement which reimbursement is received from the group or person before which the Senator is speaking, is not a gift but a reimbursement for a necessary expense.

Similarly, if the group or person before whom the Senator is speaking provides actual transportation instead of reimbursing the Senator for commercial transportation, that actual transportation necessary to get to and from the speaking engagement is not a gift and, therefore, need not be reported and is not prohibited.

A couple of examples will serve to illustrate this distinction. If a Senator is invited to speak to a group in a rural part of Vermont and the Senator states that he could only speak on that occasion if his transportation can be provided to and from Washington in such a manner that the Senator does not miss any votes on the Senate floor, then a private plane provided by the group to which the Senator is speaking taking the Senator from Washington to the speaking engagement and returning the Senator to Washington would be transportation provided in a situation where the transportation is a necessary expense and is not a gift. This principle is not limited to transportation to speaking engagements where honoraria are received. If a Senator is requested to inspect a part of the Alaskan pipeline and the trip is part of the Senator's official business, transportation to and from the pipeline by the company building the pipeline would be necessary transportation provided for the Senator to perform his governmental function and would not be a gift. However, if a large corporation told the Senator that they had a private airplane which would be at his disposal any Friday afternoon to take him back to his home State for the weekend, this would be a gift even if the Senator were returning to his home State for official business.

A good deal of commonsense will be needed to apply this interpretation of reportable and prohibited transportation to actual everyday situations. Senate Resolution 110 provides for the Ethics Committee to give advisory opinions to help guide Senators and high-level officials in determining whether transportation is covered or not by rules XLII and XLIII of the proposed Code of Official Conduct. It is likely that transportation provided in a private airplane by a lobbyist or corporation with a political action committee would be a gift if that transportation is between Washington and the Senator's home State and the Senator is not involved in a speaking engagement, meeting, or inspection tour affecting that corporation. However, private airplane transportation within a State, especially the larger Western States, where a corporation provides a private airplane for a Senator to inspect a facility or area affected by the corporation's activity, is much more likely not to be a gift.

In determining whether transportation is a gift, whether or not the transportation is to or from, or within the Senator's home State, is not determinative. Someone can receive transportation which is not a gift to a speaking engagement in an other State. Further, any transportation received for personal purposes or for vacation purposes would always be a gift and, therefore, covered by rules XLII and XLIII.

One further point should be made with respect to the applicability of rules XLII and XLIII to transportation. It is the intent of the sponsors of Senate Resolution 110 that if a Senator travels on a private airplane owned by a corporation, that transportation is not a gift if the Senator reimburses the owner of the plane for the cost of the equivalent commercial air transportation.

The above description of what transportation is considered a gift for the purposes of Senate Resolution 110 was drafted in cooperation with Senator STEVENS who raised some questions about this topic a few days ago. Senator STEVENS, have I accurately described the treatment of transportation and is that treatment satisfactory to you?

Mr. STEVENS. Mr. President, I first would like to thank Senator NELSON, the manager of this resolution, and his staff for working with me and my staff to clarify the interpretation of the proposed Code of Official Conduct with respect to transportation received by a Senator. Senator NELSON has accurately stated how I believe the code should be interpreted.

I have a series of additional questions I would like to pose to the manager of the bill to clarify the application of the code in this area. As I understand the code, if a group of Senators go fishing on a boat owned by an individual, that is personal hospitality and is not covered by rules XLII or XLIII. No disclosure is required and that activity is not prohibited even if the individual is a registered lobbyist.

Mr. NELSON. That is correct.

Mr. STEVENS. If the fishing boat is owned by a local corporation which is not a registered lobbyist and does not have a political action committee, the Senator would have to disclose the value of the use of the boat if the value exceeded $250 but use of the boat would not be prohibited under rule XLIII, no matter what the value of the use of the boat.

Mr. NELSON. The Senator is correct.

Mr. STEVENS. If the boat is owned by a corporation with a political action committee, the Senator could not accept use of the boat worth more than $100.

Mr. NELSON. That is correct. It should be made clear that the value of the use of the boat would be based upon the cost of renting or leasing a comparable boat. If 10 people go out for a day on a boat and a comparable boat would cost $660 a day to rent, the value of the use of the boat to each individual is $66.

Mr. STEVENS. I would like to thank the floor manager for engaging in this very informative colloquy with me.

The PRESIDING OFFICER. What is the will of the Senate?

Mr. FORD. I suggest the absence of a quorum, Mr. President.

The PRESIDING OFFICER. The clerk will call the roll.

The assistant legislative clerk proceeded to call the roll.

Mr. ROBERT C. BYRD. Mr. President, I ask unanimous consent that the order for the quorum call be rescinded.

The PRESIDING OFFICER. Without objection, it is so ordered.

ROUTINE MORNING BUSINESS

Mr. ROBERT C. BYRD. Mr. President, I ask unanimous consent that there now be a period for the transaction of routine morning business.

The PRESIDING OFFICER. Without objection, it is so ordered.

THE JOHN SHERMAN COOPER DAM AND RESERVOIR—S. 1205

Mr. BAKER. Mr. President, it was a pleasure to meet yesterday in my office with Mrs. Opal Lucas of London, Ky., who is a good and loyal friend of former Senator John Sherman Cooper and a strong leader for her region and State.

Mrs. Lucas brought to me a resolution unanimously adopted at the 1977 Kentucky Fifth District Lincoln Day Dinner. This annual banquet at Cumberland Falls is a great tradition in the Fifth District of Kentucky, where my father was born. I fondly recall speaking at the Fifth District Lincoln Day Dinner in the past, as did also my father and my wife's father, Senator Dirksen, before me.

The resolution requests the Army Corps of Engineers to name the Laurel River Lake in Laurel County, Ky., the "John Sherman Cooper Dam and Lake." Mr. President, I ask unanimous consent that a copy of this resolution be printed in the RECORD at the conclusion of my remarks.

The PRESIDING OFFICER. Without objection, it is so ordered.

(See exhibit 1.)

Mr. BAKER. To name this beautiful, new Corps of Engineers lake—located in the vicinity of Senator Cooper's home—

after the distinguished former Senator and Ambassador would be a fitting recognition of Senator Cooper's dedicated, long, and outstanding service to his county, State, and Nation.

Mr. President, I have discussed this matter with my colleagues from Kentucky, Senators HUDDLESTON and FORD, who are, I believe, on the floor at this time; and I have discussed it as well with the distinguished representative of the Fifth Congressional District of Kentucky, Dr. TIM LEE CARTER, and it is my pleasure at this time, Mr. President, to send to the desk a bill on my behalf and on behalf of Senators HUDDLESTON and FORD, and I ask for its appropriate referral.

The PRESIDING OFFICER. The bill will be received and appropriately referred.

EXHIBIT 1

RESOLUTION REQUESTING THE ARMY CORPS OF ENGINEERS TO NAME THE LAUREL RIVER DAM THE JOHN SHERMAN COOPER DAM AND RESERVOIR

Whereas, the Laural River Dam and Lake is an actuality, largely through the efforts of our own distinguished, former United States Senator, John Sherman Cooper, and,

Whereas, this beautiful dam and reservoir is a boon to this and neighboring counties, in that it provides much needed energy and makes accessible to man the varied beauties of nature—fauna-flora-rocks, rills and all facets of nature at its best, and,

Whereas, it is a source of pleasure to boaters, water skiers, and fisherman and lovers of nature in such fashion that it has caused and will cause this region to blossom as the "Rose of Sharon," and,

Whereas, the dedicated efforts of other great statesmen who worked unceasingly to procure the selfsame benefits to a particular area have been honored to have these named for them, to wit—"Barkley Lake" in western Kentucky; "Norris Lake" in east Tennessee; "Sam Rayburn Lake" in Texas, and many others too numerous to mention, and,

Whereas, John Sherman Cooper is recognized throughout the nation and the world as an outstanding United States Senator; an outstanding Ambassador to India, and more recently, an outstanding Ambassador of this nation to East Germany; and,

Whereas, the life of John Sherman Cooper for the most part, in war and peace, has been dedicated to public service, not only for this state and nation, but for the entire world, and is so recognized by Republicans, Democrats, and Independents, who all attest that he has fulfilled the admonition of the Master, who said: "He that would be greatest of all, let him be servant of all." John Sherman Cooper throughout his entire career has observed the commandment of the Man of Gallilee, and,

Whereas, John Sherman Cooper, both in private life and public life has emulated the great emancipator, Lincoln, that we honor here tonight, in humility, service, faith, compassion, justice, humor and other qualities of greatness. We, the members of the Fifth District Lincoln Republican Club think that it is altogether fitting and proper that the Laurel River Dam and Lake be named in honor of the faithful, dedicated servant of all the people of the Commonwealth of Kentucky to the "John Sherman Cooper Dam and Lake," and,

Whereas, this great statesman, John Sherman Cooper, like Ulysses of old, has traveled a little further, thought a little deeper, and striven always to steer his party in the right direction, by this Resolution may we show our gratitude to Senator Cooper, whose motto for serving his party has been, "To strive, to seek, to find, and not to yield."

Therefore, be it resolved that this organization, in its 39th annual session, request that Laurel River Lake and Dam be renamed, "The John Sherman Cooper Lake and Dam" in honor of the memorable services of John Sherman Cooper, and be it further resolved that all civic clubs in this region make the same request of the Corps of Engineers to name the lake and dam in honor of this great statesman.

Mr. HUDDLESTON. Mr. President, I am very pleased to join with the distinguished Senator from Tennessee in supporting this proposal in naming this beautiful lake and dam located in Laurel County, Ky., very near the birthplace of Senator John Sherman Cooper, after this distinguished Kentuckian and distinguished American.

As long as I can remember in Kentucky the name of John Sherman Cooper has been prominent among our statesmen and among our public officials.

I am very pleased and honored to be serving in the seat held here in the U.S. Senate by Senator Cooper prior to his retirement from this body.

Senator Cooper was a gentleman certainly in the finest Kentucky tradition, and we are proud of that tradition in Kentucky, proud of the sons of Kentucky whom we have sent forth not only to this capital but throughout the world to serve the people.

Senator Cooper did serve Kentucky in the legal profession, as a county judge, as a State legislator, and as a Member of the U.S. Senate. Certainly he served the entire Nation not only as a Senator but as an Ambassador to India, as an adviser to Secretaries of State and to Presidents and, most recently, in a very important post, as our first Ambassador to East Germany.

Greater service to the Nation and to the State has been a hallmark of John Sherman Cooper. He is not of my party. He represents a member of the Republican Party, and that makes him something of a political phenomenon as far as our State of Kentucky is concerned because even though he was not always successful in his attempts for reelection, as no Republican could expect to be in the Democartic State of Kentucky, he did enjoy a longer tenure in public office than any other Republican and virtually was unbeatable as he reached the end of his long and distinguished public service.

The reason he was so acceptable to all Kentuckians, as he was to all Americans, was that all of his actions in public office reflected the general good of the public. He never resorted to narrow partisanship in any capacity in which he served the American people or the people of Kentucky.

The naming of this particular facility, this beautiful lake and dam, is particularly appropriate because Senator Cooper devoted a great deal of his time and effort to preserving the natural heritage we have in this country; he was active in wilderness legislation in the Wild Rivers Act, and the National Historical Preservation Act.

There are many in this body who are more intimately acquainted with his service here in the U.S. Senate than I am and what he meant to this body and what his service, for instance, on the Committee on Foreign Relations meant to this entire Nation and to the world.

So it is not necessary for me to reiterate that service and the high esteem those who served with him and knew him on both sides of the aisle felt for John Sherman Cooper.

I would just say again I am pleased to join in this movement, and I appreciate the fact that the Senator from the great State of Tennessee (Mr. BAKER), who knew John Sherman Cooper well from his early childhood, has initiated this action, and I join wholeheartedly in his effort and recommend it to the Senate.

I thank the Presiding Officer.

Mr. FORD. Mr. President, I am pleased to join with my colleague from Kentucky and my colleague from Tennessee in endeavoring to honor this outstanding Kentuckian, John Sherman Cooper, a man who has distinguished himself in public service, service at the county level, State level, nationally, and on the international scene.

Only this week the former Senator and Ambassador was in my office working with my staff and with me to assist us in our efforts to help a local group.

This distinguished Kentuckian is still interested in people and is still working for them.

I think it is appropriate to name this lake and this dam for John Sherman Cooper because this area is a very beautiful area.

It is one he recognized at an early date, and one he worked so hard to bring about. This area will be one that those who are sportsmen will enjoy, it is one that those who are nature lovers will enjoy, and those who would go and relax in the tranquil area of the countryside will enjoy.

I am very pleased to see this effort is being made and I, too, feel this is just a small token of appreciation of the people of the Commonwealth of Kentucky and of this country to say to John Sherman Cooper that "we appreciate your work, we appreciate your dedication as a public servant, we appreciate your faithfulness in your duty as a public servant."

I, too, hope that the appropriate committee will work very quicky in sending this back to the Senate floor so that we might take the necessary steps to make his a permanent thing and name it, the dam and the lake, after this distinguished Kentuckian.

MESSAGES FROM THE PRESIDENT

Messages from the President of the United States were communicated to the Senate by Mr. Chirdon, one of his secretaries.

EXECUTIVE MESSAGES REFERRED

As in executive session, the Presiding Officer laid before the Senate messages from the President of the United States submitting sundry nominations which

were referred to the appropriate committees.

(The nominations received today are printed at the end of the Senate proceedings.)

BUDGET OF THE DISTRICT OF COLUMBIA—MESSAGE FROM THE PRESIDENT—PM 61

The Presiding Officer laid before the Senate the following message from the President of the United States, which was referred to the Committee on Appropriations:

To the Congress of the United States:

In accordance with the District of Columbia Self-Government and Governmental Reorganization Act, I am today transmitting for your consideration the budget of the District of Columbia for fiscal year 1978.

JIMMY CARTER.

THE WHITE HOUSE, *March 31, 1977.*

MESSAGE FROM THE HOUSE

At 11:50 a.m., a message from the House of Representatives delivered by Mr. Hackney, one of its clerks, announced that the House disagrees to the amendments of the Senate to the bill (H.R. 4800) to extend the Emergency Unemployment Compensation Act of 1974 for an additional year, to revise the trigger provisions in such act, and for other purposes; agrees to the conference requested by the Senate on the disagreeing votes of the two Houses thereon; and that Mr. ULLMAN, Mr. CORMAN, Mr. RANGEL, Mr. STARK, Mr. JACOBS, Mrs. KEYS, Mr. FISHER, Mr. CONABLE, Mr. VANDER JAGT, and Mr. KETCHUM were appointed managers of the conference on the part of the House.

The message also announced that the Speaker has appointed as members of the United States delegation of the Canada-U.S. Interparliamentary Group Mr. FASCELL, chairman; Mr. JOHNSON of California, vice chairman; Mr. BOLAND, Mr. GIBBONS, Mr. HANLEY, Mr. MEEDS, Mr. LAFALCE, Mr. CAVANAUGH, Mr. MCEWEN, Mr. WINN, Mr. GOODLING, and Mr. JEFFORDS.

The message further announced that the House has agreed to, without amendment, the concurrent resolution (S. Con. Res. 8) authorizing the printing of the committee print entitled "The Accounting Establishment" as a Senate document.

COMMUNICATIONS FROM EXECUTIVE DEPARTMENTS, ETC.

The PRESIDING OFFICER laid before the Senate the following communications which were referred as indicated:

EC–1025. A letter from the Secretary of the Navy transmitting a draft of proposed legislation to amend section 409 of title 37, United States Code, to eliminate restrictions for transporting a house trailer or mobile dwelling by a member of the uniformed services, and for other purposes (with accompanying papers); to the Committee on Armed Services.

EC–1026. A letter from the Deputy Assistant Secretary of Defense, Installations and Housing, transmitting, pursuant to law, notice of 28 construction projects to be undertaken by the Army National Guard (with accompanying papers); to the Committee on Armed Services.

EC–1027. A letter from the Chairman of ConRail transmitting, pursuant to law, a summary of activities and accomplishments of the Consolidated Rail Corporation for the nine month period ending December 31, 1976 (with an accompanying report); to the Committee on Commerce, Science, and Transportation.

EC–1028. A letter from the Secretary of Health, Education, and Welfare transmitting, pursuant to law, a report of Federal activities related to welfare programs for the period from July 1, 1975, to June 30, 1976 (with an accompanying report); to the Committee on Finance.

EC–1029. A letter from the Chairman of the National Advisory Council on the Education of Disadvantaged Children transmitting, pursuant to law, the 1977 Annual Report of the National Advisory Council on the Education of Disadvantaged Children (with an accompanying report); to the Committee on Human Resources.

EC–1030. A letter from the Director of the Administrative Office of the United States Courts transmitting a draft of proposed legislation to amend the Federal Rules of Criminal Procedure to provide for appellate review of sentence in certain circumstances (with accompanying papers); to the Committee on the Judiciary.

EC–1031. A letter from the Comptroller General of the United States transmitting, pursuant to law, a report entitled "Recruitment and Retention of Veterans Administration Health Care Workers are not Major Problems" (HRD–77–57, March 31, 1977) (with an accompanying report); to the Committee on Governmental Affairs.

EC–1032. A letter from the Deputy Assistant Secretary of Defense transmitting, pursuant to law, a listing of names of persons who have filed the reports for fiscal year 1976 as required by section 410(b) of Public Law 91–121 (with an accompanying report); to the Committee on Armed Services.

PETITIONS

The PRESIDING OFFICER laid before the Senate the following petitions which were referred as indicated:

POM–115. House Joint Resolution No. 26 adopted by the Legislature of the State of Montana requesting that the Congress of the United States take into consideration climatic and soil conditions and raise the general 160-acre limitation on lands under single ownership which may be irrigated from Federal reclamation projects to reflect varying climatic and soil and conditions; to the Committee on Energy and Natural Resources;

"HOUSE JOINT RESOLUTION NO. 26

"A joint resolution of the Senate and the House of Representatives of the State of Montana requesting that the Congress of the United States take into consideration climatic and soil conditions and raise the general 160-acre limitation on lands under single ownership which may be irrigated from Federal reclamation projects to reflect varying climatic and soil conditions

"Whereas, the Reclamation Act of 1902 generally provides that no water may be sold for lands in excess of 160 acres in single ownership; and

"Whereas, the Omnibus Adjustment Act of 1926 provides in effect that the owners of irrigable lands in excess of 160 acres must dispose of this excess before they can receive water from a federal project; and

"Whereas, due to the climatic and soil conditions of a great portion of Montana and of the other Northwestern States a 160-acre parcel is not an economic agricultural production unit; and

"Whereas, the climatic and soil conditions of a great portion of Montana and of the other Northwestern States require a farm or ranch unit containing in excess of 160 irrigable acres in order to achieve a viable agricultural production unit which can support a family; and

"Whereas, the State of Montana owns substantial acreages of potentially irrigable land within irrigation districts; and

"Whereas, Congress has seen fit to grant exemptions from the 160-acre limitation to the Northern Colorado Water Conservancy District; and

"Whereas, the Small Reclamation Projects Act of 1956 has been construed to grant an exemption from the 160-acre limitation.

"Now, therefore, be it resolved by the Senate and the House of Representatives of the State of Montana:

"That, the Congress of the United States is requested to take into consideration climatic and soil conditions and raise the general 160-acre limitation on lands under single ownership, and provide special provisions allowing additional acreage to lessees of state land, which may be irrigated from Federal Reclamation Projects to reflect varying climatic and soil conditions and state ownership.

"Be it further resolved:

"That, the Secretary of State shall send a copy of this resolution to the President of the Senate of the United States, the Speaker of the House of Representatives of the United States, the Montana congressional delegation, the Secretary of the Interior, the Commissioner of the Bureau of Reclamation, and the legislatures of the several States."

POM–116. House Joint Resolution No. 270 adopted by the General Assembly of the Commonwealth of Virginia memorializing Congress to allow regulation of surface mining of coal to remain in the hands of the States; to the Committee on Energy and Natural Resources:

"HOUSE JOINT RESOLUTION NO. 270

"Whereas, coal is our nation's most abundant fossil fuel; and

"Whereas, our nation faces an energy crisis of potentially devastating proportions, with coal being the only reliable and proven energy source available to meet our needs for the foreseeable future; and

"Whereas, over one-half of our total coal production now comes from surface mines; and

"Whereas, recognizing the necessity to properly control surface mining and reclamation operations, Virginia and thirty-seven other states, including all major coal producing states, now have surface mining laws; and

"Whereas, these laws are based on the desires and judgements of the citizens of the respective states, taking into account differences in climate, terrain, coal quality and quantity, transportation facilities, and other unique considerations; and

"Whereas, there is overwhelming evidence that House Resolution 2 and similar bills before the Congress would result in reduced coal production, greater dependence upon foreign oil, increased unemployment in the coal-producing counties of Virginia and other states, and unnecessary economic disruptions throughout our nation; and

"Whereas, the United Mine Workers of America voted overwhelmingly on September twenty-nine, nineteen hundred seventy-six, at their Cincinnati, Ohio, convention to withdraw their previous support of federal coal and surface mining legislation; now, therefore, be it

"Resolved by the House of Delegates, the Senate concurring, That regulation of coal surface mining and reclamation should remain the exclusive responsibility of the sev-

eral states, and that Congress should refrain from forcing federal intrusion into this area which is, and ought to remain, a matter properly under the control of those citizens directly affected; and, be it

"Resolved further, That the Clerk of the House of Delegates is hereby instructed to send copies of this resoluiton to the President of the United States, the President of the United States Senate, the Speaker of the House of Representatives, the Secretary of the Interior, and the members of the Virginia delegation to the United States Congress as an expression of the sense of this body."

REPORTS OF COMMITTEES

The following reports of committees were submitted:

By Mr. JACKSON, from the Committee on Energy and Natural Resources:

Special Report entitled "History, Jurisdiction, and a Summary of Legislative Activities during the 94th Congress of the Committee on Interior and Insular Affairs (Rept. No. 95–79).

By Mr. WILLIAMS, from the Committee on Human Resources:

Special Report entitled "Legislative Review Activity" (Rept. No. 95–80).

By Mr. LONG, from the Committee on Finance:

Special Report entitled "Legislative Review Activity" (Rept. No. 95–81).

EXECUTIVE REPORTS OF COMMITTEES

The following executive reports of committees were submitted:

By Mr. NELSON, from the Select Committee on Small Business:

Arthur Vernon Weaver, Jr., of Arkansas, to be Administrator of the Small Business Administration.

(The above nomination was reported with the recommendation that it be confirmed, subject to the nominee's commitment to respond to requests to appear and testify before any duly constituted committee of the Senate.)

By Mr. WILLIAMS, from the Committee on Human Resources:

Mary Berry, of Colorado, to be Assistant Secretary for Education in the Department of Health, Education, and Welfare.

Ernest LeRoy Boyer, of New York, to be Commissioner of Education.

(The above nominations were reported with the recommendation that they be confirmed, subject to the nominees' commitment to respond to requests to appear and testify before any duly constituted committee of the Senate.)

By Mr. STENNIS, from the Committee on Armed Services:

David Emerson Mann, of Maryland, to be an Assistant Secretary of the Navy.

William James Perry, of California, to be Director of Defense Research and Engineering.

(The above nominations were reported with the recommendation that they be confirmed, subject to the nominees' commitment to respond to requests to appear and testify before any duly constituted committee of the Senate.)

INTRODUCTION OF BILLS AND JOINT RESOLUTIONS

The following bills and joint resolutions were introduced, read the first time and, by unanimous consent, the second time, and referred as indicated.

By Mr. McGOVERN:

S. 1190. A bill to authorize appropriations for the Department of State, the United States Information Agency, the Board for International Broadcasting, and the Arms Control and Disarmament Agency; to establish for those agencies requirements and guidelines regarding policy and procedures; and for other purposes; to the Committee on Foreign Relations.

By Mr. McGOVERN (for himself, Mr. PERCY, Mr. HUMPHREY, Mr. BELLMON, and Mr. DOLE):

S. 1191. A bill to amend the Public Health Service Act to establish a Bureau of Human Development, and for other purposes; to the Committee on Human Resources.

By Mr. JACKSON (by request):

S. 1192. A bill to provide for the relief of certain residents of the Trust Territory of the Pacific Islands; to the Committee on Energy and Natural Resources.

By Mr. JACKSON (by request):

S. 1193. A bill to authorize $15 million for the Government of Guam; to the Committee on Energy and Natural Resources.

By Mr. CHURCH (for himself, Mr. CLARK, Mr. WILLIAMS, Mr. HUMPHREY, Mr. STEVENSON, Mr. RANDOLPH, Mr. LEAHY, Mr. INOUYE, Mr. STONE, Mr. ABOUREZK, Mr. HUDDLESTON, Mr. BROOKE, Mr. BURDICK, Mr. METCALF, Mr. EASTLAND, Mr. STAFFORD, Mr. JACKSON, Mr. MAGNUSON, Mr. PELL, Mr. EAGLETON, Mr. HATFIELD, and Mr. KENNEDY):

S. 1194. A bill to amend titles II, VII, XI, XVI, XVIII, and XIX of the Social Security Act to provide for the improved administration of the old-age, survivors, and disability insurance program, the supplemental security income program, and the medicare program by a newly established independent Social Security Administration, to separate social security trust fund items from the general Federal budget, to prohibit the mailing of certain notices with social security and supplemental security income benefit checks, and for other purposes; to the Committee on Finance.

By Mr. DURKIN:

S. 1195. A bill to amend title 38 of the United States Code to make certain that recipients of veterans' pension and compensation will not have the amount of such pension or compensation reduced because of increases in monthly social security benefits; to the Committee on Veterans' Affairs.

By Mr. ABOUREZK:

S. 1196. A bill for the relief of Alfred Feghali; to the Committee on the Judiciary.

By Mr. DOLE:

S. 1197. A bill to amend title XVIII of the Social Security Act to provide coverage for services which may be performed by a dentist on the same basis as presently allowed for physicians under the medicare program, and to authorize payment under such program for all inpatient hospital services furnished in connection with dental procedures requiring hospitalization; to the Committee on Finance.

By Mr. CHILES:

S. 1198. A bill to amend the Strategic and Critical Materials Stock Piling Act, and for other purposes; to the Committee on Armed Services.

By Mr. McINTYRE:

S. 1199. A bill to amend title 5 of the United States Code to improve agency rulemaking by establishing paperwork control mechanisms by expanding opportunities for public participation, and by enabling the President to delay the implementation of certain rules for one year to allow a more comprehensive analysis of congressional intent and public impact, and for other purposes; to the Committee on Governmental Affairs.

By Mr. ABOUREZK (for himself, Mr. THURMOND, Mr. McGOVERN, Mr. RANDOLPH, Mr. DOMENICI, Mr. HUMPHREY, Mr. HATHAWAY, and Mr. HOLLINGS):

S. 1200. A bill to amend section 306(a) of the Consolidated Farm and Rural Development Act to prescribe criteria for determining the amount of grants made under such section, to prescribe the priority of applicants for loans and grants under such section, and for other purposes; to the Committee on Agriculture, Nutrition, and Forestry.

By Mr. GOLDWATER:

S. 1201. A bill to amend title 5 of the United States Code to allow congressional employees with long periods of service with the same Member of Congress to receive Civil Service retirement credit for employment by the Member during a break in service of the Member; to the Committee on Governmental Affairs.

By Mr. McCLURE (for himself and Mr. CHURCH):

S. 1202. A bill to provide for the transfer of certain lands to the Secretary of the Interior by the Energy Research and Development Administration for sale to farmers damaged by the Teton flood; to the Committee on Energy and Natural Resources.

By Mr. LAXALT (for himself, Mr. GARN, Mr. McCLURE, and Mr. MELCHER):

S. 1203. A bill to amend the Federal Land Policy and Management Act of 1976 relating to certain rules and regulations promulgated by the Secretary of the Interior and the Secretary of Agriculture; to the Committee on Energy and Natural Resources.

By Mr. JOHNSTON:

S. 1204. A bill entitled "The Saccharin Control Act of 1977"; to the Committee on Human Resources.

By Mr. BAKER (for himself, Mr. HUDDLESTON, and Mr. FORD):

S. 1205. A bill to provide that the lake referred to as the "Laurel River Lake" on the Laurel River, Kentucky, shall hereafter be known as the John Sherman Cooper Lake and that the dam forming such lake shall hereafter be referred to as the John Sherman Cooper Dam; to the Committee on Environment and Public Works.

By Mr. HUMPHREY:

S.J. Res. 42. A joint resolution to authorize and request the President to issue a proclamation designating the year 1977 as the "Year of Education" in honor of the Lubavitcher Rebbe, Rabbi Menachem Mendel Schneerson; to the Committee on the Judiciary.

STATEMENTS ON INTRODUCED BILLS AND JOINT RESOLUTIONS

By Mr. McGOVERN:

S. 1190. A bill to authorize appropriations for the Department of State, the U.S. Information Agency, the Board for International Broadcasting, and the Arms Control and Disarmament Agency; to establish for those agencies requirements and guidelines regarding policy and procedure; and for other purposes; to the Committee on Foreign Relations.

FOREIGN RELATIONS AUTHORIZATION ACT, FISCAL YEAR 1978

Mr. McGOVERN. Mr. President, in recent years, for purposes of efficiency, the Foreign Relations Committee has dealt with the annual authorizations for various foreign affairs agencies through a consolidated Foreign Relations Authorization Act, rather than by means of in-

dividual bills for each agency as submitted by the executive branch. This omnibus bill has proven to be an effective legislative vehicle; it and the yearly Foreign Assistance Act now constitute the two major pieces of annual foreign affairs legislation.

Mr. President, I now introduce the Foreign Relations Authorization Act, fiscal year 1978, which consists simply of the provisions of the several bills submitted by the administration providing fiscal year 1978 authorizations for the State Department, the U.S. Information Agency, the Board for International Broadcasting, and the Arms Control and Disarmament Agency. The Subcommittee on International Operations, of which I am chairman, will be considering the State, USIA, and BIB requests contained in this bill in the weeks ahead, during which time the Arms Control Subcommittee chaired by Senator PELL will be considering the ACDA request. I anticipate that the full committee will then, after considering the recommendations made by the two subcommittees, report out, with appropriate amendments, the bill I have just introduced.

By Mr. McGOVERN (for himself, Mr. PERCY, Mr. HUMPHREY, Mr. BELLMON, and Mr. DOLE):

S. 1191. A bill to amend the Public Health Service Act to establish a Bureau of Human Development, and for other purposes; to the Committee on Human Resources.

PREVENTIVE MEDICINE, HEALTH MAINTENANCE AND HEALTH PROMOTION

Mr. McGOVERN. Mr. President, today I am introducing legislation which provides for a national preventive medicine, health maintenance and health promotion initiative, using research in nutrition as the cornerstone upon which to build a healthier and more productive America.

By authorizing and directing the Federal health research machinery to include prevention among its priorities, greater clarity and direction should be brought to many crucial areas, including basic and applied research, program implementation, program evaluation, technology evaluation, data collection, analysis and dissemination, and policy formation.

In July 1976, the Select Committee on Nutrition and Human Needs initiated a series of hearings, which are still in progress, focusing on diet and health. These hearings are a part of a major effort by the committee to make preventive health care an integral part of our national health policy and programs.

The hearing record to date clearly demonstrates the vital role of good nutrition in maintaining and promoting optimal health. On the first day of the hearings, the Assistant Secretary for Health, Dr. Ted Cooper, stated that besides general self-care and self-responsibility, nutrition was most important in health maintenance and promotion. He went on to say that we must call to public attention the underlying conditions or antecedent causes of preventable diseases rather than concentrating solely on the treatment of diseases themselves. He added that people throughout the Nation want and can benefit from more authoritative guidance about nutrition, that there is much already known which has not been transmitted, and that there are still many gaps in our understanding of nutrition which must be filled by intensified research.

Both the fiscal year 1977–81 and fiscal year 1978–82 forward plans for Health, DHEW, emphasize the importance of nutrition research and programs.

The hearing record already has provided substantial evidence of the potential savings if Americans ate a better diet. The No. 1 killer in the United States, cardiovascular disease, is costing $60 billion a year alone from health care expenditures and lost productivity. USDA estimated that a better diet could reduce this cost by 25 percent.

It is equally important to consider the significant reduction in morbidity which can result from an improved diet. Enhanced learning capacity in our infants and children, fewer sick leave days among the adult working population, and greater vitality for Americans of all ages are just a few of the benefits which can increase the quality of life for the Nation.

The sense of the Nutrition Committee is that the United States must begin to redress the past overemphasis on disease oriented, curative medicine; and that since we all must eat to live, nutrition and diet is one place that all Americans can and should take responsibility for improving their own health and the quality of their lives.

I believe this legislation is a significant step forward in addressing the need for a preventive emphasis in health—away from sickness and toward the concept of wellness.

I ask unanimous consent that the bill and an explanation of the bill be printed at this point in the RECORD.

There being no objection, the bill and analysis were ordered to be printed in the RECORD, as follows:

S. 1191

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That this Act may be cited as the "National Preventive Medicine, Health Maintenance and Health Promotion Act of 1977".

FINDINGS

SEC. 2. The Congress finds that—

(1) many of today's health problems are caused by a variety of factors not susceptible to medical solutions or to direct intervention by a health provider;

(2) health care costs were $135 billion in fiscal year 1976, of which 40 percent were Federal dollars, and are projected to be $230 billion in fiscal year 1980;

(3) our rapidly escalating health care costs are not producing a commensurate increase in the quality of the Nation's health;

(4) the average life expectancy for a white male age 45 has increased by only 3.6 years between 1900 and 1973.

(5) in fiscal year 1976, the Federal Government spent an amount for "prevention and protection" which represents only 3.1 percent of the total Federal health budget and less than 1 percent of all United States health care expenditures in fiscal year 1976;

(6) to a substantial degree an individual's behavior and lifestyle such as smoking, alcohol consumption, exercise, hours of sleep, stress, and dietary habits, are capable of both causing and preventing certain chronic and degenerative disease problems including cancer, cardiovascular disease, diabetes, and cirrhosis of the liver.

(7) 6 of the 10 leading causes of death in the United States are related to diet;

(8) it has been estimated that an overall savings of 20 percent in the yearly cost of medical care could be achieved through an improved diet;

(9) there are still many gaps in our understanding of nutrition which will require intensified research;

(10) it is imperative that the United States begin to address the past overemphasis on disease-oriented, curative medicine and begin a preventive approach to the study of certain chronic and degenerative diseases.

PURPOSES

SEC. 3. It is the purpose of this Act to—

(1) establish at the National Institutes of Health a Bureau of Human Development, having a preventive and curative, noncategorical perspective on health, and consisting of two new institutes:

(A) the National Institute of Family Health,

(B) the National Institute on Population Sciences, which assume the responsibilities of the National Institute of Child Health and Human Development, and three existing Institutes:

(C) the National Institute of General Medical Sciences,

(D) the National Institute on Aging, and

(E) the National Institute on Environmental Health Sciences,

(2) establish the position of Associate Director for Preventive Medicine within the Office of the Director, NIH,

(3) rename the Center for Disease Control the National Center for Health Maintenance and Promotion,

(4) include in the mission of the Bureau of Human Development such priorities as nutrition, genetics, and epidemiology,

(5) revise and expand the mission at the National Center for Health Maintenance and Promotion for such priorities as nutrition, health education and epidemiology, and

(6) provide lead agency responsibility with regard to a national initiative for preventive medicine, health maintenance and health promotion to the Bureau of Human Development; the National Center for Health Maintenance and Promotion; the National Center for Health Services Research; the National Center for Health Statistics; and the Office of Health Information and Health Promotion in the Office of the Assistant Secretary for Health, the Department of Health, Education, and Welfare.

TITLE I—BUREAU OF HUMAN DEVELOPMENT

SEC. 101. Part E of title IV of the Public Health Service Act is amended to read as follows:

"ESTABLISHMENT OF NATIONAL BUREAU OF HUMAN DEVELOPMENT

"SEC. 441. (a) There is hereby established in the Public Health Service a National Bureau of Human Development (hereinafter in this part referred to as the 'Bureau') for the purpose of conducting, supporting, and fostering basic and applied research and training relating to the maintenance of health, and the prevention and cure of disease by the study of the continuum of human development not limited to but including human reproduction, fertility and heredity, child and maternal health, adolescent health, family health and the special health problems and requirements of adults, particularly those related to aging and the aged; by the study of man-made agents in the environment which impact on the continuum of

human development; and for the purpose of providing a non-categorical perspective at the National Institutes of Health for biomedical and social science research with particular emphasis on maintaining a strong basic research effort in general medical science and human biology and giving special attention to Bureau-wide priorities not limited to but including nutrition, genetics, epidemiology and where justified longer-term research programs.

"(b) The Director of the Bureau shall be appointed by the Secretary upon recommendations from the Director of National Institutes of Health. The Director of the Bureau shall report directly to the Director of the National Institutes of Health. The Director of the Bureau shall establish an Information Office for Human Development Research to collect, catalog, and analyze all information derived from studies which have been and are being carried on in the United States and elsewhere and disseminate such information insofar as feasible through publication, conferences, meetings, and other forms of communication for the use and benefit of any person concerned with Human Development Research in any country.

"(c) With regard to the activities of the Bureau there is established a National Human Development Policy Advisory Board (hereinafter in this section referred to as the 'Board') to be composed of 22 members as follows:

"(1) The Director of the National Institutes of Health, and the Associate Director for Preventive Medicine of the National Institutes of Health, the Secretary of Health, Education, and Welfare, the Director of the National Science Foundation, the chief medical officer of the Veterans' Administration (or designee), a medical officer designated by the Secretary of Defense, and the Director of the Office of Health Information and Health Promotion shall be ex officio members of the Board, without voting status. The remaining members of the Board shall be appointed from persons who are among the leading scientific or medical authorities outstanding in the fields related to the Bureau's activities. Each appointed member of the Board shall be appointed from among persons who by virtue of their training, experience, and background are especially qualified to appraise the programs of the Bureau.

"(2)(A) Five members shall be appointed by the Secretary upon recommendation by the Bureau Director. Not more than 3 shall be scientists or physicians and not less than two shall be representatives from the general public. Of these five, one shall be particularly qualified to represent the Institute for Family Health, one shall be particularly qualified to represent the Institute on Population Sciences, one shall be particularly qualified to represent the Institute for General Medical Sciences, one shall be particularly qualified to represent the Institute on Aging, and one shall be particularly qualified to represent the Institute of Environmental Health Sciences.

"(B) Members appointed under subparagraph (A) shall serve four-year terms except that of the members first appointed, one shall be appointed for one year, one shall be appointed for two years, one shall be appointed for three years, and two shall be appointed for four years.

"(3) Two members (one a physician or scientist and one a representative of the general public) shall be appointed by each Institute Director of the Bureau to serve for two years, except that of the members first appointed, three physicians or scientists and two representatives from the general public shall be appointed for one year, and of the five, one each shall come from each Institute in the Bureau. These 10 members shall be chosen from those members already having served two years on their respective Institute Advisory Councils.

"(d)(1) Any member appointed to fill a vacancy occurring prior to expiration of the term for which his or her predecessor was appointed shall serve only for the remainder of such term. Appointed members shall be eligible for reappointment and may serve after the expiration of their term until their successors have taken office.

"(2) A vacancy in the Board shall not affect its activities, and 12 members thereof shall constitute a quorum.

"(e) One of the Bureau Director's appointed members shall be designated by the Bureau Director to serve as chairperson for a two-year term.

"(f) The Board shall meet at the call of the Bureau Director or the Chairperson, but not less than 4 times a year and shall advise and assist the Bureau Director with recommendations on Bureau Research policy priorities, budget requests and allocations, and the future direction and mission of the Bureau.

"(g) The Director of the Bureau shall designate a member of the staff of the Bureau to act as Executive Secretary of the Board.

"(h) The Board may hold such hearings, take such testimony and sit and act at such times and places as the Board deems advisable to investigate programs and activities of the National Human Development Program.

"(i) The Board shall submit a report to the President for transmittal to the Congress not later than January 31 of each year on the progress of the National Human Development Program toward the accomplishment of its objectives.

"(j) Members of the Board who are not officers or employees of the United States shall receive for each day they are engaged in the performance of the duties of the Board compensation at rates not to exceed the daily equivalent of the annual rate in effect for GS–18 of the General Schedule, including travel time; and all members, while so serving away from their homes or regular places of business, may be allowed travel expenses, including per diem in lieu of subsistence, in the same manner as such expenses are authorized by section 5703, title 5, United States Code, for persons in the Government service employed intermittently.

"(k) There are authorized to be appropriated to carry out the purposes of this section $475,000,000.00 for the fiscal year ending September 30, 1978, $575,000,000.00 for the fiscal year ending September 30, 1979, and $700,000,000.00 for the fiscal year ending September 30, 1980.

"NATIONAL INSTITUTE OF FAMILY HEALTH

"SEC. 442. (a) There is hereby established within the Bureau a National Institute of Family Health (hereinafter in this part referred to as the 'Family Health Institute') to carry out the purposes of section 441 with regard to research and training relating to the prevention and cure of disorders through the study of institute priorities, not limited to but including, nutrition, genetics, and epidemiology, in order to determine the origins of disease; to understand the processes of normal maternal, paternal and child health; to solve specific disorders, diseases, and health problems which impede or prevent optimum maternal, paternal and child health; to contribute to the maximum well-being of pregnant women and the children they bear; to minimize the risks of having children damaged by mental retardation or other developmental disabilities; and to facilitate the optimal growth and development of children.

"(b) The Family Health Institute shall carry out the purposes of section 301 with respect to the conduct and support of research which specifically relates to sudden infant death syndrome.

"(c) The Director of the Family Health Institute shall be appointed by the Secretary upon recommendations from the Director of the National Institutes of Health. The Director of the Family Health Institute shall serve as an Associate Director of the Bureau in order to participate in the Bureau's policy and budget process which includes but is not limited to the setting of priorities; presentations before the Director of the National Institutes of Health, the Assistant Secretary for Health, the Secretary for Health, Education, and Welfare, and the Congress; and interacting with any other health or related agencies.

"(d)(1) There is established a National Family Health Advisory Council (hereinafter referred to as the 'Family Health Council') to advise, consult with, and make recommendations to the Institute Director, at meetings held not less than 3 times each year, with regard to the activities of the Family Health Institute established under this section.

"(2) The Family Health Council shall be composed of the Director of the National Institutes of Health who shall serve as chairperson, the Associate Director for Preventive Medicine of the National Institutes of Health, the Chief Medical Officer of the Veterans' Administration a medical officer designated by the Secretary of Defense, and a member designated by the Director, Office of the Child Development, who shall serve as ex officio members; and 12 members appointed by the Secretary upon recommendations from the Director of the Family Health Institute. Six of such members shall include but are not limited to leading scientific and medical authorities in basic and applied research and training in the biomedical, behavioral, and social sciences. Six of such members shall be providers of family health services, and members of the general public, including representatives of women's groups, youth groups, consumer groups and minority groups, and experts in law, economics, and relevant fields; and may include additional ex officio members as deemed necessary to carry out its functions. Each appointed member of the Family Health Council shall hold office for a term of four years except that any members appointed to fill a vacancy occurring prior to the expiration of the term for which his or her predecessor was appointed shall be appointed for the remainder of such term, and except that, of the members first appointed three shall hold office for a term of four years, three shall hold office for a term of three years, three shall hold office for a term of two years, and three shall hold office for a term of one year, as designated by the Secretary at the time of appointment. No more than two members from either the scientist and physician group, or the general public may be selected in any one year. None of the members shall be eligible for reappointment until a year has elapsed since the end of his or her preceding term.

"(3) Members of the Family Health Council who are not officers or employees of the United States shall receive for each day they are engaged in the performance of the duties of the Family Health Council compensation at a rate not to exceed the daily equivalent of the annual rate in effect for GS–18 of the General Schedule, including travel time; and all members, while so serving away from their homes or regular places of business, may be allowed travel expenses, including per diem in lieu of subsistence, in the same manner as such expenses are authorized by section 5703 of title 5, United States Code, for persons in the Government service employed intermittently.

"(4) The Director of the Institute shall make available to the Council such staff, information, and other assistance as it may require to carry out its activities.

"(5) The Family Health Council shall assume all duties, functions, and powers of the National Advisory Health Council relating to the research or training projects with which the Family Health Council established under this part is concerned.

"(e) The Secretary, through the Director of the Institute established under this section, shall carry out the purposes of section 301 with respect to the conduct and support of research in Family Health. In carrying out the Family Health program of the Family Health Institute, the Family Health Director shall:

"(1) with the advice of the Family Health Council, plan and develop an expanded, intensified, and coordinated family health research program encompassing the relevant programs of the National Institute of Child Health and Human Development as it existed prior to the date of enactment of this section;

"(2) expeditiously utilize existing research facilities and personnel of the National Institutes of Health for accelerated exploration of opportunities in areas of special promise to advance knowledge in the fields of Family Health;

"(3) encourage and coordinate Family Health research by commercial entities where there is evidence of a particular capacity for such research and enter into contracts with such commercial entities;

"(4) make grants and enter into contracts with public or nonprofit private agencies, institutions, organizations, and with individuals engaged in scientific research in Family Health;

"(5) establish, support and maintain programs of training in the appropriate sciences and disciplines to provide an expanded and continuing manpower base from which to select investigators and health professions personnel for participation in basic, applied, and directed research in Family Health, including where appropriate the use of training stipends, fellowships, career awards, grants to public and nonprofit private entities, and contracts with public and private entities;

"(6) call special meetings of the National Family Health Advisory Council at such times and in such places as deemed necessary in order to consult with, obtain advice from, and accomplish all other actions necessary without delay to gain maximum benefit from new scientific or technical finding; and

"(7) provide for the collection, cataloging, and analysis of Family Health research findings and their dissemination by the Institute, and the Bureau's Information Office.

"NATIONAL INSTITUTE ON POPULATION SCIENCES

"SEC. 443. (a) There is hereby established within the Bureau a National Institute on Population Sciences (hereinafter referred to as the 'Population Institute') to carry out the purposes of section 441 with regard to applied research and training relating to population matters having both preventive and curative emphases such as—

"(1) biomedical research in reproductive biology;

"(2) research in the development of fertility control methods;

"(3) research on the effects of nutrition and genetics on human reproduction;

"(4) research in the organization, delivery, and dissemination of fertility control methods and services;

"(5) research in the social, behavioral, epidemiological, and demographic sciences as to the psychological, social, and economic determinants and consequences of population processes, structure, growth, distribution, and change; and

"(6) their effects on human health and well-being.

"(b) The Director of the Population Institute shall be appointed by the Secretary upon recommendation from the Director of the National Institutes of Health. The Director of the Population Institute shall serve as an Associate Director of the Bureau in order to participate in the Bureau's policy and budget process which includes but is not limited to the setting of priorities; presentations before the Director of the National Institutes of Health, the Assistant Secretary for Health; and the Secretary of Health, Education, and Welfare and the Congress; and interacting with any other health or related agencies.

"(c)(1) There is established a National Population Sciences Advisory Council (hereinafter referred to as the 'Population Council') to advise, consult with, and make recommendations to the Institute Director, at meetings held no less than three times each year with regard to the activities of the Population Institute established under this section.

"(2) The Population Council shall be composed of the Director of the National Institutes of Health who shall serve as chairperson, the Associate Director for Preventive Medicine of the National Institutes of Health, the Chief Medical Officer of the Veterans' Administration or designee, a medical officer designated by the Secretary of Defense, and a member designated by the Director, Office of the Child Development, who shall serve as ex officio members; and twelve members appointed by the Secretary upon recommendations from the Population Institute Director. Six of such members shall include but are not limited to leading scientific and medical authorities in basic and applied research and training in the biomedical, behavioral, social and demographic sciences. Six of such members shall be providers of fertility control methods and services, members of the general public, including representatives of women's groups, youth groups, consumer groups and minority groups, and experts in law, economics, and relevant fields; and may include additional ex officio members as deemed necessary to carry out its functions. Each appointed member of the Population Council shall hold office for a term of four years except that any members appointed to fill a vacancy occurring prior to the expiration of the term for which his or her predecessor was appointed shall be appointed for the remainder of such term, and except that, of the members first appointed, three shall hold office for a term of four years, three shall hold office for a term of three years, three shall hold office for a term of two years, and three shall hold office for a term of one year, as designated by the Secretary at the time of appointment. No more than two members from either the scientist and physician group, or the general public may be selected in any one year. None of the twelve members shall be eligible for reappointment until a year has elapsed since the end of his or her preceding term.

"(3) Members of the Population Council who are not officers or employees of the United States shall receive for each day they are engaged in the performance of the duties of the Population Council compensation at a rate not to exceed the daily equivalent of the annual rate in effect for GS–18 of the General Schedule, including travel time; and all members, while so serving away from their homes or regular places of business, may be allowed travel expenses, including per diem in lieu of subsistence, in the same manner as such expenses are authorized by section 5703 of title 5, United States Code, for persons in the Government service employed intermittently.

"(4) The Director of the Institute shall make available to the Council such staff, information, and other assistance as it may require to carry out its activities.

"(5) The Population Council shall assume all or such part as the Secretary may specify of the duties, functions, and powers of the National Advisory Health Council relating to the research or training projects with which the Population Council established under this part is concerned.

"(d) The Secretary, through the Director of the Institute established under this section, shall carry out the purposes of section 301 with respect to the conduct and support of research in population matters such as reproductive biology, fertility control technology, and in the social, behavioral and demographic sciences. In carrying out the program of the Population Institute, the Population Institute Director shall:

"(1) With the advice of the Population Council, plan and develop an expanded, intensified, and coordinated Population Sciences research program encompassing the relevant programs of the former National Institute of Child Health and Human Development, as it existed prior to the date of enactment of this section.

"(2) Expeditiously utilize existing research facilities and personnel of the National Institutes of Health for accelerated exploration of opportunities in areas of special promise to advance knowledge in the fields comprising the population sciences.

"(3) Encourage and coordinate population sciences research by commercial entities where there is evidence of a particular capability for such research, and enter into contracts with such commercial entities.

"(4) Make grants and enter into contracts with public or nonprofit private agencies, institutions, organizations, and with individuals engaged in scientific research in the population sciences.

"(5) Establish, support and maintain programs of training in the appropriate sciences and disciplines to provide an expanded and continuing manpower base from which to select investigators and health professions personnel for participation in basic, applied and directed research in the population sciences, including where appropriate the use of training stipends, fellowships, career awards, grants to public and nonprofit private entities, and contracts with public and private entities.

"(6) Call special meetings of the National Population Sciences Advisory Council at such times and in such places as he deems necessary in order to consult with, obtain advice from, and accomplish all other actions necessary without delay to gain maximum benefit from new scientific or technical findings.

"(7) Provide for the collection, cataloging, and analysis of Population Sciences research findings and their dissemination by the Institute, and the Bureau's Information Office.

"NATIONAL INSTITUTE OF GENERAL MEDICAL SCIENCES

"SEC. 444. (a) There is hereby established as a component within the Bureau, the National Institute of General Medical Sciences (hereinafter referred to as the General Medical Institute) to carry out the purposes of section 441 with regard to research and training relating to general medical sciences activities having both preventive and curative emphases in basic medical, biological, preclinical, clinical, related natural, epidemiological and behavioral sciences, the methods of science, and broad multi-disciplinary programs and studies, including but not limited to nutrition and genetics, which have significance for two or more institutes or other divisions of the Public Health Service, or are outside the general area of responsibility of any other institute or division.

"(b) The Director of the General Medical Institute shall be appointed by the Secretary upon recommendations from the Director of

the National Institutes of Health. The Director of the General Medical Institute shall serve as an Associate Director of the Bureau in order to participate in the Bureau's policy and budget process which includes but is not limited to the setting of priorities; presentations before the Director of the National Institutes of Health, the Assistant Secretary for Health and the Secretary of Health, Education, and Welfare, and the Congress; and interacting with any other health or related agencies.

"(c)(1) There is established a National General Medical Sciences Advisory Council (hereinafter referred to as the 'General Medical Council') to advise, consult with, and make recommendations to the Institute Director, at meetings held no less than 3 times each year with regard to the activities of the General Medical Institute esablished under this section.

"(2) The General Medical Council shall be composed of the Director of the National Institutes of Health who shall serve as chairperson, the Associate Director for Preventive Medicine of the National Institutes of Health, the Chief Medical Officer of the Veterans Administration or his designee, and a medical officer designated by the Secretary of Defense, who serve as ex officio members; and 12 members appointed by the Secretary upon recommendation from the Institute Director. Six of such members shall include but are not limited to leading scientific and medical authorities in basic and applied research and training in the biomedical, behavioral and social sciences. Six of such members shall be providers of general medical services, members of the general public, including representatives of women's groups, youth groups, consumer groups, and minority groups, and experts in law, economics, and relevant fields; and may include additional ex officio members as deemed necessary to carry out its functions. Each appointed member of the General Medical Council shall hold office for a term of four years except that any member appointed to fill a vacancy occurring prior to the expiration of the term for which his or her predecessor was appointed shall be appointed for the remainder of such time, and except that, of the members first appointed, three shall hold office for a term of four years, three shall hold office for a term of three years, three shall hold office for a term of two years, and three shall hold office for a term of one year, as designated by the Secretary at the time of appointment. No more than two members from either the scientist and physician group, or the general public may be selected in any one year. None of the twelve members shall be eligible for reappointment until a year has elapsed since the end of his or her preceding term.

"(3) Members of the General Medical Council who are not officers or employees of the United States shall receive for each day they are engaged in the performance of the duties of the General Medical Council compensation at a rate not to exceed the daily equivalent of the annual rate in effect for GS-18 of the General Schedule, including travel time; and all members, while so serving away from their homes or regular places of business, may be allowed travel expenses, including per diem in lieu of subsistence, in the same manner as such expenses are authorized by section 5703 of title 6, United States Code, for persons in the Government service employed intermittently.

"(4) The Director of the Institute shall make available to the Council such staff, information, and other assistance as it may require to carry out its activities.

"(5) The General Medical Council shall assume all or such part as the Secretary may specify of the duties, functions, and powers of the National Advisory Health Council relating to the research or training projects with which the General Medical Council established under this part is concerned.

"(d) The Secretary, through the Director of the Institute established under this section, shall carry out the purposes of section 301 with respect to the conduct and support of research in the General Medical Sciences. In carrying out the General Medical program of the General Medical Institute, the General Medical Director shall:

"(1) with the advice of the General Medical Council, plan and develop an expanded, intensified, and coordinated General Medical research program;

"(2) expeditiously utilize existing research facilities and personnel of the National Institutes of Health for accelerated exploration of opportunities in areas of special promise to advance knowledge in the fields of General Medical Sciences;

"(3) encourage and coordinate General Medical research by commercial entities where there is evidence of a particular capability for such research, and enter into contracts with such commercial entities;

"(4) make grants and enter into contracts with public or nonprofit private agencies, institutions, organizations, and with individuals engaged in scientific research in General Medical Sciences;

"(5) establish, support and maintain programs of training in the appropriate sciences and disciplines to provide an expanded and continuing manpower base from which to select investigators and health professions personnel for participation in basic, applied, and directed research in General Medical Sciences, including where appropriate the use of training stipends, fellowships, career awards, grants to public and non-profit private entities, and contracts with public and private entities;

"(6) call special meetings of the National General Medical Sciences Advisory Council at such times and in such places as deemed necessary in order to consult with, obtain advice from, and accomplish all other actions necessary without delay to gain maximum benefit from new scientific or technical findings; and

"(7) provide for the collection, cataloging, and analysis of general medical sciences research findings and their dissemination by the Institute, and the Bureau's Information Office.

"NATIONAL INSTITUTE ON AGING

"SEC. 445. (a) There is hereby established as a component within the Bureau, the National Institute on Aging (hereinafter referred to as the Aging Institute) to carry out the purposes of section 441 with regard to the conduct and support of biomedical, social, epidemiological and behavioral research and training, including but not limited to nutrition and genetics, related to the aging process and the diseases and other special problems and needs of the aged.

"(b) The Director of the Aging Institute shall be appointed by the Secretary upon recommendations from the Director of the National Institutes of Health. The Director of the Aging Institute shall serve as an Associate Director of the Bureau in order to participate in the Bureau's policy and budget process which includes but is not limited to the setting of priorities; presentations before the Director of the National Institutes of Health, the Assistant Secretary for Health, and the Secretary of Health, Education and Welfare, and the Congress, and interacting with any other health or related agencies.

"(c)(1) The Secretary shall establish a National Advisory Council on Aging (hereinafter referred to as the Aging Council) to advise, consult with, and make recommendatios to the Institute Director, at meetings held no less than 3 times each year, on programs relating to the aged which are administered by the Institute Director and on those matters which relate to the Institute.

"(2) The Aging Council shall be composed of the Director of the National Institutes of Health, who shall serve as chairperson, the Associate Director for Preventive Medicine of the National Institutes of Health, the Chief Medical Officer of the Veterans' Administration or designee, a medical officer designated by the Secretary of Defense, a representative designated by the Commissioner on Aging, and the Chairperson of the Aging Research and Manpower Committee of the Federal Council on Aging, who serve as ex officio members; and 12 members appointed by the Secretary upon recommendations from the Aging Institute Director, who are leaders in the fields of fundamental sciences, medical sciences, education or public affairs. Six of such members shall be leading scientific and medical authorities in basic and applied research and training in the biomedical, behavorial and social sciences. Six of such members shall be providers of health services to the aging, members of the general public, including representatives of women's groups, youth groups, consumer groups, and minority groups, and experts in law, economics, and relevant fields; and may include additional ex officio members as deemed necessary to carry out its functions. Each appointed member of the Aging Council shall hold office for a term of four years except that any members appointed to fill a vacancy occurring prior to the expiration of the term for which his or her predecessor was appointed shall be appointed for the remainder of such term, and except that, of the members first appointed, three shall hold office for a term of four years, three shall hold office for a term of three years, three shall hold office for a term of two years, and three shall hold office for a term of one year, as designated by the Secretary at the time of appointment. No more than two members from either the scientist and physician group, or the general public may be selected in any one year. None of the 12 members shall be eligible for reappointment until a year has elapsed since the end of his or her preceding term.

"(3) Members of the Aging Council who are not officers or employees of the United States shall receive for each day they are engaged in the performance of the duties of the Aging Council compensation at a rate not to exceed the daily equivalent of the annual rate in effect for GS-18 of the General Schedule, including travel time; and all members, while so serving away from their homes or regular places of business, may be allowed travel expenses, including per diem in lieu of subsistence, in the same manner as such expenses are authorized by Section 5703, Title V, United States Code, for persons in the Government service employed intermittently.

"(4) The Director of the Institute shall make available to the Council such staff, information, and other assistance as it may require to carry out its activities.

"(5) Upon appointment of such Advisory Council, it shall assume all, or such part as the Secretary may specify, of the duties, functions, and powers of the National Advisory Health Council relating to programs for the aged with which the Advisory Council established under this part is concerned.

"(d) The Secretary—

"(1) shall, through the Director of the Institute carry out the purposes of section 301 with respect to research investigations, experiments, demonstrations, and studies related to the aging process and the diseases and other special problems and needs of the aged, except that the Secretary shall determine the area in which and the extent to which he will carry out such activities in furtherance of the purposes of section 301 through the Institute or another institute established by or under other provisions of

this Act, or both of them, when both such institutes have functions with respect to the same subject matter, and

"(2) shall be responsible for coordinating such activities so as to avoid unproductive and unnecessary overlap and duplication of such functions; and

"(3) shall, through the Institute, conduct scientific studies to measure the impact on the biological, medical, and psychological aspects of aging of all programs and activities assisted or conducted by the Department of Health, Education, and Welfare.

"(e) The Secretary may also provide training and instruction and establish traineeships and fellowships, in the Institute and elsewhere, in matters relating to study and investigation of the aging process and the diseases and other special problems and needs of the aged. The Secretary may provide trainees and fellows participating in such training and instruction or in such traineeships and fellowships with such stipends and allowances (including travel and subsistence expenses and dependency allowances) as he deems necessary, and, in addition, provide for such training, instruction traineeships, fellowships through grants to public or other nonprofit institutions. In carrying out his health manpower training responsibilities under this Act or any other Act, the Secretary shall take appropriate steps to insure the education and training of adequate numbers of allied health, nursing, and paramedical personnel in the field of health care for the aged.

"(f) The Secretary shall provide for the collection, cataloging, and analysis of aging research findings and their dissemination by the Institute and the Bureau's Information office.

"NATIONAL INSTITUTE OF ENVIRONMENTAL HEALTH SCIENCES

"SEC. 446. (a) There is hereby established as a component within the Bureau, the National Institute of Environmental Health Sciences (hereinafter in this part referred to as the Environmental Health Institute) to carry out the purposes of section 441 with regard to research and training relating to the prevention of human health problems caused by harmful man-made agents, including but not limited to foods, food constituents, additives and preservatives, in the environment; to the development of an understanding of the relationship between these agents, and human disease; to the identification of those chemical and physical agents in the environment that can adversely affect man; to understanding the mechanisms and manifestations of human diseases produced by these agents; to providing the scientific basis for the development of control measures by regulatory agencies; and to the further understanding of Institute research priorities which include but are not limited to the health effects of environmental agents at low concentrations over long periods of time; the interaction of several agents in man that can result in enhanced toxic effects; and the modifying effects of a variety of physical and biological states within man on susceptibility to and the course of disease induced by these agents.

"(b) The Director of the Environmental Health Institute shall be appointed by the Secretary upon recommendations from the Director of the National Institutes of Health. The Director of the Environmental Health Institute shall serve as an Associate Director of the Bureau in order to participate in the Bureau's policy and budget process which includes but is not limited to the setting of priorities; presentations before the Director of the National Institutes of Health, the Assistant Secretary for Health, and the Secretary of Health, Education, and Welfare, and the Congress; and interacting with any other health or related agencies.

"(c)(1) There is established a National Environmental Health Sciences Advisory Council (hereinafter referred to as the 'Environmental Health Council') to advise, consult with, and make recommendations to the Institute Director, at meetings held no less than 3 times each year with regard to the activities of the Environmental Health Institute established under this section.

"(2) The Environmenal Health Council shall be composed of the Director of the National Institutes of Health, who shall serve as chairperson, the Associate Director for Preventive Medicine of the National Institutes of Health, the Chief Medical Officer of the Veterans Administration or designee, a medical officer designated by the Secretary of Defense, and the Director of the Environmental Protection Agency or designee, who serve as ex officio members; and 12 members appointed by the Secretary upon recommendations from the Environmental Health Institute Director. Eight of such members shall include but are not limited to leading scientific and medical authorities outstanding in environmental health sciences. Four of the members shall be members of the general public, including representatives of women's groups, youth groups, consumer groups and minority groups, and experts in law, economics, and relevant fields; and may include additional ex officio members as deemed necessary to carry out its functions. Each appointed member of the Environmental Health Council shall hold office for a term of four years except that any member appointed to fill a vacancy occurring prior to the expiration of the term for which his or her predecessor was appointed shall be appointed for the remainder of such term, and except that, of the members first appointed three shall hold office for a term of four years, three shall hold office for a term of three years, three shall hold office for a term of two years, and three shall hold office for a term of one year, as designated by the Secretary at the time of appointment. No more than two members from either the scientist and physician group, or the general public may be selected in any one year. None of the 12 appointed members shall be eligible for reappointment until a year has elapsed since the end of his or her preceding term.

"(3) Members of the Environmental Health Council who are not officers or employees of the United States shall receive for each day they are engaged in the performance of the duties of the Environmental Health Council compensation at a rate not to exceed the daily equivalent of the annual rate in effect for GS-18 of the General Schedule, including travel time; and all members, while so serving away from their homes or regular places of business, may be allowed travel expenses, including per diem in lieu of subsistence, in the same manner as such expenses are authorized by section 5703, title V, United States Code, for persons in the Government service employed intermittently.

"(4) The Director of the Institute shall make available to the Council such staff, information, and other assistance as it may require to carry out its activities.

"(5) The Environmental Health Council shall assume all or such part as the Secretary may specify of the duties, functions, and powers of the National Advisory Health Council relating to the research or training projects with which the Environmental Health Council established under this part is concerned.

"(d) The Secretary, through the Director of the Institute established under this section, shall carry out the purposes of section 301 with respect to the conduct and support of research in Environmental Health. In carrying out the Environmental Health program of the Environmental Health Institute, the Environmental Health Director shall:

"(1) With the advice of the Environmental Health Council, plan and develop an expanded, intensified, and coordinated environmental health research program.

"(2) Expeditiously utilize existing research facilities and personnel of the National Institutes of Health for accelerated exploration of opportunities in areas of special promise to advance knowledge in the field of Environmental Health Sciences.

"(3) Encourage and coordinate Environmental Health Sciences research by commercial entities where there is evidence of a particular capability for such research, and enter into contracts with such commercial entities;

"(4) Make grants and enter into contracts with public or nonprofit private agencies, institutions, organizations, and with individuals engaged in scientific research in Environmental Health Sciences.

"(5) Establish, support and maintain programs of training in the appropriate sciences and disciplines to provide an expanded and continuing manpower base from which to select investigators and health professions personnel for participation in basic, applied, and directed research in Environmental Health Sciences, including where appropriate the use of training stipends, fellowships, career awards, grants to public and nonprofit private entities, and contracts with public and private entities;

"(6) Call special meetings of the National Environmental Health Sciences Advisory Council at such times and in such places as deemed necessary in order to consult with, obtain advice from, and accomplish all other actions necessary without delay to gain maximum benefit from new scientific or technical findings.

"(7) Provide for the collection, cataloging, and analysis of Environmental Health Sciences Research findings and their dissemination by the Institute and the Bureau's Information Office.".

SEC. 102. Section 471 of the Public Health Service Act is amended by—

(1) inserting "(a)" after "471."; and

(2) by adding at the end thereof the following new subsection:

"(b) There is established within the office of the Director of the National Institutes of Health the position of Associate Director of Preventive Medicine. It shall be the function of such Associate Director to foster and coordinate basic and applied research and training relating to the maintenance of health and the prevention of disease.".

TITLE II—NATIONAL CENTER FOR HEALTH MAINTENANCE AND PROMOTION

SEC. 201. The Center for Disease Control shall hereafter be designated as the "National Center for Health Maintenance and Promotion".

SEC. 202. (a) In addition to any other functions to be performed by the National Center for Health Maintenance and Promotion (hereinafter referred to as the "Center") the Center shall encourage increased epidemiological research and programs, particularly with respect to chronic and degenerative diseases, and provide support for longer term epidemiological research where justified.

(b) There are authorized to be appropriated to carry out the purposes of this section $15,000,000 for the fiscal year ending September 30, 1978, $25,000,000 for the fiscal year ending September 30, 1979, and $35,000,000 for the fiscal year ending September 30, 1980.

SEC. 203. (a) There is established within the Public Health Service a Bureau of Health Education. In addition to any other functions assigned to such Bureau by the Secretary of

Health, Education, and Welfare, such Bureau shall serve as the focus for health education programs for the Public Health Service. Such Bureau shall—

(1) identify priorities which should include but are not limited to, smoking, drugs, alcohol, self-care, family planning, immunizations, venereal disease, and safety; and utilize the best means available, such as the solicitation of concepts and the awarding of pre-planning grants, in order to provide national leadership and direction in the implementation of programs designed to accomplish the priorities identified;

(2) provide for peer review of contract and grant proposals submitted or solicited for funding to the Public Health Service;

(3) assist the National Center for Health Services Research in the evaluation of current health education programs, and in the development and evaluation of standards, criteria and methodologies for improved health education programs;

(4) require evaluation from the outset of all health education programs undertaken;

(5) provide for long-range basic and applied evaluative research;

(6) serve as a source for technical assistance for the development of health education concepts and programs;

(7) encourage and assist in the broader application of effective health education interventions at the Regional, State and community level, including the assignment of qualified and experienced staff at each of the 10 regional offices of the Department of Health, Education, and Welfare;

(8) encourage and assist the dissemination of improved health education interventions as well as new health knowledge in the health education programs it supports or reviews; and

(9) develop mechanisms, including a clearinghouse for health education information, for improving the dissemination of information, and for coordinating health education activities in the public and private sectors.

(b) There are authorized to be appropriated to carry out the purposes of this section $7,500,000 for the fiscal year ending September 30, 1978, $8,500,000 for the fiscal year ending September 30, 1979, and $10,000,000 for the fiscal year ending September 30, 1980.

SEC. 204. (a) There is established, as a component at the National Center for Health Maintenance and Promotion, a Bureau of Nutrition for the purpose of establishing and conducting a program to continuously monitor, survey and evaluate the nation's nutritional status, having as a first priority the development and testing of an appropriate survey methodology, and utilizing the experience gained from such surveys as the Ten-State survey and the Health and Nutrition Examination Survey; for the purpose of fostering and supporting the dissemination and application of nutrition research findings; with the intent of coordinating and interacting with the Department of Agriculture on its household food consumption survey in order to provide a more complete assessment of national nutritional needs; and with the intent of utilizing the evaluation research and survey expertise of other Public Health Service agencies such as the National Center for Health Services Research and the National Center for Health Statistics.

(b) There is authorized to be appropriated to carry out the purposes of this section $1,000,000.00 for the fiscal year ending September 30, 1978, $3,000,000.00, for the fiscal year ending September 30, 1979, and $5,000,000.00 for the fiscal year ending September 30, 1980.

TITLE III—NATIONAL CENTER FOR HEALTH SERVICES RESEARCH

SEC. 301. Section 305 of the Public Health Service Act is amended by adding at the end thereof the following new subsection:

"(f)(1) In addition to other functions under this section, the Center shall—

"(A) provide expertise for the evaluation of existing health education programs and for the evaluation and development of evaluation research methodology for the Bureau of Health Education;

"(B) evaluate new technology being developed at the National Institutes of Health and other agencies to determine which merits dissemination;

"(C) evaluate existing technology, for efficiency and effectiveness to determine which should be continued, altered, or eliminated from use; and

"(D) evaluate the efficiency and effectiveness of health maintenance and health promotion procedures and programs.

"(2) There are authorized to be appropriated to carry out the purposes of this subsection $2,000,000 for the fiscal year ending September 30, 1978, $4,000,000 for the fiscal year ending September 30, 1979, and $6,000,000 for the fiscal year ending September 30, 1980.".

TITLE IV—NATIONAL CENTER FOR HEALTH STATISTICS

SEC. 401. (a) The Secretary of Health, Education, and Welfare acting through the National Center for Health Statistics (established under section 306 of the Public Health Service Act), shall make a continuing survey of the needs, interest, attitudes, knowledge, and behavior of the American public regarding health, particularly health maintenance and health promotion. The Secretary shall use the findings of such surveys and the findings of similar surveys conducted by national health education organizations and community health education organizations as the basis for formulating policy respecting preventive medicine, health maintenance and health promotion.

(b) For the surveys to be conducted through the National Center for Health Statistics there are authorized to be appropriated $2,000,000 for the fiscal year ending September 30, 1978, $3,000,000 for the fiscal year ending September 30, 1979, and $4,000,000 for the fiscal year ending September 30, 1980.

TITLE V—OFFICE OF HEALTH INFORMATION AND HEALTH PROMOTION

SEC. 501. Section 1706 is amended to read as follows:

"SEC. 1706. The Secretary shall establish within the Office of the Assistant Secretary for Health an Office of Health Information and Health Promotion which shall—

"(1) coordinate and promote activities within the Department of Health, Education, and Welfare, and between the Department of Health, Education, and Welfare and other departments and agencies which relate to health information and health promotion, preventive health services, and education in the appropriate use of health care;

"(2) coordinate its activities with similar activities of organizations in the private sector;

"(3) establish a national information clearinghouse to facilitate the exchange of information concerning matters relating to health information and health promotion, preventive health services, and education in the appropriate use of health care, to facilitate access to such information, and to assist in the analysis of issues and problems relating to such matters; and

"(4) maintain a national dialogue on preventive medicine, health maintenance and health promotion issues, policies and programs; provide advice and recommendations to the Secretary on general policy with respect to the functions of the Office; and provide to the Congress and the Secretary an analysis and recommendations with respect to preventive medicine, health maintenance and health promotion, on all budget requests from the Department which relate to health or health related matters.

SHORT EXPLANATION OF THE NATIONAL PREVENTIVE MEDICINE, HEALTH MAINTENANCE AND HEALTH PROMOTION ACT OF 1977

This bill provides for a national preventive medicine, health maintenance and health promotion initiative, using research in nutrition as the cornerstone upon which to build a healthier and more productive America.

By authorizing and directing the federal health research machinery to include prevention among its priorities, greater clarity and direction should be brought to many crucial areas, including basic and applied research, program implementation, program evaluation, technology evaluation, data collection, analysis, and dissemination, and policy formation.

A. PURPOSE

(1) establish at the National Institutes of Health a Bureau of Human Development having a preventive and curative, non-categorical perspective on health, and consisting of two new Institutes:

(A) the National Institute of Family Health; (B) the National Institute of Population Sciences; which assume the responsibilities of the National Institute of Child Health and Human Development, and three existing Institutes:

(C) the National Institute of General Medical Sciences,

(D) the National Institute on Aging, and

(E) the National Institute on Environmental Health Sciences,

(2) establish the position of Associate Director for Preventive Medicine within the Office of the Director, NIH,

(3) rename the Center for Disease Control, the National Center for Health Maintenance and Promotion; and

(4) include in the mission of the Bureau of Human Development such priorities as nutrition, genetics, and epidemiology,

(5) revise and expand the mission at the National Center for Health Maintenance and Promotion for such priorities as nutrition, health education and epidemiology,

(6) provide lead agency responsibility with regard to a national initiative for preventive medicine, health maintenance and health promotion to the Bureau of Human Development; the National Center for Health Maintenance and Promotion; the National Center for Health Services Research; the National Center for Health Statistics; and the Office of Health Information and Health Promotion in the Office of the Assistant Secretary for Health, the Department of Health, Education, and Welfare.

B. TITLE I

(1) Establishes a National Bureau of Human Development for the purpose of conducting, supporting and fostering basic and applied research and training relating to the maintenance of health and the prevention and cure of disease by the study of the continuum of human development; by the study of man-made agents in the environment which impact on human development; and for the purpose of providing a non-categorical perspective at NIH for biomedical and social science research.

(2) Establishes a Policy Advisory Board, having equal representation from all the Bureau's Institutes, which shall advise and assist the Bureau Director with recommendations on Bureau research policy priorities, budget requests and allocations, and the future direction and mission of the Bureau.

(4) Authorizes $475,000,000 in the first year of the Bureau which is only $17.5 million above the proposed fiscal year 1978 authorization levels.

(5) Divides the existing National Institute of Child Health and Human Development

into the National Family Health Institute, and the National Population Sciences Institute.

(6) Incorporates the existing National Institute of General Medical Sciences, the National Institute on Aging, and the National Environmental Health Sciences Institute into the Bureau.

(7) Cites as Bureau and Institute priorities, not limited to but including, nutrition, genetics, epidemiology, and longer term research where justified.

(8) Provides for peer review Advisory Councils for each Institute.

(9) The Institute Directors also act as Associate Directors of the Bureau in order to participate in the Bureau's policy and budget process including the setting of priorities, presentations before the Director, NIH, the Assistant Secretary for Health, the Secretary, HEW, and the Congress, and interacting with any other health or related agencies.

(10) Establishes within the office of the Director at NIH the position of Associate Director of Preventive Medicine in order to foster and coordinate basic and applied research and training relating to the maintenance of health and the prevention of disease.

C. TITLE II

(1) Renames the National Center for Disease Control the National Center for Health Maintenance and Promotion thus expanding its mission and giving it a more positive approach to health.

(2) Encourages increased epidemiological research and programs particularly with respect to chronic and degenerative diseases; provides support for longer term epidemiological research where justified; and authorizes $15 million in additional funding in the first year.

(3) Establishes a Bureau of Health Education to serve as a focus within the PHS for health education programs including but not limited to such priorities as smoking, drugs, alcohol, self-care, family planning, immunizations, venereal disease, and safety; provides for evaluation of existing health education programs; requires evaluation from the outset of all new health education programs undertaken; encourages and assists in the broader application of effective health education interventions, including the assignment of qualified and experienced staff at each of the 10 regional offices of DHEW; encourages and assists in the dissemination of improved health education interventions and knowledge; provide for peer review of grants and contracts; and authorizes $7.5 million in the first year of the program.

(4) Establishes a new Bureau of Nutrition for the purpose of establishing and conducting a program to continuously monitor, survey and evaluate the nation's nutritional status, having as a first priority the development and testing of an appropriate survey methodology, and utilizing the experience gained from such surveys as the Ten-State survey and the Health and Nutrition Examination Survey; for the purpose of fostering and supporting the dissemination and application of new nutrition research findings," with the intent of coordinating and interacting with the Department of Agriculture on its household food consumption survey in order to provide a more complete assessment of national nutritional needs; and with the intent of utilizing the evaluation research and survey expertise of other Public Health Service agencies such as the National Center for Health Services Research and the National Center for Health Statistics; and authorizes $1 million in the first year of the program.

D. TITLE III

Included in the duties of the National Center for Health Services Research are the provision of expertise for the evaluation and development of evaluation research methodology for the Bureau of Health Education, National Center for Health Maintenance and Promotion; the development and utilization of an expertise to: 1) evaluate new technology to determine which merits dissemination; 2) evaluate existing technology, now in use, to determine which should be continued, altered or eliminated; and 3) evaluate health maintenance and health promotion procedures and programs; and authorizes $2 million in additional funding for the first year.

E. TITLE IV

Provides that the National Center for Health Statistics shall conduct a continuing survey of the needs, interest, attitudes, knowledge, and behavior of the American public regarding health, particularly health maintenance and health promotion; and authorizes $2 million in additional funding for the first year.

F. TITLE V

Includes in the duties of the Office of Health Information and Health Promotion that it: 1) maintain a national dialogue on preventive medicine, health maintenance and health promotion issues, policies and programs; 2) provide advice and recommendations to the Secretary on general policy with respect to the functions of the Office; and 3) provide to Congress and the Secretary an analysis and recommendations with respect to preventive medicine, health maintenance and health promotion, on all budget requests from the Department which relate to health or health related matters.

Mr. PERCY. Mr. President, I am pleased to cosponsor the National Preventive Medicine, Health Maintenance, and Health Promotion Act of 1977.

This bill is a product of the long-standing interest of the Select Committee on Nutrition and Human Needs in the relationship between diet and health. This interest culminated in a year-long nutrition and health investigation, which is still in progress. The findings of the investigation have made a persuasive case for the need to shift our medical system from curative care to preventive care.

Many of us in Congress at one time or another have talked about the problem of the national health crisis. We have criticized the escalating costs of medical care, deplored the maldistribution of health manpower, decried the lack of research funding, denounced fraud and abuse in health programs, and tried to do something about the growing inaccessibility of health care for the average citizen. Most of us, however, overlooked the fundamental weakness of a medical system that is oriented primarily toward death prevention rather than health maintenance and promotion. We failed to see that the major diseases of "civilization"—heart attack, stroke, and cancer—may not be susceptible to strictly medical solutions. And we failed to hear the growing agreement among health authorities that spending money for medical care may have no more positive effect on good health than making simple changes in the way we eat and live.

As our national health care expenditures fast approach $200 billion a year, it is imperative that we seek alternatives to curative care to prevent disease and maintain health.

The National Preventive Medicine, Health Maintenance, and Health Promotion Act is an attempt to find such an alternative. The bill would reconstitute four existing National Institutes of Health into a new Bureau of Human Development. The reorganization would mean increased funding and greater priority for nutrition and prevention in basic and applied health research, health policy formulation, and health program implementation.

As a cosponsor, my primary objective is to lend support to the promotion of nutrition and prevention as integral parts of our national health policy and programing. The specifics of the bill are by no means cast in stone. They represent ideas and proposals to be considered. In the months ahead the Nutrition Committee plans to solicit the views of interested individuals and groups to create a public dialog through which the bill would be refined and perfected.

I hope that the National Preventive Medicine, Health Maintenance, and Health Promotion Act of 1977 will be a first step toward a national health care system that is committed as much to the healthy as to the dying.

By Mr. JACKSON (by request):

S. 1192. A bill to provide for the relief of certain residents of the Trust Territory of the Pacific Islands; to the Committee on Energy and Natural Resources.

Mr. JACKSON. Mr. President, by request, I send to the desk a bill to provide for the relief of certain residents of the Trust Territory of the Pacific Islands.

Mr. President, this draft legislation was submitted and recommended by the Department of the Interior, and I ask unanimous consent that the executive communication accompanying the proposal from the Secretary of the Interior be printed in the RECORD at this point in my remarks.

There being no objection, the letter was ordered to be printed in the RECORD, as follows:

U.S. DEPARTMENT OF THE INTERIOR,
Washington, D.C., March 17, 1977.

Hon. WALTER F. MONDALE,
President of the U.S. Senate,
Washington, D.C.

DEAR MR. PRESIDENT: Enclosed is a proposed bill "To provide for the relief of certain residents of the Trust Territory of the Pacific Islands."

We recommend that the bill be referred to the appropriate committee for consideration, and strongly urge that it be enacted.

The bill would provide for *ex gratia* compensation to the people of Rongelap and Utirik Atolls in the Marshall Islands for radiation exposure resulting from a thermonuclear detonation on Bikini Atoll on March 1, 1954. The following sum would be paid:

(1) $25,000 to each person, or his heirs or legatees per stirpes and not per capita, who has had his thyroid gland or a neurofibroma in the neck surgically removed, or who has developed thyroid atrophy resulting in myxedema or who develops a radiation related malignancy;

(2) $25,000 for the heirs or legatees per stirpes and not per capita of a person dying of radiation-related causes; and

(3) $1,000 to each person who was an inhabitant of Utirik Atoll, his heirs or legatees per stripes and not per capita.

On March 1, 1954, the people of Rongelap, some of whom were visiting nearby Allingnae Atoll, and the people of Utirik were exposed

to accidental radiation fallout from a United States thermonuclear test. The Rongelapese received an estimated GAMMA dose of 175 rads and the Utirikese 14 rads. Additionally, the people of Rongelap were displaced from their island, for 3 years, the people of Utirik for 3 months. There were no deaths at the time of the fallout but acute effects were noted, particularly in the Rongelap people. These included transient depression of blood cells, body skin burns, and spotty loss of hair. There was internal absorption of radioactive material by inhalation and ingestion of contaminated food and water.

In 1965, the U.S. Congress appropriated $950,000 to carry out the provisions of P.L. 88-435, enacted in the preceding year, for the exposed people of Rongelap (some $10,500 per person). No compensation was paid to the people of Utirik since the dosage received was believed, at that time, to be too low to cause any radiation abnormalities.

Since the 1965 compensation payment thyroid radiation related effects began to appear in the Rongelap exposed groups; particularly tumors of the thyroid in children and to a lesser degree in adults. By 1976, 28 of the original Rongelapese exposed population of 86 had developed abnormalities of the thyroid gland. Of this group, 27 have had thyroid surgery in the United States with four of the tumors being cancerous. Additionally, in 1972, a 19-year old Rongelapese man, who had been exposed at the age of one year and who earlier had thyroid surgery died of acute leukemia in the National Institutes of Health, Bethesda, Maryland. In addition, there has been one case of neurofibroma tumor of the neck.

Annual medical examinations on the people of Rongelap and Utirik have been carried out since the 1954 fallout. In 1974, the Atomic Energy Commission paid $18,000 as an inconvenience payment to the people of Utirik to recompense them for the medical tests regularly being done on them but this amounted to approximately $114 per person. During the follow-up medical examinations, several benign tumors of the thyroid in the Utirik population appeared, as well as one case of thyroid cancer. Since the incidence was less than the incidence in the unexposed Rongelap population, it was held that these tumors were not related to the fallout. In October 1975, a second case of cancer of the thyroid appeared in an exposed Utirik woman. Medical experts and statisticians advise that it is extremely unlikely that two cases of thyroid cancer would occur by chance in the exposed Utirik population. Seven Utirikese have had thyroid surgery to date.

The Congress of Micronesia in 1972 appointed a Special Committee concerning Rongelap and Utirik Atolls to study the problem. The Committee recommended additional compensation be paid to the people of Rongelap and Utirik.

There is no question that certain liability exists for the fallout accident and this was recognized in 1965, when the U.S. Congress appropriated $950,000 (P.L. 88-485) for the people of Rongelap.

In 1955, the U.S. Government settled with the Government of Japan for 29 Japanese fishermen aboard the Japanese fishing vessel, the *Lucky Dragon*, who were subject to the same 1954 fallout as were the people of Rongelap and Utirik. The claims of these Japanese fishermen were the subject of a settlement of $2 million entered into by the Department of State (T.I.A.S. 3160, 6 U.S. TI, January 4, 1955).

Since 1965, latent effects have increasingly appeared in the Rongelap exposed population and now in the Utirik exposed population. While the people of Rongelap received a previous *ex gratia* payment in the nature of relief benefit, based on humanitarian principles, this earlier payment was for general suffering, damages, injuries, and inconvenience suffered up to 1965. As noted above, up to that time no serious after effects had been recorded. The thyroid radiation related effects, i.e., tumors, some cancerous, and other thyroid abnormalities, as well as one death from acute leukemia, have occurred since 1965. Additionally, the people of Utirik did not receive compensation in 1965.

We believe tht the amounts of compensation requested in the enclosed bill are reasonable. Following is a breakdown of the current costs of the proposed bill.

1. $25,000—for each thyroid operation to date; for surgical removal of neurofibroma tumor in the neck and for atrophy of the thyroid gland. (35 cases to date), $875,000.

2. $25,000—to the heirs of a person dying from radiation related causes, $25,000.

3. $1,000—each for each exposed Utirikese, their heirs, or assignees (158), $158,000.

Total, $1,058,000.

We believe that future payments under the enclosed legislation would not exceed an additional $300,000 to $500,000.

The Office of Management and Budget has advised that the presentation of this draft bill is consistent with the Administration's objectives.

Sincerely,

CECIL D. ANDRUS,
Secretary.

By Mr. JACKSON (by request):

S. 1193. A bill to authorize $15 million for the Government of Guam; to the Committee on Energy and Natural Resources.

Mr. JACKSON. Mr. President, by request, I send to the desk a bill to authorize $15 million for the Government of Guam.

Mr. President, this draft legislation was submitted and recommended by the Department of the Interior, and I ask unanimous consent that the executive communication accompanying the proposal from the Secretary of the Interior be printed in the RECORD at this point in my remarks.

There being no objection, the letter was ordered to be printed in the RECORD, as follows:

U.S. DEPARTMENT OF THE INTERIOR,
Washington, D.C., March 25, 1977.

Hon. WALTER F. MONDALE,
President of the U.S. Senate,
Washington, D.C.

DEAR MR. PRESIDENT: Enclosed is a draft bill "To authorize $15 million for the Government of Guam."

We recommend that the bill be referred to the appropriate Committee for consideration and that it be enacted.

This is the third Interior proposal to aid Guam since Typhoon Pamela occurred in May 1976.

Immediately after Typhoon Pamela, the Guam Government and Guamanian citizens received financial assistance of approximately $70 million from the Federal Disaster Assistance Administration. In addition, a $20.0 million grant, requested by Interior, was provided directly to the Guam Government to maintain essential government services. Typhoon Pamela so disrupted the economy that revenues were not sufficient to continue government operations. Finally, Interior has proposed a $10.2 million grant to reconstruct and upgrade power and water facilities based on an assessment of the Typhoon damage.

In addition to these funds, the Department has requested a supplemental appropriation to develop a program plan to help the Government of Guam deal with its short and long range needs. We expect this plan to cover a broad range of activities, including governmental operations, financial management, economic development, and alternative proposals for federal government assistance.

Guam's cash flow has been deficient for several years, however, and poses a more immediate problem. The decline of revenues is attributable to several factors: (1) the decline of the tourist industry in the mid-seventies, (2) the Tax Reduction Act of 1975 and, finally, (3) Typhoon Pamela. This proposed $15.0 million grant is intended to compensate Guam for losses suffered under the Tax Reduction Act of 1975 and to supplement Guam's revenues until the plan is completed and implementation is started. Currently there are immediate and obvious investment and rehabilitation requirements, such as improving roads, school facilities, which need not await the completion of the more comprehensive program plan. The requested funds will permit Guam to start on some of the more immediate projects. Furthermore, Guam may need to use some of the funds to continue the operation of essential government services. This grant represents a logical bridge for Guam until the overall program plan is completed.

The Office of Management and Budget has advised that there is no objection to the presentation of this legislative proposal from the standpoint of the Administration's program.

Sincerely,

CECIL D. ANDRUS,
Secretary.

By Mr. CHURCH (for himself, Mr. CLARK, Mr. WILLIAMS, Mr. HUMPHREY, Mr. STEVENSON, Mr. RANDOLPH, Mr. LEAHY, Mr. INOUYE, Mr. STONE, Mr. ABOUREZK, Mr. HUDDLESTON, Mr. BROOKE, Mr. BURDICK, Mr. METCALF, Mr. EASTLAND, Mr. STAFFORD, Mr. JACKSON, Mr. MAGNUSON, Mr. PELL, Mr. EAGLETON, Mr. HATFIELD, and Mr. KENNEDY):

S. 1194. A bill to amend titles II, VII, XI, XVI, XVIII, and XIX of the Social Security Act to provide for the improved administration of the old-age, survivors, and disability insurance program, the supplemental security income program, and the medicare program by a newly established independent Social Security Administration, to separate social security trust fund items from the general Federal budget, to prohibit the mailing of certain notices with social security and supplemental security income benefit checks, and for other purposes; to the Committee on Finance.

SOCIAL SECURITY ADMINISTRATION ACT

Mr. CHURCH. Mr. President, on behalf of myself and Senators CLARK, WILLIAMS, HUMPHREY, STEVENSON, RANDOLPH, LEAHY, INOUYE, STONE, ABOUREZK, HUDDLESTON, BROOKE, BURDICK, METCALF, EASTLAND, STAFFORD, JACKSON, MAGNUSON, PELL, EAGLETON, HATFIELD, and KENNEDY, I introduce for appropriate reference the Social Security Administration Act.

Representative CHARLES VANIK, the chairman of the Oversight Subcommittee of the House Ways and Means Committee, is introducing a similar bill today. With this type of strong support from a respected and high-ranking member of the House Ways and Means Committee, I am hopeful that this measure can be enacted into law soon.

The bill that I introduce today is based upon legislation, S. 388, that I sponsored during the past Congress. That measure

received strong bipartisan support. A clear majority—51 Senators in all—sponsored S. 388. However, no final action was taken because the House Ways and Means Committee considered several other high priority bills during the 94th Congress, including the Tax Reform Act, the Tax Reduction Act of 1975, amendments to the supplemental security income program, unemployment compensation amendments, and others.

MAJOR PROVISIONS

The Social Security Administration Act has three principal provisions. First, it would reestablish the Social Security Administration as an independent, nonpolitical agency under the direction of a three-member governing board appointed by the President with the advice and consent of the Senate.

This new autonomous unit would continue to have administrative responsibility for:

The social security cash benefits program, old-age, survivors, and disability insurance;

Medicare;

Supplemental security income; and

The portion of the black lung benefit program now under the direction of the existing Social Security Administration.

Second, the bill would prohibit the mailing of political notices with social security or supplemental security income checks.

Third, our proposal would remove the transactions of the social security trust funds from the unified budget.

NEED FOR AN INDEPENDENT AGENCY

Social security is the economic backbone for the vast majority of older Americans. It accounts for over half the income of 7 out of 10 individual beneficiaries and 1 out of 2 elderly couple beneficiaries.

Social security also represents almost the entire source of support—90 percent or more of total income—for 1 out of 4 single aged beneficiaries and 1 out of 12 older couples.

In addition, social security keeps 10 million persons out of poverty, including 7 million older Americans. Without these benefits millions of elderly individuals would be forced onto the welfare rolls. Others would be required to depend upon relatives—many of whom would be financially hard pressed to provide economic assistance. And without social security, the overwhelming proportion of older Americans could not hope to achieve even a moderate standard of living.

These facts underscore the need to assure that the social security system continues to be administered effectively, impartially, and efficiently.

Hearings conducted by the Committee on Aging have provided compelling reasons to separate the Social Security Administration from the Department of Health, Education, and Welfare.

Many leading authorities now agree that HEW is unwieldly and unmanageable by virtue of its size, budgetary level, and numerous programs.

The fiscal 1977 appropriations for HEW amounted to $45.1 billion. In addition HEW administers over 300 programs, several of which are very complex. Overall, HEW has over 152,000 employees.

Removal of the Social Security Administration, I strongly believe, would help to reduce HEW to more manageable proportions. At the same time, it would allow the Secretary and his staff to devote more attention to other important programs, as well as the smaller remaining units in the Department.

Social security is clearly large enough and important enough to be a separate agency. It is one of the larger direct line operations of the entire Federal Government. employing about 86,000 persons throughout the country.

Independent status, in my judgment, would also improve the efficiency of the Social Security Administration. The three-member board—appointed for staggered terms—would permit continuity of operation. This would be a safeguard against the situation which occurred in 1973—when the Social Security Administration operated without a Commissioner at the helm for about 7 months. During this time, crucial decisions affecting the supplemental security program had to be made. I am convinced that this gap contributed to some of the problems now confronting SSI.

A three-member board would also permit some degree of specialization for the appointees. For example, the three board members could each be experts in a particular area, such as the cash benefits program, medicare, or SSI.

Social security clearly deserves full-time, nonpolitical executive attention. The rapid turnover of HEW Secretaries and their staffs—and there have been 12 Secretaries during HEW's 24 years of existence—creates problems for the operations of social security. And it certainly does contribute to the best administration of this important institution which now affects almost every American family in one from or another.

PROHIBITING MAILING OF POLITICAL NOTICES

The Social Security Administration Act has another provision to protect the program from undue political pressures.

This would be achieved by prohibiting the mailing of announcements with social security or SSI checks which make reference by name, title, or signature to any officer of the United States.

Our proposal would not—and I want to emphasize this point—prevent the mailing of notices for legitimate informational purposes by the Social Security Administration.

It would, however, safeguard the program from attempts by elected officials to politicize the program.

In the past Republican and Democratic administrations alike have included announcements with social security checks. These notices usually imply that a boost in benefits is because of Presidential action.

The most striking example occurred in October 1972—a month before the Presidential election—when President Nixon sent out an announcement to 28 million persons, claiming credit for the enactment of the 20-percent social security increase. Yet, he used every resource at his disposal to defeat this measure.

Social security should not be exploited by persons in high office for their personal gain. It is simply too important to be demeaned in this way.

No one benefits—least of all the elderly—if social security and SSI can be used for political purposes. Both programs are simply too important to be demeaned in this fashion.

REMOVE SOCIAL SECURITY TRUST FUNDS FROM UNIFIED BUDGET

Our proposal would also remove the transactions of the social security trust funds from the unified budget.

Now social security transactions are a part of the unified budget, which lumps together general revenue operations and the separately financed social security system.

This is causing confusion for many Americans. Some are concerned whether their social security benefits are securely protected. Others are wondering how separate social security is from general revenue programs of the Federal Government.

The effect of the Social Security Administration Act is to return to the pre-1969 budget presentation, which kept the financial transactions of the social security system—except for purposes of economic analysis—entirely separate from general revenue income and expenditures. And this is the way that it should be.

Social security is a separately financed program and is paid from earmarked contributions from workers, their employers, and self-employed persons. The trust funds can only be used for two purposes: payment of benefits and administrative expenses of the system.

Social security represents a commitment by the Federal Government to pay benefits to workers and their families with separate financing on the basis of past earnings and contributions from covered employees. These obligations should not be lumped together with other programs, as if it were possible within the budgetary process to make choices between social security payments and other Government expenditures.

Public understanding about managing the Federal budget would also be greatly improved if there would be general recognition that social security is separately financed through earmarked payroll contributions.

Public confidence in the security of the long-range commitments of social security calls for budgetary and accounting treatment that is entirely separate from general revenue programs.

Although the social security trust funds would not be a part of the unified budget, they would be taken into account, as has always been the case, for purposes of economic analysis.

EXISTING FEATURES UNCHANGED

The Social Security Administration Act would not make any changes in the benefit or financing provisions of the social security system. Most existing relationships between the Social Security Administration and other units of Government would remain unchanged.

The Secretary of the Treasury, for example, would still have responsibility for investment of the trust funds.

The bill would, in no way, disturb existing relationships between Social Security and the Office of Management and Budget, the General Accounting Office, and the General Services Administration. The newly constituted Social Security Administration would be subject to the normal clearances on legislative proposals.

Moreover the statutory Advisory Council on Social Security would still continue as would other special purpose advisory panels. Their membership, however, would be appointed by the governing board of the Social Security Administration. This would enhance the nonpolitical character of the system.

NEED FOR PROMPT ENACTMENT

Nearly 33 million persons now receive social security benefits, or one out of every seven Americans. Over 100 million workers will pay social security taxes in 1977. In return, they will build credits for retirement, disability, survivor, and hospital insurance protection for themselves and their families.

Every one of these individuals has a very direct and important stake in social security. They deserve no less than the very best in service from the social security offices throughout the Nation. They also have a right to insist that social security continue to be administered fairly and effectively. And, the Social Security Administration Act would contribute to these objectives.

Mr. President, I ask unanimous consent that the text of this bill be printed at this point in the RECORD.

There being no objection, the bill was ordered to be printed in the RECORD, as follows:

S. 1194

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That this Act may be cited as the "Social Security Administration Act".

DECLARATION OF PURPOSE

SEC. 2. (a) The purpose of this Act is to strengthen the fiscal and administrative structure of the contributory social security programs. These programs constitute a retirement and group-insurance plan that provides nearly all American workers and their families protection designed to partly make up for the loss of earned income during retirement, during periods of extended and total disability before retirement age, or because of death, and provides protection against the costs of medical care during periods of extended and total disability and after age sixty-five. In conjunction with the program of supplemental security income to the needy, designed to fill the gaps in insurance protection, these contributory social insurance programs form a universal structure of economic security. It is essential that every practical step be taken to assure the long-range fiscal integrity of these programs and to provide for nonpolitical, objective, and skilled program administration.

(b) In creating the contributory social security and health insurance programs, the Congress has undertaken a fiscal obligation which differs in essential respects from its obligations under programs financed in other ways. The distinctive nature of this obligation results from (1) the contributory character of the programs which gives to nearly every American a personal financial stake in future benefit rights, (2) the concomitant obligation of Government to assure beyond peradventure that these rights earned by compulsory contributions and based on past earnings will, in fact, be honored when they fall due whether in the near or the distant future, (3) the dependence of the programs, if this assurance is to be fully credible, on adequate long-term sources of income dedicated exclusively to these programs, and (4) the need that changes in these systems which may be required to meet changing economic and social conditions be developed on a long-range basis and in the context of their interrelated benefit and financial structures. In order to assure more completely the full recognition of the fiscal obligations inherent in these programs, this Act separates the transactions of the self-financed social insurance programs from the transactions of the general budget.

(c) The magnitude of these social insurance programs and of the supplemental security income program—in terms of the number of people affected by them, the volume of income and expenditures, the number of persons engaged in their operation, the nationwide network of local offices, and the complexity of these huge operations—demands the utmost in skillful, nonpolitical administration. To help assure such administration and continuously high levels of service to the beneficiaries of and contributors to the programs, this Act constitutes the Social Security Administration as an independent agency in the executive branch, responsible directly to the President. The independence accorded by this change will also serve to emphasize to the public that the Government's role in the insurance programs is essentially that of trustee and manager for those who have worked in covered employment and contributed to the support of the programs, a role which is markedly different and carries different obligations from the Government's role in programs financed in other ways.

TITLE I—SOCIAL SECURITY ADMINISTRATION

SEC. 101. (a) Title VII of the Social Security Act is amended by inserting immediately before section 702 the following new section:

"SOCIAL SECURITY ADMINISTRATION

"SEC. 701 (a) (1) There is hereby established, as an independent agency of the executive branch of the Government, a Social Security Administration (hereinafter in this section referred to as the 'Administration'). The Administration shall be headed by a Board which shall consist of three members who shall be appointed by the President, by and with the advice and consent of the Senate. The resident shall, from time to time, designate one of the members as Chairman of the Board.

"(2) No individual shall, during the time that he holds the office as a member of the Board, engage in any business, vocation, or employment, other than the discharge of his duties and the exercise of his authority as a member of the Board.

"(3) Not more than two of the members of the Board shall be members of the same political party.

"(4) Each member of the Board shall hold office for a term of four years, except that (A) a member appointed to fill a vacancy occurring prior to the expiration of the term for which his predecessor was appointed, shall be appointed for the remainder of such term, and (B) the terms of office of the members first taking office after the date of enactment of the Act to establish the Social Security Administration as an independent agency shall expire, as designated by the President at the time of appointment, one on January 20, 1979, one on January 20, 1980, and one on January 20, 1981.

"(5) Actions taken, and decisions made by members of the Board shall be by majority vote; and any action so taken, or decision so made, shall be the action or decision of the Administration.

"(b) (1) It shall be the duty of the Administration to administer the programs established by titles II, XVI, and XVIII of this Act, and to discharge the duties and responsibilities imposed on the Secretary of Health, Education, and Welfare in connection with the administration of the program established by title IV of the Federal Coal Mine Health and Safety Act of 1969.

"(2) The Administration shall also have the duty of studying and making recommendations as to the most effective methods of providing economic security through social insurance, and as to legislation and matters of administrative policy concerning the programs referred to in paragraph (1), and to other programs having similar objectives.

"(3) The Administration shall prepare and submit to the Congress an annual report on its activities, which report shall include the rector of the Social Security Administration." made pursuant to paragraph (2).

"(c) (1) There shall be in the Administration an Executive Director, who shall be appointed by and serve at the pleasure of the Administration, and who shall perform such functions concerning the programs administered by the Administration as the Administration may prescribe.

"(2) There shall be in the Administration a General Counsel, who shall be appointed by and serve at the pleasure of the Administration, and who shall be the principal legal counsel in the Administration. The Administration may obtain the services of experts and consultants in accordance with the provisions of section 3109 of title 5, United States Code.".

(b) Section 702 of such Act is amended by inserting, immediately before the period at the end thereof, the following: "; except that nothing in this section shall be construed to require the Secretary to make studies of or recommendations with respect to programs administered by the Social Security Administration".

(c) Section 706 of such Act is amended—

(1) by striking out "Secretary", wherever it appears therein, and inserting in lieu thereof "Social Security Administration",

(2) in subsection (c) (1) thereof, by striking out "Department of Health, Education, and Welfare" and inserting in lieu thereof "Social Security Administration", and

(3) in subsection (a) thereof, by striking out "the public assistance programs under this Act" and inserting in lieu thereof "the program established by title XVI of this Act".

(d) Section 201(c) of such Act is amended—

(1) in the first sentence thereof, by inserting "the Chairman of the Board of the Social Security Administration," immediately after "Secretary of Labor.", and

(2) in the third sentence thereof, by striking out "Commissioner of Social Security" and inserting in lieu thereof "Executive Director of the Social Security Administration".

(e) The last sentence of section 205(g) of such Act is amended by striking out "in the person occupying the office of Secretary or any vacancy in such office" and inserting in lieu thereof "in the membership of the Board of the Social Security Administration or any vacancy in the membership of such Board".

(f) Section 1817(b) of such Act is amended—

(1) in the first sentence thereof, by inserting ", the Chairman of the Board of the Social Security Administration," immediately after "the Secretary of Labor,", and

(2) in the third sentence thereof, by striking out "Commissioner of Social Security" and inserting in lieu thereof "Executive Director of the Social Security Administration".

(g) Section 1841 (b) of such Act is amended—

(1) in the first sentence thereof, by inserting ", the Chairman of the Board of the Social Security Administration," after "Secretary of Labor", and

(2) in the third sentence thereof, by striking out "Commissioner of Social Security" and inserting in lieu thereof "Executive Director of the Social Security Administration".

(h) Title II (other than the first sentence of section 201(c) thereof, and the last sentence of section 205(g) thereof), title XVI and title XVIII (other than the first sentence of section 1817(b) thereof, and the first sentence of section 1841(b) thereof), of the Social Security Act are each amended—

(1) by striking out, wherever it appears therein, "Secretary of Health, Education, and Welfare" and inserting in lieu thereof "Social Security Administration",

(2) by striking out, wherever it appears therein, "Department of Health, Education, and Welfare" and inserting in lieu thereof "Social Security Administration",

(3) by striking out, wherever it appears therein, "Department" (but only if it is not immediately succeeded by the words "of Health, Education, and Welfare", and only if it is used in reference to the Department of Health, Education, and Welfare) and inserting in lieu thereof "Social Security Administration", and

(4) by striking out, wherever it appears therein, each of the following words (but, in the case of any such word, only if such word refers to the Secretary of Health, Education, and Welfare): "Secretary", "Secretary's", "his", "him", and "he", and inserting (in the case of the word "Secretary") "Social Security Administration", (in the case of the word "Secretary's") "Social Security Administration's", (in the case of the word "his") "the Social Security Administration's", (in the case of the word "him") "the Social Security Administration", and (in the case of the word "he") "the Social Security Administration".

(i) Section 1867(b) of such Act is amended by adding at the end thereof the following new sentence: "Any advice or recommendations so provided by the Advisory Council with respect to title XIX shall be transmitted by the Social Security Administration to the Secretary."

(j) Title XIX of the Social Security Act is amended by striking out "Secretary" wherever it appears, and inserting in lieu thereof "Social Security Administration" in—

(1) section 1902(a)(9)(A) thereof, and

(2) section 1903(i)(2) thereof.

(k) Section 1122 of such Act is amended—

(1) in subsection (c) thereof, by striking out "The Secretary shall pay" and inserting in lieu thereof "The Social Security Administration shall (pursuant to and in accordance with directives from the Secretary) pay",

(2) in subsection (d)(1)(B) thereof, by striking out all the matter that follows clause (ii) of subparagraph (B) and inserting in lieu thereof the following: "then, for such period as he finds necessary in any case to effectuate the purposes of this section, he shall in determining the Federal payments to be made under title V and XIX with respect to services furnished in the health care facility for which such capital expenditure is made, not include (and shall direct the Social Security Administration, in determining the Federal payments to be made under title XVIII with respect to services furnished in such health care facility, not to include) any amount which is attributable to depreciation, interest on borrowed funds, a return on equity capital (in the case of proprietary facilities), or other expenses related to such capital expenditures. With respect to any organization which is reimbursed on a per capita or a fixed fee or negotiated rate basis, the Secretary shall, in determining the Federal payments to be made under titles V and XIX, exclude (and shall direct the Social Security Administration, in determining the Federal payments to be made under title XVIII, to exclude) an amount which in his judgment is a reasonable equivalent to the amounts which would otherwise be excluded under this subsection if payments were to be made on other than a per capita or a fixed fee or negotiated rate basis.", and

(3) in subsection (e) thereof, by striking out "in determining the Federal payments" and inserting in lieu thereof "for the purpose of the determination of the Federal payments".

(l) Part B of title XI of such Act is amended—

(1) in section 1152(e) thereof, by—

(A) inserting "or title XVIII" immediately after "(other than this part", and

(B) inserting at the end thereof the following new sentence: "In order to avoid duplication of functions and unnecessary review and control activities, the Social Security Administration is authorized to waive any or all of the review, certification, or similar activities otherwise required under or pursuant to title XVIII when it finds, on the basis of substantial evidence of the effective performance of review and control activities by Professional Standards Review Organizations, that the review, certification, and similar activities so required are not needed for the provision of adequate review and control.",

(2) in section 1155(f)(2) thereof, by inserting "(or cause to be made, in appropriate cases, by the Social Security Administration)" immediately after "that the Secretary make",

(3) in section 1157 thereof, by striking out "The Secretary" wherever it appears and inserting in lieu thereof "The Social Security Administration",

(4) in section 1159(b) thereof, by—

(A) inserting "(or by the Social Security Administration, in the case of a beneficiary or recipient under title XVIII)" immediately after "to a hearing thereon by the Secretary", and

(B) inserting "(or the Social Security Administration's final decision, in the case of a beneficiary or recipient under title XVIII)" immediately after "review of the Secretary's final decision", and

(C) inserting "(or the Social Security Administration, as the case may be)" immediately after "The Secretary",

(5) in section 1165 thereof, by inserting "(promulgated in consultation with the Social Security Administration)" immediately after "The Secretary shall by regulations", and

(6) in section 1168 thereof, by adding at the end thereof the following: "In determining the amount to be payable from the Federal Hospital Insurance Trust Fund, the Secretary shall consult with the Social Security Administration; and any amount payable from such Fund shall be payable by the Social Security Administration, pursuant to and in accordance with directives of the Secretary.".

SEC. 102. (a) Except as provided in subsection (b), the term "Secretary of Health, Education, and Welfare" and the term "Secretary", when used to refer to the Secretary of Health, Education, and Welfare, shall be deemed to refer to the Social Security Administration when (and to the extent that) such term is employed in any provision of law which imposes any duty or responsibility on, confers any authority on, or imposes any limitation on the exercise of authority by, the Secretary of Health, Education, and Welfare with respect to the administration of the programs established by (1) title II, XVI, or XVIII, of the Social Security Act, or (2) title IV of the Federal Coal Mine Health and Safety Act of 1969.

(b) The provisions of subsection (a) shall not apply to any provision of law which is contained in (1) title II, XVI, or XVIII, of the Social Security Act, (2) title IV of the Federal Coal Mine Health and Safety Act of 1969, or (3) section 1122 of the Social Security Act, or part B of title XI of such Act.

SEC. 103. (a) There are transferred to the Social Security Administration (established by section 701 of the Social Security Act under the amendment made by section 101(a) of this Act) all functions carried out by the Secretary of Health, Education, and Welfare, with respect to the administration of programs and activities the administration of which is vested in such Administration, by reason of this Act and the amendments made thereby.

(b) There are transferred to the Social Security Administration (as established by section 701 of the Social Security Act under the amendment made by section 101(a) of this Act) all personnel, assets, liabilities, contracts, property, and records, which the Director of the Office of Management and Budget determines to be employed, held, or used by the Secretary of Health, Education, and Welfare primarily in connection with the functions, activities, and programs which, by reason of this Act and the amendments made thereby, are vested in or become the responsibility of such Administration.

(c) The position of Commissioner of Social Security is abolished.

SEC. 104. (a) All orders, determinations, rules, regulations, permits, contracts, certificates, licenses, and privileges—

(1) which have been issued, made, promulgated, granted, or allowed to become effective, in the exercise of functions (A) which were exercised by the Secretary of Health, Education, and Welfare (or his delegate), and (B) which relate to functions which, by reason of this Act and the amendments made thereby, are vested in the Social Security Administration (as established by section 701 of the Social Security Act under the amendment made by section 101(a) of this Act), and

(2) which are in effect at the time this Act takes effect,

shall (to the extent that they relate to functions described in paragraph (1)(B)) continue in effect according to their terms until modified, terminated, suspended, set aside, or repealed by the Social Security Administration (as established by section 701 of the Social Security Act).

(b) The provisions of this Act (including the amendments made thereby) shall not affect any proceeding pending at the time this Act takes effect before the Secretary of Health, Education, and Welfare with respect to functions vested (by reason of this Act and the amendments made thereby) in the Social Security Administration (as established by section 701 of the Social Security Act under the amendment made by section 101(a) of this Act), except that such proceedings, to the extent that they relate to such functions, shall continue before the Social Security Administration (as so established). Orders shall be issued under any such proceeding, appeals taken therefrom, and payments shall be made pursuant to such orders, in like manner as if this Act had not been enacted, and orders issued in any such proceeding shall continue in effect until modified, terminated, superseded, or repealed by the Social Security Administration (as so established), by a court of competent jurisdiction, or by operation of law.

(c) Except as provided in this subsection—

(1) the provisions of this Act shall not affect suits commenced prior to the date this Act takes effect; and

(2) in all such suits proceedings shall be had, appeals taken, and judgments rendered,

in the same manner and effect as if this Act had not been enacted.

No cause of action, and no suit, action, or other proceeding commenced by or against any officer in his official capacity as an officer of the Department of Health, Education, and Welfare, shall abate by reason of the enactment of this Act. Causes of action, suits, actions or other proceedings may be asserted by or against the United States and the Social Security Administration (as established by section 701 of the Social Security Act under the amendment made by section 101(a) of this Act), or such official of such Administration as may be appropriate, and, in any litigation pending when this section takes effect, the court may at any time, on its own motion or that of a party, enter an order which will give effect to the provisions of this subsection (including where appropriate, an order for substitution of parties).

(d) This Act shall not have the effect of releasing or extinguishing any criminal prosecution, penalty, forfeiture, or liability incurred as a result of any function which (by reason of this Act) is vested in the Social Security Administration.

(e) Orders and actions of the Social Security Administration in the exercise of functions vested in such Administration under this Act (and the amendments made thereby shall be subject to judicial review to the same extent and in the same manner as if such orders and actions had been taken by the Secretary of Health, Education, and Welfare in the exercise of such functions immediately preceding the effective date of this Act. Any statutory requirements relating to notice, hearings, action upon the record, or administrative review that apply to any function so vested in the Social Security Administration shall continue to apply to the exercise of such function by such Administration.

(f) In the exercise of the functions vested in it under this Act (and the amendments made thereby), the Social Security Administration shall have the same authority as that vested in the Secretary of Health, Education, and Welfare with respect to the exercise of such functions immediately preceding the vesting of the same in such Administration, and actions of such Administration shall have the same force and effect as when exercised by such Secretary.

TITLE II—MISCELLANEOUS AND CONFORMING AMENDMENTS

SEC. 201. (a) Section 205 of the Social Security Act is amended by adding after subsection (q) thereof the following:

"(r) The Social Security Administration shall not permit to be enclosed with any check for benefit payments under this title any material which—

"(1) is not related to the provisions of this title or title XVIII, or

"(2) contains the name, signature, or title of any officer of the Government of the United States.".

(b) Section 1631(a) of such Act is amended by adding at the end thereof the following new paragraph:

"(6) The Social Security Administration shall not permit to be enclosed with any check for benefit payments under this title any material which—

"(A) is not related to the provisions of this title or title XVIII, or

"(B) contains the name, signature, or title of any officer of the United States.".

SEC. 202. Title IV of the Federal Coal Mine Health and Safety Act of 1969 is amended—

(1) in section 402(c) thereof, by striking out "where used in part B means the Secretary of Health, Education, and Welfare, and", and

(2) in all the provisions thereof (other than section 402(c) and section 427) by—

(A) striking out, wherever it appears therein, "Secretary of Health, Education, and Welfare" and inserting in lieu thereof "Social Security Administration", and

(B) striking out, wherever it appears therein, each of the following words (but, in the case of any such word, only if such word refers to the Secretary of Health, Education, and Welfare): "Secretary", "Secretary's", "his", "him", and "he", and inserting (in the case of the word "Secretary") "Social Security Administration", (in the case of the word "Secretary's") "Social Security Administration's", (in the case of the word "his") "Social Security Administration's", (in the case of the word "him") "the Social Security Administration", and (in the case of the word "he") "the Social Security Administration".

SEC. 203. (a) Section 201 of the Budget and Accounting Act, 1921 (31 U.S.C. 11), is amended—

(1) in the second sentence of subsection (a) thereof, by striking out "The Budget" and inserting in lieu thereof "Except as provided in subsection (d), the Budget"; and

(2) by adding at the end of such section the following new subsection:

"(d) The Budget shall set forth the items referred to in paragraphs (4), (5), (6), (7), (8), (9), and (12) of subsection (a) which are attributable to receipts of and expenditures from the general fund of the Treasury (commonly referred to as the 'administrative budget'), and shall set forth separately such items which are attributable to receipts of and expenditures from the Federal Old-Age and Survivors Insurance Trust Fund, the Federal Disability Insurance Trust Fund, the Federal Hospital Insurance Trust Fund, and the Federal Supplementary Medical Insurance Trust Fund.".

(b) The amendment made by subsection (a) shall apply with respect to the Budget for the fiscal year ending September 30, 1978, and for each fiscal year thereafter.

SEC. 204. (a) Section 5312 of title 5, United States Code (relating to level I of the Executive Schedule), is, amended by adding at the end thereof the following new paragraph:

"(14) Chairman of the Board of the Social Security Administration.".

(b) Section 5313 of such title (relating to level II of the Executive Schedule) is amended by adding at the end thereof the following new paragraphs:

"(23) Member of the Board of the Social Security Administration.

"(24) Executive Director, Social Security Administration.".

(c) Section 5314 of such title (relating to level III of the Executive Schedule) is amended by adding at the end thereof the following new paragraph:

"(65 General Counsel, Social Security Administration.".

(d) Section 5315 of such title (relating to level IV of the Executive Schedule) is amended by striking out—

"(99) Commissioner of Social Security, Department of Health, Education, and Welfare."

The officers referred to in the preceding sentence shall be compensated from the date they first take office, at the rates provided for in the amendments to title 5, United States Code, made by section 204 of this Act. Such compensation and related expenses of such officers shall be paid from funds available for the functions vested in the Social Security Administration by this Act and the amendments made thereby.

By Mr. DURKIN:

S. 1195. A bill to amend title 38 of the United States Code to make certain that recipients of veterans' pension and compensation will not have the amount of such pension or compensation reduced because of increases in monthly social security benefits; to the Committee on Veterans' Affairs.

Mr. DURKIN. Mr. President, in my State of New Hampshire and throughout this Nation, there are many needy and deserving veterans who are forced to live on a veterans' pension and social security benefits. Both of these programs were designed to insure that its recipients will be allowed an income which will enable them to survive with a fair and decent standard of living. Yet the intent of the legislation establishing both of these programs has systematically been frustrated by the procedure which causes the benefits under the veterans' pension to be reduced with each corresponding increase in monthly social security benefits. The legislation which I am introducing today will remedy this situation by providing that the cost-of-living increases in social security benefits shall be disregarded in the determination of the annual income of a veteran entitled to pension benefits and shall in no way reduce a veteran's pension.

In the last Congress, Members of this body articulated a sincere sensitivity to the problems and needs of both the elderly and the veterans of this Nation. The inflationary economy of the last years has oftentimes had a more severe impact on these two groups than on other deserving members of our society. We have attempted to resolve this problem for the elderly by providing a cost-of-living increase in social security benefits. Yet the practical effect of our Federal programs is that this increase which we have determined to be necessary is not helpful to its full extent for those veterans who receive social security as their pension benefits are reduced by the very amount of the social security cost-of-living increase. The absurd result is that those veterans who may need a cost-of-living increase the most are in this way effectively deprived of fully enjoying the increase.

Mr. President, we must put an end to this absurd system with its deleterious impact on the veterans of this Nation. I therefore urge prompt consideration of this legislation which will disregard the cost-of-living increase in social security benefits in the determination of annual income for purposes of a veteran's pension.

I ask unanimous consent that the text of this bill be printed in the RECORD.

There being no objection, the bill was ordered to be printed in the RECORD, as follows:

S. 1195

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That (a) subsection (g) of section 415 of title 38, United States Code, is amended by adding at the end thereof the following new paragraph:

"(4) In determining the annual income of any individual who is entitled to monthly benefits under the insurance program established under title II of the Social Security Act, the Administrator, before applying paragraph (1)(G) of this subsection, shall disregard any part of such benefits which results from (and would not be payable but

for) the general increase in benefits under such program provided by section 201 of Public Law 92-336 or any subsequent cost-of-living increase in such benefits occurring pursuant to section 215(i) of the Social Security Act."

(b) Section 503 of title 38, United States Code, is amended by adding at the end thereof the following new subsection:

"(d) In determining the annual income of any individual who is entitled to monthly benefits under the insurance program established under title II of the Social Security Act, the Administrator, before applying subsection (a)(6) of this section, shall disregard any part of such benefits which results from (and would not be payable but for) the general increase in benefits under such program provided by section 201 of Public Law 92-236 or any subsequent cost-of-living increase in such benefits occurring pursuant to section 215(i) of the Social Security Act."

(c) In determining the annual income of any person for purposes of determining the continued eligibility of that person for, and the amount of, pension payable under the first sentence of section 9(b) of the Veterans' Pension Act of 1959, the Administrator of Veterans' Affairs shall disregard, if that person is entitled to monthly benefits under the insurance program established under title II of the Social Security Act, any part of such benefits which results from (and would not be payable but for) the general increase in benefits under such program provided by section 215(i) of the Social Security Act.

SEC. 2. The amendments made by this Act shall apply with respect to annual income determinations made pursuant to sections 415(g) and 503 (as in effect both on and after June 30, 1960) of title 38, United States Code, for calendar years after 1972.

By Mr. DOLE:

S. 1197. A bill to amend title XVIII of the Social Security Act to provide coverage for services which may be performed by a dentist on the same basis as presently allowed for physicians under the medicare program, and to authorize payment under such program for all inpatient hospital services furnished in connection with dental procedures requiring hospitalization; to the Committee on Finance.

TITLE XVIII OF THE SOCIAL SECURITY ACT

Mr. DOLE. Mr. President, there are two serious inequities in the present medicare law affecting the profession of dentistry and its specialty, oral surgery. I am today introducing legislation which will remedy these inequities.

Many of the professional services covered under the present medicare program are provided by both oral surgeons and other dentists and by physicians, but the patient is reimbursed for such services only when they are provided by physicians. The first section of this proposed legislation will eliminate this discrimination against dentists and their patients.

There is significant overlap between the professional practice of dentists, including oral surgeons, and that of physicians. Both groups often admit their patients to hospitals and perform complicated oral and maxillofacial procedures, provide diagnostic care, and treat oral infections. Medicare will presently pay for all of these services if they are performed by a physician, but will not pay for the diagnostic care or treatment of oral infection if it is performed by a dentist or an oral surgeon.

Under present law, medicare only covers the services of dentists when they constitute so-called "physicians' services." "Physician" is defined to include a doctor of dental or oral surgery, licensed by his State "but only with respect to": First, surgery related to the jaw or any contiguous structure; or second, reduction of fractures of the jaw or any facial bones.

Under present law, as it had been regularly interpreted by the Social Security Administration, a dentist only functions or acts as a "physician," and his services are only covered, when he is involved in actual surgery or reduction. The law, thus, seriously discriminates against dentists and oral surgeons by excluding from coverage important nonsurgical functions. Absolutely no logical reason exists to support this unfair treatment. Dentists and especially oral surgeons are professionaly trained and licensed by State law to perform these procedures.

This situation creates serious consequences for the patient and is important to the professional life of the dentist. If the patient is aware of the discrimination, his freedom of choice of provider between a physician and a dentist will be prejudiced. If he is not aware of this legal pitfall, he will be deprived of reimbursement for what surely must appear to him to be a completely arbitrary distinction.

The correction of this inequity will not increase the scope of covered services. The existing exclusion from coverage of routine dental care found in section 1862(a)(12) would not be changed. Those services of both dentists and physicians that fall into this category will still not be covered. The solution offered by my legislation will merely assure that patients will not be denied reimbursement for otherwise covered services solely because of the academic degree of the provider.

The second section of this legislation will authorize payment under the medicare program for all inpatient hospital services furnished in connection with dental procedures requiring hospitalization. Presently, if a patient's oral surgeon hospitalizes the patient for a noncovered dental procedure solely because the patient's dental condition necessitates hospitalization, the patient is not reimbursed for his hospital expenses.

Existing medicare law differentiates between cases in which the dental procedure itself is a covered service—and thus allows reimbursement for the dentist's fee—and cases involving noncovered procedures. If the procedure is covered, the inpatient hospital expenses are also covered. However, the present medicare statute as interpreted by the Social Security Administration restricts the payment of inpatient hospital expenses in the case of a noncovered dental procedure to circumstances in which the patient's underlying medical condition, and not solely his dental condition, requires hospitalization.

The effect of the existing law is to preclude hospitalization coverage where, in the judgment of the patient's dentist, the severity of his dental condition alone requires hospitalization for the safe performance of a noncovered dental procedure. In this case, the patient must find his own means of payment for the hospital expenses. For example, an 81-year-old woman in Florida who was hospitalized by her oral surgeon for the removal of six maxillary teeth had her claim rejected because the medicare intermediary found that she was treated for a purely dental condition. The correction of this problem will not increase the coverage of dental fees. It will only increase the hospital coverage and aid the patient.

I am pleased to introduce these proposed amendments to title XVIII of the Social Security Act, and I urge their timely consideration.

I ask unanimous consent that the text of this legislation be printed in the RECORD.

There being no objection, the bill was ordered to be printed in the RECORD, as follows:

S. 1197

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That clause (2) of section 1861(r) of the Social Security Act is amended to read as follows: "(2) a doctor of dental surgery or of dental medicine who is legally authorized to practice dentistry by the State in which he performs such function or action, and who is acting within the scope of his license when he performs such function or action, or".

SEC. 2. (a) Section 1814(a)(2)(E) of the Social Security Act is amended to read as follows:

"(E) in the case of inpatient hospital services in connection with a dental procedure, the individual, because of his underlying medical condition and clinical status, or because of the severity of his dental condition, requires hospitalization in connection with the provision of such dental services;".

(b) Section 1862(a)(12) of such Act is amended by striking out "except that" and all that follows and inserting in lieu thereof the following: "except that payment may be made under part A in the case of inpatient hospital services in connection with the provision of any dental services if the individual, because of his underlying medical condition and clinical status, or because of the severity of his dental condition, requires hospitalization in connection with the provision of such services; or".

SEC. 3. The amendments made by this Act shall apply with respect to items and services furnished on or after the first day of the first month beginning after the date of the enactment of this Act.

By Mr. CHILES:

S. 1198. A bill to amend the Strategic and Critical Materials Stock Piling Act, and for other purposes; to the Committee on Armed Services.

Mr. CHILES. Mr. President, I am today introducing S. 1198, to establish the authority and procedures necessary to maintain an adequate supply of critical materials for our national security.

This is a companion bill to H.R. 4895, which was introduced earlier this year by my distinguished colleague from Florida, Mr. BENNETT, chairman of the House Armed Services Subcommittee on Seapower and Strategic and Critical Materials. The House measure was voted out unanimously by the House Armed Services Committee on March 17, and passed the House Rules Committee March 29.

National stockpiles are maintained to

guarantee an adequate supply of critical materials for national security, so as to allow our defense and defense-related activities to function smoothly in the event of wartime disruptions.

The National Security Council recently completed a study of our national stockpile system. That study revealed an imbalance in our stockpiles: Many items currently in the stockpile are simply not needed for our national defense, while other items of great importance to our national security needs are not in these stockpiles at all.

The solution to this problem will require the acquisition of substantial amounts of additional stockpile materials, and the cost of that acquisition may run into the billions of dollars. This legislation is designed to provide the need without placing an undue burden upon the taxpayers of this country. It is consistent with my determination to provide a strong national defense in an efficient, cost-effective manner.

This bill would provide the Government with three mechanisms which will work together to go a long way toward correcting our stockpile imbalance in a cost-effective manner.

First. It would establish a special strategic and critical materials procurement fund, which would use the revenues from stockpiles in the future. Currently such proceeds return to the General Treasury fund. The money in this special fund would be subject to the normal congressional authorization and appropriation processes.

Second. It would provide for the authorization of appropriations for the acquisition, transportation, and processing of materials for the strategic stockpiles. The lack of such authority in the present stockpile law would hinder our ability to correct the imbalance in our stockpiles. This bill would also authorize the transfer of excess stockpile materials at fair market values as payment for the expenses of acquisition, refining, or processing of needed materials. That way, we can exchange our excess material to acquire, refine, and process those materials we need.

Third. It would require the establishment of a coordinated Government program to barter or exchange excess goods owned by the Government to foreign countries for strategic materials. The authority to do so exists today and has been used in the past to exchange excess American agricultural commodities for strategic materials from foreign countries. This bill contains provisions to assure the active cooperation and participation of every appropriate department or agency and also requires each agency to submit a detailed report on its efforts to participate in the program.

Mr. President, I ask unanimous consent that the bill be printed in the RECORD.

There being no objection, the bill was ordered to be printed in the RECORD, as follows:

S. 1198

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That section 3 of the Strategic and Crtical Materials Stock Piling Act (50 U.S.C. 98b) is amended—

(1) by striking out the period at the end of paragraph (e) and inserting in lieu thereof "; and"; and

(2) by adding after such paragraph the following new paragraph:

"(f) establish a program which (1) shall provide for the acquisition of strategic and critical materials from foreign countries through barter of goods owned by the United States, and (2) shall include provisions adequate to assure the active cooperation and participation of each appropriate department and agency, as determined by the President, having custody of goods owned by the United States which are deemed suitable for barter with foreign countries.".

SEC. 2. Section 4 of the Strategic and Critical Materials Stock Piling Act (50 U.S.C. 98c) is amended by adding at the end the following new sentence: "Each report submitted under this section shall include a detailed report on the efforts of each appropriate department and agency (as determined by the President under section 3(f)) to acquire strategic and critical materials through barter with foreign countries under the program established pursuant to section 3(f).".

SEC. 2. Section 4 of the Strategic and Critical Materials Stock Piling Act (50 U.S.C. 98g) is amended to read as follows:

"SEC. 8. (a)(1) No funds may be appropriated or obligated for procurement of materials under this Act unless funds for such procurement have been specifically authorized by law.

"(2) There is authorized to be appropriated, out of any money in the Treasury not otherwise appropriated, for transportation, maintenance, rotation, storage, refining and processing of the materials to be acquired under this Act, such sums as the Congress, from time to time, may deem necessary to carry out the provisions of this Act.

"(3) Funds appropriated for procurement of materials under this Act, and funds appropriated for transportation, maintenance, rotation, storage, refining, and processing materials to be acquired under this Act, including funds heretofore appropriated for such purposes, shall remain available to carry out the purposes for which appropriated until expended.

"(b) Excess materials in the inventory maintained under the Defense Production Act of 1950 (50 U.S.C. App. 2061–2166) and excess materials in the national stockpile and supplemental stockpile, the disposition of which is authorized by law, shall be available, without reimbursement, for transfer at fair market value as payment for expenses (including transportation and other accessorial expenses) of acquisition of materials, or of refining, processing, or otherwise beneficiating materials, or of rotating materials, pursuant to section 3.".

SEC. 4. Section 9 of the Strategic and Critical Materials Stock Piling Act (50 U.S.C. 98h) is amended to read as follows:

"SEC. 9. (a) There is established in the Treasury of the United States a separate fund to be known as the Strategic and Critical Materials Procurement Fund (hereinafter in this section referred to as the 'Fund'). All moneys received after the effective date of this section on account of sales of materials under this Act shall be covered into the Fund.

"(b)(1) Moneys covered into the Fund shall be available, when appropriated therefor, only for the procurement, transportation, maintenance, rotation, storage, refining, or processing of materials under this Act.

"(2) Any moneys covered into the Fund which are appropriated shall remain available, without fiscal year limitation, for the purposes for which they are appropriated until they are expended.

"(c) The Administrator of General Services shall submit a report to the Congress not later than the first day of January of each year on the financial condition and the results of the operation of the Fund during the preceding fiscal year and on its expected condition and operations during the next fiscal year. Such report shall be printed as a Senate document of the session of the Congress to which the report is made.".

SEC. 5. (a) Except as provided in subsection (b), the amendments made by this Act shall take effect on the date of enactment of this Act.

(b) The amendment made by section 3 shall apply with respect to fiscal year 1978 and each fiscal year thereafter.

By Mr. McINTYRE:

S. 1199. A bill to amend title 5 of the United States Code to improve agency rulemaking by establishing paperwork control mechanisms by expanding opportunities for public participation, and by enabling the President to delay the implementation of certain rules for 1 year to allow a more comprehensive analysis of congressional intent and public impact, and for other purposes; to the Committee on Governmental Affairs.

RED TAPE REDUCTION ACT

Mr. McINTYRE. Mr. President, we have all experienced the feelings of helplessness and frustration which seemingly go hand-in-hand with the burgeoning morass of Government rules and regulations. Like a Gordian knot which sits in the marketplace and defies unraveling, the Code of Federal Regulations—CFR—has become an undecipherable nightmare for small businessmen who are overruled and cross-regulated by a series of diffuse agency programs whose very purposes often run head-on into each other.

A classic example is an Ohio meatpacker who was visited by an OSHA inspector. OSHA determined that his concrete packing floors were too smooth, and that he would have to rib his floors to afford better traction for the safety of his employees. At considerable expense, he complied, only to be visited by the Food and Drug Administration shortly thereafter, who ruled that his new ribbed floors were equally unacceptable due to the bacteria which would accumulate between the ribs.

Mr. President, we can no longer wait for another Alexander the Great to enter the scene and sever this knot with a single blow of his mighty sword. We have dallied too long, and the problem is far too great, that now, as legislators, it is our responsibility to do whatever we can to abate the serious administrative problems which we all know will not vanish overnight.

We are not alone in our effort, however. The Commission on Federal Paperwork has been working for a year and a half now in a full-time effort to identify unnecessary, duplicative, and conflicting paperwork connected with Federal, State, and local governments. In another 6 months, Congress and the President will receive the Commission's major recommendations and final report.

As cochairman of the Commission, I have been closely monitoring the staff's work. One finding I have observed thus far from our many hearings and the subsequent staff research is that early statutory deadlines for the promulgation of rules and regulations have often trig-

gered unworkable situations within the administrative agencies.

A prime example is the Employee Retirement Income Security Act of 1974—ERISA. The intent of the act was to promote solidarity in pension and retirement plans by establishing standards for those who set up plans or held retirement funds in trust. A most laudable objective, but the act required that the regulations be promulgated within 120 days from the law's effective date. This deadline created a rush situation within the Department of Labor which resulted in an ill-conceived, 30-page report, the EBS–1, which was thrust upon thousands of pension planners. The report consisted of essay type responses which consumed countless man-hours from businesses of all kinds, yet the information which took so much time to gather was not good enough to use. Is it not ironic that, in this case, and in several others, our haste to implement an otherwise sound program has caused us to take two steps in reverse before we can take one forward.

There are other areas where the speed of implementing regulations is causing great problems. I shall just mention one: the requirements of the Office of Civil Rights.

Robert Benton, one of the Commissioners serving on the Commission on Federal Paperwork, who is also superintendent of public instruction in Iowa, gave me some information recently concerning the speed of regulatory implementation that has resulted in massive paperwork.

Benton noted that the Council of Chief State School Officers had been working closely with the executive branch to develop ways to implement surveys of schools to comply with HEW regulations promulgated by the Office of Civil Rights. But at a meeting in Salt Lake City last November 14–17, the Council reviewed the OCR plans for 1976–1977 collection of data for schools. It found that the data burden was excessive, requiring hundreds of thousands of person-hours to provide; the amount of advance notice and the time schedule make it virtually impossible to meet OCR requirements as schools conduct normal essential education activities; and, in many States the OCR information requirements are redundant.

Clearly, more time should have been taken before regulations and information requests were sent out by OCR burdening our school districts.

This brings me to the point I would like to make about ourselves. It includes some criticism, which is usually enough to make most of us quit listening from the start, but I believe there is a good deal of truth in what I am about to say.

I believe it would be fruitful to consider our ability, as legislators, to set effective dates for the promulgation of rules and regulations in all the laws we enact. I submit that in some instances, we know exactly what the surrounding circumstances are, and in most instances we know enough to approximate, but in a few cases—let us face it—our deadlines to agencies have been unreasonable because we were not fully aware of all the exigencies which come into play once a law is handed to an agency for implementation. This is not to say that we have been intentionally arbitrary and capricious. But nobody bats 1,000, and sometimes we make mistakes.

The Red Tape Reduction Act which I am introducing today would relieve this situation by allowing adjustments in premature effective dates. The bill permits the President to delay the promulgation of agency rules under a given law for a period not to exceed 1 year. The delay would be carried out by the President's Executive order based on a request from an agency head.

Mr. President, the new administration has made a pledge of cooperation with Congress during the next 4 years.

We can reciprocate by listening to the executive branch in an area where they have a better vantage point than we. By heeding the advice of an agency head who can convincingly show that sticking to a congressionally mandated effective date would cause serious administrative problems, we can avoid clashes with the agencies and with the public which could easily be avoided. I concur with President Carter in his assertion that good faith efforts on the part of both Congress and the executive will go a long way. The public will be the real winner. In the spirit of joint cooperation, I therefore urge prompt passage of this legislation.

Mr. President, I ask unanimous consent that the text of the bill be printed in the RECORD at this point.

There being no objection, the bill was ordered to be printed in the RECORD, as follows:

S. 1199

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That this Act may be cited as the "Red Tape Reduction Act of 1977".

STATEMENT OF FINDINGS

SEC. 2. (a) The Congress finds that—

(1) a multiplicity of complex laws are passed in each session of the Congress of the United States which require additional interpretation by the executive agencies;

(2) many laws contain statutory rulemaking deadlines which, in fact, are not met;

(3) a period of time for study and analysis between the date of enactment of a Public Law of the United States and the promulgation of the necessary rules thereunder would allow a more effective implementation of such Public Law, and would improve communication and understanding between Executive department and agencies charged with the administration or enforcement of such Public Law and Congressional Oversight committees;

(4) such a period would improve public participation in rulemaking by allowing more time to identify a rule's unnecessary and excessive paperwork before it is approved and thrust upon the public;

(5) the public is often unaware of agency proposals to promulgate new rules and regulations;

(6) in many instances, the public has not been allowed to effectively participate in rulemaking procedures with respect to rules which have direct and widespread public impact; and

(7) the delays caused by the selective use of such periods of study would be justified by the improved quality of rules which would be produced thereunder.

DEFINITIONS

SEC. 3. For the purposes of this Act the term—

(1) "agency" has the meaning set forth in section 551(1) of title 5, United States Code;

(2) "rule" has the meaning set forth in section 551(4) of title 5, United States Code;

(3) "law" means a Public Law of the United States or any amendment thereto, but such term does not include a treaty of the United States or any Protocol thereto which has received the ratification of the Senate, a Private Law, or any reorganization plan submitted under the provisions of chapter 9 of title 5, United States Code.

DELAY OF REGULATIONS

SEC. 4. (a) Section 553 of title 5, United States Code, is amended by adding at the end thereof the following new subsection:

"(f)(1) Upon the request of an agency head, the President may issue an Executive Order delaying for a period not to exceed one year the effective date required by law for the promulgation of rules or regulations. Such Executive Order must include a finding that the effective date required by law is impracticable due to—

"(A) the need to collect data not readily available; or

"(B) widespread and substantial public impact which requires additional time for consultation with affected parties.

"(2) During the period of delay described in paragraph (1) of this subsection, the agency shall evaluate the relative costs and benefits, both direct and indirect, for any alternative rule necessary to implement the law, and shall promulgate such rule as it finds best implement such law not later than 30 days after such evaluation is completed.

(b)(1) The Executive Order described in subsection (a) of this section may take effect—

(A) only after the expiration of the first period of thirty days of continuous session of Congress after the date on which such Executive Order was issued; and

(B) only if, between the date of issuance of such Executive Order and the end of the thirty-day period, no concurrent resolution is adopted which states in substance that Congress does not favor such Executive Order.

(2) For the purpose of paragraph (1) of this subsection—

(A) continuity of a session of Congress is broken only by an adjournment of Congress sine die; and

(B) the days on which either House is not in session because of an adjournment of more than three days to a day certain are excluded in the computation of such thirty-day period.

(c) Whenever a committee of either House of Congress reports a resolution of disapproval as provided in subsection (b) of this section relating to such Executive Order, it is at any time thereafter in order (even though a previous motion to the same effect has been disagreed to) to move to proceed to the consideration of such resolution. Such motion is highly privileged and is not debatable. An amendment to such motion is not in order, and it is not in order to move to reconsider the vote by which such motion is agreed to or disagreed to.

(d) No request for an Executive Order described in subsection (a) of this section shall issue if, in the opinion of the agency head, such Executive Order, if issued, would so delay the promulgation of the final rule or regulation by an agency as to present a substantial risk to the health or safety of persons or to national security.

PUBLIC PARTICIPATION

SEC. 5. Section 553 of title 5, United States Code, is amended as follows:

(1) subsection (b) thereof is amended—

(A) by inserting after the first sentence thereof the following new sentence:

"Other appropriate publications shall be used whenever such use would substantially improve notification to those parties significantly affected by the proposed rule.";

(B) in paragraph (2) thereof by striking out "; and" and inserting in lieu thereof a semicolon;

(C) by striking out the period at the end of paragraph (3) thereof and inserting in lieu thereof a semicolon; and

(D) by adding immediately after paragraph (3) thereof the following new paragraphs:

"(4) an estimate of the projected paperwork burden involved in complying with the proposed rule, including the type and number of people affected, the time required to comply, the expertise or special training involved in compliance, and the cost of compliance; and

"(5) the tentative date, whenever possible to project, upon which a proposed rule is scheduled to become effective.";

(2) subsection (c) thereof is amended—

(A) by inserting after the first sentence thereof the following new sentence:

"During the drafting stage of the rule, which shall be determined by each agency head but which shall in no event be less than 30 days in duration, the agency shall make a reasonable attempt to work with those parties likely to be affected by the paperwork burden of the proposed rule."; and

(B) by inserting after the second sentence thereof the following new sentence:

"The statement shall include an acknowledgment as to whether the agency used its best efforts to obtain a broad range of public input during the drafting of the rule."; and

(3) subsection (d) thereof is amended by striking out "30 days" in the first sentence thereof, and inserting in lieu thereof "45 days".

SEPARABILITY

SEC. 6. If any provision of this Act or the applicability thereof is held invalid with respect to its application to any person or circumstance, the remainder of this Act shall not be affected thereby.

EFFECTIVE DATE

SEC. 7. (a) Except as provided in subsection (b) of this section this Act shall become effective upon the date of—

(b) This Act shall be inapplicable to any Act of Congress enacted during the first period of 90 legislative days immediately preceding the date of enactment of this Act.

By Mr. ABOUREZK (for himself, Mr. THURMOND, Mr. RANDOLPH, Mr. MCGOVERN, Mr. DOMENICI, Mr. HUMPHREY, Mr. HATHAWAY, and Mr. HOLLINGS):

S. 1200. A bill to amend section 306(a) of the Consolidated Farm and Rural Development Act to prescribe criteria for determining the amount of grants made under such section, to prescribe the priority of applicants for loans and grants under such section, and for other purposes; to the Committee on Agriculture, Nutrition, and Forestry.

FMHA WATER AND SEWER GRANT AND LOAN PROGRAM AMENDMENTS

Mr. ABOUREZK. Mr. President, I am pleased to introduce today a bill to amend the Rural Development Act's provisions concerning the Farmers' Home Administration's water and sewer grant and loan program.

This program has provided a vital and essential service to rural communities throughout the country, and the work of the FmHA in this area is to be commended. I believe, however, that certain changes are needed.

Rural communities face particular problems in obtaining a reliable supply of good quality water, or in developing sewer systems that are efficient and safe.

Because rural communities are small, they cannot accomplish many of the economies of scale in water development available to larger communities. Nonetheless, the rural community must meet the same needs of its people and Federal standards for the supply of water and construction of sewers as the large city. The result is that for many rural communities, the choice is either a system they cannot afford, or a system that is unreliable or unsafe.

The national demonstration water project, under a grant from the Environmental Protection Agency, in fact, has been conducting a survey of rural water needs, and their information so far indicates that rural communities face a number of severe water problems.

The Michigan health department reported, for instance, 25 percent of the wells in very small communities were bacteriologically unsafe for drinking. The costs of providing safe water to these communities would be $26 per month per user, an obviously unrealistic price for rural users.

The problem in Michigan is but one of dozens of similarly severe cases reported by the national demonstration water project in their national rural water needs survey. The survey has come up with even more disturbing national data:

One out of every ten residents in places under 2,500 lives in housing without running water;

There are approximately 10 million people who live in housing with incomplete plumbing in rural areas;

Approximately 18 million people in communities of 10,000 and under use individual wells that have high rates of contamination;

Over 6.5 million people served by community water systems use water that did not meet Federal drinking water standards in 1970; and

While comprising only 27 percent of the population, communities of 2,500 and under have 92 percent of all housing without running water and 64 percent of all housing without complete plumbing.

I have also appended to this statement the average user payments for water in FmHA funded systems for the first half of 1976, figures that show just how high the payments are. There is also comparative data on the number of housing units in rural and urban areas lacking complete plumbing, or without running water.

The Farmers' Home Administration's water and sewer grant and loan program is designed to alleviate these problems, and, in part, it has succeeded. In large part, however, it has not.

Congressional intent in creating the program was to provide assistance to low-income communities to meet their water and sewer needs. A 1975 survey by the national demonstration water project shows, however, that under current rules, families with incomes under $5,000 per year constitute 44 percent of the supposed FmHA target population—families with incomes under $12,000 in places of 10,000 population or less—but receive only 12 percent of the FmHA grant funds. The average monthly per-family charge for water service was roughly $10.25 per month, which is about three times what the urban family would pay. Many families are paying over $30 a month, according to the survey, and average rates typically amount to 2 to 4 percent of a family's median income. Most disturbingly, though, the lower the income of the family, the greater the percentage of their income must go for water service.

These high rates are very disturbing, of course, for the communities which must pay them. As the data show, however, there is an even more serious problem: many communities find that they cannot afford a decent water system, even with an FmHA grant. These communities, as a result, face severe difficulties in attracting business and preventing out-migration. If we are to preserve a rural way of life in this country—and I believe we absolutely must—then we must make it possible for people to live in rural communities.

The current FmHA system encounters the problems raised here for a number of reasons.

First, the amount of the grant FmHA can make is limited to 50 percent, even though other Federal grants for water systems, such as those from EPA, are more typically 75 percent. The legislation I am proposing today would increase the percentage allowed to 75 percent, and thus enable FmHA to make user payments more realistic and to make it possible for many communities to install water systems when they otherwise would not be able to do so.

Second, the grant moneys are made available, by administrative practice, on the basis of the 1-percent rule. This rule states that a grant cannot be made until the community, through loans, assures that each potential user in a project has assumed an annual debt service burden equal to 1 percent of the community's median family income.

This 1-percent rule applies only to debt service; all operations and maintenance costs must be paid by the users. Operation and maintenance costs, however, are often equal to or greater than debt service costs. Moreover, the 1-percent rule is not generally even met. The average in Kansas was 1.3 percent, in New York 2.8 percent, et cetera.

Largely because of the 1-percent rule, the 50-percent grant limit is usually not reached. Moreover, the rule causes program administrators to give inadequate consideration to total system costs, since only the capital costs of the project are relevant to the 1-percent rule. As a result, NDWP has found, many projects turn out to have operation and maintenance costs that cause user payments to be beyond what users can reasonably afford.

To rectify this situation, I am proposing that grants be made so that average user payments for all the costs of the project will not exceed a range of 1 to 2½ percent. The specific percentage a community pays will depend on its median income—poorer communities will pay the least, wealthiest the most. This change in the rules means that FmHA money will be directed specifically toward those who need it most, and that the costs of water systems will be brought to a level where people can afford them. The bill allows the Secretary, however, to use his discretion to allow for a lower rate for a wealthier community where he determines it necessary. I want to stress that nothing in this bill calls for an increase in the authorization or appropriation for this program.

The bill also addresses two more minor problems in the program. One of these is the failure of FmHA to give adequate consideration to non-centralized systems as a means of fulfilling FmHA's mandate to provide area-wide service where possible.

The second would establish a clear system of priorities for the loans and grants, so that communities facing health problems would have first priority, while communities establishing new service would have second.

This important legislation is being simultaneously introduced in the House by Congressman ALEXANDER of Arkansas. It is not a regional issue—I have received information on the program from all over the country. I hope that the Senate can act expeditiously on this, so that we can get about the business of making a decent water supply available to everyone.

Mr. President, I ask unanimous consent to have printed in the RECORD at this point a memorandum provided by my staff on the program, a copy of the bill, a section-by-section analysis, and relevant data on rural water and sewer needs and payment levels.

There being no objection, the material was ordered to be printed in the RECORD, as follows:

S. 1200

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That paragraph (2) of section 306(a) of the Consolidated Farm and Rural Development Act (7 U.S.C. 1926(a)(2)) is amended by (1) inserting "(A)" after "(2)"; (2) striking out "50 per centum" in the second sentence and inserting in lieu thereof "75 per centum"; (3) adding at the end thereof the following: "Subject to the limitations prescribed in the foregoing provisions of this paragraph, any grant made under this section for any project shall be made in such an amount as will result in the amount of the payment for project facility use by the average domestic user in the area served by the project being not greater than the amount prescribed in clause (i), (ii), (iii), or (iv) below, as appropriate.

"(i) In the case of a project in any area in which the median income is in the lowest 25 percentile of the national median income, the average domestic user payment shall be not more than 1 per centum of the median family income of the area to be served by the project.

"(ii) In the case of a project in any area in which the median income is above the 25 percentile but at or below the 50 percentile of the national median income, the average domestic user payment shall be not more than to 1½ per centum of the median income of the area to be served by the project.

"(iii) In the case of a project in any area in which the median income is above the 50 percentile but at or below the 75 percentile of the national median income, the average domestic user payment shall be not more than to 2 per centum of the median family income in the area to be served by the project.

"(iv) In the case of a project in any area in which the median income is above the 75 percentile of the national median income, the average domestic user payment shall be not more than to 2½ per centum of the median family income in the area to be served by the project.

"(B) In any case in which the Secretary determines that the maximum amount of the grant which can be made to any association under this paragraph will be insufficient to result in the applicable user cost limitation prescribed in subparagraph (A), the Secretary shall seek the assistance of appropriate agencies of the State in which such association is located and other departments and agencies of the Federal Government to provide such additional assistance as may be necessary to meet or assist in meeting the user cost limitation prescribed in subparagraph (A).

"(C) In implementing the provisions of subparagraph (A), the Secretary may increase the amount of the grant for which any association would otherwise qualify under this paragraph if the Secretary determines that the increased amount of the grant would result in the user cost being less than that prescribed in the applicable clause of Subparagraph (A) and that (i) there is an exceptional need for the increased amount of the grant, such as areas in which the median income does not represent significant numbers of low-income families in the area to be served, or (ii) the lower user cost would have significant beneficial effect on the efficiency of the project for which the grant is made."

SEC. 2. Paragraph (3) of section 306(a) of the Consolidated Farm and Rural Development Act (7 U.S.C. 1926(a)(3)) is amended by striking out "to the extent feasible" in clause (ii) of the first sentence and inserting in lieu thereof a comma and the following: "including those persons in the area who can feasibly be served by the applicant by means of separate facilities providing central service or facilities serving individual properties, or both,".

SEC. 3. Paragraph (12) of section 306(a) of the Consolidated Farm and Rural Development Act (7 U.S.C. 1926(a)(12)) is amended by striking out the first sentence and inserting in lieu thereof the following: "In the making of loans and grants for community waste disposal and water facilities under paragraphs (1) and (2) of this subsection, the Secretary shall accord highest priority to the application of any municipality or other public agency (including any recognized Indian tribe on a Federal or State reservation or other federally recognized Indian tribal group) in a rural community which has a population not in excess of five thousand five hundred and which has a hazardous public health situation as determined and certified to the Secretary by the State Health Officer (or other appropriate official) of the State in which the community is located. The Secretary shall accord the next highest priority to applicants for projects which contemplate a substantial number of new service connections for residents of the area not presently receiving adequate service.".

SECTION-BY-SECTION ANALYSIS OF FARMERS' HOME ADMINISTRATION WATER AND SEWER GRANT AND LOAN PROGRAM AMENDMENTS OF 1977

Section 1 (A): This section replaces the current limit for water and sewer development costs of 50% with a new limit of 75%.

(A i-iv): This subsection establishes a formula for the distribution of grants linking the amount of the grant to the median income of the community so that the poorest communities would have to pay the least and the wealthiest the most. Users in the poorest communities would be required to pay not more than 1% of their median income for all water and sewer costs; those in the wealthiest not more than 2½%, with communities in between paying amounts between these levels.

(B): This subsection directs the Secretary to seek assistance from other agencies of federal, state or local governments to provide grants to meet the levels specified in (A).

(C): This subsection gives the Secretary discretion to provide grants larger than those that would meet the formula specified in (A) in certain special cases.

Section 2: This section mandates the Secretary to consider non-centralized systems in his efforts to secure area-wide service for water and sewer systems.

Section 3: This section establishes that the first priority for grants and loans will go to areas facing health problems; the second to areas establishing new service.

THE FMHA, WATER-SEWER LOAN/GRANT PROGRAM: PERFORMANCE, PROBLEMS, AND POSSIBILITIES*

OBJECTIVE

One of the purposes of the Consolidated Farm and Rural Development Act of 1972 is to assist rural residents in obtaining access to necessary community facilities at prices they can afford. To this end, a program of subsidies for the building of community facilities is included in the Act and its conduct is mandated to the Farmers Home Administration (FmHA) in the U.S. Department of Agriculture.

TYPES OF SUBSIDIES

Two kinds of subsidies are provided under the present community facilities program:

((1) Low-cost loans. FmHA is authorized to make or guarantee loans to eligible applicants at five-percent interest with a 40-year repayment period. Top priority in the disbursement of loan funds is given to water and sewer projects.

(2) Grants. Direct grants, which are not to be repaid, may be made to cover parts of the cost of initial construction. Water-sewer projects are eligible for grant as well as loan funds.

In both cases, funds are available only to cover "eligible projects costs," with the excluded items detailed in the FmHA regulations. Loans can often be made when grants could not be (for example, to purchase an existing water system.)

PROGRAM TARGETS

Both private and public organizations are eligible for FmHA funding. The basic target population consists of people who live in the open countryside or in communities, incorporated or unincorporated, with up to 10,000 in population. In addition, the funds are intended for "needy" applicants, i.e., families

* This paper was prepared by the staff of Senator James Abourezk (D-S. Dak.). The studies referred to in the paper were done by National Demonstration Water Project and the information was provided to the staff at the request of Senator Abourezk.

with annual incomes under $12,000. Program funds are allocated to states according to a formula based on the characteristics of this target population.

CONSTRAINTS ON USE OF FUNDS

There are constraints, legislative and administrative, that have been placed on the use of these loan and grant funds:

(1) Loans. Although there is apparently no limit on the total amount of loan funds that may be obligated in a single year, there is a de facto limitation imposed by the number of staff people who are available to process applications. In addition, since FmHA considers itself the "banker of last resort," applicants must show that they have been unable to receive satisfactory credit elsewhere.

(2) Grants. The total amount of grant funds that may be obligated in a single year is limited—$300 million according to the 1972 legislation. For FY '77 only $200 million was authorized. Lack of staff is also a problem in the processing of grant applications, of course. In addition to these limitations, there are other constraints on the use of grant funds that do not apply to loans:

(a) Fifty-percent rule. The authorizing legislation limits to fifty percent the amount of grant funds that may be applied to total project costs.

(b) One-percent rule. No grant funds will be applied in a project until each potential user has assumed, through loans, an annual debt service burden equal to one percent of the community's median family income. (Agency regulations.)

(c) Similar-communities rule. Although grant funds are to be used to produce reasonable rates, this is defined as a rate that is not less than that being paid by similar communities. (Agency regulations.)

(d) Discretionary rules. Since the authorizing legislation does not establish a clear system of priorities in terms of eligible applicants or projects, FmHA has broad discretionary powers in choosing among applicants.

APPLICATION OF THE RULES

In practice, the agency regards the constraints on the use of grant funds as guidelines only. The rules are often not followed, and when there is a deviation, it tends to be in the direction of fewer grant funds than the applicant would be entitled to if the rules were followed. Studies by a major national organization in the rural water-sewer field of funding actions by FmHA in Fiscal year 1976 reveal:

(1) Underobligation. Although, under present legislation, FmHA could have obligated $300 million in grant funds in FY 76, Congress only appropriated $200 million, and the FmHA did not obligate even this entire amount.

(2) Underfunding. Of the 650 water and sewer projects funded by the agency in FY 76, over two-thirds were underfunded either in terms of the fifty-percent rule, the one-percent rule, the similar communities rule, or combinations of these. Of the three rules, the fifty-percent rule is the least likely to be followed in the sense that, for a given project, the probabilities are that FmHA will not provide grant funds up to its authorized level of fifty percent of project costs. The one-percent rule is also honored more in the breach than in the observance; commonly the debt service load is higher than this. The average was 1.3 in New York, 2.8 in Kansas, etc.

(3) Narrow interpretation of Rules. FmHA usually interprets "similar communities" to mean projects the agency itself has funded. High rates in one project are thus transferred to others.

In addition to failing to use its full grant funding authority, as shown in statistical studies, FmHA also uses its discretionary powers, experience indicates, to channel funds into a narrow range of projects. Thus it has shown a preference for funding central systems (i.e., a single water source and miles of pipe in the distribution system) as opposed to other types of systems (e.g., more water sources but less pipe) that may be less expensive. Also it promotes mergers, consolidations, and upgrading of existing systems rather than the building of facilities for those rural residents who have no adequate facility at all.

RESULTS OF PRESENT POLICY

The results of these policies and practices are:

(1) Rates are high in FmHA projects The national average in the 650 projects examined in the previously-mentioned study was $10.25 per user per month. The average monthly user payment is over thirty dollars in a number of states.

(2) Grant funds are not reaching the neediest communities. In a study of 210 systems receiving some grant funds in the first half of FY 76, it was found that families with annual incomes of $5,000 and under, about 44 percent of FmHA's target population, received only 12 percent of the grant funds. (This study was a part of the broader study cited above.)

(3) Isolated rural residents receive no assistance. Since FmHA largely regards community systems as meaning traditional central systems, residents who live in open countryside where a central system is not economically feasible receive almost no governmental assistance. These residents could be served if a broader definition of "system" were so that different types of facilities could be constructed to bring area-wide water-sewer service.

(4) The unserved population is at a disadvantage. Rural residents who lack any adequate facility have more difficulty in receiving assistance than those served by existing systems that may be consolidated or upgraded to improve their performance.

A few illustrations, chosen at random from the many thousands that exist, may sharpen the picture presented above.

(1) High rates. The All Seasons Water Users Association in Bottineau County, North Dakota, has received funding from FmHA for a 625-connection system. Previously the people were hauling water from long distances or using poor quality wells. However, average monthly user payments are projected at $28 per month or $336 per year. These rates are particularly high in view of the fact that thirty percent of the families involved have annual incomes of less than $6,000. Debt service on the system will amount to 3.18 percent of the community's median family income.

(2) Unserved populations. The Health Department in Marquette County, Michigan recently tabulated the results of the individual water wells sampled in the eighteen townships. From this sample, it was found that twenty-five percent of the wells produced water that was bacteriologically unsafe for drinking. These wells serve homes owned or rented primarily by low-income and elderly people. They have been unable to receive assistance in obtaining adequate water service.

RECOMMENDED CHANGES

To correct the problems cited above, a number of legislative changes are required. The objectives would be to:

(1) Insure reasonable rates. The Congress should specifically mandate that FmHA grant funds will be used to produce reasonable rates. This should be defined in legislation in such a way that average monthly user payments (the total bill, not just the debt service) would be linked directly to community median family income, and the lower the income of the community, the lower the percentage of family income that would have to be paid for water or sewer service. To accomplish this, the limitation on grant funds per project would have to be changed from the present fifty percent to at least 75 percent. Further, FmHA would need additional staff in the field to process the applications in a timely manner.

(2) Insure area-wide service. Under the present program, both applicants and FmHA proceed on a facility-by-facility basis with inadequate attention to the service needs of residents of smaller outlying communities and the open countryside. Legislation should be changed to require FmHA to develop facilities to provide service to all residents of an area rather than only those residents in dense population clusters that can be served by a single central facility. Service responsibility should not be limited to a single facility but should consider service through use of one or more facilities providing central service and facilities providing service to individual properties, or both.

(3) Insure new service connections. The legislation should require that, second only to health hazard conditions, FmHA should give funding priority to applications that contemplate a substantial number of new service connections. Applicants that are concerned solely with upgrading established service without extending a facility or incorporating new facilities into their plan would not receive priority unless a health hazard, as certified by the State Health Officer, existed.

CONCLUSION

The present FmHA water-sewer loan/grant program is not meeting the objectives of the Consolidated Farm and Rural Development Act of 1972. The legislative changes recommended would bring the agency more into line with the goals cited in this legislation.

Source: 1970 Census of Housing, vol. 1, U.S. summary, U.S. Department of Commerce.

Mr. THURMOND. Mr. President, I am pleased to cosponsor the legislation by the distinguished Senator from South Dakota, Mr. ABOUREZK, which will amend section 306(a) of the Consolidated Farm and Rural Development Act, as administered by the Farmers Home Administration.

Adequate water distribution and waste disposal programs are essential if American citizens who reside in rural areas are to be able to enjoy an adequate standard of living. Section 306(a) of the Consolidated Farm and Rural Development Act was enacted to focus on the water and sewer needs of rural Americans. To some extent, this program, administered by the Farmers Home Administration, has been successful; however, statistics compiled from a survey by the national demonstration water project found that many rural Americans lack essential water and sewer services. Specifically, this survey revealed that:

First, 1 out of every 10 residents in places under 2,500 lives in housing without running water;

Second, there are approximately 10 million people who live in housing with incomplete plumbing in rural areas;

Third, approximately 18 million people in communities of 10,000 and under use individual wells that have high rates of contamination;

Fourth, over 6.5 million people served by community water systems use water that did not meet Federal drinking water standards in 1970; and

Fifth, while comprising only 27 percent of the population, communities of 2,500 and under have 92 percent of all housing without running water and 64 percent of all housing without complete plumbing.

Mr. President, these rural citizens are without services which the majority of Americans considers a bare necessity.

This water and sewer program is funded at the level of $300 million per year. However, over $100 million was not obligated for fiscal year 1976; and were subsequently carried over into the next fiscal year. Mr. President, this "carry-over" represents over one-third of the funds that had been appropriated for this vital program.

I want to point out to my colleagues that nothing in this bill calls for any increase in authorization or appropriation for this FmHA program. This legislation would encourage rural communities to provide these much needed water and sewer services. Primarily, these proposed changes would increase the limit for grants of water and sewer development costs from 50 to 75 percent, and established a distribution formula which links the amount of grants to the median income of the community.

Mr. President, I believe that the changes proposed by this legislation would make available needed water and sewer systems to many rural communities, and I urge my colleagues to give prompt and favorable consideration to this measure.

By Mr. GOLDWATER:

S. 1201. A bill to amend title 5 of the United States Code to allow congressional employees with long periods of service with the same Member of Congress to receive civil service retirement credit for employment by the Member during a break in service of the Member; to the Committee on Governmental Affairs.

Mr. GOLDWATER. Mr. President, I am today introducing legislation to provide Government retirement credit to individuals who may serve as employees of Members of Congress continuously during a break in service of such Member and for long periods of years both before and after the separation.

Now, the way I have drafted the bill, it would require that an individual be employed by a Senator or Congressman—

First. For at least 6 years prior to any break in service of that Member of Congress.

Second. During the entire period of such break in congressional service, and

Third. For at least 6 years after the date on which the Member again takes office in the Congress.

The periods of employment which are set forth as conditions of eligibility for the special retirement credit provided in the bill happen to represent the length of time of a full term of office as a Senator. This seems to be as reasonable a test of continuity of employment as any other, but I am willing to consider alternative suggestions.

It does seem equitable to me to allow an individual who is employed consecutively by a Member of Congress for the equivalent of one full Senate term before the Member may have a break in service, and then for another period of years equivalent to a second full term of office as a Senator, to qualify for civil service retirement credit for their continuous employment by the same Member during a temporary break in congressional service.

Mr. President, let me point out that no staffer will get a free ride under the bill. It requires that the employee must make the appropriate monetary deposit required under the retirement law for the extra years of credit involved. Another restriction imposed by the legislation is a limit of 5 years on the additional years of employment which such a congressional employee may use for retirement credit.

Finally, in order to make certain that such an employee would not double-dip—that is, would not receive possible social security payments based on the same years used toward a civil service annuity—the bill specifically provides that no social security credit shall be allowed for any period of years during which a congressional employee is allowed the special retirement credit provided in the bill.

Also, I might note that the legislation would not apply retroactively, but would apply only to individuals who become entitled to annuities upon their separation from service as congressional employees after the date of enactment of the legislation.

Now, Mr. President, I will explain that I got the idea for the bill as the result of my knowledge of the situation of an individual who has long been employed

by me. When I took my self-imposed sabbatical from 1964 to 1968, one individual who had served with me for several years before my temporary retirement from the Senate remained employed by me throughout the entire period of the intervening 4 years. After I returned to the Senate in 1969, that individual continued as a member of my staff and is still employed by me.

However, I do not intend the legislation to be in any way considered as a private bill. It is drafted in general terms and would apply to anyone who meets the conditions described in the bill. I think it is only fair that we offer an option of additional retirement credit to loyal and experienced employees who have extended years of service with Members of Congress and who have been employed continuously by a Member for so many years.

By Mr. McCLURE (for himself and Mr. CHURCH):

S. 1202. A bill to provide for the transfer of certain lands to the Secretary of the Interior by the Energy Research and Development Administration for sale to farmers damaged by the Teton flood; to the Committee on Energy and Natural Resources.

ERDA LAND TRANSFER FOR TETON FARMERS

Mr. McCLURE. Mr. President, I am introducing a bill today that will make 6,000 acres of Energy Research and Development Administration land in Idaho available to farmers who lost their farms in the Teton Dam disaster. As many of you recall, the Teton disaster of June 5, 1976, caused considerable destruction to both lives and property in the upper Snake River agriculture region. Congress and the administration acted quickly to provide assistance and the replacement of lost homes and businesses through special legislation is being carried out today.

There are a handful of farmers, however, whose farms were in the immediate path of the flood and whose farms today are under deposits of gravel or stripped to bedrock. To continue farming on this land is impossible and while they may be compensated for the loss of their land, they must have the opportunity to reinvest that money into other farmland. Efforts to try and locate suitable farmland in the same region have not been successful. While the Bureau of Reclamation did a survey of real estate and located around 25,000 acres of farmland, a closer look revealed that much of the land has been overfarmed, is too far from the upper Snake River region, is either scab land or alkaline, and is basically unsuitable as productive farmland. State and other Federal land are not available.

In order to try and provide these farmers with an opportunity to continue farming in this part of Idaho, I have proposed that a small portion of the Energy Research and Development Administration site be released for farming. ERDA retains 572,000 acres in southeastern Idaho at their Idaho Nuclear Engineering Laboratory. Their facilities cover approximately 1 percent of this land. My bill transfers 6,000 acres of ERDA land to the Bureau of Reclamation and after 3 years, if eligible farmers have not purchased this land, it will be returned to ERDA. The 6,000 acres are on the eastern edge of the site, adjacent and south of highway No. 88, are bordered by farm land and have no ERDA facilities on them.

The entire INEL site is designated an ecological research area and many research projects are located throughout these sagebrush flat lands. The area provides habitat for antelope, deer, upland game birds, and other smaller animals. Both the Environmental Division of INEL and the Idaho Fish and Game Department have assured me that the acreage selected is not in a migration path of antelope nor other game, is not critical habitat for any species and is the best land suited for farm use with respect to the wildlife concerns. Any research that may be conducted on this land is also being conducted on other INEL lands and my proposal will not jeopardize the research program.

Both the administration and ERDA have promised their cooperation in this program if other alternatives could not be found for these farmers. Unfortunately, time is of the essence and no alternatives have been found. For generations these families have farmed this area and they want to continue farming but they must be able to begin soon. This proposal makes Federal land available to be purchased by farmers whose land was taken away from them by the Federal Government through the Teton disaster. It is justice to provide them with the opportunity to continue their life's work, that of farming in eastern Idaho.

By Mr. LAXALT (for himself, Mr. GARN, Mr. McCLURE, and Mr. MELCHER):

S. 1203. A bill to amend the Federal Land Policy and Management Act of 1976 relating to certain rules and regulations promulgated by the Secretary of the Interior and the Secretary of Agriculture; to the Committee on Energy and Natural Resources.

Mr. LAXALT. Mr. President, today I am introducing legislation designed to improve congressional oversight over the Federal agencies charged with the management of public lands and to restrain such agencies from prescribing regulations which are inconsistent with congressional intent.

The method proposed is one with which we are all well acquainted; that is, the legislative veto. The power to direct, review, approve or disapprove proposed executive actions has expanded rapidly during the last several decades. Almost 200 different acts of Congress have provided some type of congressional review over or consent for contemplated or pending executive implementations of those laws. The need to engage in this method of oversight and our willingness to do so with respect to public lands is evidenced by the inclusion of such provisions in Public Law 94–579, the Federal Land Policy and Management Act of 1976. My legislation which amends that act simply provides for a more comprehensive application of the legislative veto.

As a result of the act, certain sales, withdrawals, and exclusions of principal uses are now subject to legislative veto. It is important to note that in approving such uses of the veto, Congress expanded its oversight domain from general policy matters to specific management actions. While the impetus for that action was the issue of the disposal of public lands, so too should the protection of public lands and the regulation of the users of public lands cause us to expand our oversight capabilities. In my view, applying the legislative veto to these areas is entirely appropriate and necessary.

The act conveys to the Secretaries of the Interior and Agriculture broad authority to issue rules and regulations to carry out the purposes of the act. This authority is provided principally in sections 302 and 310, but also appears elsewhere for the enforcement of particular provisions. Having conveyed that power, the Congress should be willing to take the necessary steps to insure that it is not abused. By adding a new section which requires that no rule or regulation concerning public lands including their management, use, and protection will take effect until the expiration of 90 days and then only if Congress has not adopted a concurrent resolution of disapproval, we will acquire a means by which to control any abuses.

Regulations pertaining to the internal management of the relevant agencies are likely to be of little importance to public land users, and hence, are excluded from the disapproval process. However, beyond this exemption, I believe that it is necessary to include all other categories of regulation. Were we to attempt further specification of regulations not subject to congressional disapproval, we would run the risk of excluding potentially important areas. It is my opinion that only through the method proposed here can we accommodate the many, and sometimes competing interests of public land users. In addition, my proposal would provide to many groups of public land users who either cannot afford costly litigation or who do not have a cozy relationship with the regulators, a final safeguard against regulatory overkill.

The mechanics of the disapproval provision are largely the same as those employed in the disapproval provisions already contained in the organic act. A significant feature of this method is that a concurrent, as opposed to a simple resolution, is required to reject a rule or regulation, thereby reducing the likelihood of capricious action. The 90-day referral, identical to the existing veto provision, should provide adequate time during which to consider the proposed rule or regulation. Also, in the event of an emergency situation, a method is provided whereby regulations will take effect immediately.

Certainly, my own State of Nevada, the land of which are almost 90 percent federally owned, has a very great interest in this legislation. Likewise, this interest is shared by many other Western States with high percentages of Federal landownership. And, I make no bones about this, making the regulators more

responsive to the needs and interests of Nevadans and other westerners is, without question, one of the goals of this legislation. However, I believe that the additional goal of restoring to the Congress the power to assure that its intent is not subjected to bureaucratic misinterpretation, is one which we all can share.

Lastly, I would suggest that while this legislation holds the potential for extensive application, if need be, the more likely prospect is that frequent use will not be necessary. Although it is not a panacea for all the problems of the regulation of land use, I believe that the presence of the prerogative and, its occasional application, will have a deterrent effect on agency regulation. For example, only recently, the Bureau of Land Management issued regulations concerning surface mining on public lands which have imposed serious hardship on the public land miners of the West. The knowledge that the Congress may disapprove some of the regulations may have a chilling effect on that agency, and consequently, an improvement in the quality of the regulations.

Mr. President, I ask unanimous consent that the text of my bill be printed in the RECORD at this time.

There being no objection, the bill was ordered to be printed in the RECORD, as follows:

S. 1203

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That the Federal Land Policy and Management Act of 1976 is amended by adding at the end thereof the following new section:

"SEC. 708. (a) Except to the extent otherwise provided in subsections (b) and (c) of this section, no rule or regulation issued pursuant to this Act or any other law by the Secretary of the Interior with respect to the implementation of the provisions of this Act or any other law involving the management, use, or protection of the public lands, including the property located thereon, and no rule or regulation issued pursuant to this Act by the Secretary of Agriculture with respect to the implementation of this Act involving lands within the National Forest System, shall take effect until after the expiration of the ninety day period (not counting days on which the Senate and the House of Representatives have adjourned for more than three consecutive days) beginning on the day copies of such rule or regulation (together with a concise statement of the purposes of such rule or regulation, the legal authority for such rule or regulation and a detailed explanation thereof) has been transmitted to the Senate and the House of Representatives by the appropriate Secretary, and then only if the Congress has not, within such period, adopted a concurrent resolution stating that it does not approve the rule or regulation. If the committee to which a resolution has been referred during the said ninety day period, has not reported it at the end of thirty calendar days after its referral, it shall be in order to either discharge the committee from further consideration of such resolution or to discharge the committee from consideration of any other resolution with respect to such rule or regulation. A motion to discharge may be made only by an individual favoring the resolution, shall be highly privileged (except that it may not be made after the committee has reported such a resolution), and debate thereon shall be limited to not more than one hour, to be divided equally between those favoring and those opposing the resolution. An amendment to the motion shall not be in order, and it shall not be in order to move to reconsider the vote by which the motion was agreed to or disagreed to. If the motion to discharge is agreed to or disagreed to, the motion may not be made with respect to any other resolution with respect to the same rule or regulation. When the committee has reported, or has been discharged from further consideration of a resolution, it shall at any time thereafter be in order (even though a previous motion to the same effect has been disagreed to) to move to proceed to the consideration of the resolution. The motion shall be highly privileged and shall not be debatable. An amendment to the motion shall not be in order, and it shall not be in order to move to reconsider the vote by which the motion was agreed to or disagreed to.

"(b) Notwithstanding the provisions of subsection (a) of this section, in any case in which the Secretary of the Interior or the Secretary of Agriculture determines that a delay in the effective date of a proposed rule or regulation otherwise subject to the provisions of subsection (a) would seriously injure an important public interest, substantially frustrate legislative policies, or seriously damage a person or class of persons without serving any important public interest, such Secretary may promulgate and put into effect such rule or regulation without regard to the provisions of subsection (a), but such rule or regulation shall expire ninety days after its promulgation and in no case shall any subsequent rule or regulation, covering the same or similar subject matter as that contained in such rule or regulation so expiring, take effect except in accordance with the provisions of subsection (a) of this section.

"(c) The provisions of subsection (a) of this section shall not be applicable with respect to interpretative rules, general statements of policy, or rules of departmental organization, procedure, or practice.

"(d) The failure of Congress to act with respect to, or the rejection without referral to a Committee of, any resolution of disapproval of any rule or regulation under subsection (a) shall not be deemed to be an expression of approval by the Congress of such rule or regulation.".

By Mr. JOHNSTON:

S. 1204. A bill entitled "The Saccharin Control Act of 1977"; to the Committee on Human Resources.

Mr. JOHNSTON. Mr. President, I am today submitting legislation that will provide for an orderly process in determining what the United States should do regarding saccharin. As all of my colleagues in the Senate are aware, the recent decision of the Food and Drug Administration to move toward a ban on saccharin in the next month is highly criticized, and I believe with good reason. It is my impression, from all that I have reviewed, that the decision of the Food and Drug Administration is based on slim and inconclusive evidence. Information provided by the Department of Health, Education, and Welfare suggests that over a period of 80 years the use of saccharin has not been known to harm people. Moreover, it is clear that many Americans rely on saccharin either as an important food supplement in a diabetic's diet, as a means of weight control, or for other health reasons, such as good dental practice.

For all of these reasons, Mr. President, I think it is important that we be certain that any decision made limiting or restricting the use of saccharin is a sound and well-founded decision. This bill is designed to insure that.

Very simply, Mr. President, this bill would mandate a study by the Secretary of Health, Education, and Welfare, to include a review of past work together with original research. Such study would take no less than 1 year. I have inserted this time limit because I believe that it is virtually impossible for any meaningful new research in the area to be done in a shorter period of time.

Once this study is completed, the Secretary will submit his findings to the Congress. No regulations of any kind, either proposed or final, limiting, restricting, or modifying the use of saccharin will be lawful prior to the completion of this study and the submission of the Secretary's report.

Finally, Mr. President, I have included in section 4 of this bill a provision that allows for a one-House veto of any regulations that are finally published. I believe that it is appropriate in this case, and I believe that the Congress is perfectly capable of assessing the final regulations, if any, that might be promulgated in this area.

ADDITIONAL COSPONSORS

S. 247

At the request of Mr. GOLDWATER, the Senator from Maine (Mr. HATHAWAY) was added as a cosponsor of S. 247, to provide recognition to the women's Air Forces Service Pilots.

S. 394

At the request of Mr. CULVER, the Senator from West Virginia (Mr. BYRD), the Senator from Minnesota (Mr. HUMPHREY), and the Senator from Wisconsin (Mr. NELSON) were added as cosponsors of S. 394, the Bridge Replacement and Rehabilitation Act of 1977.

S. 514

At the request of Mr. RIBICOFF, the Senator from New York (Mr. MOYNIHAN) was added as a cosponsor of S. 514, to provide visionary care under part B medicare payments.

S. 527

At the request of Mr. CULVER, the Senator from Minnesota (Mr. ANDERSON), the Senator from Minnesota (Mr. HUMPHREY), and the Senator from South Dakota (Mr. MCGOVERN) were added as cosponsors of S. 527, a bill to authorize the Small Business Administration to furnish reinsurance for product liability insurers of small business.

S. 607

At the request of Mr. JOHNSTON, the Senator from Hawaii (Mr. MATSUNAGA) was added as a cosponsor of S. 607, to establish a Minority Business Development Administration.

S. 666

At the request of Mr. STEVENS, the Senator from Oklahoma (Mr. BARTLETT) was added as a cosponsor of S. 666, a bill to allow Federal employment preference to certain employees of the Bureau of Indian Affairs, and to certain employees of the Indian Health Service, who are not entitled to the benefits of, or who have been adversely affected by the applica-

tion of, certain Federal laws allowing employment preference to Indians and for other purposes.

S. 708

At the request of Mr. CLARK, the Senator from Kentucky (Mr. FORD) was added as a cosponsor of S. 708, to amend title XVIII of the Social Security Act.

S. 904

At the request of Mr. KENNEDY, the Senator from Alaska (Mr. GRAVEL) was added as cosponsor of S. 904, a bill to provide for the efficient and regular distribution of current information on Federal domestic assistance programs.

S. 991

At the request of Mr. RIBICOFF, the Senator from North Dakota (Mr. BURDICK) was added as a cosponsor of S. 991, to establish a Department of Education.

S. 1010

At the request of Mr. MCINTYRE, the Senator from Massachusetts (Mr. KENNEDY), the Senator from Kansas (Mr. PEARSON), and the Senator from Minnesota (Mr. ANDERSON) were added as cosponsors of S. 1010, the National Consumer Cooperative Bank bill.

S. 1034

At the request of Mr. HAYAKAWA, the Senator from Indiana (Mr. LUGAR), the Senator from Idaho (Mr. MCCLURE), and the Senator from Alabama (Mr. ALLEN) were added as cosponsors of S. 1034, to provide for a study of the effects of saccharin and for other purposes.

S. 1076

At the request of Mr. GARN, the Senator from Wyoming (Mr. HANSEN), the Senator from Utah (Mr. HATCH), the Senator from Idaho (Mr. CHURCH), and the Senator from Idaho (Mr. MCCLURE) were added as cosponsors of S. 1076, to amend the Jones Act.

S. RES. 76

At the request of Mr. HAYAKAWA, the Senator from Montana (Mr. MELCHER) was added as a cosponsor of Senate Resolution 76, relating to unilateral regulations by the European Economic Community.

S. RES. 120

At the request of Mr. HUMPHREY, the Senator from Minnesota (Mr. ANDERSON) was added as a cosponsor of Senate Resolution 120, relating to the ban on saccharin.

SENATE RESOLUTION 129—SUBMISSION OF A RESOLUTION RELATING TO THE CONSIDERATION OF S. 266

(Referred to the Committee on the Budget.)

Mr. JACKSON submitted the following resolution:

S. RES. 129

Resolved, That pursuant to section 402(c) of the Congressional Budget Act of 1974, the provisions of section 402(a) of such Act are waived with respect to the consideration of S. 266, a bill to authorize appropriations for fiscal year 1977 to the Energy Research and Development Administration. Such waiver is necessary to extend a program of the Energy Research and Development Administration, and increase the authorization for the program to allow completion of remedial action concerning a potential health hazard caused by the use of sand containing uranium mill tailings for the construction of buildings in the Grand Junction, Colorado area.

SENATE RESOLUTION 130—SUBMISSION OF A RESOLUTION RELATING TO RURAL FIRE PROTECTION

(Referred to the Committee on Agriculture, Nutrition, and Forestry.)

Mr. HUDDLESTON submitted the following resolution:

S. RES. 130

Whereas approximately 37 percent of Americans live in communities having a population of 10,000 or less; and

Whereas the fire fatality rate for white Americans in nonmetro areas is approximately 4 per 100,000 versus 2.7 per 100,000 in metro areas; and

Whereas the fire fatality rate for black and other minority groups in non-metro areas is 15.3 per 100,000 versus 8.1 in metro areas; and

Whereas rural fire efforts are often thwarted by insufficient water supplies, inadeqaute equipment, and lack of alarm facilities; and

Whereas increased training of fire protection personnel is badly needed in many areas; and

Whereas improved fire protection is essential to the protection of lives and property in rural areas as well as to the development of such areas; and

Whereas fire has destroyed the Nation's forests at an average annual rate in excess of two million acres over the past five years; and

Whereas applications for Federal assistance under title IV of the Rural Development Act of 1972 have far exceeded the number which could be funded; and

Whereas the executive branch has never requested funds for carrying out the Federal-State matching program provided for in title IV of the Rural Development Act of 1972: Now, therefore, be it

Resolved, That it is hereby declared to be the sense of the Senate that the Department of Agriculture should make a strong commitment to and give increased attention and emphasis to the Rural Community Fire Protection program provided for under title IV of the Rural Development Act of 1972, and that the Congress should provide increased fundng for such program.

SEC. 2. The Secretary of the Senate shall transmit a copy of this resolution to the Secretary of Agriculture.

Mr. HUDDLESTON. Mr. President, I am today submitting a resolution urging that the new administration give increased attention to title IV of the Rural Development Act which provides for rural firefighting assistance.

Recently, I cosponsored legislation to extend this program and I fully expect the Senate Agriculture Committee to follow through on that in the near future.

But, the fact is that over the past 3 years during which the program has been in existence it has not received sufficient time and attention from the Department of Agriculture or from the previous administration. There has never been a budget request from the administration for the program, and the $3.5 million which has been allotted annually has been the result solely of congressional action. This has happened despite the fact that numerous requests for assistance under this matching program—far in excess of the number which could be funded—have come in each year.

Because of the previous indifference of the Department to this program, I had earlier thought of proposing legislation to transfer it to the National Fire Prevention and Control Administration in the hope that it would receive the attention which it merits, and also to avoid any duplication which can exist when several agencies or departments are involved in similar fields. In view of the fact that we have a new administration, I have, however, decided to withhold that proposal at this time in the hope that the Department will exercise the interest and support for this program which is due, although initial actions are not reassuring. To emphasize that need and the desire of the Congress that the Department follow such a course, I am, consequently, submitting this resolution.

Because of the importance of expanding and improving our rural fire prevention capabilities, I ask unanimous consent to have printed in the RECORD a summary of Federal assistance which is currently available for rural fire prevention activities. The summary was prepared by Mauree W. Ayton, analyst in science and technology, of the Congressional Research Service.

There being no objection, the summary was ordered to be printed in the RECORD, as follows:

SUMMARY BY MAUREE W. AYTON

In addition to the programs of the National Fire Prevention and Control Administration and the Department of Agriculture, other programs that provide assistance for fire protection to rural communities include the following:

Department of Commerce. National Bureau of Standards:

Fire protection research. Publishes information that is useful to rural communities.

Department of Commerce. National Weather Service:

Disseminates weather information and special weather data for aviation, agriculture, fire prevention, etc.

Department of Defense. Defense Civil Preparedness Agency:

Assists communities by making vehicles available on donation or loan under the surplus and contributions loan program. Certain government purpose military vehicles are ideally suited, with certain modification, for use as emergency fire and rescue equipment. Information for modifying this equipment is contained in Technical Memorandum 75–1, "Converting Vehicles For Use as Fire Apparatus or Rescue Trucks," available from the Defense Civil Preparedness Agency, Washington, D.C. 20301. Vehicles may be obtained through local and State civil preparedness directors.

Department of Health, Education, and Welfare:

Administers a fire services training program. Matching Federal funds for fire fighter training, including training for volunteers, are granted by the State directors of vocational education under the Vocational Education Act of 1973, as amended by the Vocational Education Amendments of 1968 (Public Law 90–576).

Department of the Interior. Bureau of Mines:

Provides grants, of up to 50 percent of cost, to combat fires on the public domain or Indian lands that endanger federally-owned coal reserves, and gives financial and technical assistance for the control of such fires on pirvately-owned land. Elimination of air pollution from such fires is also an objective. Available to State or local government, or owner of coal reserves threatened by the advance of a fire.

Department of Labor, Manpower Administration:

Provides salaries for public service employees and subsidized labor supply for construction, improvement, repair, renovation, painting, beautification of fire department buildings and equipment. Dispatchers, spotters. Assistance is available to volunteer and public fire departments in open country, villages, towns, and cities not larger than 50,000 persons, if not within the built-up or already subdivided suburbs of cities larger than 50,000 population.

Department of Transportation. Federal Aviation Administration (FAA):

Section 612 of the Airport and Airway Development Act of 1970 directs the FAA to establish minimum safety standards for the operation of airports that serve Civil Aeronautics Board certified air carriers. Part 139 of the Federal Aviation Regulation requires certain firefighting and rescue equipment. Federal aid is available to State, county, municipal, and other public agencies to assist in the purchase of this equipment, if airport requirements are shown in the National Airport System Plan.

Department of Transportation. National Highway Traffic Safety Administration (NHTSA):

NHTSA is authorized under the Highway Safety Act of 1967 to administer an emergency medical services program which provides Federal grants and assistance for purchasing ambulances, small rescue trucks, approved equipment, and training for personnel. Assistance is available through this program to emergency service that provide complete ambulance or rescue service, 24 hours a day, with specified communications and management programs and facilities.

Department of the Treasury:

The State and Local Fiscal Assistance Act of 1972 provides Federal aid to States, counties, cities, towns, and townships without the Federal Government controlling exactly how the money is spent. The idea is to have the Federal Government provide funds but to permit local jurisdictions to determine their needs and priorities. Fire services are eligible to receive their share of revenue sharing funds.

U.S. Consumer Product Safety Commission:

Its comprehensive injury information clearinghouse, the National Electronic Injury Surveillance System (NEISS), collects surveillance and in-depth data from 119 emergency rooms which participate in NEISS and provide a representative sample for the United States. Its in-depth investigations include all deaths and injuries associated with flamable fabrics.

U.S. Postal Service:

Provides special rates for second and third class bulk mailings to philanthropic organizations, and to volunteer fire, ambulance and rescue companies.

AMENDMENTS SUBMITTED FOR PRINTING

SUPPLEMENTAL APPROPRIATIONS, 1977—H.R. 4877

AMENDMENT NO. 178

(Ordered to be printed and to lie on the table.)

Mr. WILLIAMS submitted an amendment intended to be proposed by him to the bill (H.R. 4877) making supplemental appropriations for the fiscal year ending September 30, 1977, and for other purposes.

AMENDMENT NO. 179

(Ordered to be printed and to lie on the table.)

Mr. WEICKER submitted an amendment intended to be proposed by him to the bill (H.R. 4877), supra.

NOTICE OF HEARINGS

PARKS AND RECREATION SUBCOMMITTEE

Mr. ABOUREZK. Mr. President, I would like to announce for the information of the Senate and the public, the scheduling of a public hearing before the Parks and Recreation Subcommittee of the Senate Energy and Natural Resources Committee.

The hearing is scheduled for April 29, 1977, beginning at 10 a.m., in room 3110 of the Dirksen Senate Office Building. Testimony is invited regarding S. 1125, a bill to authorize the establishment of the Eleanor Roosevelt National Historic Site in the State of New York, and for other purposes.

For further information regarding the hearings you may wish to contact Mr. Thomas Williams of the subcommittee staff on extension 47145. Those wishing to testify or who wish to submit a written statement for the hearing record should write to the Parks and Recreation Subcommittee, room 3106, Dirksen Senate Office Building, Washington, D.C. 20510.

ADDITIONAL STATEMENTS

SELECTION OF FEDERAL JUDGES

Mr. HUDDLESTON. Mr. President, on October 28, 1976, the Kentucky Bar Association, together with the distinguished junior Senator from Kentucky (Mr. FORD) and I, created a nine-member nonpartisan advisory Commission to make recommendations for Federal district judgeship vacancies in our State. For each judgeship vacancy, this Commission will recommend from three to five persons who are considered to be the best qualified. Senator FORD and I, in turn, will submit all of those recommended by the Commission to the President for his consideration.

The Kentucky Commission was the second one of its kind in the Nation and is a significant step in the direction of removing partisan politics from the selection of Federal judges. Since the creation of the Kentucky Commission, President Carter has proposed a similar system for the Federal circuit courts of appeals and other Senators have expressed an interest in the idea. In order to assist those who are considering this approach to improving the Federal judiciary, I ask unanimous consent that the charter of the Federal Judicial Selection Commission of Kentucky be printed in the RECORD.

There being no objection, the charter was ordered to be printed in the RECORD, as follows:

CHARTER OF THE FEDERAL JUDICIAL SELECTION COMMISSION OF KENTUCKY

United States Senator Walter D. Huddleston, United States Senator Wendell H. Ford and Henry D. Stratton, President of the Kentucky Bar Association, after extended and careful consideration of the selection process for judicial officers of the United States courts, find:

1. That the maintenance of a strong and competent federal judiciary is necessary for the protection of the rights and freedoms of all those within the jurisdiction of the United States Constitution and that the judiciary must be preserved as a viable co-equal branch of our democratic government;

2. That only those individuals who exhibit the highest professional and personal qualifications and attributes should be appointed to serve on the federal judiciary;

3. That the selection process should not be influenced by arbitrary criteria such as sex, race, national origin, religion or political affiliation which have no bearing upon a nominee's true qualifications; and

4. That the constitutional process of presidential appointment, with the advice and consent of the United States Senate, to fill vacancies in the courts of the United States can be substantially augmented and improved through the creation of a nonpartisan advisory commission composed of outstanding representatives of the Kentucky Bar and leading citizens of the Commonwealth of Kentucky to nominate eligible persons for the federal district courts of Kentucky and appropriate seats on the United States Court of Appeals for the Sixth Circuit.

In accordance with these findings, the following charter is promulgated effective immediately:

1. There is hereby created and established the Federal Judicial Selection Commission of Kentucky, hereinafter referred to as the "Commission".

2. The Commission shall nominate persons found to be qualified to fill vacancies on the United States District Court for the Western and Eastern Districts of Kentucky and those vacancies on the United States Court of Appeals for the Sixth Circuit which are appropriately considered Kentucky seats.

3. The Commission shall consider all applications and also seek out through appropriate means qualified prospects for appointment to fill vacancies on the above mentioned courts. The Commission may seek and receive recommendations from any interested citizen or group.

4. Whenever a vacancy occurs in a judicial office within the jurisdiction of the Commission, the Commission shall meet to consider the qualifications and eligibility of all possible candidates for appointment.

The Commission shall notify the Kentucky Bar and the public at large in the Commonwealth of the existence of a vacancy and of the nomination procedure to be followed by the Commission and shall request recommendations of persons to fill vacancies.

5. Within 30 days after the occurrence of a vacancy, the Commission shall select by majority vote of its entire membership no fewer than three nor more than five proposed nominees who are the most qualified of those considered. The nominees shall be listed alphabetically and certified to the two United States Senators from Kentucky, who shall submit the nominees to the President of the United States as the most qualified for his appointment. The time limitation may be extended for an additional 30 days at the discretion of the Senators.

For those vacancies which exist at the time of the creation of the Commission, the initial 30 day time limitation shall begin to run 30 days after all commissioners have been officially appointed.

6. The Commission shall seek, receive, review and evaluate all pertinent information on the judicial prospects concerning their qualifications and eligibility.

7. No nominee shall be certified as one of the most qualified by the Commission unless there is an affirmative showing that the nominee possesses:

(a) All the qualifications required by law;

(b) The personal qualities of integrity, sound physical health, objectivity, emotional stability, honesty, fairness, compassion and community respect; and

(c) The professional qualities of probable judicial temperament, legal experience and outstanding legal ability.

8. The personal and professional qualities shall be identified and evaluated in light of guidelines and rules established by majority vote of the Commission. These guidelines and rules shall be recorded by the Commission and copies made available to the public for review without undue delay.

9. The Commission shall consist of nine members to be appointed as follows:

(a) Each United States Senator from Kentucky shall appoint three members to the Commission;

(b) Three members of the Commission shall be appointed by the Board of Governors of the Kentucky Bar Association from among the Kentucky Bar members who are actively engaged in the practice of law with offices within the Commonwealth of Kentucky. No more than two of the Bar appointments shall have their primary legal practice located in the same federal judicial district;

(c) The Senators and Board of Governors shall cooperate in their appointments to assure that the Commission membership represents, insofar as possible, a cross-section of the people of Kentucky as a whole including diverse political affiliation;

(d) A member of the Commission may not be a justice, judge or hold statewide office in any political party;

(e) Initial appointments of the members of the Commission shall be for staggered terms of two, three, and four years, as designated by the appointing authority. When a vacancy occurs on the Commission due to the resignation, disability or death of a member, a successor shall be chosen by the original appointing authority for the unexpired term. Vacancies which occur due to expiration of the member's term shall be filled by the original appointing authority for a term of four years.

(f) No member shall be eligible for appointment to a federal judicial office so long as he or she is a member of the Commission and for a period of two years after ceasing to be a member.

10. An act of the Commission shall be official only with the concurrence of a majority of its members.

11. The Commission shall designate its chairman, vice chairman and secretary. Notice of Commission meetings must be given to all members three days prior to the meeting. Operating rules of the Commission shall be recorded and made available without undue delay for public inspection.

12. The Commission shall keep the public informed of its activities and actions to the extent possible without jeopardizing the goals of the selection process or compromising the privacy of potential nominees.

13. A member of the Commission may be removed from the Commission by his or her appointing authority if the member conducts himself or herself in a manner unbecoming to an individual with this important responsibility or willfully violates the rules or official policies of the Commission.

14. Nothing contained herein is intended in any way to impair or delegate the constitutional and statutory powers, duties or prerogatives of the President of the United States or the Senate in the appointment of judicial officers.

LET US CUT TAXES ON INCOME AND SAVINGS

Mr. HATCH. Mr. President, there are better alternatives to the administration's rebate and spending package for stimulating the economy. In an article in the current issue of the Reader's Digest, Representative JACK KEMP argues that it is more important to increase productivity than to increase spending. He points out that jobs ultimately have their basis in profits. Businesses respond to profitable activities by investing in them, and these new investments result in the new plant and equipment that provide new jobs for a growing labor force. If the labor force grows faster than the rate at which the country adds to the plant and equipment that employs people in productive jobs, the unemployment rate will grow.

In his article, Representative KEMP outlines his proposals for increasing productivity. I believe that his proposals are both sensible and fair and that we should consider them as an alternative to the administration's stimulus package. I ask unanimous consent that Representative KEMP's article be printed in the RECORD.

There being no objection, the article was ordered to be printed in the RECORD, as follows:

NEEDED—TAX REFORM THAT WILL CREATE JOBS

(By Representative JACK KEMP)

In the traffic circle at Niagara Square in Buffalo, N.Y., stands the white marble William McKinley Memorial, a handsome 93-foot obelisk that has been a local landmark for almost 70 years. Unfortunately, it has also now become a landmark example of how *not* to create jobs. Consider:

With the city hard hit by the recent recession, a decision was made to create jobs by building a brick wall around the base of the monument. Buffalo hastily scraped up $135,000 to "match" $440,000 in federal funds, and the bricklayers went to work. Only as the fortress-like wall began rising did citizens realize how grotesquely it altered the beauty of the square.

A great public outcry finally halted the job, the project was torn down, and the monument area restored to its original condition. But by the time the last truck had hauled away the debris, taxpayers all over the country had chipped in on a "project" that added nothing to the wealth or well-being of the city and did nothing for the area's flagging economy.

Buffalo needs jobs. America needs jobs, for the millions now out of work and for the almost two million young men and women who will be entering the market each year. But America does not need McKinley monument-type jobs like those urged by too many of my colleagues in Congress. Tax rebates, temporary tax credits and government make-work programs, such as those advocated by the Carter Administration, cannot deal permanently with unemployment because they do nothing to increase real wealth and exist only as long as the private sector supports them with its taxes. Real jobs—those that produce goods and services, pay taxes and, in turn, create more jobs—come only one way: by harnessing private enterprise, the ultimate source of all of America's wealth.

Today, however, America's job machine, once the wonder of the world, is slowing down. Its fuel supply—the investment capital to start new companies, expand old ones, develop new products, replace obsolete or worn-out machines—is slowly being choked off.

How has it happened? The voracious combination of taxes rising on the tide of inflation has been eating up profits and discouraging the saving and investment necessary to increase our pool of job-producing, economy-expanding capital. Corporate after-tax profits (as a percentage of corporate domestic income) were 13 percent in 1965. By 1975 they had dropped to 5.1 percent.

This decline has also meant a drastic drop in retained earnings, the money left after paying dividends that business plows into job-producing modernization and expansion. A study by the Machinery and Allied Products Institute, adjusted to show the effects of inflation, shows that in 1965 corporations had $19 billion in retained earnings. A decade later, retained earnings had been wiped out.

The consequences of this economic reality are evident in every part of the country. In Buffalo, a major employer decides not to expand plant capacity. In Ohio's Mahoning Valley, a group of small steel companies considers a drastic pooling of resources to acquire enough capital to build a jointly operated mill that would replace antiquated blast furnaces. Fears of anti-trust violations are raised, but the alternative is frightening: get out of business. Indeed, this whole capital issue *is* the jobs issue. There is no economic lesson more basic than that capital *creates* jobs (a man can't hire people to cut wood if he hasn't first invested in saws) and *increases* productivity—and therefore wages—by buying better, more efficient tools.

The most important factor in increasing productivity is the amount of capital investment spent per worker. In the 1950s, we were investing an average of $84,000 per worker added to the labor force. In the '70s, that rate dropped to $60,000 per new worker. As a consequence, American workers are losing ground in the productivity race against world competitors.

Lest anyone think there is no correlation between investment capital and real economic growth, look at Japan. The free-world leader in productivity growth (close to 11 percent a year), it has also been the leader in private investment, plowing an average of 35 percent of its GNP back into capital expenditures. In West Germany, the figure is 26 percent; in France, 25 percent. The United States trails all major free-world nations, with an investment rate of only 18 percent.

Because our investment rate ranks last among the major industrial nations, we also rank last in growth of real wages and benefits. From 1965 to 1975, the real income of the American worker increased only 15.7 percent. In Sweden, it increased 68.8 percent; in Germany, 78.1 percent; and in Japan, 137.9 percent. In the United States by 1950, per-capita income was twice that of Sweden or Switzerland. Today, both have surpassed us, and other industrial nations are not far behind.

If we are to meet our energy needs, compete with foreign industry, build a projected 28 million new homes and maintain our standard of living, staggering amounts of capital are essential—$4 trillion in new investment between now and 1986. If present trends continue, we will fall $650 billion short of this goal.

Despite such predictions—plus the relationship between our dwindling rate of investment and jobs—we find Congress today still talking about soaking the rich and increasing taxes on business. It is the spectacle of a man choking himself. But if the advocates of "getting the fat cats" and "placing the burden on business" have their way, we will see still further reduction of our ability to save, invest, energize the economy.

There is, however, a way to encourage investment and provide millions of new jobs. Many of my colleagues in the House have joined me in sponsoring the Jobs Creation Act. Its most important proposals:

An across-the-board cut of ten percent on all personal income-tax rates. The American taxpayer's need for permanent relief is painfully obvious. The total tax bill of the average American household in 1975 (the most recent year computed) was $5844, or 41.2 percent of household income. Because of the universality of the federal income tax, a permanent cut at that level would be the most equitable and easily attained form of relief. Such a cut would be far better than one-shot rebates of money that has already been funneled to Washington and is then sent back—without interest, plus the added

expense of printing and mailing checks. We can best stimulate the economy by leaving more money with the people in the first place.

An exemption to each taxpayer of up to $1000 on a new savings account, money added to existing savings, or new investments in stocks and bonds. This will treat everyone equally and is a basic step to encourage the saving that is the heart of capital formation. Of the nine major industrial nations of the free world, the United States ranks eighth in taxation of what we consume. But it ranks first in taxation of wealth—the pool from which we must draw to finance the kind of productivity that makes things available to consume. Only by encouraging investment can we provide the trillions of dollars that American industry needs to supply real jobs for millions of workers.

An end to the double taxation of corporate dividends. This double dip by the U.S. Treasury has reduced the benefits of investment to individuals. After whacking 48 cents out of a corporate-profit dollar for federal taxes, the government then extracts tax a second time from the dividend checks of individual stockholders. The bite can go as high as 70 percent. This virtual confiscation of at least half and often more of a profit dollar has made many people reluctant to invest in business. The evidence: while 548 small companies (under $5 million net worth) were able to sell stock and raise $1.5 billion in capital in 1969, only four new companies issued stock in 1975, raising just $16 million in funds.

A reduction of the tax rate on small businesses. Today many small businesses must pay 48 percent of all earnings above $50,000 to the government—more than double the already high (20 to 22 percent) tax rate on earnings below $50,000. This tax jump is a formidable disincentive to firms that might otherwise expand. While these smaller businesses cannot borrow on the same terms as bigger companies, nor easily sell stock to raise funds, they are taxed at the same rate as multimillion-dollar business.

I also believe in adjusting personal and corporate income taxes to the consumer-price index so that individuals and businesses are not penalized when they are pushed into higher tax brackets solely because of inflation. It is the automatic result of inflation that income taxes as a percent of the average worker's income have risen steadily since 1950. Case in point: a Chicago construction worker earned $7196 in 1965 and saw $634, or 8.8 percent of it, siphoned off to Washington via income tax. In 1975, he earned $13,798, nearly double his pay of a decade ago. But Washington slipped $1386 out of his pay envelope—more than ten percent of his earnings. There's a hidden story here of how relentlessly the government tax machine runs on. When inflation is factored in, it turns out that the worker's pay increased only 12.4 percent over the decade, while his real taxes increased 28.1 percent, more than twice the wage rate.

The Jobs Creation Act would obviously increase after-tax corporate profits. This means bigger dividends, but also more money for job-producing capital expansion. In short, the "bonanza" would be widespread—through new jobs and through the financial benefits to the more than 25 million U.S. stockholders, many of them workers and retirees.

As I have found from the wide blue-collar support in my home district, working people understand all this better than do many supposedly pro-labor Congressmen. More than 51 million workers have a vital stake—beyond their jobs—in American business. Their retirement funds are invested in stocks and bonds (in fact, the controlling interest—at least one third of the shares—of the 1000 largest U.S. industrial corporations is held by about 1300 of the biggest union, teacher and employe pension funds). In addition, more than 380 million life-insurance policies depend to a great degree on business investments.

A major study—directed by economist Norman Ture—shows that enactment of the Jobs Creation Act would restore production incentives and generate a substantial amount of new jobs and higher wages. As such economic activity increases, the tax base grows. The revenue loss would be substantially less than usual estimates because lowering the high tax rates, which are the roadblocks to a more vigorous economy, would result in an increased GNP and, therefore, increased tax base. This is because jobs in the private sector pay for themselves, while the taxpayer foots the bill for public-sector jobs. And, of course, more private-sector jobs mean fewer unemployment-related expenditures by government, such as food stamps and unemployment compensation.

On the other hand, if we go the route of government make-work, we will find ourselves dreaming up largely nonproductive jobs at a cost that could reach $34 billion a year in public money. We are clearly at a time of decision. We can "create" jobs that are, in fact, an ill-disguised divvying of a shrinking economic pie into smaller and smaller portions. Or we can set about baking a bigger and better pie.

We've known the recipe for 200 years in America: it's the intrinsic genius of the capitalist system. But we've been stifling that genius through restrictive, regressive tax policies. It's clearly time to examine, revise and in some cases throw out those policies and let that genius breathe free.

THE GENOCIDE CONVENTION

Mr. PROXMIRE. Mr. President, evidently something in the Genocide Convention is not clear to my colleagues; otherwise, I am sure the convention would have been ratified by now.

The text of article I of the convention is self-explanatory. The signers seek to make it clear that genocide will be an international crime outlawing actions that result in elimination of members of racial, ethical, national, or religious groups. Article I states that all parties which ratify the convention will join together to prevent and punish genocide. The action of preventing genocide then would not be acted upon by just one nation.

Mr. President, the only change that acceptance of the Genocide Treaty would make is that the crime of genocide would be added to the list of criminal offenses. It would not give more power to any part of the Government.

We must realize that when genocide is committed, it involves reprehensible actions against a large mass of people. It is a concern to all nations.

Since 1776 the United States has made a commitment to strive for basic human rights for all mankind. What the Genocide Convention does it to extend our principles of leadership in the field of human rights to an international accord.

Mr. President, there is no reason to stop driving for a major goal of the United States—that of complete harmony between people and nations. We must not continue to remain inactive in this matter of utmost concern.

Mr. President, I urge my fellow Senators to ratify the Genocide Convention as quickly as possible.

OPPOSITION TO SACCHARIN BAN

Mr. MORGAN. Mr. President, on March 9 of this year, the Federal Food and Drug Administration announced its intention to ban saccharin from public consumption. The FDA said this ban was required under the Delaney amendment to the Federal Food, Drug and Cosmetic Act. That amendment bans a food additive if it is "found to induce cancer when it is ingested by man or animal."

Saccharin is now the only artificial sweetener presently allowed by the FDA.

The Delaney amendment has been on the Federal books since 1958. This was the same amendment under which the FDA banned cyclamates a few years ago.

The reason given for banning saccharin was that 100 Canadian rats were fed diets containing 5 percent saccharin, and from this controlled study 17 of the rats developed cancer. For a human to consume this much saccharin he would have to drink 800 12-ounce bottles of diet soda every day of his life. What is truly remarkable, therefore, is that 17 of the 100 Canadian rats got cancer but that the remaining 83 remained in good health.

The dangers to the American public, resulting from the ban on saccharin, are truly great. The biggest danger is to 200 million or more Americans who are overweight and diabetics who are on restricted diets.

Heart disease is the major killer in this country; responsible for more deaths than all other causes combined. Heart specialists are concerned about the effects on heart disease. Just replacing 10 billion cans of diet soft drink with regular soft drink will lead to an extra 2 trillion calories, and that means 600 million extra pounds of fat in Americans.

Saccharin has been used fairly consistently for almost 80 years. During that time, ironically, the rate of human stomach and bladder tumors has either remained stable or gone down. This indicates that widespread use of saccharin has not caused cancer.

And there can be little doubt that it has saved thousands of lives which otherwise would have been lost through heart disorders.

The FDA takes the position that the Delaney amendment is unqualified and prohibits rational decision making. I do not agree.

The amendment has been on the books for almost 20 years. During that time there was reputable research with monkeys which disclosed no abnormalities after they had been given large doses of saccharin for 6½ years. There have been numerous other tests indicating that saccharin is safe. It seems to me that there is discretion in the Delaney amendment but that the discretion is being abused at this time by the FDA.

I communicated my displeasure over the saccharin issue to the FDA a few days after the ban was announced. I am hopeful that the FDA will use the discretion inherent in the Delaney amendment clause and reexamine its position with a view toward leaving saccharin on the market.

If this is not the case, and action is required by the U.S. Congress to delete or amend the Delaney amendment, I am hopeful the Congress will act swiftly and decisively so that no American will be forced to be without saccharin.

The ban on saccharin by the Federal Food and Drug Administration is to me just a further example of the power which the bureaucrats assume in writing regulations for the executive branch. The Congress passes many bills which basically have good intentions and are based on sound reasons.

However, we must of necessity leave the day-to-day implementation of the laws up to the executive branch, and this includes writing rules and regulations.

In many cases, as with saccharin, the Executive branch gets carried away in writing the rules and regulations and includes many things which the Congress never intended.

These rules and regulations affect our farmers, businesses, industry, schools, consumer products and every facet of life.

Under the Constitution, the laws of this land are to be made by Congress, not by the bureaucrats in the executive branch.

The President has indicated that he intends to cut down on the number of rules and regulations being issued. I applaud this action, and I sincerely hope that he will be successful in this effort.

UNIFORMED SERVICES UNIVERSITY OF THE HEALTH SCIENCES

Mr. JOHNSTON. Mr. President, I am glad to report to the Senate that the Appropriations Committee has voted funds to maintain the operation of the Uniformed Services University of the Health Sciences through the end of fiscal year 1978. I trust that the Senate as a whole will strongly endorse this committee position when the supplemental appropriations bill is considered on the floor. This university is an efficient, economical, and constructive national initiative toward solving the chronic shortage of military physicians. Moreover, testimony before the Appropriations Committee strongly indicates that the university will be a national health resource of which we can be justifiably proud.

I ask unanimous consent that several pieces of information about the university be printed in the RECORD. First, there is a letter to each Senator signed by Senators BELLMON, HUDDLESTON, JACKSON, STEVENS, THURMOND, and myself, explaining in some detail the contribution that the university will make. Second, there are three statements that were made before the Appropriations Committee during hearings on this question. I would hope that Senators would carefully look at these materials. I believe that they strongly indicate that we should move ahead with the course of action that the Senate has endorsed on a number of prior occasions.

There being no objection, the material was ordered to be printed in the RECORD, as follows:

U.S. SENATE,
Washington, D.C., March 29, 1977.

DEAR COLLEAGUE: We are writing at this time to call your attention to an item in the FY 1977 Supplemental Appropriations Bill which we believe is critically important. The Appropriations Committee has included $12.5 million in funding to operate the Uniformed Services University of the Health Sciences through the end of FY1978. This decision was made by a 17–4 vote, and we believe it is essential that these funds be a part of the Senate bill.

As you know, Congress determined in 1972 that a dual mechanism of scholarships and a university was necessary for procuring physicians for the Armed Services. The Scholarship Program and the University were to be complementary, not competitive, and together they were designed to alleviate the chronic military physician shortage.

Five years later, the University is a reality. All construction funds have been appropriated and are under contract, and the first of two buildings is almost complete with the second building well under way. A class of 32 students began last September and a new class of 68 students is being selected from among 4000 applicants at this time. More than 200 faculty members are participating in the University's program. By 1980, the University will admit 175 students each year.

The Congress has acted on a number of occasions to support this University. At each step, the University has been discussed, and at each stage we have determined it to be a sound investment. A hearing was recently held in the Appropriations Committee to review the program. That hearing proves conclusively that this medical training initiative is an efficient, economical, and effective means of training a cadre of career physicians for the military. We would like to summarize for you the main points that were made in this hearing:

1. The University is a less expensive means of procuring physicians for the services than the Scholarship Program.

The General Accounting Office has indicated, and the Defense Department agrees, that the only accurate comparison of costs between the two programs is the total cost per staff year. Only this calculation recognizes the fact that University graduates will remain in the service, on average, more than twice as long as Scholarship Program graduates. In fact, while 99 percent of all Scholarship Program graduates serve only their 4 year commitment, University graduates will serve more than 10 years (a 7 year active duty commitment and a 4-year military residency), and many will remain as career medical officers.

The General Accounting Office, in a report of June 15, 1976, indicates that the total cost per staff year of the Scholarship Program will be $32,068, while the University will cost only $26,236. These are comparable figures, including in both cases the full costs of each program. Occasionally, different costs have been cited for the Scholarship Program, but these lower costs have been arrived at by including only the Defense Department contribution and by neglecting a proportional amount of support provided by the Department of Health, Education, and Welfare.

2. The University will produce a cadre of career professional medical officers who are essential to the health mission of the services.

There are a number of important nonquantifiable benefits of this University. Most of these were summarized in a November, 1976 memorandum prepared by Dr. Robert N. Smith, Assistant Secretary of Defense for Health Policy. Dr. Smith's statement said, in part:

"The USUHS will provide a nucleus of career-minded health professionals which is considered to be essential to the effective accomplishment of the military medical mission. The University will add to the supply of needed doctors, particularly in the primary care area. The University will assist the military in retaining outstanding physicians by offering them opportunities to pursue careers in academic medicine while remaining on active duty. . . . This institution is in a unique position to develop models in medical education and health care delivery systems. The University will train global military physicians as well as being a repository of knowledge on worldwide medical problems. All of these benefits make the USUHS a truly national health resource."

It was Dr. Smith who represented the Administration, in its efforts to terminate the university, at our hearing. He stated before the Appropriations Committee that he continues to believe in these non-quantifiable benefits, and it is his opinion that the University is certain to improve the effective accomplishment of the military medical mission.

3. The services currently face a serious shortage of physicians, and the University is an important step toward correcting that problem.

In order to meet its demand for physicians this year, the services will have to recruit some 900 doctors "off the street." In the last several years, of these recruited physicians, 35 percent have been foreign medical graduates, and 29 percent of these recruited doctors have not been U.S. citizens. In the Navy, foreign medical graduates this year are accounting for 62 percent of the recruited doctors. The recruiting problem in general is typified by the Air Force experience in the last two years. In FY 1976, the Air Force could recruit only 220 physicians toward an objective of 553. Failure to meet these recruiting objectives ultimately means that we incur huge expense in having service members, their families, and military retirees treated by civilian personnel.

The University will be an important step toward solving this physician shortage. Estimates show that by the year 2005, 28 percent of the doctors on active duty will be University graduates.

4. The University will make a contribution toward solving the over-all national shortage of physicians.

At our hearing, there was strong agreement that the additional physicians provided by the University are needed in the general American health care system. Were the University to be disbanded, approximately 1500 scholarships would be required to provide an equivalent number of physicians. Thus, closing the University not only withdraws the 700 new training spaces that are now being created, but also reduces the number of civilian medical training positions by 1500.

At this time we should be expanding our national health training resources, not contracting them. This University, with its 175 graduates a year, is an important step in that direction.

We hope that your review of this information will confirm our commitment that the University will be an important and cost-effective national health resource.

STROM THURMOND.
HENRY BELLMON.
WALTER D. HUDDLESTON.
J. BENNETT, JOHNSTON, Jr.
TED STEVENS.
HENRY M. JACKSON.

STATEMENT BY THE HONORABLE DAVID PACKARD, CHAIRMAN, BOARD OF REGENTS, UNIFORMED SERVICES UNIVERSITY OF THE HEALTH SCIENCES

Mr. Chairman, and members of the Committee, I am David Packard, Chairman of the Board of Regents of the Uniformed Services University of the Health Sciences. As you know, the Congress founded the University and directed that "the business of the University shall be conducted by a Board of Regents." I am happy to have the opportunity to appear before you to report on the University.

The Board of Regents is proud to report that the University is a going concern. We have met every requirement directed by the Congress. An exceptionally strong senior faculty has been recruited and outstanding men and women are applying for future positions. An extraordinarily bright and dedicated Charter Class is hard at work learning medicine. The University has received its appropriate accreditation. The buildings are on schedule. Mr. Chairman, I wish that my time could be spent telling you about all the exciting work that is going on. Unfortunately, I must talk about a very different issue.

The Secretary of Defense made a decision in February of this year to close the University. He made that decision in order to reduce the costs of operating the Department of Defense. Now, I have considerable sympathy for Secretary Brown; I have had some experience myself in trying to reduce Defense costs. However, in the case of the University, I must respectfully disagree with the Secretary of Defense. It is my purpose today to review cost and *benefit* information which I hope will persuade you to keep the University open, and I want to discuss some of the considerations which were not adequately taken into account when the decision was made by the Secretary.

Let me begin with construction costs. The Congress—after very careful review and analysis of the need for the University—decided to found the school and appropriated $85 million for the buildings. The University has had fine support from the Naval Facilities Engineering Command who secured excellent contracts for us. We are going to bring those buildings in for a little over $72 million with a savings of $13 million from the appropriation.

The construction timetable is on schedule. I might note that in the early planning for the University, additional buildings were programmed. The Board of Regents, which keeps a very close eye on the school and which meets monthly to review progress, decided in February 1976 that additional programs and buildings were not justified at this time and requested the Congress to delete $9 million from the FY 77 budget, which was done. We now have one building almost finished, and another one nearly 20 percent complete. The Department of Defense has proposed to give these buildings away, but no one has come to the Congress or the Board of Regents to tell you or us who is to get them. Nor have we heard of any plans to permit the Congress to review the costs and benefits of the programs which these new owners would propose for the buildings. Since those buildings were specifically designed to be a medical school, I am sure that it will cost the taxpayers a good bit of money for remodeling. No one has told the Congress or the Board of Regents what those costs might be. There have been some rough estimates that the building costs would come to over $40 million if the project is shut down today. I believe it will be more, possibly as much as $60 million, to close the project down and settle all claims—as compared to the $72 million which is all both completed buildings will cost. In short, I believe the Department of Defense has failed to do its homework on the closing and construction costs and I predict that a lot of tax dollars are going to be wasted if the University is closed.

Let me now turn to the costs of operating the school and of producing military medical officers. There were a number of careful cost-effectiveness studies done in 1974, 1975, and 1976. The Board of Regents has reviewed all of these. In my opinion as a businessman, the two General Accounting Office studies of May and June, 1976 are not only the most recent, but are the most complete and carefully done. The Board of Regents has generally accepted the cost data in these two studies with one major reservation: Congressman Price asked the GAO for the total cost to the taxpayer of the DoD Scholarship program. The GAO reported that an extra $10,624 of Federal support should be added to the Scholarship program, which would make scholarship students cost more than University graduates. The GAO said that it was not proper to add these costs since the Department of Health, Education and Welfare would have to pay them anyway. However, I believe that the taxpayer and the Congress are providing money to HEW to pay for physicians for the civilian community, not for the Department of Defense. In manufacturing, when one is producing several different items in a plant, investment costs are assigned or apportioned to each product; it is the only way that one can determine true costs so that accurate sales pricing can be done. Since the DoD scholarship program is designed to produce a physician for DoD, in my view it is fair to charge these costs to DoD—I would even go so far as to suggest that Secretary Califano ought to ask Secretary Brown for some or all of that $10,624 per scholarship student! I think it is important to mention that scholarship costs are going to increase; medical school tuitions have increased an average of 60 percent in the past five years, and are still increasing. The Congress, the Department of Defense and the Board of Regents can control the costs of the University; we have no such capability for civilian medical school costs.

There are other aspects of the Secretary of Defense's decision that concern me. The men and women in our volunteer Armed Forces have repeatedly put medical care very high on their list of reasons for joining and remaining in the Armed Forces. The Congress has been a strong supporter of the military medical departments. It is clear that the Congress intends to provide quality medical care to military people and their dependents.

The Secretary of Defense said that he could get enough physicians for the Department of Defense from the Scholarship program and by recruiting volunteers. I am sure he was not aware of the increasing number of foreign medical graduates that the Surgeons General have had to recruit while trying to meet—without success so far—their physician shortages. I am sure he was not aware that to replace the 175 graduates of the school will require over 1500 additional scholarships—for which he would have to come to the Congress for authorization and more money.

I am sure he was not aware of the ethical and contractual commitments his Department had made to University faculty and students. I am sure he was not aware how difficult it will be to transfer our students to other medical schools. I am sure he was not aware that over 2400 young men and women have applied for the 68 spaces in the class due to start this September. I am sure he was not aware of the problems the Department of Defense is having in keeping young physicians in the active Reserve for mobilization requirements. I am sure he was not aware that the new Health Professions Education Assistance Act of 1976 will markedly reduce the number of foreign medical graduates available for recruitment and will provide an HEW scholarship program that is more attractive than the DoD Scholarships. I am sure he was not aware that 185 medical and scientific officers of the Army, Navy, Air Force, and Public Health Service, and 40 Federal civilian physicians and scientists have already accepted joint teaching appointments to the University—at no extra salary cost to the Department of Defense. I know the Secretary of Defense was not aware of the GAO studies showing that the University and the Scholarship program have essentially equal costs.

I believe that if the Secretary of Defense had had all these facts available to him, that he would not have decided to close the school.

Let me now turn to some points that all the cost-effectiveness studies have not addressed—the benefits that the University will provide the Department of Defense. The GAO analysts recognized these benefits, but since dollars could not be credited to them, the analysts could not consider them.

The University provides a unique medical education. In addition to giving the students a first-class general medical education, it uses the extra six months in the program to provide an excellent foundation in military medicine. University graduates will get a special education in medical staff and command operations in peace and war; in medical defense against nuclear, chemical and biological war; in tropical medicine and parasitology; in military preventive and environmental medicine; in aviation and submarine medicine; in wound ballistics and mass casualty management and in all the other unique aspects of medical care of our Armed Forces in war and peace. Dr. Smith told the Congress last week that keeping doctors in the military depends on giving them a "sense of mission" about the military. That is exactly what the University will provide.

The University is already regarded by the career physicians now on active duty as "their" school. They have volunteered for its faculty, they are excited about teaching its students, and they regard it as their center for academic excellence. For this group of skilled and scarce people closing the school means that the Department of Defense has broken faith, ruptured a contract, and in effect told them it has no need for their dedication. Closing the University is certain to lose the Department of Defense the services of many of its best medical officers.

The superb Federal clinical research and educational facilities in Washington have accepted the University students with open arms. The students are already seeing patients at Walter Reed, Bethesda, and Malcolm Grow hospitals. Students are doing projects at the National Library of Medicine. The Congress recognized the educational potential of these institutions—they are already vital parts of the University.

The University—as a center of academic excellence—will be training military medical scientists for the masters and doctors degrees. The Department of Defense now sends its young Medical Service Corps and Basic Science Corps officers to civilian universities to get their degrees in bacteriology, parasitology, chemistry, and the other sciences allied to medicine and required by the military departments to support patient care and medical research. The University will provide a military relevant, problem-focused education in these sciences and train another cadre of long service officers for the Armed Forces.

The University clinical faculty, both military and civilian, will add to the patient care staff of the medical departments. As an indispensable part of their teaching of medical students, interns and residents, they will provide an additional resource to the Department of Defense for consultation and medical service. You gentlemen in the Congress are already quite aware of the excellent care you get when you go to Walter Reed, Bethesda, or Malcolm Grow hospitals. You know many of the University faculty, who now serve at their hospitals. I can assure you that the Board of Regents has selected and will continue to select only the most highly qualified men and women for the faculty—and we have had no dearth of applicants! It is this faculty to whom the military medical departments will turn to teach the programs in continuing medical education for active duty physicians. You gentlemen are well aware that more and more states are requiring evidence at continued professional growth and knowledge for re-

newal of licenses to practice medicine. Both at the school and on consultant visits, the University faculty will provide a significant portion of those requirements for military physicians all over the world.

Finally, at a time when the State of New York is paying to send its residents to school in Israel, and when civilian medical schools receive 40 percent of their support from state and private funds, it does not seem to me either just or equitable that the Department of Defense should depend any longer on the civilian sector to be the exclusive source of the physicians in the Armed Forces. I believe it is at last time that the Department of Defense begin to carry its share of the load and be a positive contributor to our nation's health manpower pool.

In summary, gentlemen, I cannot too strongly urge you and the other members of the Congress to continue to support and finance the University that the Congress founded. If you will permit a personal note, I am no stranger to the "bottom line". I know the University to be an efficient, cost-effective operation with intangible benefits that cannot be obtained any other way. Investment in the University is identical to your investments in capital ships and other systems that you intend to be long term contributions to our national defense. The graduates of the University will be the "core of the Corps", the essential cadre for mobilization in war and for service and training in peace.

I would like to place on the record a statement by Dr. Charles Odegaard, a member of the Board of Regents and—as president emeritus of the University of Washington, a distinguished medical educator. Let me take a minute to read just a few of his wise observations.

I hope that your decision will be not only favorable but as rapid as your deliberative process will allow Right now we are in limbo. We cannot admit a next class. We cannot recruit faculty. Our present faculty is asking if they should seek jobs elsewhere We cannot purchase supplies and equipment for next year's program. We have been told to prepare a plan to close down. If we are to stay open, we must tell our student applicants and faculty recruits by mid-April and we must move quickly to make up for our lost time.

Gentlemen, I know the House Armed Services Committee has put us back in the budget on no uncertain terms. The Board of Regents places the preservation of the University in your hands, trusting that you will support the University and that you will see to it that a dedicated faculty and student body and the committed military physicians now on active duty will once again know that the Congress is determined to keep the faith with them.

Mr. Chairman and members of the Subcommittee, I would be honored to answer your questions.

STATEMENT BY JOHN E. CHAPMAN, M.D., DEAN, SCHOOL OF MEDICINE, VANDERBILT UNIVERSITY

Mr. Chairman—Members of Congress: I come here to testify as a medical educator of some 20 years of experience in medical education and for many of those years as a participant and an observor of medical education in both developed and developing medical schools. By training I am a pharmacologist, Clinical pharmacologist, internist and toxocologist. By profession I am a medical educator and a medical administrator and currently Dean of the School of Medicine, Vanderbilt University, Nashville, Tennessee. I am a member of the Advisory Committee of the Liaison Committee on Medical Education which accredits medical education in the United States and have on numerous occasions been both participant as well as chairman of committees which examine medical education in both new and fully developed medical schools in this country over the past several years. I have also chaired national study and policy committees on student finances. It is from the perspective of having reviewed the status of essentially every medical school in the country, as well as the perspective of being a Dean, acting Vice Chancellor, and Associate Dean related directly to students in medical education that I speak to you today to the subject of the feasibility of a Uniformed Service University of the Health Sciences. I also speak from a unique perspective of having been a member of a survey team which visited the Uniformed Services University of the Health Sciences on April 19, 20, 21, and 22 of 1976 for purposes of evaluating the program.

The conclusions and statements which I provide you are my own, and represent the thinking that I feel, based upon the experience I have had with students, with medical education, with curricula and with the American Medical Scene. I do not speak for any particular organization, but rather represent an independent view of one Dean with experiences in medical education and with medical students at all levels from Assistant to the Dean through Assistant Dean, Associate Dean, Dean, and at one time Acting Vice Chancellor for Medical Affairs.

When I learned of the plan, now long standing and of much debate, for a Uniformed Services University of the Health Sciences, I initially had some reservations. I had worked with students for many years and found that a number of students—sometimes significant, sometimes miniscule, saw advantage to and participated in the various scholarship programs of the several Services to support them while in medical school. However, as time passed and I gained in experience, I found that these students divided themselves into two groups, a relatively large group which undertook the scholarship responsibility through force of financial circumstances and a smaller group which felt a dedication and an attraction to military medicine. The former group sought to discharge military responsibility as quickly as possible and depart while the latter group represented the core of the Medical Corps of the various Services.

It is my view that economically it is less expensive, and functionally to greater advantage, to attract those who are truly attracted because of strong motivation and to train and educate those of strong motivation in areas in which that motivation is strong and enduring.

A Uniformed Services University for the Health Sciences provides a focus for this group to express that motivation and to organize that motivation into mobilizable activity in a manner which can be, indeed must be, of high quality both in terms of the qualifications of the individual and in terms of the program to which the individual is exposed, as well as an economically sound investment which endures.

There is little which can be more expensive than the constant turnover of physicians—the physician who is there because he must be, not because that physician wishes to be. The former is expensive and potentially a liability. The latter is less expensive and a great asset. There is a certain pride in any medical school to be dedicated to those principles of strength that that medical school holds to be important and of priority value.

The Uniformed Services University for the Health Sciences will provide a focus for those individuals who hold the principles and objectives of this University in high priority. It is true that military scholarships can, and do, provide for a certain number of students who ultimately enter the armed Services and stay. It is my view that there is strength in diversity and significant weakness in common uniformity, thus it would be my view that those who indicate that it must be one or the other seek the simplistic approach and ignore the fact that our economy, our security, and our way of life is built on diversity with a common thread wherein organizations are developed which address specifically principles and priorities of unique interest to particular individuals. It is my assertion that the Uniformed Services University for the Health Sciences provides that focus for individuals dedicated to, and who hold a priority for, military medicine and far from being a financial liability, it is a financial asset to have highly motivated people in a quality program which develops a tradition around which develops the motivation which is economically sound in that it perpetuates itself—strength builds upon strength and the diversity that is provided through not only the Uniformed Services University for the Health Sciences but the various military scholarship programs will together provide that diversity and strength which provides for certainty and security for our medical services. We know that the Department of Defense is currently short by almost a third of the authorized physicians in the Reserve. Further, most of the physicians available through the Reserve are rather senior in years we need to build a youthful, dedicated, interested, committed group of physicians in military medicine. It is my assertion that the Uniformed Services University for the Health Sciences will provide for that important need and will provide for that important need in a manner which is economically feasible.

I think the people who monitor the budget would do well to remember an axiom which I learned as a student of evaluation and budget making. I quote "All that counts cannot be counted, and some that counts most cannot be counted at all and counterwise all that we count may not count at all."

While it is a catchy phrase it does have some substance to it in that the magic of numbers does not count the motivational factors—the factors of dedication—the factors of turnover—the factors of pride, quality and service.

I would add but one further comment, namely that Congress acted to create a medical school—a Uniformed Services University for the Health Sciences and did so after debating the issue many times over many years. Students are studying in that University at the present time, faculty have been recruited, progress has been made, schedules have been met, commitments are in place—a curriculum has been developed, approvals have been achieved.

To reverse field at this point would tend to confirm one of the greatest fears that some of us, certainly I, had as this concept of a governmentally free standing medical school developed—namely that the institution would not be an institution but a political organization and would engage the political process more than it would engage the academic process of educating physicians and other health care professionals. It is my view that in order to be a stable, viable institution which will attract faculty and students of high quality that issues of on-again, off-again must be converted into what do we want, rather than do we want it. That point has been passed—the latter question has been answered through your action; do we want it—the answer has been YES—and now it is present and functioning. It seems to me important to address how much do we want and what type; for this comes with a decision and a commitment, a fundamental commitment not to dangle an organization at the end of a string but rather to firm it up, focus it clearly and support it wisely to produce the desired result—it can be done, you have the resources and power to do it.

With these few comments you know something of me and of my views—I am here to respond to whatever inquiry you wish to make of me—Thank you.

STATEMENT BY CONGRESSMAN CLAUDE PEPPER, CHAIRMAN, SELECT COMMITTEE ON AGING, U.S. HOUSE OF REPRESENTATIVES

Chairman McClellan, Chairman Johnston, I appreciate your allowing me to come before your Subcommittees on such short notice. I just want to speak briefly on the Administration's proposal to abolish the Uniformed Services University of the Health Sciences.

I appreciate the fact that this proposal was put forward in the spirit of fiscal responsibility, but I believe there is a strong case for keeping the university open.

We are told there will be savings in construction costs—perhaps as much as $100 million. But estimates of completing the buildings now stand at $72.6 million—$13.2 million under what Congress has appropriated. This may be one of the few cost underruns experienced by the Defense Department in recent memory. Moreover, it is estimated that closing the school could cost between $40 million and $60 million.

We hear that the cost of graduating a medical student from the Uniformed Services University is much greater than through the Defense Department scholarship program. And, as you know, the General Accounting Office did a comparison of these costs based on years of expected service in the military, and found that the cost to the Defense Department is somewhat lower through the scholarship program. But what does not receive as much attention is the fact that other Federal programs—primarily through the Department of Health, Education, and Welfare, pick up the rest of the tab for these scholarship students, so there is not a saving to the Federal Treasury.

Moreover, it has been demonstrated that the total cost for graduating a civilian medical school student is somewhat higher than for a student at the military medical school.

As my colleagues are aware, the Administration indicates we will save $14 million in operating costs in fiscal year 1978, and as much as $28 million a year by fiscal 1982. Yet the GAO, in its report last May, indicated that some 379 scholarship graduates each year would be needed to replace 175 graduates yearly of the University, because of the difference in the length of time each is required to serve. The additional Defense Department scholarships needed would cost some $12 million annually. And it is possible that it would cost as much as $27.6 million, with the additional Federal assistance that could be requested by civilian schools.

Moreover, we are all aware that tuition at civilian medical schools is rising rapidly. The cost of these Defense Department scholarships will no doubt continue to rise.

The Administration believes it can make up its physician shortage through recruitment, with the use of scholarships, Variable Incentive Pay and other steps. But we have seen that the Department has not yet met its physician needs through recruitment. Moreover, we know that a substantial number of these recruits are graduates of foreign medical schools.

We have heard discussions about greatly reducing the number of foreign medical graduates who are allowed to practice medicine in this country. Should this happen, it stands to reason that DOD would have an even more difficult time recruiting physicians. And our civilian medical schools would be hard put to produce enough physicians to serve both the civilian and military populations.

We could argue the question of cost-savings for the rest of the week. Everybody has his own set of figures. The fact is, it is difficult to assess what the cost factors will be with any certainty. But there are other aspects that must be taken into account.

If we close down this school, we will have displaced 32 first-year medical students who have planned their careers around the University. They will, no doubt, have difficulty being accepted at civilian schools as second-year students. The staff and faculty of the University, many of whom gave up tenured positions elsewhere, will have their lives disrupted. The costs of settling the obligations can be expected to be substantial.

The school is operating. The curriculum has been established. The buildings will be finished soon. The students and faculty have made plans for their futures. Why disrupt them now—why, after the Congress has acted, change our minds now? It would be a sad state of affairs for Congress to take an about-face at this late date.

This University was created to produce a core of career-minded physicians—doctors trained in the tradition of the services, who understand the special needs of military personnel and their families, and who are trained to deal with war-time situations.

Finally—and this is an area of great concern to me—I believe this University is needed as much by civilians as the military. If we close down the school, there will be that much more pressure on the civilian medical schools. I am constantly beset by people who want to go to medical school, but there simply aren't enough spaces.

For almost 30 years, I have fought in the Congress for Federal aid to medical education. We simply must do what we can to ensure that this Nation has enough trained doctors and health care personnel to meet the needs of all our citizens—those in the military and those in the cities and towns all around this country.

If we ask the civilian schools to give us their physicians for the military—and if, as I mentioned, foreign medical graduates are prevented from practicing here, we will run the risk of having too few doctors to serve the rest of our population.

As Chairman of the Select Committee on Aging, I am determined to see that our older citizens have the benefit of medical care. It is they who most need the assurance that there are enough well-trained doctors to meet their needs. I believe that we should go ahead with our plans for this University, and I am hopeful that we will be able to accomplish this goal.

Thank you.

THE JONES ACT AND RUBBER RIVER RAFTS

Mr. CHURCH. Mr. President, the U.S. Customs Service has decided to administratively expand the scope of the Jones Act to include inflatable river rafts. This action may seriously affect the whitewater industry within my State of Idaho.

The Jones Act was passed by Congress back in 1920. This law, which prohibits the shipment of cargo from one U.S. port to another on any foreign vessel, was enacted to protect America's merchant marine and shipbuilding industries from foreign competitors. The law was never meant to apply to the small rubber rafts which are used extensively throughout the country in running whitewater rivers. However, the Customs Service, through somewhat tortured logic, has recently ruled that foreign-made rafts are in violation of the Jones Act. They reason that these rafts, contrary to simple commonsense, are foreign ships which are carrying cargo on navigable waterways between two U.S. ports. Now this fact by itself is not all that earthshaking. It is unlikely that the Customs Service's corps of inspectors will brave the hazards of Idaho's back country to check on the origin of a raft. However, the Coast Guard is in the process of preparing a set of regulations on raft safety that would require inspections by next year, and they have stated that they could not certify a foreign-made raft. These foreign-made rafts currently make up about 60 percent of the total in U.S. commercial use.

I have recently joined with my colleague from Utah, Senator GARN, in sponsoring legislation which would amend the Jones Act to exempt inflatable boats used in river running from its provisions. It is unfortunate that we must resort to changing the law to resolve this situation. Nonetheless, I feel this step is necessary if we are to protect Idaho's whitewater industry, which is a source of income to many small businesses, and an important Idaho tourist attraction.

Mr. President, I ask unanimous consent that an article which appeared in a recent issue of Business Week, and which describes this problem in some detail, be printed in the RECORD.

There being no objection, the article was ordered to be printed in the RECORD, as follows:

RED-TAPE MAY CAPSIZE RIVER RAFTS

For a number of years the sport of descending river rapids in inflatable rafts has been booming as more and more persons found adventure in shooting the spectacular runs. But most of the rafts may be beached next year because of a bizarre excess of federal bureaucracy. The U.S. Customs Service has ruled that foreign-made rafts, roughly 60% of the total in U.S. commercial use, are in violation of the Jones Act, which prohibits foreign vessels from trafficking between U.S. ports. Most foreign-built rafts come from Britain and France.

Clearly, the Jones Act was never intended to be applied to the tiny rafts, which carry at most 12 people and operate only sporadically during the summer months. But the rafts nevertheless fit neatly into the definition of coastwise trade, since they carry cargo between two U.S. destinations and, since they usually successfully traverse the treacherous rapids, they do it on navigable U.S. waterways. "We must hold that the transportation of passengers . . . in foreign-built rubber rafts would be in violation of the coastwise laws," the Customs Service stated in a letter to Representative Marjorie S. Holt (R-Md.).

INSPECTIONS PLANNED

Raft operators might ignore the customs ruling, since no inspectors are likely to trek into the wilderness to check a raft's origin. But the Coast Guard is preparing a series of regulations on raft safety that would require inspections by next year. "We couldn't certify a raft that was foreign made," says Lieutenant Commander Paul Anderson of the Coast Guard's merchant vessel inspection office.

The Coast Guard, wary of President Carter's pledge to reduce such meddlesome red tape, has dumped the problem on Transportation Secretary Brock Adams. But Anderson sees only two recourses: either get Customs to reinterpret its view of the Jones Act or persuade Congress to pass an exemption for rubber rafts.

Senator Edwin J. Garn (R-Utah) has drafted a bill that would do just that. But bailing out the raft operators does not rate a high priority. In the meantime, the sport, which has grown tenfold over the past seven years, could begin a tumble worse than those suffered in rapids. "Even if there was a good reason for banning foreign rafts," says a Garn staffer, "U.S. manufacturers can't take up the slack."

COMMONSENSE ON BEEF CONSUMPTION

Mr. McGOVERN. Mr. President, I am indebted to the Huron (S. Dak.) Daily Plainsman, one of the principal daily papers in my State, for editorially putting into proper perspective certain information contained in a recent report by the Senate Select Committee on Nutrition and Human Needs.

Some factions of the beef industry interpreted several statements in the report regarding beef consumption as harmful to an industry already depressed by almost 3 years of market prices well below the cost of production. I consider whatever differences which might have existed as being differences of emphasis rather than substance. The committee continues to consider beef a safe and highly desirable source of protein. It does recommend a reduction in the consumption of excessive saturated fat.

The editorial I have referred to appeared in the March 29, 1977, edition of the Daily Plainsman and is entitled "Unnecessary Furor." For the information of Senators also similarly involved, I ask unanimous consent that the text of the editorial be printed at this point in the RECORD.

There being no objection, the editorial was ordered to be printed in the RECORD, as follows:

UNNECESSARY FUROR

We haven't seen the report from the Senate Select Committee on Nutrition and Human Needs that has generated all of the fuss over red meat in the American diet, but it is probably safe to assume that the controversy, if indeed there is one, is not nearly as serious as it has been billed.

A part of the excitement over the report stems from the fact that Sen. George McGovern, second ranking Democrat on the Senate Agricultural Committee and Robert Dole, Kansas, the ranking Republican, are both members of the select committee which McGovern chairs.

The rumble started when the Senate Select Committee on Nutrition issued a report recommending decreased consumption of fat and cholesterol and suggested that more of our protein needs be satisfied from fish and poultry and vegetable sources.

Cattle industry spokesmen asked the committee for a corrected report last week and asked that it make "no further dietary recommendations without consideration of scientific data from all sources."

In his weekly newsletter McGovern makes a sensible argument that the nutrition report recommendation, that we strive to consume a leaner product, and the long-term goals of the American National Cattlemen's Association to eliminate "excess fat" from finished beef animals for a better return are compatible.

There are a few basic facts that support Sen. McGovern's position.

Cattlemen are getting less for their finished beef than it costs to raise it. And one of the reasons is oversupply that could be most readily reduced by marketing animals at lighter weights, with less fat and lower production costs for the feeder. This would provide the leaner carcass that the nutrition committee seems to have in mind.

In the end, however, it is the housewfe and the consumer who will ultimately decide how much marbling they want in their beef and whether or not they want to substitute chicken or fish.

Those consumers who have a cholesterol problem will probably take the advice of their own doctor about what they should or should not eat. And those who have no problem will probably not pay a great deal of attention to the recommendations of the Senate Select Committee anyway.

If there is a real demonstrable health bonus for eating leaner meat, and if there is a real economic bonus for producing leaner meat, it would seem that it should not be too difficult for the experts on the select committee on nutrition and officials of the livestock organizations to pool their expertise for the benefit of all concerned.

There should be a distinct advantage in having ranking members of both political parties from agricultural states serving on both the agriculture and nutrition committees at the same time.

The furor of last week seems a little unnecessary.

HARNESSING THE WIND

Mr. RIBICOFF. Mr. President, the energy challenges facing America are mounting, and there is a growing awareness that most of the energy resources currently utilized are not limitless. Although the President's energy message will not be presented to the Congress and the Nation for another couple of weeks, we have received indications that conservation will be a keystone of a comprehensive national energy policy.

In addition to conservation, it is also imperative that we utilize as many alternative energy sources as are practical. One readily available source is the wind.

For centuries man has harnessed the power of the wind to pump water and irrigate his fields, to operate mills and, in a number of isolated cases, to generate electricity. Some 150,000 windmills are in operation throughout the United States. Another 50,000 could be repaired and made operable. Clearly, this is an existing source of energy—and a renewable source—which warrants fuller exploitation.

The current issue of the Sierra Club Bulletin contains a very informative and timely article on the use of windmills. As the author properly notes, while a windmill may never be able to generate the same amount of energy as a big thermal plant "most experts agree that wind-driven engines can provide supplemental power during peak loads."

I ask unanimous consent that this article be printed in the RECORD and commend it to our colleagues' attention.

There being no objection, the article was ordered to be printed in the RECORD, as follows:

THE WINDMILL RENAISSANCE

(By Volta Torrey)

The most nearly inexhaustible source of energy yet available to us is the sun. It bathes the earth with radiation, and the wind derives its strength directly from this energy. Windmills have often enhanced both the earth's productivity and its beauty, without ever polluting the air, water, or soil. But when nuclear power was first demonstrated at Alamagordo, New Mexico, thirty-two years ago this summer, further development of wind-energy conversion systems in the United States virtually ceased, and was not resumed until recently.

The Persians caught bits of the wind's energy more than ten centuries ago to irrigate gardens in their arid land. Their crude sails revolved horizontally, like carousels, and a few like them are still turning in Afghanistan. Five centuries ago, Northern Europeans caught more of the wind's energy with nearly vertical sails, which were copied here until about 100 years ago, when our inventors substituted small many-bladed fans for the long rectangular sails of the Dutch, English and other European peoples.

The American windmills cost less to construct, were easier to manage and yielded enough energy to lift water from deep wells. When we celebrated our first centennial year, dozens of new factories were beginning to produce millions of dollars worth of windmills. The plants were clustered near Chicago, and the wind-driven engines exhibited at the Columbian Exposition on that city's lake front were one of its most spectacular attractions. Sears, Roebuck & Co. and Montgomery Ward sold thousands by mail, and windmill manufacture provided work for men whose labor was no longer needed on farms because of the increasing mechanization of agriculture.

ROLE OF EARLY WINDMILLS

The windmills they produced helped homesteaders survive and eventually prosper on the semiarid Great Plains west of Omaha. They also filled trackside tanks with water for the locomotives that first crossed the continent. Volunteer firemen saved flimsy wooden buildings in frontier towns with water pumped by windmills, and many Americans soon had running water in their home for the first time. Windmills became a significant factor in our country's exports, and the industry throve until rural electrification reduced the demand for its products.

The fans on the farmers' towers revolved too slowly to generate electricity. More speed was obtained by replacing them with two- or three-bladed "impellers," which resembled the propellers on airplanes. This rejuvenated the windmill business for a few years after World War I, but the little aero-generators could only deliver direct current, which was expensive to store and incompatible with the alternating current the utility companies poured into transmission lines from their steam and hydroelectric plants.

This technical obstacle to the use of the wind was reduced during World War II. If nuclear energy had not seemed too promising to most of our engineers, legislators and investors when that war ended, the wind might be generating millions of kilowatts for our utility companies today.

Palmer Putnam, a Boston engineer living on Cape Cod in the 1930s, was impressed both by the wind's strength there and by his utility company's monthly bills. He thought the wind should be used to reduce the cost of electricity and, with Dr. Vannevar Bush's help, he interested dozens of eminent engineers and scientists in designing a gigantic wind-driven power plant. New England utility executives concerned about increasing demands on their hydroelectric plants found Putnam's ideas attractive, too. The S. Morgan Smith Company, a leading builder of water turbines, then undertook the construction of the most powerful wind turbine ever built. General Electic produced a synchronous generator for it, and the machine was erected during the war on a high knoll in Vermont called Grandpa's Knob.

It was able to feed enough current for a small town into New England companies' transmission lines. But the builders and operators were handicapped by other wartime demands, and one of the two big impeller blades in the rotor broke loose. That wind plant could have been repaired and modified, but it was built without government help; and the S. Morgan Smith Company could not afford to continue the work on it. So the company decided to tear it down for junk when the atomic bombs ended the war. No other such mighty turbine has since been built anywhere in the world.

Although you seldom see a stationary wheel drawing useful power from the wind in our cities or suburbs today, tens of thou-

sands of fan wheels are still pumping water for cattle on Western ranches, on scattered farms and in the less developed countries. Three years ago, two American factories were still producing a few windmills to run pumps, and a third company was still manufacturing small aerogenerators that often have proven especially valuable even though they yield only a few watts of electrical energy. Those bits have enabled radio operators to stay on the air in electrical blackouts to direct rescuers to victims of severe storms, earthquakes and similar emergencies. During the first winter that we were asked to save energy in the United States, those little "Windchargers" also kept a few Christmas trees lit for us.

The prices demanded by the Arabs for their petroleum account largely for our current interest in further development of a source of energy used in their part of the world long ago. Our big federal Energy Research and Development Administration (ERDA) categorizes wind as a subdivision of solar energy and has increased support for studying it, but thus far it has pushed development of nuclear and other sources of energy much more enthusiastically.

WINDMILLS TODAY

Our biggest wind-energy conversion system today is a 100-kilowatt machine designed by space engineers and erected on the Ohio Shore of Lake Erie near Sandusky. It is less than a tenth as powerful as the one on Grandpa's Knob, but similar to it in many respects. Beaumont Smith, former president of the S. Morgan Smith Company, and Carl Wilcox, one of its engineers, were honored guests at the dedication of the Ohio plant last fall. "After thirty-five years," Mr. Wilcox observed, "our ideas have been proven worthwhile." On this machine, ERDA expects to test new concepts and components for more powerful wind turbines, and several aerospace companies are competing for contracts to produce them.

Although the Ohio plant is the largest one now running, many other new types are generating smaller amounts of electricity elsewhere. Almost any home handyman can build a windmill that will pump water, but building an economical, efficient aerogenerator is still a complex technical challenge.

At Albuquerque, New Mexico, in the Sandia laboratories that ERDA inherited from the Atomic Energy Commission, a small team of aerodynamics specialists has built a modern rotor that revolves parallel to the ground, the way the world's first windmills did. Instead of catching the wind with simple sails, this one does it with scientifically designed bow-shaped airfoils. Engineers call this a "vertical axis wind turbine" because the axis of rotation is perpendicular both to the earth's surface and to the windstream that drives it. Several similar turbines are being tested in other states and Canada. The Sandia team believes this kind of machine will prove to be best for generating electricity, and ERDA has applied for a patent on its experimenters' innovations.

At Mukwonago, Wisconsin, a technological commune called "Windworks," sponsored by Buckminster Fuller, has been especially interested in small aerogenerators that anyone handy with tools might assemble. This group has devised new kinds of vertical rotors, towers and power converters. With one of the latter, the owner of a Windworks system might make his utility company's meter run backward whenever the wind produced more power for him than he was using. Representative Henry Reuss is testing a Windworks system at his summer home in Wisconsin. He has permitted his utility company to put a ratchet on his meter, however, to keep it from being reversed by energy from the wind.

At Stillwater, Oklahoma, a newly organized firm called American Wind Turbine, Inc., began manufacturing another new type of windmill last year. The rotor on it is built like a bicycle wheel, with a rim around it so that power can be drawn from it at either the hub or the trim. The wheel weighs less than the old type of fan and is easier to support at an appropriate height. This turbine can either run a pump mechanically or generate electricity.

Both on our big ranches and in many other places still remote from transmission lines, some machine of this sort may be the most economical type of power plant yet feasible. The wind that drives these and other new experimental machines cost nothing, and this accounts largely for the wind mills' ability to survive competition from alternative energy sources.

A tradoff of esthetics for function may be required when the newest prototypes are built; such a tradeoff is anticipated with windmills to be erected on San Francisco Bay area hills.

WINDMILLS IN ART

Generations of artists and children have found windmills especially fascinating. Rembrandt was one of the first of many painters who left us pictures of their countries' windmills. Since Shakespeare's day, perceptive writers have also sprinkled poetry, plays, novels, and essays with allusions to windmills. And city youngsters still leap out of family cars at a "Children's Farm" maintained by the National Park Service near Washington, to run and watch an old gray farm windmill pump water spasmodically into a tank for barnyard animals.

Nostalgic senior Americans have spent millions of dollars to build replicas, import, restore, and reconstruct fine examples of windmills designed long ago in Europe. American windmills, too, are now attracting more attention; special bicentennial exhibits in the Smithsonian Institution last summer featured full-size models of two different types of windmills manufactured in the industry's heyday.

Few authorities expect a windmill ever to generate as many megawatts of energy economically as a big thermal or nuclear plant, but most experts agree that wind-driven engines can provide supplemental power during peak loads. The most desirable sizes and types of wind-energy conversion systems can soon be determined, and economic as well as environmental and sentimental motives all suggest that more attention should be given to solar energy, including the wind, in formulating policies to provide our country with adequate energy.

FCC THROWN OUT OF CENSORSHIP BUSINESS

Mr. PROXMIRE. Mr. President, one of the reasons I introduced in January S. 22, the First Amendment Clarification Act of 1977, was to establish the principle that there is no inherent difference between the print and the broadcast media when it comes to first amendment freedoms.

This legislation is necessary because to date neither the Congress nor the Federal Communications Commission has been willing to recognize that our laws governing broadcast journalism and broadcast programing in general allow Government discretion to censor.

Fortunately, the courts have on occasion been less willing than the Congress and the FCC to concede to the Government the power to determine such matters as fairness in broadcast journalism and standards of taste in broadcast programing.

One such occasion came earlier this month when a panel of the U.S. Court of Appeals for the District of Columbia Circuit ruled that the FCC acted in violation of the Communications Act of 1934 when it banned the broadcast of certain unsavory words at times when children are likely to be in the audience.

This decision may have spared our broadcasters from further erosion of their first amendment rights, Mr. President, but it was by no means a ringing vindication of freedom of expression in the broadcast media.

Only Chief Judge Bazelon, who wrote a concurring opinion, was willing to say that any FCC intrusion upon the editorial and programing discretion of the licensee is a violation of the first amendment.

The opinion of the court, written by Judge Tamm, willingly accepts that the FCC had in this instance tread upon the "forbidden realm of censorship." but only to the extent that it had violated the ban on such actions contained in section 326 of the Communications Act.

The FCC order, Judge Tamm ruled, would have been so broad as to forbid the broadcast of certain portions of the Bible, passages from Shakespeare, and excerpts from literary works by Hemingway, Joyce, and others. Moreover, he said, the order was too vague in defining the standard for indecent broadcasting to provide sufficient guidance for broadcasters without encroachment on free expression.

I would like to call the attention of my colleagues to one particular passage in Judge Tamm's opinion, however, which I believe has significant bearing on our consideration of S. 22, which would do away with the equal time provisions and the so-called fairness doctrine. Judge Tamm stated:

> We should continue to trust the licensee to exercise judgment, responsibility and sensitivity to the community's needs, interest and tastes. To whatever extent we err, or the commission errs in balancing its duties, it must be in favor of preserving the values of free expression and freedom from governmental interference in matters of taste.

This declaration of faith in the responsibility of licensees, we should note, comes in the context of a ruling concerning the broadcast of material which many of us might prefer not to hear, let alone condone for the entertainment of our children.

But it seems ironic, Mr. President, that we can fail to give our attention to Government's continuing control of broadcast journalism when within the last 6 months we have seen the Federal courts twice reprimand the FCC for its efforts to control violence, sex, and indecent language in broadcast programing. It had been my impression, Mr. President, that expression of a political nature—which makes up much of broadcast news—was of primary importance under the first amendment. Yet this area of expression remains in the status of a stepchild to the FCC.

If the courts are willing to entrust matters of taste in programing to the licensees, should not the Congress be willing to entrust matters of news judgment to them as well?

I am persuaded that if licensees are sufficiently responsible to make pro-

graming decisions, they are certainly competent to make news judgments without concern for such regulations as the fairness doctrine.

Mr. President, I am encouraged by the court of appeals decision to the extent that it indicates a trend in the right direction. But the task of elevating broadcasters to parity with publishers under the first amendment is far from complete.

So that my colleagues might have the benefit of a more detailed analysis of the court panel's decision, I ask unanimous consent that a report on that decision in the March 21, 1977, issue of Broadcasting magazine be printed in the RECORD.

There being no objection, the report was ordered to be printed in the RECORD, as follows:

FCC THROWN OUT OF CENSORSHIP BUSINESS BY D.C. COURT

At the time the FCC issued its anti-indecency ruling in a case involving a George Carlin comedy record dealing with the "seven dirty words you can never say on television" (Broadcasting, Feb. 17, 1975), commission officials said that if the ruling did not survive judicial review, there was probably no language that could not be aired at any time. The question of whether that fear was warranted may soon be answered. Last week, a panel of the U.S. Court of Appeals in Washington overturned the commission's action, which attempted to distinguish broadcasting from other media for First Amendment purposes and which was designed to protect children from the broadcast of allegedly offensive material. Judge Edward A. Tamm, who wrote the court's opinion, said the commission's ruling was "overbroad and vague" and carried the commission into the "forbidden realm of censorship."

The panel, reflecting the uncertainty over government authority in the area of regulation of speech, was split. Judge Tamm said the commission's ruling constituted a violation of the Communications Act provision that prohibits the commission from censoring broadcast material. Chief Judge David Babelon, who concurred, went further, he said the ruling also violated the First Amendment, and he appeared to reject the commission's view that material protected in other media could be barred from broadcasting. Judge Harold Leventhal, the third member, dissented, with an opinion generally supporting the commission's position.

The effect of the opinion was to place the commission in a quandary—or, as Chairman Richard E. Wiley put it, "a never-never land." He said the commission's ruling was a good faith effort" to implement the federal statute prohibiting the airing of obscene or indecent material. "I guess we did not do it right," he said. But he also said the commission was left without guidance as to how it might proceed properly.

Accordingly, it seemed likely the commission would seek review of the panel's decision by the full nine-member bench of the District of Columbia circuit. At a minimum, the court might provide clarification.

The record album at issue—*George Carlin, Occupation: Foole*—was broadcast by Pacifica Foundation's WBAI(FM) New York on the afternoon of Oct. 30, 1973. The album was featured in a broadcast on the use of language in society.

But the Carlin monologue came to the commission's attention in a complaint from a man who said he had heard it on the car radio while driving with his young son. And the commission—under pressure from Congress and the public to police the airwaves for allegedly offensive material—seized on it as a means of clarifying its definition of the kind of indecent material that it would ban under the obscenity and indecency statute.

The definition referred to language that describes "sexual or excretory activities and organs" in a manner considered "patently offensive" by community standards for the broadcast medium and that is broadcast at a time of day when children would be expected to be in the audience. The commission said such material might be aired late at night, provided it had serious literary, artistic, political or scientific value. And the commission, citing its authority under the obscenity-indecency statute, held the words, "as broadcast," to be "indecent" and prohibited from the air.

To Judge Tamm, the statement does exactly what the Communication Act's Section 326—the no-censorship provision—prohibits it from doing: interfere with licensee discretion in programing. Despite the effort to "channel" the allegedly offensive material into late-evening hours, he said, the commission is still engaging in censorship.

As drafted, the commission ruling, Judge Tamm said, would prohibit the broadcast of Shakespeare's "The Tempest" or "Two Gentlemen of Verona," some passages of the Bible, as well as the works of a number of authors, including Ernest Hemingway and James Joyce. The Nixon Watergate tapes would also be forbidden, he said.

Having declared the ruling in violation of Section 326, Judge Tamm said it was not necessary to decide the First Amendment question. But he also said the ruling does not meet the "rigorous demands" the Supreme Court has laid down for defining obscenity—even assuming the commission has the power to ban nonobscene speech from the air. He said the ruling is "overbroad" (it "sweepingly forbids any broadcast of the seven words irrespective of context or however innocent or educational they may be)" and "vague" ("it fails to define children").

Judge Tamm's solution to the problem is to trust broadcasters to exercise good taste and judgment. "To whatever extent we err, or the commission errs in balancing its duties," he said, "it must be in favor of preserving the values of free expression and freedom from governmental interference in matters of taste."

Judge Bazelon held that regulation of indecency must be subjected to the same restraints as those applied to the regulation of obscenity; he said the Supreme Court has always treated indecency in terms of obscenity. And, like Judge Tamm, he found the commission's definition of the term "massively overbroad." Furthermore, he said, the commission had failed to demonstrate radio and television are different—why offensive speech that would be protected in other media may be regulated when broadcast over radio or television. Judge Bazelon rejected each of the commission's arguments for that proposition, including the principal one—that the ban is designed to prevent the exposure of children to words their parents would not want them to hear. The commission, he said, "incorrectly assumes that material regulatable for children can be banned from broadcast." If the commission had such power, Judge Bazelon said, it could ban the airing of political or religious programs from which parents might want to shield their children."

Judge Leventhal, who appended a transcript of the Carlin monologue to his opinion to make clear the nature of the problem that confronted the commission, said he "cannot fault" the commission's action.

"TV-radio broadcasting has special access to the home, and home audiences are a primary target of the industry," he said. "In the home, special considerations apply, with freedom from unwanted intrusion both by the government . . . and by others presenting unwanted materials."

Judge Leventhal noted that the "abhorrence of censorship is a vital part of our society." But he indicated he is not an absolutist on the First Amendment, at least where children are concerned. He said he would permit regulation of programing if the aim is "to assist parents in their protection of young children" during the time of their development—"a compelling state interest."

THE RIGHT APPROACH TO FUTURE OF TELECOMMUNICATIONS

Mr. HART. Mr. President, under the chairmanship of Senator HOLLINGS, the Subcommittee on Communications has just completed excellent exploratory hearings on a vitally important but complex subject—the future of telecommunications in this country and the various public policy options that are before us.

At issue here are how to preserve the high quality of our public telephone network and how to make available to American consumers a new generation of specialized communications services made possible by the revolution in computer and electronics technology of the 1950's and 1960's. These new services promise to change our patterns of work and leisure just as radically as the telephone once did.

Under current FCC policies, competition has been allowed in two specialized areas of the telecommunications industry—provision of private long-distance business lines and terminal equipment. The public telephone network has remained a regulated monopoly, controlled by A.T. & T. and the 1,600 independent telephone companies.

But. A.T. & T. and the independents claim that unless these specialized services are supplied by them on a monopoly basis, the technical quality of the public telephone network will suffer and local telephone rates will go up. After failing to reverse the FCC policies in the courts, the established industry is now seeking to remove competition from the telecommunications industry through legislation in the shape of the Consumer Communications Reform Act.

The controversy centers on the established industry's claim that profits from A.T. & T.'s specialized services subsidize basic telephone rates. The industry goes on to argue that local rates will have to be raised if the "creamskimming" activities of the new private line and terminal equipment competitions are allowed to continue.

Studies by the FCC and some States strongly suggest that the reverse may be true—that far from helping to keep local rates low by contributing to common costs, A.T. & T.'s specialized private line and terminal equipment services may be running at a deficit and keeping local rates artificially high.

The crucial question of cross-subsidies is complicated by a lack of information on the true costs of A.T. & T.'s various services. A.T. & T. itself appears to be unable to provide adequate data, and the FCC believes that it will take the general application of new fully distributed costing principles and a revision of the uniform system of accounts before a complete picture emerges

As an editorial in Sunday's Washing-

ton Post noted, Senator DANFORTH went straight to the heart of the matter in his perceptive questioning of the A.T. & T. chairman, John D. deButts, at the Communications Subcommittee hearings last week. Since A.T. & T. is asking for legislation against competition, Senator DANFORTH told Mr. deButts, A.T. & T. must carry the burden of proving the harm it alleges will result if competition in private lines and terminal equipment is allowed to continue. A.T. & T. must provide something more than just a bald statement that they are losing money, he added, and went on to lay down a challenge to the A.T. & T. chairman: "Show me."

Mr. President, we should all pay attention to the words of Senator DANFORTH. If the largest corporation in the world wishes us to pass monopoly legislation that would give it a free hand to determine the future of telecommunications in this country, it must first present us with a watertight case. So far, it has just not produced the facts to back up its claims.

I ask unanimous consent that the editorial from the Washington Post of Sunday, March 27 be printed in the RECORD.

There being no objection, the editorial was ordered to be printed in the RECORD, as follows:

TO A.T. & T.: "SHOW ME"

The new Senator from Missouri, John C. Danforth, got it just right the other day when he told the chairman of the telephone company, "Show me." The chairman, John D. deButts, was claiming that residential telephone rates are now subsidized by long distance service. But the Federal Communications Commission says it has seen no evidence of such a subsidy, and AT&T hasn't kept its book in the past in a way that reveals one. So Sen. Danforth, quite properly, told Mr. deButts that the "burden of proof" is on the telephone company to justfy its claim.

The subsidy is central to AT&T's persistent campaign for legislation cutting off competition in the telecommunications field. It has built a massive lobbying effort around the idea that more competition will mean poorer service and higher rates for residential customers. The FCC and the Department of Justice, which have been promoting competition, insist that neither result is inevitable. And no one appears to have the economic data to back up the assertions.

That lack of data has not deterred AT&T's efforts on Capitol Hill, however, Mr. deButts asked last week for an immediate prohibition against new competition for his company while Congress studies the whole telecommunications field. And the "Bell Bill," as a piece of legislation entitled "the Consumer Communications Reform Act" has become known, is still being pushed vigorously from all over the country. The force of that effort should not be underestimated. The Bell system reaches into 48 states and employs a million people. It should have been no surprise that its pet legislative proposal picked up more than a third of the members of Congress as sponsors when it was first introduced last year.

That bill, which would grant AT&T an effective monopoly in its industry, does raise many complex issues. The telecommunications field is changing rapidly and its future is not yet defined. As computers become tied to communications circuits, a whole new kind of daily life begins to unfold. It is not clear, at least to us, what form this exploding industry should take or what role government should have in it or in its regulation. But it is clear that no one company ought to have a stranglehold on it and on the introduction of new equipment and new techniques. That is why Congress should proceed with all deliberate speed in dealing with the questions opened up by the Bell Bill and why Sen. Danforth has the right approach.

VIEWS OF HEW ON COLLEGE TUITION TAX CREDIT

Mr. KENNEDY. Mr. President, in light of the recurring issue in the Senate over the proposed college tuition tax credit, I wrote to Secretary of HEW Joseph A. Califano earlier this month, asking for the Department's views on the merits of this tax approach to ease the burden of rising education costs on American families.

Under the current version of the credit proposal introduced earlier this year in the Senate, an income tax credit of $250 in 1977, increasing to $500 in 1980, would be available for college tuition expenses. The cost of the bill to the Federal Treasury would be $1.1 billion in the first year and $2 billion when the credit is fully phased in. In the past, I have opposed such proposals as an expensive, unstudied, and unwise new Federal spending program through the Internal Revenue Code.

Today, I received Secretary Califano's reply, in which he raises a number of serious objections to the credit as a matter of Federal education policy. Among the points made by the Secretary are the following:

Direct Federal grant and loan programs are more effective than a tax credit in dealing with the increasing burden of tuition costs, because such programs can target the relief to the specific needs of particular families.

The tax credit is inequitable because it gives the same benefits to families regardless of income, need, or actual education expenses. Families with incomes too low to pay taxes get no benefits at all. Wealthy families with children in low-tuition community colleges get the same benefit as low-income families with children in high-tuition colleges.

For many families, even those in upper-middle-income groups, a long-term low interest loan would be preferable to a tax credit, because the full college costs could be spread over several years under the loan.

The benefits of the tax credit would be distributed unfairly among income groups, with 60 percent of the benefits going to families with incomes over $18,000 a year.

The benefits of the tax credit would also be distributed unfairly on the basis of college costs: only 30 percent of the benefits would go to families with children in private colleges, although they have 60 percent of the financial need of families benefiting from the tax credit.

Overall, as the Secretary concluded, the credit would be a "radical departure" from current Federal education policy.

Obviously, these objections by HEW should make Congress pause before it launches an expensive new multibillion-dollar Federal tax subsidy program of the sort proposed by the tuition tax credit. The Nation can be rightfully proud of its existing aid-to-education programs. As Secretary Califano notes, it may be possible to improve the existing programs even further. But on the present evidence, adoption of the tax credit approach would be a serious step in the wrong direction, and a waste of scarce Federal education dollars that could be much better used in other ways.

Mr. President, I ask unanimous consent that the texts of my letter to Secretary Califano and his reply may be printed in the RECORD.

There being no objection, the letters were ordered to be printed in the RECORD, as follows:

U.S. SENATE,
Washington, D.C., March 8, 1977.

Hon. JOSEPH A. CALIFANO, Jr.,
Secretary, Department of Health, Education, and Welfare, Washington, D.C.

DEAR MR. SECRETARY: I am writing to request your Department's analysis of the proposed tuition tax credit for education expenses. As you know, this proposal was passed by the Senate last year in its consideration of the Tax Reform Act of 1976. Although the provision was dropped by the Senate-House Conference Committee, there is a continuing interest in the proposal, and it may well be offered as a rider on the Senate floor to the Administration's tax bill.

I believe that it is important for the proposed tax credit to be analyzed as a Federal education program. I would therefore appreciate receiving your comments on the measure, viewing it as a Federal program to provide financial assistance for education. It would be helpful if your analysis could recast the proposed tax credit as a direct federal grant program, equivalent to the tax expenditure, and then address such questions as:

Is there an overall need for the program?

Are the federal funds targeted to the persons that need federal assistance?

Is the form of the program—direct grants—more desirable than other forms of aid, such as loans?

Is the distribution of the benefits equitable among income groups?

Would the proposed program be consistent with the policies underlying the benefits provided by existing direct federal expenditures for education?

In sum, I would like your view as to whether the Department would support the education program contained in the proposed tax credit if it had been proposed as a direct program to be administered by HEW.

Unfortunately, there is some urgency to the proposal, since it may be offered as a rider to the tax bill coming soon to the Senate floor.

With best wishes, and I look forward to hearing from you.

Sincerely,

EDWARD M. KENNEDY.

THE SECRETARY OF HEALTH, EDUCATION, AND WELFARE,
Washington, D.C., March 31, 1977.

Hon. EDWARD M. KENNEDY,
U.S. Senate,
Washington, D.C.

DEAR SENATOR KENNEDY: I am writing in response to your request for an analysis of proposals for the use of tuition tax credits to provide aid to families with college age students.

There is no question but that college costs are rising and that many families must make hard choices to finance a college education. Reduction in the family's standard of living or increased borrowing is often necessary to meet educational expenses. However, there are many combinations of grant and loan

programs which would deal with that problem better and more fairly than a program of tuition tax credits, by distributing assistance according to the severity of the particular family's problem. For example, a highly paid professional sending his child to a low-tuition community college would get as large a benefit under some proposals as a blue collar worker sending his child to an expensive private college with no other aid. A family with income so low that it pays no tax would receive no aid at all. The "solution" proposed by such legislation badly matches the problem.

This, of course, implies an answer to your question regarding whether such a program would target Federal funds to those who need assistance. Such grants would have little relationship to need because almost all students, even those attending low-tuition public institutions, incur sufficient tuition charges and other expenses to be eligible for the maximum credit. A reduction in the allowable credit would occur only where the student received grant or scholarship assistance, and, since today most grants and scholarships are awarded on the basis of need, such a reduction would almost always result from receipt of a need-based grant or scholarship.

A direct, targeted grant program in which both family ability to pay and costs of attendance determine the amount of the students grant is a desirable way of equalizing educational opportunities, and is highly complementary to loan programs. However, for many of the upper-middle income families which would likely benefit from a grant program such as the tax credit proposal, I suspect a loan program would be preferable. What they need most is to spread college costs over an extended number of years, as is currently done under the Guaranteed Student Loan program. I think most of these families, when faced with large college costs in a particular year, would prefer a $2,500 long term 7 percent loan to a $250 to $500 grant. Where the issue is not ability to pay, but convenience, I believe the loan alternative becomes the more desirable.

The distribution of benefits under a grant program patterned after some proposals would appear to be inequitable among income groups. Benefits would be largely the same, despite differences not only in college costs, but also in income. We estimate that at least 60 percent of tax credit benefits would probably go to families with incomes of $18,000 or more—which are considerably better off than the national average. Further, only 30 percent of the benefits would go to families sending children to private colleges, although they have almost 60 percent of the financial need of all families likely to benefit from the credit.

You ask whether the proposed program would be consistent with policies underlying present direct Federal expenditures for education. It would be a radical departure. Two factors presently determine the amount of aid a student receives from Office of Education programs: the family's ability to pay, and the cost of the chosen college. When ability to pay is subtracted from cost, we have need, and in this sense all the Office of Education programs are need based. Perhaps, as some argue, different ways of determining need should be considered, or assignment of responsibility for meeting need among different programs could be improved. I cannot, however, imagine endorsing a student grant program which would completely discard need as a relevant factor in the manner of some tuition credit proposals.

Sincerely,

JOSEPH A. CALIFANO, Jr.

ELECTORAL REFORM

Mr HATCH. Mr. President, in recent years the issue of electoral reform has received substantial attention among scholars and students of the election process. The 1976 Presidential election has rekindled the flame and reform of the electoral college system is again dominant in political discussion. In the last six Presidential contests, half were termed by historians, media, and citizens alike as being "close," where a small shift of voters in any one or two States would have changed the outcome of the election and essentially affected the course of our Nation's history.

With all of the bantering about the electoral college these last several years, it is apparent that some reform is needed, but it is imperative to give careful and thorough consideration to each alternative to our present system. In reforming the electoral college we are not dealing with a minor procedural matter, but rather passing judgment on a method to elect our Chief Executive. It is sure to have an enormous effect on not only our domestic and foreign policies, but every aspect of our national character.

Advocates of change in the system generally favor one of three oft-mentioned plans:

First. Total elimination of the electoral college, providing for the direct election of the President and Vice President by popular vote;

Second. The "district" plan, which would provide for two at-large electors from each State in addition to one elector from each congressional district, and the elector would cast his vote for the candidate carrying that particular district; and

Third. The proportional distribution of a State's electoral votes relative to the percentage of popular votes each candidate receives.

I presently believe that the proportional plan is the most preferable reform proposal for small States particularly. In amending our Constitution it is imperative that we improve on the Founding Fathers original concepts. We cannot blithely disregard their very legitimate concerns. First of all, we must remember that the 50 States are individual political units and deserve to retain a high degree of election impact of their own. For a candidate to even campaign in Utah, my home State, with only four electoral votes, would be a waste of his time and money if Utah and her citizens are not guaranteed that their individual votes are on a par with those cast in New York or California. The abolition of the electoral college or the adoption of the district plan could not make this guarantee. Utahans, even though they live in a less populous State, are Americans nonetheless, and should have reasonable opportunity to participate in Presidential campaigns.

The main flaw in the present system is the "winner-take-all" method of apportioning the electors. Under this system, 48 percent of the people in New York who voted for Gerald Ford were ignored. A like situation existed for supporters of Jimmy Carter in California. Can we continue to allow these citizens to be disenfranchised? The proportional system will give each individual's vote its full measure of value toward the total number of electoral votes cast, and ultimately toward the selection of the President and Vice President of the United States, without defeating the intended purpose of the electoral college.

Further, it is generally agreed that citizen apathy is becoming far too widespread. I find this personally alarming. All citizens bear a responsibility to participate in the election-day process be it national, State, or local, but the electoral college operating within the constitutional structure for national elections does absolutely nothing to encourage voter interest. Why should John and Jane Doe of Boston, Mass., bother to vote at all when it is a virtual certainty that their State will be carried by the Democratic Party? The Democratic Party must also be concerned by this problem.

It is obvious that direct election by popular vote will not contribute to a solution to this problem of mutual concern. This method of Presidential election would reduce the effect of an individual's vote to a ratio of less than 1 to 100 million. The district plan, while it would make a nominal impression on the voters and retain some of the essence of the constitutional idea of insuring the weight and importance of all 50 States, is, in actuality, the present "winner-take-all" system on a smaller level, one in which the winner of the particular congressional district wins the one electoral vote.

Additionally, it is my feeling that basing the electoral system on the State level is more efficient for counting and statistical purposes. A large share of the precincts across America still utilize paper ballots; and, under the district proposal, the elector in most of these congressional districts could not be chosen the same evening as the election.

The specific proposal of which I am a cosponsor, Senate Joint Resolution 18, has yet another unique and praiseworthy feature. In an instance when the electoral college fails to elect a President, our Constitution has provided for a decision by the House of Representatives. Senate Joint Resolution 18 mandates that both House and Senate shall choose the President by a majority vote in joint session. This is further insurance that the States, under a proportional plan, such as Senate Joint Resolution 18, will have proper recognition as equal participants in the federal system.

I have but briefly outlined a few of the commonsense reasons why I believe a constitutional amendment revising the electoral college is needed and why the proportional system appears to me to be the best option. It combines the best points of what our Founding Fathers wrote into the Constitution in 1787, and yet acknowledges the constructive criticism of recent years. The 95th Congress can be recorded 20 years from now as the Congress that gave serious and deliberate consideration to such an amendment, not more lip service, and moved positively to increase each individual's voting power. We can act to strengthen our citizens' input in Government.

ECONOMIC RECOVERY IN THE NORTHEAST REGION

Mr. KENNEDY. Mr. President, a number of organizations have recently been formed in the Northeast to promote economic recovery in the region. On Octo-

ber 6, 1976, the Department of Commerce announced an Economic Development Administration, EDA, grant of $540,000 to form the Council for Northeast Economic Action. The Council is comprised of leaders from the public and private sectors, and is now in the process of formulating a program of research and policy coordination in order to develop solutions to regional economic problems.

Dr. James M. Howell, senior vice president of the First National Bank of Boston, has been appointed to serve as Chairman of the Council. Dr. Howell has long been a leading advocate of the need to effectively coordinate governmental and private sector efforts to combat economic stagnation in the Northeast. In this regard, the March 21 edition of the Weekly Bond Buyer contained an article which outlined Dr. Howell's recommendations for dealing with this most serious problem. His proposals merit careful consideration, and I ask unanimous consent that this article be printed in the RECORD.

There being no objection, the article was ordered to be printed in the RECORD, as follows:

BROAD PRIVATE SECTOR ASSISTANCE TERMED KEY TO ECONOMIC RECOVERY IN NORTHEAST

BOSTON.—A four-point economic recovery program aimed at combating the unique governmental and economic conditions of the Northeast and emphasizing broad private sector technical assistance has been put forth by James M. Howell, senior vice president at First National Bank of Boston and chairman of the Council for Northeast Economic Action.

Speaking at a Boston Citizen seminar, "The Northeast Means Business," sponsored by Boston College, Mr. Howell said: "President Carter's employment stimulus program most likely will have a less significant impact on the regions that require the greatest assistance because those regions are characterized by governmental and economic maturity. Seemingly paradoxical, but it is not.

"Municipal governments in the Northeast are ill equipped to play a role in solving the region's complex economic problems. Governmental structures still largely reflect the growth patterns of the 19th Century; local boundaries have simply not been changed to be more functionally compatible with changing realities. Moreover, outdated management practices seriously undermine the ability of municipal governments to deal with modern issues, let alone implement a wide range of new Federal programs with skill and success," Mr. Howell said

He added that the other part of the region's structural problem is that of economic maturity. "Once economic maturity is reached, a wide range of new economic problems begins to manifest itself—lagging capital spending, structural adjustment problems in labor markets and a reluctance on the part of business management to expand in the region. Taken together, these factors produce regional economic stagnation—that is, the private sector stops making a net contribution to the region's growth.

He analyzed the impact of these dual maturities on President Carter's "special economic stimulus package with its heavy reliance on public service employment and investment tax incentives. To the national policymakers, these new programs will undoubtedly appear sound, but regional maturity hampers their effectiveness in the Northeast.

"To implement a relatively large public service employment program, there must be effective governments, not 'mature' ones immersed in bureaucratic inefficiencies." He said that the bank's empirical analysis indicates that "employment increases in mature government structures have already reached the stage of rapidly declining returns to the overall economy."

Mr. Howell also declared that "for Federal investment tax credits to stimulate private sector capital spending in the Northeast, the cost-price structure in our region must be reduced relative to other competing regions, especially the New South. But again, national policies fail to hit the regional target because a national investment tax credit overlooks regional cost differences."

Referring to another disparity, Mr. Howell said that compared to the New South, private sector contribution to total Northeast employment has slipped dramatically. He described research recently completed by the economics department of First National Bank of Boston which focused on the 30 largest urban areas in the Northeast and found that during the 1972–75 period whatever aggregate growth had occurred was stimulated by government employment.

PROPOSALS OUTLINED

Mr. Howell's suggested program includes the following four points:

A new forum to deal with resolution of the Northeast's problems in a national context should be established. Specifically, the long-awaited White House Conference on Balanced Regional Growth should be convened.

The regional economic consequences of proposed Federal programming and budgetary considerations should become a regular part of all Presidential recommendations. Similarly, Congressional Budget Office analyses of these proposals/programs should include regional economic impact statements.

Just as Federal programming initiatives should be predicated on regional variations, these initiatives should also take into account changing concepts of the proper allocation of functions among levels of government.

A broad private sector technical assistance program should be created to aid Northeastern municipalities in overcoming the problems of governmental and economic maturity. Steps have already been taken by the Council for Northeast Economic Action to develop a proper foundation for a major regional programming effort to transfer the technical skills of the private sector to the public sector.

"NORMALIZING" RELATIONS WITH CUBA AND NORTH VIETNAM

Mr. THURMOND. Mr. President, on Monday, March 28, 1977, radio station WBSC in Bennettsville, S.C., broadcasted an airitorial of particular merit.

There have been suggestions recently of "normalizing" relations with Cuba and North Vietnam. Mr. Ken Harmon of WBSC expresses an opinion shared by many Americans—Americans who remember the history of the Castro regime.

Ken Harmon is an outstanding community leader and patriotic, public-spirited, a fine citizen.

Mr. President, I believe my colleagues will find Mr. Harmon's comments worth their consideration. Accordingly, I ask unanimous consent that the airitorial be printed in the RECORD.

There being no objection, the airitorial was ordered to be printed in the RECORD, as follows:

WBSC RADIO AIRITORIAL

The United States Government is talking about normalizing trade and diplomatic relations with Cuba. We are against this now and until Cuba has made restitution to the Companies and individuals whose property was seized when the Cuban government expropriated it. Millions of dollars was lost by Americans when this took place and we feel that normalizing relations with the Cubans will have the effect of saying to them you don't have to do anything about the property you took from our citizens without giving them one thing in return. The total of this property is nearly two billion dollars. Think of that . . . two billion dollars and unless there is some way to force the Cubans to repay . . . our people will never see a dime. The Cubans need relations with us . . . we don't need them. If the need gets strong enough we will hear something from them about this debt. Let's hold off diplomatic relations with the Cubans until they show good faith toward us and make some restitution for the property they took.

VIRGINIA WORKERS: THE MODEL FOR OUR NATION

Mr. HARRY F. BYRD, JR. Mr. President, the Senate has now voted favorably upon H.R. 4800, legislation to extend the Emergency Unemployment Compensation Act.

The act provides workers with an additional 13 weeks of unemployment compensation beyond the normal 39 weeks of regular and extended benefits. Under the Senate bill, the program ends December 31, 1977—and shall not be extended.

The legislation is a temporary measure, and I emphasize "temporary," to assist workers who are unemployed, because of economic conditions in their State.

I voted in favor of this legislation. My vote was cast, however, in the expectation and belief that this program will cease to operate on December 31, 1977. Any further extension would convert a social insurance program into welfare.

Although Virginia is a participant in this program, Virginia's workers have used the extended benefits available to them only on a very limited basis.

I am very proud of Virginia's record which I would like to share with my colleagues in the Senate.

In terms of population, Virginia is the 12th largest State in the United States. However, according to information prepared by the Finance Committee staff for the committee in its consideration of the bill, only 1,282 Virginians have had to make use of the extended unemployment benefits under the Emergency Unemployment Act.

Only four other States—Alaska, New Hampshire, North Dakota, and Wyoming—have used this program less.

Of those Virginians who participated in the program, only 39 people fully exhausted their available benefits. In only two other States, New Hampshire and Wyoming, did less people fully use this program.

The statistics for Virginia's involvement in this program are a tribute to the competence and industry of the working men and women in Virginia.

Virginia, like other States, has been hit by the recession. But, Virginians have not given up. Through their perseverance and ingenuity, workers in Virginia have found employment opportunities and have remained as productive members of our State's labor force.

Through my travels in Virginia, I have

met Virginians who are employed in all types of jobs—in factories, in stores, in mines, on farms, and in offices. The information before the Finance Committee confirms what I have long known. Virginia's working men and women are the backbone of our State.

During a discouraging period of rising prices and unemployment, Virginia's working people have adhered to sound principles of industry and resourcefulness.

I am proud of those who work in our factories and offices and stores, and on our farms and in our mines. Their actions and attitudes are examples which the rest of our Nation should follow.

QUESTIONS SURROUNDING THE BAN ON SACCHARIN

Mr. ANDERSON. Mr. President, the proposed ban on saccharin is denying consumers their right to choose.

Diabetics use saccharin in place of sugar. Overweight persons use saccharin to help control weight and ward off possible heart attacks. Saccharin has helped many people who have had to limit their sugar intake; it has become a part of many peoples' lives over the past 80 years.

The U.S. Government is doing an injustice to the consumer by banning this product before conclusive tests have shown that saccharin is positively linked to cancer in humans. I will not support the sale of any product which is a proven cause of cancer. But I do not believe that sufficient evidence yet exists linking saccharin to cancer.

I have added my name to Senate Resolution 120, introduced by Mr. HUMPHREY to place a temporary halt on the saccharin ban. This resolution provides for further investigation into the saccharin issue without amending the Delaney clause, which I feel is a needed protection for consumers.

If further investigations show saccharin to be a safe food additive, I will support a move to exempt saccharin from Food and Drug Administration supervision.

Mr. President, due to the complexity of this issue, I ask unanimous consent that the following article from the March 14, 1977, issue of the Minneapolis Tribune be printed in the RECORD.

There being no objection, the article was ordered to be printed in the RECORD, as follows:

QUESTIONS SURROUND FDA PLAN TO BAN SACCHARIN

(By Lewis Cope)

Saccharin has become the latest target in scientists' efforts to cut your risk of having cancer. How the saccharin decision was reached shows some of the promise and problems.

The U.S. Food and Drug Administration (FDA) announced last week that it would ban the widespread use of saccharin on the basis of Canadian research in which 14 rats developed bladder cancer.

The rats had been fed very high doses of this artificial sweetner. To consume an equivalent amount of this chemical, a person would have to drink 800 12-ounce diet soft drinks a day for a lifetime, the FDA noted.

The FDA took red dye No. 2, which had been widely used in foods, off the market last year after tests in which some of the animals literally turned red because of the high doses of the chemical used.

Is it realistic to use such high doses in animal tests?

Even at lower doses, just because rats get cancer, should humans be worried?

Since saccharin has been in use for 80 years, why worry now?

And with obesity one of the nation's top medical concerns, is it being penny wise and pound foolish to take the only artificial sweetner off the market?

The real question, of course, is not what would happen to someone who even *tried* to drink 800 bottles of saccarin-sweetened pop in a day. It's what would be the cancer risk for a person who consumes, say, one-thousandth of the dosage of saccharin fed to the Canadian rats.

But if these lower doses of saccharin caused one out of every 10,000 humans who used it to get cancer, it would be a major concern. Assuming that half of the 200 million Americans have used saccharin at one time or another, that could be 10,000 cases of cancer.

The risk of cancer drops with decreased dosage, but not in any simple mathematical way. Experts explain that they don't know precisely what risks are posed by low doses of cancer-causing chemicals. There may even be a threshold dose below which no one would get cancer.

"As a generalization, many of us believe there is a threshold level for a carcinogen—but no one has been able to demonstrate it," said Dr. Arnold Brown, chairman of the Department of Pathology and Anatomy at the Mayo Clinic in Rochester, Minn., in a telephone interview.

Brown last year headed a National Cancer Institute study group that reviewed the many animal tests with another artificial sweetener, cyclamates, that had come on the scene in the 1950s but had been banned in 1969.

"The committee is concerned over the implications of the increased incidence of tumors in the urinary tract of cyclamate-fed animals from several studies," even though the increases were so small they might be caused by chance alone, the committee concluded. "It is not clear whether this represents a weak carcinogenic (cancer-causing) response" or not, the committee said. On the basis of this study, however, the FDA decided that it should keep cyclamates off the market.

Brown now serves as chairman of the National Cancer Institute's Clearing House on Environmental Carcinogens, which advises the federal institute on which chemicals should be tested—and how—for their possible cancer-causing potential.

The Canadian research involved 100 rats that were fed large doses of saccharin for their entire lifespan. Fourteen of these animals developed cancerous bladder tumors—compared with only two tumors in a control group of 100 rats that weren't given saccharin.

No one is suggesting that 14 percent of humans who have ingested saccharin in soft drinks or food products will develop bladder cancer. But even a fraction of 1 percent could mean a lot of cancer cases.

Two earlier studies failed to find a correlation between high use of saccharin and human bladder cancer. One involved diabetics who depended on this artificial sweetener, the other checked dietary habits of people with bladder cancer.

But, as Brown noted, it's "extremely difficult" to try to sort out the various factors that may be involved in such a common type of malignancy. Bladder cancer now strikes about 30,000 Americans each year.

Other studies have found high rates of bladder cancer in areas of the country where many people work in chemical industries. Various unknown factors that may cause bladder cancer make it difficult to pick out the role that saccharin may play.

MAN VS. RATS

"I'm not a rat—why should I worry?"

To questions like this, experts noted that there is good reason for concern.

The National Cancer Institute lists 35 "known human carcinogens"—chemicals or other agents shown to have a cause-and-effect relationship with cancer in man. This is based on clear evidence that people exposed to sufficient amounts of these things develop cancer.

One is cigarette smoke. Another is radioactive materials. A third is asbestos. Another is vinyl chloride, which has been shown to cause a rare type of liver tumor in workers who are exposed to it in the plastic industry. If this chemical had caused only the "garden variety" of liver cancer, its causative role probably would have escaped detection.

In all, about 1,000 chemicals—both common and rare ones—have been reported in one study or another to cause cancer in animals. Some of these findings are debated, and no one can say that all of these chemicals can cause cancer in people. But the safe course is to assume that many do, experts say.

WHY NOW?

After 80 years of wide use of saccharin, why the concern now?

First, research into what causes cancer has been spurred in recent years. Experts now estimate that between 70 and 90 percent of all cancer cases have an environmental cause—that is, they are caused by what we eat and drink and smoke and otherwise expose ourselves to.

Second, the concern over saccharin is not new. A number of researchers have reported over the past three years that animals given saccharin had increased cancer rates. But impurities in the saccharin and various other factors made these findings questionable. So new studies began. The Canadian study was the first to come up with conclusive findings.

WHAT NOW?

"Today, about 20 percent of adults in the United States are overweight to a degree that may interfere with optimal health and longevity," says a recent report of the National Institutes of Health. "After age 40, this figure jumps to a startling 35 percent."

Saccharin has helped many people keep their weight down, raising concerns about what may happen when the FDA order becomes final. This isn't scheduled until July, although the FDA already is encouraging manufacturers "to discontinue use of saccharin as soon as possible."

The FDA really had no choice. The Delaney Clause requires all food additives that are clearly shown to cause cancer when ingested by animals to be taken off the market.

The FDA is considering classifying saccharin as a drug, so doctors could prescribe it for diabetics who need to restrict their use of sugar and presumably some overweight people. But the convenience of buying a bottle of diet pop still would be gone.

Researchers are studying some other possible low-calorie sweeteners, but none appears close to approved use.

And the saccharin dilemma is just the beginning.

More and more chemicals are being treated with the realization that this could be an important way to cut the cancer toll.

The hope is that this knowledge can be used to reduce the 385,000 cancer deaths in the United States each year. The hope is that it won't cause an epidemic of cancer-phobia—or, on the other hand, raise so many concerns that the public becomes oblivious to them.

After all, the biggest environmental cause

of cancer already is known—and millions of Americans keep puffing away on cigarettes.

Americans—either through government actions or individual decisions—will be making more and more decisions in this area.

REPORT OF THE COMMITTEE ON VETERANS' AFFAIRS REGARDING OVERSIGHT ACTIVITIES IN THE 94TH CONGRESS

Mr. CRANSTON. Mr. President, section 136 of the Legislative Reorganization Act of 1946, as amended, requires each standing Senate committee to submit on or before March 31 of each odd-numbered year, a report on the oversight activities of that committee during the previous Congress. On behalf of the Committee on Veterans' Affairs, of which I have become chairman in this Congress. I report the following to the Senate:

During the 94th Congress, the Senate Committee on Veterans' Affairs, under the able chairmanship of the Senator from Indiana, Mr. Hartke, exercised jurisdiction over the following legislative matters and concerns:

Veterans' measures generally;

Pensions of all wars of the United States, general and special;

Life insurance issued by the Government on account of service in the Armed Forces;

Compensation of veterans;

Vocational rehabilitation and education of veterans;

Veterans' hospitals, medical care and treatment of veterans;

Soldiers' and sailors' civil relief;

Readjustment of servicemen to civil life, and

National cemeteries.

During the Congress the committee had 25 hearing sessions and, as a result of these hearings, printed 11,362 pages of hearing record. Eleven executive sessions were held and 17 bills were ordered reported. Of the 17 reported, all were passed by the Senate and 15 were ultimately enacted into public law. Those enacted into public law include:

1st session, 1975:

Veterans Disability Compensation and Survivor Benefits Act of 1975 (Public Law 94–71).

Veterans' Administration Physician and Dentist Pay Comparability Act of 1975 (Public Law 94–123).

Veterans and Survivors Pension Interim Adjustment Act of 1975 (Public Law 94–169).

2d session, 1976:

Naming of Veterans' Administration Hospital at Loma Linda, Calif., for Jerry L. Pettis (Public Law 94–246).

Per Diem Rates for Members of the American Battle Monuments Commission (Public Law 94–256).

Releasing of Names and/or Addresses of Present and Former Armed Forces Members by the Administrator of Veterans' Affairs (Public Law 94–321).

Veterans Housing Amendments Act of 1976 (Public Law 94–324).

Increased Payments to Cover the Cost for Care and Treatment of Veterans in State Homes (Public Law 94–417).

Naming of Veterans' Administration Hospital at Madison, Wisconsin, for William S. Middleton (Public Law 94–420).

Extending and Improving the Program of Exchange of Medical Information (Public Law 94–424).

Veterans and Survivors Pension Adjustment Act of 1976 (Public Law 94–432).

Veterans Disability Compensation and Survivor Benefits Act of 1976 (Public Law 94–433).

Medical Care for Certain Members of Allied Wartime Forces (Public Law 94–491).

Veterans' Education and Employment Assistance Act of 1976 (Public Law 94–502).

Veterans Omnibus Health Care Act of 1976 (Public Law 94–581).

The bills which passed the Senate but did not pass the House are: Veterans' Insurance Amendments Act of 1976 (S. 1911) and Veterans and Survivors Pension Reform Act (S. 2635).

In compliance with this provision of the Legislative Reorganization Act, I ask unanimous consent that the report on the activities of the Veterans' Affairs Committee be printed in the RECORD.

There being no objection, the report was ordered to be printed in the RECORD, as follows:

CEMETERIES AND BURIAL BENEFITS ACTIVITIES OF THE VETERANS' AFFAIRS COMMITTEE

Pursuant to Executive Committee action on December 9, 1975, a new Subcommittee on Cemeteries and Burial Benefits was created. Senator John Durkin (D., N.H.) was named as the initial Chairman of this Subcommittee.

The mission of the Veterans' Administration National Cemetery System over which this Subcommittee had oversight jurisdiction is to provide, for the interment of any eligible deceased service-person, discharged veterans or dependents in any open National Cemetery, and procurement of headstones and markers for graves of eligible active duty personnel and discharged veterans.

Currently, the VA maintains and operates 138 existing cemeterial activities. In late fiscal year 1977, a new cemetery is scheduled to open in New York, and during fiscal year 1978, cemeteries in California and Massachusetts are slated for opening.

The Committee, prior to the formation of this new Subcommittee, conducted hearings in regard to the establishment of new national cemeteries. These open hearings, held at the Courthouse in Casper, Wyoming, considered S. 1361, a bill, introduced by request by Senator Clifford Hansen (R., Wyo.), the ranking Minority member of the Committee, to authorize a program of assistance to states for the establishment, expansion, improvement, and maintenance of veterans' cemeteries.

Testimony was presented by the Director of the National Cemetery System for the Veterans' Administration, the Veterans' Affairs Commission of the State of Wyoming, representatives of major veterans organizations, and a representative from the Funeral Directors' Association of Wyoming.

In addition to considering S. 1361, the full Committee and the Subcommittee on Cemeteries and Burial Benefits considered a total of 19 bills in regard to the VA cemetery system introduced into the Senate during the 94th Congress. In addition, an Administrative proposal to eliminate the veterans' burial benefit when and to the extent the benefits duplicated other federally funded benefits was considered and rejected during both sessions of the 94th Congress.

COMPENSATION FOR SERVICE-CONNECTED DISABILITIES

The Subcommittee on Compensation and Pension, chaired by Senator Herman Talmadge (D., Ga.), held two days of hearings in regard to compensation, disability and indemnity compensation (DIC) and other compensation-related matters during the 94th Congress. These hearings reviewed the Veterans' Administration service-connected disability compensation and dependency and indemnity and death compensation programs.

The compensation program provides financial aid to veterans who, because of service-connected disability, have suffered impairment of earning capacity. The amount paid in individual instances is contingent upon the nature of the disability or combination of disabilities and the extent to which earning capacity is impaired.

Death compensation, or dependency and indemnity compensation (DIC), is payable to the surviving spouse and dependents of a veteran whose death occurs during active duty or as a result of service-connected causes. This benefit is intended to compensate for the loss of family income, and individual benefits are contingent upon the military pay grade of the person upon whose death entitlement is predicated.

Bills considered during these hearings included S. 1597, Veterans Disability Compensation and Survivor Benefits Act of 1975 (ultimately enacted as Public Law 94–71 on August 5, 1975), S. 3596, Veterans Disability Compensation and Survivor Benefits Act of 1976 (ultimately enacted as Public Law 94–433 on September 30, 1976), and other bills related to the veterans compensation and DIC programs.

Those testifying in the open hearing held on May 8, 1975 concerning the Veterans Disability Compensation and Survivor Benefits Act of 1975 and related bills included the Chief Benefits Director of the Veterans' Administration and representatives from the Disabled American Veterans, The American Legion, Veterans of Foreign Wars, and the Paralyzed Veterans of America, Inc. Those submitting written testimony included representatives from the Non-Commissioned Officers Association of the U.S.A., Disabled Officer's Association, the Retired Officers Association, Gold Star Wives, and Blinded Veterans Association.

By agreement with the Subcommittee on Compensation and Pension, S. 1597 was reported without recommendation to the full Committee for consideration. On June 19, 1975, the full Committee met in open executive session and unanimously ordered reported S. 1597, as amended. The measure was reported to the Senate on June 19, 1975 accompanied by Report 94–214. On June 23, the Senate considered and passed S. 1597 and then vacated the action by amending H.R. 7767 with the provisions of S. 1597 as passed by the Senate. H.R. 7767 as amended was passed and forwarded to the House of Representatives. On July 22, 1975, the House agreed to the Senate amendment with an amendment; on July 24 the Senate agreed to H.R. 7767, as amended; and on August 5, 1975 the measure was signed into law.

As enacted, Public Law 94–71:

(1) Provides a 10-percent cost-of-living increase in the rates of disability compensation for those veterans rated 50 percent disabled or less and a 12-percent increase for more severely disabled veterans rated 60 percent to totally and permanently disabled.

(2) Provides a 10-percent cost-of-living increase in the rates of additional compensation for dependents of veterans whose disability is rated 50 per centum or more.

(3) Provides an increase from $150 to $175 in the annual clothing allowance of a veteran who, because of his compensable disability, wears or uses a prosthetic or orthopedic appliance, including a wheelchair which tends to wear out or tear his clothing.

(4) Provides that the effective date of an award of increased compensation shall be the earliest ascertained date that an increase in disability occurred if the application is received within a year of such date.

(5) Provides a 12-percent cost-of-living increase in the rates payable for dependency and indemnity compensation (DIC) for widows and children, and a 12-percent increase in additional allowances for those in receipt of DIC and death compensation who are in receipt of aid and attendance.

(6) Provides that a study be conducted by the Veterans' Administration, and submitted by October 1, 1976, of application for dependency and indemnity compensation

(DIC) by widows of veterans who had disabilities rated total and permanent at the time of death, and provides that such study shall include an analysis of whether there has been a significant increase in the use of discretionary authority by the VA in claim awards.

The study mandated by Public Law 94-71 to be conducted and submitted by the VA on or before October 1976 was subsequently transmitted by the Administrator to the Committee on September 28, 1976.

A summary of the study findings is as follows:

"There were 1,842 cases meeting the requirements of P.L. 94-71, where the veteran at the time of death was receiving disability compensation from the Veterans' Administration based on a rating of 100%.

"The Veterans' Administration awarded service-connected death benefits in 1,597 cases, 86.70% of the claims filed for dependency and indemnity compensation.

"Eight cases, .43% of the claims filed, were remanded to the regional offices of jurisdiction for further development (to obtain private hospital report, medical statement from private doctor, etc.) and reconsideration of the claims.

"In the study mandated under P.L. 93-295, a total of 1,697 claims was reviewed. The Veterans' Administration allowed service-connected death benefits in 1,274 cases, 75.07% of the claims filed. Claims for service-connected death benefits were disallowed in 423 cases, 24.93% of the claims filed. Although nearly 150 more cases were involved in the current study, there were 186 fewer denials of service connection for cause of death."

On July 23, 1978, a hearing concerning S. 3596, the Veterans Disability Compensation and Survivor Benefits Act of 1976, and related bills was held during which testimony was presented by interested parties concerning the veterans compensation and disability and indemnity compensation (DIC) programs and related matters. Those testifying included the Deputy Chief Benefits Director of the Veterans' Administration and representatives from the Disabled American Veterans, the American Legion, Veterans of Foreign Wars, and AMVETS. Those submitting written testimony included representatives from the Paralyzed Veterans of America, Inc., and the Blinded Veterans Association.

By agreement with the Subcommittee on Compensation and Pension, S. 3596 was reported without recommendation to the full Committee for consideration. On September 1, 1976, the Committee met in open executive session and unanimously ordered reported H.R. 14299, as amended, to include the provisions of S. 3596. Subsequently, on September 9, 1976, the measure was reported to the full Senate accompanied by Senate Report 94-1226. On September 20, H.R. 14299, as amended, was considered and passed by the Senate. On September 21, the House agreed to the Senate amendment and forwarded the bill to the President. On September 30, 1976, the bill was enacted as P.L. 94-433.

As enacted, P.L. 94-433:

(1) Provides disabled veterans with an 8-percent increase in compensation rates and an 8-percent increase in the statutory awards for more serious disabilities.

(2) Provides veterans rated 50 percent or more disabled with an 8-percent increase in the additional allowances authorized for spouses, children, and dependent parents.

(3) Provides an 8-percent increase in dependency and indemnity compensation (DIC) benefits for surviving spouses of veterans when the death of the veteran was service-connected (including the additional allowance payable for dependent children and those in need of aid and attendance).

(4) Provides children of veterans whose death was service-connected (when there is no surviving spouse) with an 8-percent increase in benefits.

(5) Provides children who have become permanently incapable of self-support due to disability incurred prior to the age of 18 with an 8-percent increase in DIC benefits.

(6) Directs the Administrator to carry out a thorough study of the dependency and indemnity compensation program to measure and evaluate the adequacy of benefits and to determine whether such benefits should be based on the former military pay grade of the deceased veteran.

(7) Increases from $175 to $190 the annual clothing allowance paid certain seriously disabled veterans whose disability tends to wear out or tear their clothing.

(8) Increases from $30,000 to $40,000 the VA mortgage protection life insurance available for certain severely disabled veterans eligible for and living in specially adapted housing.

(9) Extends eligibility for the VA automobile and adaptive equipment program to certain disabled veterans who served prior to World War II.

(10) Authorizes VA payment for the cost of transportation to a national cemetery for burial of the remains of deceased disabled veterans.

(11) Authorizes additional allowances for those spouses of veterans rated 50 percent or more disabled when the spouse requires the aid and attendance of another person.

(12) Includes "annulment" as a form of dissolution of marriage in applying of the "end of the year" rule to establish the effective date of reduction or discontinuance of compensation, DIC, or pension as a result of such action.

(13) Directs the Administrator to conduct a scientific study to determine if there is a causal relationship between the amputation of an extremity and the subsequent development of cardiovascular disorders.

(14) Makes numerous technical amendments to chapter 11, Disability Compensation, and chapter 13, Dependency and Indemnity Compensation including the elimination of unwarranted or inappropriate gender references.

EDUCATION AND TRAINING

The Subcommittee on Readjustment, Education, and Employment conducted three days of hearings in regard to matters relating to the veteran educational programs conducted under Chapters 31, 34, 35, and 36 of title 38, U.S.C., and veterans unemployment programs conducted under Chapters 41, 42, and 43 of the same title.

Readjustment benefits under the G.I. Bill consist of educational assistance for eligible veterans, dependents, and survivors. Under Chapter 31 of title 38, United States Code, service-disabled veterans are provided with vocational rehabilitation opportunities for the purpose of restoring employability lost by reason of the service-connected disability. Under Chapter 34 of title 38, eligible veterans and servicepersons are provided educational assistance to assist in the readjustment to civilian life following military service. Dependents and survivors of veterans whose death or permanent and total disability are service-connected are eligible for educational assistance under Chapter 35 of title 38.

During the 94th Congress, several reports concerning the G.I. Bill program were submitted to the VA pursuant to statutory mandates or oversight requests.

On September 29, 1976, pursuant to Section 212(c) of Public Law 93-508, the Veterans' Administration reported to the Congress a report (subsequently printed as Committee Print No. 58) on erroneous, misleading, or deceptive advertising practices. The report included the nature and disposition of all cases in which an institution approved for veterans benefits utilized advertising, sales or enrollment practices which were erroneous, deceptive, or misleading either by actual statement, omission, or intimidation.

On December 13, 1976, pursuant to section 1798 of title 38, U.S.C., the Administrator submitted to the Committee a report (subsequently printed as Committee Print No. 64) specifying the default experience under the Education Loan program provided to eligible veterans and persons under § 1798 of title 38. In addition, the report included a comparison of collective default experience at individual educational institutions. The VA reported to the Committee that of the 13,290 loans disbursed during the fiscal year there were 102 loan defaults; a default rate of .08 percent.

Additional reports submitted to the Congress include Training by Correspondence under the G.I. Bill (An In-Depth Analysis) (Committee Print No. 49), Data on Vietnam Era Veterans (Committee Print No. 59), Continuation of G.I. Bill Training After the Use of "Free" Entitlement (June 1966 through December 1975) (Committee Print No. 60), and Completion Rates for Education and Training Under the Vietnam-Era G.I. Bill.

The Subcommittee on Readjustment, Education and Employment held hearings in regard to the education program on October 1 and 2, 1975. Those presenting testimony at these hearings included the Chief Benefits Director of the Veterans' Administration, and representatives of the Veterans of Foreign Wars, The American Legion, Disabled American Veterans, National Association of Concerned Veterans, Assistant Secretary of the Army for Manpower and Reserve Affairs, the President of Compton Community College—representing the American Association of Community and Junior Colleges, the Vice Chancellor of the University System of Georgia, and representatives of the Paralyzed Veterans of America, Swords to Plowshares, Non Commissioned Officers Association of the United States of America, and the Bureau of Equal Opportunity for the State of Pennsylvania. Reports concerning the G.I. Bill were received by the Committee from the General Accounting Office, National League of Cities, Human Resources Research Organization, Institute for Social Research, University of Michigan, Defense Manpower Commission, Congressional Research Service, and Professors Charles C. Moskos and Morris Janowitz. Communication concerning Amendment 2005 to S. 969 included communications from Universal Training Service, Miami, Florida; Iona College, New Rochelle, New York; San Diego Community College, San Diego, California; American Veterans of World War II, Korea, and Vietnam (AMVETS), Florida State University, American Council on Education, Georgia Veterans Association, National College of Business, and Association of Independent Colleges and Schools.

The full Committee met in open executive session on September 1, 1976 to consider S. 969 and Amendment 2005, the Veterans Education and Employment Assistance Act of 1976, and ordered reported S. 969 as amended with the provisions of Amendment 2005 as amended. On September 16, 1976, S. 969, as amended, was reported to the full Senate accompanied by report 94-1243. Subsequently, on October 1, 1976, S. 969 was considered, amended, and passed by the Senate by a unanimous voice vote. Later that same evening, the House agreed to S. 969 as amended with amendments. The Senate agreed to the House amendments and forwarded the measure to the President and the President signed the bill into law on October 15, 1976.

As enacted, Public Law 94-502 (with the exception of title VI relating to employment and covered in a separate section of this report):

Title I—Chapter 31, Disabled Veterans' Vocational Rehabilitation Rate and Program Adjustments—

(1) Increases by 8 percent the subsistence allowance paid disabled veterans pursuing a course of vocational rehabilitation under chapter 31 of title 38, United States Code.

(2) Eliminates the current termination date for use of chapter 31 benefits by seriously disabled veterans when it is determined that any such veteran is in need of vocational rehabilitation.

(3) Permits chapter 31 trainees to be trained in Federal agency facilities on the same basis as trainees under the Rehabilitation Act of 1973, thus affording disabled veterans increased opportunities for Federal employment.

Title II—Veterans' Educational Rate Program Adjustments—

(1) Increases by 8 percent the educational assistance allowance paid eligible veterans pursuing a program of education (including farm cooperative, elementary and secondary education and preparatory educational assistance) under chapter 34 of title 38, United States Code.

(2) Increases by 8 percent the individualized tutorial assistance allowance authorized for eligible veterans with deficiencies in subjects required as part of an approved program of education.

(3) Removes the current restriction to undergraduate use of the 9 months of additional benefit entitlement granted in 1974, thus allowing a maximum of 45 months of eligibility for an approved program of education (including graduate work).

(4) Codifies existing regulations which define the terms "institution of higher learning" and "standard college degree".

(5) Directs the Administrator to conduct a study to determine the effectiveness of vocational objective courses approved for enrollment of veterans with particular emphasis as to whether there is full compliance with the provisions of section 1673(a)(2).

(6) Codifies existing regulations which limit enrollment of veterans in any independent study program other than those leading to a standard college degree and provides that benefits for a course of study exclusively by independent study shall be computed on less than half time basis.

(7) Extends to most programs of education the requirement that no more than 85 percent of the students enrolled in certain approved courses be in receipt of VA benefits or other Federal grants.

(8) Clarifies the definition of "unsatisfactory progress" to include those situations where a veteran is not progressing at a rate which will allow the veteran to graduate within the normal period of time for completion of studies (unless the Administrator finds that there are mitigating circumstances).

(9) Amends the veteran-student services program to permit completion of a work-study agreement even if the veteran ceases to be a full-time student.

Title III—Chapter 35, Survivors' and Dependents' Educational Assistance Rate and Program Adjustments—

(1) Increases by 8 percent the educational assistance allowance paid survivors of veterans who died of service-connected causes, and dependents of seriously disabled veterans.

(2) Extends maximum entitlement to benefits from 36 to 45 months for all persons training under chapter 35.

(3) Liberalizes the period of eligibility for use by eligible children of educational assistance benefits under chapter 35.

(4) Codifies existing regulations which define the terms "institution of higher learning" and "standard college degree".

(5) Codifies existing regulations which limit enrollment of eligible persons in any "independent study program" other than those leading to a standard college degree and provides that benefits for a course of study which is exclusively by independent study shall be computed on a less than half time basis.

(6) Further defines "unsatisfactory progress" to include those situations where an eligible person is not progressing at a rate which will allow the eligible person to graduate within the normal time for completion of the program as certified to the Veterans' Administration (unless the Administrator finds that there are mitigating circumstances).

Title IV—Post-Vietnam Era Veterans' Educational Assistance Act—

(1) Establishes December 31, 1976, as the termination date for establishing eligibility for veterans' education and training benefits under chapter 34 of title 38, United States Code.

(2) Establishes for those men and women entering the Armed Forces on or after January 1, 1977, a new chapter 32 educational matching assistance program known as Post-Vietnam Era Veterans' Educational Assistance.

(3) Sets a 5-year authorization for chapter 32 which may be extended with DOD funding if the President recommends continuation and if Congress does not disapprove.

Title V—Chapter 36, Education Loan and Program Administration Amendments—

(1) Increases by 8 percent the monthly training assistance allowance paid to eligible veterans or persons pursuing a full program of apprenticeship or other on-job training and provides similar increases for those pursuing a program of education by correspondence.

(2) Increases from $600 to $1,500 the maximum annual VA direct education loan available for eligible veterans, survivors, and dependents.

(3) Amends the VA direct education loan program to provide that interest charges on such loans shall be comparable to, but shall not exceed those charged students under other federally insured educational loan programs.

(4) Provides that the school catalogs submitted by institutions to State approving agencies contain the schools' progress requirements for graduation.

(5) Codifies existing regulations prohibiting payments for the auditing of courses and further directs that absent mitigating circumstances no payment will be authorized for any course for which the grade assigned is not used in computing the requirements for graduation.

(6) Permits continued VA payments for intervals between school terms and provides that when a veteran or eligible person transfers from one institution to another payments are permitted providing that in either event such periods do not exceed 30 days.

(7) Increases by 8 percent the allowance paid for administrative expenses incurred by State approving agencies in supervising approved educational institutions and further authorizes subcontracting by such State agencies.

(8) Codifies existing regulations which provide that the date of interruption or termination in a program of education shall be the last date the veteran or eligible person pursued such course.

(9) Increases by $2 the reporting fee paid to institutions for each veteran or other eligible person enrolled therein.

(10) Reduces the required number of clock hours necessary to qualify as a full-time course for certain vocational objective courses.

(11) Extends the requirement of 2 years of operation to certain branches or extensions of institutions prior to VA approval for enrollment of veterans.

(12) Provides the Administrator shall not approve the enrollment of any eligible veteran or person in any correspondence course

leading to a vocational objective which is normally completed in less than 6 month.

(13) Strengthens section 1796 which directs the Administrator not to approve the enrollment of veterans in any course offered by an institution utilizing erroneous, deceptive, or misleading sales or enrollment practices by requiring institutions to maintain complete records and copies of all advertising and sales materials utilized during the preceding 12-month period.

(14) Clarifies and strengthens provisions permitting VA inspection of student records to assure institutional compliance with the requirements of title 38.

(15) Strengthens and improves the education advisory committee to the Veterans' Administration.

(16) Requires annual VA compliance surveys of those institutions which enroll eligible veterans and requires that approximately 200 new compliance specialists be added to the VA staff.

Title VII—Miscellaneous and Effective Date—

(1) Provides that benefit rate increases and most other provisions shall become effective on October 1, 1976.

(2) Clarifies and strengthens provisions prohibiting the assignment of VA benefits.

(3) Establishes an ending date to the Vietnam era for purposes of qualifying for a civil service preference as a wartime veteran.

In addition to the foregoing, there are a number of technical amendments to chapters 31, 34, 35, 36, 41 42. and 43 of title 38 United States Code, including the removal of unnecessary or unwarranted gender references.

The assistance rates follow:

MONTHLY EDUCATIONAL ASSISTANCE ALLOWANCES

EMPLOYMENT

The Department of Labor has primary responsibility for the implementation of statutory provisions in regard to veteran unemployment. Section 2002 of chapter 41 of title 38, U.S.C., as amended, establishes Congressional purpose in regard to veterans employment programs operated through the Department of Labor's employment service as follows:

"The Congress declares as its intent and purpose that there shall be an effective (1) job and job training counseling service program, (2) employment placement service program, and (3) job training placement service program for eligible veterans and eligible persons. . . ."

Chapter 42 provides for the employment and training of disabled and Vietnam-Era veterans. Specifically, section 2012 requires certain Federal contractors—and subcontractors thereof—to take affirmative action to employ and advance in employment qualified disabled veterans and veterans of the Vietnam Era. Chapter 43 of the title provides reemployment protection to certain veterans.

On October 22, 1975, the Subcommittee on Readjustment, Education, and Employment held open hearings to review the operation of the readjustment assistance program as it related to veteran employment problems and to consider S. 760, a bill introduced by Senator Thurmond (R., S.C.), the senior minority member of the Committee. S. 760 would have provided for a separate agency within the Department of Labor to be known as the Veterans' Employment Service and to authorize the appointment of an Assistant Secretary of Labor for Veterans' Employment to head that Service.

Testimony concerning veterans' unemployment problems and the Department of Labor's implementation of programs mandated by Congress to assist in easing such problems was received by the Subcommittee from the Assistant Secretary of Labor for Manpower, the Assistant Secretary of Labor for Employment Standards Administration, representatives from the American Legion, Veterans of Foreign Wars, Disabled American Veterans, United Veterans Committee, and the National Association of Concerned Veterans.

Subsequently, the Committee included in title VI of S. 969, as reported and amended, provisions designed to improve the veterans' employment programs and a provision creating the post within the Department of Labor of Assistant Secretary of Labor for Veterans' Employment.

As enacted, Title VI of S. 969:

(1) Establishes within the Department of Labor the position of Deputy Assistant Secretary of Labor for Veterans' Employment, the appointment of whom is subject to Senate confirmation.

(2) Expands and strengthens the administrative controls designed to assure that eligible veterans receive satisfactory employment assistance.

HEALTH CARE

Under the aegis of the Subcommittee on Health and Hospitals chaired by Senator Alan Cranston, the 94th Congress enacted six veterans health care bills, including two major measures designed to improve the overall operating efficiency of the VA's Department of Medicine and Surgery. In addition to its legislative work during 1975 and 1976, the Subcommittee conducted a wide-ranging program of Congressional oversight activities, including formal legislative hearings on the scope and quality of health care programs provided by the VA; regular staff meetings with the VA's top-ranking health care officials; and liaison activities with other Congressional committees and Federal agencies.

The Department of Medicine and Surgery is responsible for the maintenance, staffing, and operation of the nation's largest unified system of health care facilities—172 general and neuropsychiatric hospitals, 228 outpatient clinics, 89 nursing homes, and 16 domiciliary facilities. In fiscal year 1976, 1.2 million patients were hospitalized in VA facilities; there were 14.2 million visits to VA outpatient clinics; 29,400 veterans received extended care in VA nursing homes and domiciliary facilities; and 78,800 veterans received treatment fully or partially paid for by the VA in contract hospitals, community nursing homes, and State-supported health care facilities. The VA health care program employed 172,000 people, making it the second largest department or agency in the entire Federal government; only the Department of Defense employed more. The Department of Medicine and Surgery's total budget in fiscal year 1976 was $4.1 billion.

Legislative activities

(1) Recruitment and Retention of VA Physicians and Dentists. In the spring of 1974, Chief Medical Director John D. Chase, in "Quality of Care" survey prepared at the President's request, cited difficulties in the recruitment and retention of well-qualified health care personnel as "[t]he most critical problem confronting the Department of Medicine and Surgery". Physician recruitment and retention posed a particular problem, primarily because statutory rates of pay for Federal employees were limited by a $36,000 a year salary ceiling—substantially less than most physicians could earn in private practice or (because of "bonus" legislation enacted in 1974) as Federally-employed physician officers in the Department of Defense or the United States Public Health Service.

The inevitable result was an exodus of experienced and highly qualified physicians from the VA system, an exodus that reached crisis proportions during the 12-month period ending in June, 1975, when more than 300 full-time physicians resigned because they considered their salaries inadequate. Just as serious were the increase in full-time VA physicians choosing to convert to part-time staff positions, and the VA's growing reliance on physicians who received their professional training in foreign medical schools.

To enable the VA to compete effectively with other Federal health care agencies for the services of qualified physicians, Senator Cranston introduced S. 1711 on May 12, 1975. The bill authorized the payment of up to $13,500 annually in "special pay" to full-time and part-time physicians agreeing to perform a specified number of years of service in a VA health care facility. The Subcommittee held hearings on S. 1711 and related legislation on May 22 and 23, 1975, and reported the bill to the full Committee on Veterans' Affairs on July 9. In executive session on July 16, the full Committee ordered the bill reported, and the report (No. 94–325) was filed on July 23.

On July 21, the House of Representatives, by a 382-to-3 vote, passed H.R. 8240, a bill similar in concept to but different in important particulars from S. 1711. On August 1, the Senate substituted the text of S. 1711 for the text of the House bill, and by a 76-to-6 vote passed the amended version of H.R. 8240. The House then passed H.R. 8420 on October 8 with an amendment incorporating an agreed-upon compromise text. The Senate followed suit on October 9, and the President signed the legislation into law on October 23 as the Veterans' Administration Physician and Dentist Pay Comparability Act of 1975 (Public Law 94–123).

As enacted, the measure:

(a) Mandates the payment of special pay to eligible physicians and dentists in the Department of Medicine and Surgery as follows:

One. Full-time physicians, with the exception of those in certain narrowly drawn categories of positions equally applicable to both physicians and dentists found by the Chief Medical Director not to be experiencing a significant recruitment and retention problem, receive $5,000 in "primary special pay," plus up to $8,500 in variable "incentive special pay."

Two. Full-time dentists—with the exception of those in certain narrowly drawn categories equally applicable to both physicians and dentists—receive $2,500 in "primary special pay" plus up to $4,250 in "incentive special pay."

Three. Part-time physicians and dentists employed on a half-time basis or more in the Department, with the same narrowly drawn categorical exceptions, receive "primary special pay" plus "incentive special pay" proratably reduced by the proportion of time employed in VA facilities.

(b) Removes the salary authorization for the Chief Medical Director and Deputy Chief Medical Director from title 5 of the United States Code; establishes statutory salaries for these officials in section 4107 of title 38 of the United States Code; imposes salary ceilings on their salaries, as well as that of the Associate Deputy Chief Medical Director, to correspond to specific executive schedule levels in title 5; and directs the provision of $13,500 in special pay to these three officials.

(c) Revises the "Physician and Dentist Schedule" in section 4107 of title 38 to codify the 5-percent comparability pay increase in Public Law 94–82 and Executive Order No. 11883, effective October 12, 1975, as to DM&S personnel.

(d) Requires the Administrator of Veterans' Affairs to report annually to the relevant committees of Congress on the operation of the special pay program.

(e) Requires the Director of the Office of Management and Budget and the Comptroller General, after consultation with the Administrator of Veterans' Affairs and the heads of relevant Federal agencies, to submit to the appropriate committees of Congress, not later than August 31, 1976, separate and independent reports proposing a permanent and coordinated legislative solution to the problem of attracting and retaining the services of qualified physicians and dentists for careers in the VA, the uniformed services, and other Federal agencies providing health care; requires the Comptroller General to prepare a report on the Federal Government's recruitment and retention and pay comparability problems with respect to health care personnel other than physicians and dentists, due March 1, 1977; and requires the Chief Medical Director to comment upon the OMB and GAO reports within 120 days of the receipt of those reports by the Congress. The Committee has received these reports.

(f) Provides for the inclusion in the title 38 Department of Medicine and Surgery personnel system of physicians' assistants and expanded-duty dental auxiliaries, along with physicians, dentists, and registered nurses, and directs that they be paid under the Nurse Schedule in section 4107 of title 38.

(g) Removes the prohibition on compensatory time off for VA registered nurses, but only when a nurse who, because of certain overtime work, is entitled to special compensation voluntarily and specifically requests in writing that that compensation take the form of extra time off rather than overtime pay.

The estimated first-full-year cost of the Act was $40,118,000. That figure included approximately $38 million for physician special pay, $1.8 million for dentist special pay, and $300,000 for pay raises associated with the transfer of pay authority for physician assistants from title 5 to title 38, United States Code.

(2) *Omnibus Health Care.* The Second Session of the 94th Congress saw the introduction and consideration of one of the most comprehensive veterans health care bill ever referred to the Committee on Veterans' Affairs. Introduced by Sentaor Cranston on February 2, 1976, S. 2908 was the culmination of two years of planning and development. The omnibus bill was designed, in its sponsor's words, "to shape a new direction for the Department of Medicine and Surgery after almost a decade of tremendous growth—a direction that will emphasize better and more comprehensive treatment primarily for service-connected veterans and primarily within the limits of existing resources, existing programs, and existing facilities."

The bill was born out of a concern that the unparalleled growth in VA health care expenditures between 1969 and 1976 (from $1.5 billion to $4.7 billion, a tripling in only seven years) had exacted a significant cost in operating efficiency, particularly in two respects. First, the expanded capacity of the VA health care system and the concomitant liberalization of eligibility requirements for inpatient care and outpatient services had primarily benefited veterans whose disabilities were non-service-connected. Care for the service-connected clearly suffered as the proportion of resources devoted to the treatment of veterans with non-service-connected conditions increased. Second, rapid and in some instances unplanned growth in health care resources generated legal and administrative problems that threatened the overall efficiency of the VA health care program.

The Subcommittee held two days of hearings on S. 2908 and related measures on February 18 and 19, 1976. The bill was reported by the Subcommittee on May 25, and by the full Committee on Veterans' Affairs on June 16. The Committee report (No. 94–1206, with Supplement) was filed on September 3.

On September 13, the full Committee again convened in executive session and ordered reported H.R. 2735 with an amendment substituting the text of S. 2908 as reported for the text of the House-passed bill. This procedural step was taken to expedite House consideration of the omnibus measure in the final month of the 94th Congress. H.R. 2735 as so amended passed the Senate by voice vote on September 16.

The House, on September 29, passed H.R. 2735 with an amendment incorporating the text of an agreed-upon compromise version of the legislation. The Senate passed the same amended bill on October 1, and on October 21 the President signed the measure into law as the Veterans Omnibus Health Care Act of 1976 (Public Law 94–581).

As enacted, this far-reaching legislation:

(1) Requires periodic reexaminations of VA beneficiary travel reimbursement rates, and reduces expenditures for such travel by (A) requiring persons receiving care for non-service-connected conditions to certify their inability to defray the expenses of travel, and (B) generally limiting reimbursement to the cost of travel by public transportation.

(2) Authorizes mental health services, consultation, professional counseling, and training for the family members of a veteran receiving outpatient care for a service-connected disability when essential to the effective treatment and rehabilitation of the veteran; and (at the discretion of the Administrator) the same services in connection with outpatient care of a veteran's non-service-connected disability when essential to permit the veteran's discharge from the hospital.

(3) Provides total VA health care eligibility to any veteran with a service-connected disability rated at 50 percent or more—lowered from 80 percent under present law.

(4) Establishes a system of priorities for outpatient care stressing priority for veterans requiring treatment for service-connected disabilities, those with 50-percent-or-more-rated service-connected disabilities, those with less-than-50-percent-rated service-connected disabilities and those with major non-service-connected disabilities.

(5) Authorizes, as part of national HEW immunization programs, the VA (at no cost to the VA) to provide immunization against infectious diseases to veterans otherwise receiving treatment at VA health care facilities, and to process malpractice or negligence claims arising from such immunizations in accordance with VA procedures.

(6) Provides statutory authorization for the VA compensated work-therapy program by allowing for contractual arrangements with private industry and nonprofit corporations to supply work projects for patient-workers, with remuneration at rates of pay not less than those specified in the Fair Labor Standards Act.

(7) Makes a series of changes in the VA's authority to provide outpatient care to veterans seeking treatment for non-service-connected disabilities, including provisions to limit such outpatient care to care provided in VA facilities; to limit the duration of care provided to complete treatment incident to hospital care; to limit the provision of care to "obviate" the need for hospital admission to only those circumstances when VA facilities are available for such care; and to permit followup outpatient dental services when necessary to complete treatment begun during hospitalization.

(8) Permits the transfer of veterans who have received maximum hospital benefits to intermediate care facilities, at VA expense and at lower rates of reimbursement than the rates authorized for nursing home care; and liberalizes the cost formula for determining the maximum amount which the VA may pay for community nursing home care.

(9) Clarifies the authority to provide home health services (including certain home improvements and structural alterations—with certain limitations thereon) when required for the effective and economical treatment of the disability of a veteran.

(10) Extends CHAMPVA coverage to the widow or surviving children of a veteran who, at death, suffered from a total and permanent service-connected disability.

(11) Authorizes the acquisition and subsequent disposal of automobiles needed for special driver training courses in the automobile and adaptive equipment program.

(12) Extends until September 30, 1977, the Veterans' Administration Physician and Dentist Pay Comparability Act of 1975 which authorizes the VA to enter into special pay agreements with physicians and dentists in DM&S.

(13) Establishes podiatric and optometric services in the VA, headed by directors of podiatry and optometry; establishes a "Clinical Optometrist and Podiatrist Schedule" in title 38; and makes other changes to move optometrists and podiatrists from the civil service to the title 38 pay and personnel system.

(14) Provides, in a new subchapter, entitled "Protection of Patient Rights", standards for obtaining the informed consent of all patients and research subjects, and guarantees (generally incorporating existing provisions of law set forth elsewhere) the confidentiality of certain patient medical records and the nondiscrimination against alcohol or drug abusers in admission to VA health care facilities.

(15) Requires the VA, in accordance with present DM&S plans, to establish and operate a minimum of 10,000 nursing home care beds by fiscal year 1980.

(16) Permits direct reimbursement by the Social Security Administration to the VA for

care provided to a medicare-eligible person (not an eligible veteran) in a VA facility pursuant to a sharing agreement; and requires a report to Congress regarding the implementation of this new authority.

(17) Authorizes the Administrator to prescribe standards for care provided in State home facilities receiving VA assistance and to suspend reimbursement to any facility which fails to meet those standards.

(18) Requires the Chief Medical Director to prepare a study to determine how to accommodate the growing number of elderly veterans in the VA health care system; and requires notification to individuals of any new or expanded eligibility for health care benefits to which such individuals are entitled as a result of enactment of H.R. 2735.

(19) Makes medical, technical, conforming, and clarifying amendments throughout title 38.

The estimated first-full-year cost of the Act is $6,476,000.

(3) Care of Veterans in State Veterans Homes. On September 21, 1976, the President approved H.R. 10394, as amended (Public Law 94–417), a bill to increase the per-diem rates at which the VA reimburses State veterans home for care provided to eligible veterans.

Currently, there are over 11,000 veterans being treated in State Veterans Homes at costs substantially below the per diem costs in the Veterans' Administration:

Comparative per diem costs

	State homes	Veterans' Administration	Difference per patient day
Category of care:			
Domiciliary	$12.19	$15.53	$3.34
Nursing home	20.23	41.74	21.41
Hospital	37.92	77.88	39.96

During fiscal year 1975, based on the average daily census in State Veterans Homes of approximately 11,000 veterans, the savings to the Federal Government for treating veterans in state home facilities as opposed to VA facilities amounted to almost a quarter million dollars.

Reimbursement rates under current law were last increased in September, 1973. The cost of operating state home facilities has increased dramatically since 1973.

Public Law 94–417 offers some relief to State Veterans Homes which are facing financial crisis situations because of spiraling inflation.

Rates are increased for state home reimbursement as follows under the provisions of Public Law 94–417:

Domiciliary care from $4.50 to $5.50 per day.

Nursing home care from $6.00 to $10.50 per day.

Hospital care from $10.00 to $11.50 per day.

The estimated cost of the legislation is $18.8 million in fiscal year 1977 (including $7.5 million for retroactive reimbursements to January 1, 1977), and between $12.1 million and $15.1 million in succeeding fiscal years.

(4) Release of Medical Information to State Public Health and Law Enforcement Officials. On June 29, 1976, the President approved H.R. 10268, as amended (Public Law 94–321), a bill to authorize the release of the names and addresses of patients or former patients in VA health care facilities to State public health and law enforcement officials.

Medical experts agree that the most effective way to prevent the spread of communicable diseases is to contact and treat all persons who may have been exposed to an infected carrier of the disease. To facilitate and coordinate the control of communicable diseases, all 50 States have established infectious disease units or their equivalents in the State health agency, and have enacted State laws requiring that medical authorities submit to the unit the names and addresses of persons who contract one of an enumerated list of dangerous cammunicable diseases.

For many years, the VA voluntarily complied with State reporting laws, and with other laws and ordinances requiring that gunshot or other suspicious wounds be reported to local law enforcement authorities. In 1974, however, the VA General Counsel held that the Administrator no longer had discretionary authority to release the names and addresses of veterans pursuant to State reporting laws. The VA's sudden decision raised the distinct possibility that health officials might be unable to control the spread of a dangerous disease, threatening the health of literally millions of Americans inside and outside the VA health care system.

The purpose of H.R. 10268, as amended to incorporate a substitute Senate text for the original House-passed bill, is to clarify Federal law in order to permit voluntary VA compliance with State reporting statutes, so long as a qualified representative of the State agency to which the name or address of a VA patient is to be reported requests the information in writing and certifies that it is needed for a purpose authorized by law.

(5) Exchange of Medical Information. On September 28, 1976, the President approved H.R. 3348 (Public Law 94–424), a bill to extend for an additional four years the VA's Exchange of Medical Information (EMI) program.

To strengthen medical programs at Veterans' Administration hospitals not affiliated with medical schools or in locations remote from medical teaching centers, and to foster the widest possible cooperation and consultation among members of the medical profession, Congress, 10 years ago, enacted legislation (Public Law 89–785, the Veterans Hospitalization and Medical Services Modernization Amendments of 1966) to authorize the Administrator of Veterans' Affairs to enter into agreements with medical schools, hospitals, medical centers, and individual members of the medical profession for the free exchange of medical information. The EMI program was part of a comprehensive program for the sharing of medical facilities, equipment, and information, now codified as subchapter IV of chapter 81 of title 38, United States Code.

The purpose of the EMI program was to bring modern medical and communications technology to bear on the quality of services available to veterans at VA hospitals which, for reasons of size, location, or lack of resources, were unable to take full advantage of the latest medical information. The 1966 legislation charged the VA with the responsibility to engage in pilot projects having as their objective the strengthening of VA hospitals through the exchange of medical information, and authorized annual appropriations of $3,000,000 for the 4 fiscal years ending June 30, 1971 to support projects in that area. Authorization for the program was scheduled to expire June 30, 1975.

As enacted, H.R. 3348 authorizes appropriations of $3,500,000 for fiscal year 1976, and $4,000,000 annually for fiscal years 1977 through 1979.

(6) Health Care Benefits for Allied Veterans. On October 14, 1976, the President approved H.R. 71 (Public Law 94–491), a bill to provide hospital and medical care benefits to certain members of the armed forces of Poland and Czechoslovakia during World War I or World War II. The estimated first-full-year cost of the measure is negligible.

OVERSIGHT ACTIVITIES

(1) Oversight Hearings. Hearings in May, 1975, and February, 1976, generated more than 2,000 written pages of testimony on the VA health care program. Among the more than 70 witnesses who testified were VA Chief Medical Director John D. Chase, Deputy Chief Medical Director Laurance V. Foye, distinguished members of the medical academic community, representatives of concerned labor and employee groups, representatives of health and allied health professional organizations, spokesmen for the national veterans organizations, and many other interested parties. Some of the many subjects considered at these oversight hearings were:

Problems associated with the recruitment and retention of VA physicians, dentists, nurses and other nursing personnel, optometrists, podiatrists, technologists, and technicians, and possible solutions to recruitment and retention difficulties;

The potential benefits of comprehensive preventive health care, and the costs, benefits, and administrative requirements of establishing a preventive health care program in the VA;

Alcoholism and drug abuse among veterans, and the development of treatment and rehabilitation programs for veterans suffering from alcohol abuse or drug addiction;

Relationships between VA hospitals and affiliated medical schools;

Medical programs for elderly veterans, and changing patterns of health care associated with the increasing number of aging veterans.

(2) Staff Meetings. Committee members and staff members met on a regular basis with top-ranking officials of the Department of Medicine and Surgery for meetings, briefings, and informal discussions on policy matters. The most important of these meetings are the annual budget briefings, conducted in December and January. Other meeting topics during the 94th Congress included an evaluation of the VA's progress in recruiting and retaining physicians and dentists after the enactment of Public Law 94–123; a briefing on unexplained patient deaths at the Ann Arbor VA Hospital; problems associated with affiliations between VA hospitals and medical schools; and administrative problems in the operation of the ambulatory care program.

(3) Liaison with Other Committees and Agencies. An important part of the Subcommittee's work during the 94th Congress was the communication to the Senate Budget and Appropriations Committees of the Subcommittee's views on matters pertaining to the VA health care budget. Pursuant to section 301(c) of the Congressional Budget Act of 1974, the Committee on Veterans' Affairs submitted a detailed report to the Budget Committee on March 15, 1975, and March 15, 1976, including views and estimates on all VA health care programs. In 1976, the Chairman of the Subcommittee wrote to the Chairman of the Appropriations Subcommittee on HUD-Independent Agencies with recommendations on the next fiscal year's health care budget appropriation. The June 4, 1976, letter resulted in an additional $50 million in appropriations for VA health care programs in fiscal year 1977.

In addition to its work with the Budget and Appropriations Committees, the Subcommittee coordinated portions of its legislative program with the Labor and Public Welfare (now Human Resources) and Finance Committees; communicated regularly with the General Accounting Office on monitoring and compliance activities; and corresponded with the Departments of Defense and Health, Education, and Welfare on departmental matters affecting veterans health care benefits.

HOUSING

During the 94th Congress hearings were held by the Subcommittee on Housing and Insurance, chaired by Senator Richard (Dick)

Stone (D., Fla.), in regard to the veterans housing program and related matters.

The Veterans' Administration provides housing credit assistance to eligible veterans, active servicemen, and certain survivors. The program substitutes the guaranty of the Federal Government for the investment protection afforded by substantial downpayments and shorter terms of loans under conventional mortgages. The program assists those eligible for participation in purchasing such modes of housing as conventional mobile homes and condominiums. Under this program, the VA is also authorized to make direct home loans in those areas of the country where private credit for VA-guaranteed loans is not generally available.

On November 12, 1975, the Subcommittee on Housing and Insurance reviewed veterans housing programs and, in particular, S. 2529, the Veterans Housing Amendments Act of 1975.

Testimony concerning the housing program and related matters was presented by the Chief Benefits Director of the Veterans' Administration, the Vice President of the Institute of Public Affairs, the General Counsel for the Manufactured Housing Institute, and representatives of the Veterans of Foreign Wars and the Disabled American Veterans. In addition, written testimony was submitted by a representative of the Non Commissioned Officers Association.

Pursuant to agreement, the Subcommittee reported S. 2529 without recommendation to the full Committee. After consideration in open executive session on March 10, 1976, the full Committee ordered S. 2529 reported, as amended in the nature of a substitute, to include the amending of the short title to the Veterans Housing Amendments Act of 1976.

The measure was reported to the full Senate on May 11 accompanied by Senate report 94–806. After consideration, S. 2529, as amended, was passed by the Senate and forwarded to the House. On May 18, the House passed S. 2529 as amended to contain the provisions of H.R. 13724. On June 11, the Senate agreed to the House amendments with amendments and on June 16 the House agreed to the Senate amendments to the House amendments and forwarded the measure to the President. On June 30, 1976, S. 2529 was enacted as Public Law 94–324.

As enacted, P.L. 94–324:

(1) Extends eligibility for housing benefits for the first time to veterans whose service was exclusively following the official termination of World War II and prior to the commencement of the Korean conflict—after July 25, 1947, and prior to June 27, 1950.

(2) Increases the Veterans' Administration direct home loan maximum from $21,000 to $33,000.

(3) Makes permanent the Veterans' Administration loan guaranty and direct home loan programs.

(4) Increases the maximum Veterans' Administration loan guaranty for the purchase of mobile homes from 30 to 50 percent.

(5) Makes technical amendments to the housing chapter—chapter 37 of title 38, United States Code, to correct grammatical errors and remove unnecessary or unwarranted gender references.

(6) Preempts, under certain conditions, State constitutional usury provisions which limit interest rates chargeable on FHA and VA mortgages by a certain class of lenders but which do not impose such rate limits on mortgages made by another class of lenders.

The Subcommittee on Housing and Insurance also held an open hearing in regard to the veterans housing program at the Larson Building in Tallahassee, Florida, on April 20, 1976. Specifically, the Subcommittee reviewed VA loan guarantee regulations as they affected veterans seeking to purchase a condominium.

Those presenting testimony to the Subcommittee included the Assistant Loan Guaranty Officer from the VA Jacksonville office, the Vice Chairman of the Veterans Advisory Council, the Executive Director of the Florida Home Builders Association, and representatives from the Flard Corporation, J. R. Kislak Mortgage Corporation, Veterans of Foreign Wars, and Disabled American Veterans.

INSURANCE

In the 94th Congress, the Subcommittee on Housing and Insurance held three days of open hearings during which testimony concerning the VA insurance program and related matters was received. The hearings also received testimony concerning S. 2529, the Veterans Housing Amendments Act of 1975, and S. 2218, the Veterans Insurance Disclosure Act of 1975.

Life insurance protection for eligible veterans, servicepersons, and respective beneficiaries are provided under seven separate programs—six of which are administered directly by the VA and one of which, Servicemen's Group Life Insurance (SGLI), is administered by a primary commercial carrier under contract with the VA. During fiscal year 1977, the face value of the total insurance in force in all these programs amounted to approximately $95 billion; the number of policies in force totaled 7.9 million.

On November 12, 1975, the Subcommittee met in open hearings to consider S. 1911, the Veterans Insurance Amendments Act of 1975, and other related bills. Those presenting testimony in regard to S. 1911 included the Chief Benefits Director of the Veterans' Administration and representatives of the Disabled American Veterans, and Veterans of Foreign Wars. In addition, a representative of the Non Commissioned Officers Association submitted written testimony.

The full Committee met in open executive session on December 9, 1975 and ordered reported S. 1911 as amended in the nature of a substitute. On March 10, 1976, the measure was reported to the full Senate accompanied by Senate Report 94–689. Subsequently, on March 15, S. 1911, as amended, was considered and passed by the Senate. On March 16, the measure was referred in the House of Representatives to the House Committee on Veterans' Affairs. The House Committee did not act upon S. 1911 during the Congress.

As passed, S. 1911:

(1) Provides any veteran whose coverage has lapsed under Servicemen's Group Life Insurance and who does not elect to be insured under Veterans' Group Life Insurance with a conversion right to an individual policy of commercial life insurance including a term policy.

(2) Provides all veterans upon lapse of coverage under Veterans' Group Life Insurance with the option of choosing an individual commercial policy of term insurance (convertible at a time specified in the policy to a permanent plan of insurance), as well as a whole life policy when exercising their statutory conversion privilege.

(3) Extends for 1 year after enactment of the "Veterans' Insurance Amendments Act of 1976" the period during which veterans extended retroactive eligibility by Public Law 93–289 for Veterans' Group Life Insurance may apply for such policies.

(4) Makes technical amendments to chapter 19—Insurance of title 38, United States Code to clarify statutory language, to restructure sections of the chapter into shorter subsections, and to eliminate unnecessary or unwarranted gender references.

The Subcommittee on Housing Insurance also held two days of open hearings on S. 2218, the Veterans Insurance Disclosure Act of 1975.

On December 3, 1975, those appearing to testify in regard to this measure included the President of the National Association of Insurance Commissioners, the President of the John Hancock Mutual Life Insurance Company, a professor of insurance from Indiana University, and the Secretary of the National Association of Life Underwriters.

On December 4, 1975, during the second day of hearings concerning this measure, those offering public testimony included the Director of the Veterans' Administration Insurance Center, the Senior Vice President and Chief Actuary of Prudential Insurance Company of America, a representative of the Society of Actuaries, and a representative from the National Association of Concerned Veterans.

PENSION

After several years of investigation, research, and inquiries, the Committee, during the 94th Congress, reported and the Senate passed legislation which would have assured to each pensioner the opportunity to elect to receive pension benefits under a pension program designed to prevent the loss of veterans pension income solely as a result of Social Security cost-of-living increases.

On November 18, 1975, and again on December 2, 1975, open hearings in regard to S. 2635, the Veterans and Survivor Pension Reform Act, were held. Those offering testimony in regard to this measure included the Honorable Robert Dole (R., Kans.), the Chief Benefits Director of the Veterans' Administration, and representatives from the American Legion, Veterans of Foreign Wars, Widows of World War I, Veterans of World War I, Paralyzed Veterans of America, and the National Association of Concerned Veterans.

On December 9, 1975, in an open executive session, the Committee ordered reported S. 2635 as amended in the nature of a substitute. On December 10, the measure was reported to the full Senate accompanied by Senate Report 94–532. On December 15, S. 2635 was considered by the Senate and unanimously passed by voice vote. The following day the measure was referred to the House of Representatives wherein it was referred to the House Committee on Veterans' Affairs.

As passed by the Senate, S. 2635 would:

(1) Assure a level of income above the minimum subsistence level allowing veterans and their survivors to live out their lives in dignity.

(2) Prevent veterans and widows from having to turn to welfare assistance.

(3) Treat similarly-circumstanced pensioners equally.

(4) Provide greater pension for those with greater needs.

(5) Guarantee regular increases in pension which fully accounts for increases in the cost of living.

Under current law a basic payment rate is set which is reduced by a formula system as outside income increases. At present, a veteran without a dependent and with no other income is entitled to a maximum of $1,920 a year ($1,296 for a widow). A veteran with a dependent and with no other income is entitled to a maximum yearly payment of $2,064 ($1,536 for a comparable widow with dependents).

The new pension program would establish a minimum level of income above the poverty level. A single veteran and a surviving spouse without dependents would be entitled to a maximum pension payment of $2,700, if the pensioner had no other income. A veteran with a dependent and a surviving spouse with a dependent would be entitled to a maximum of $3,900.

The new system contains few income exclusions. An exclusion is income not counted as such for purposes of pension computation. Generally, each dollar of income available to an individual or couple will be deducted from the maximum entitlement. The VA will pay the difference. Certain exclusions which rep-

resent extraordinary expenses (for example, burial or unusual medical expenses) or which represent one-time payments which replace loss (for example, fire insurance) are retained. For those in need of "aid and attendance" or permanently housebound, a higher level of need is established which reflects the additional support required (an additional $1,596 a year for those in need of aid and attendance or an additional $636 for those pensioners who are housebound). Aid and attendance allowance is "dollared down" in the same manner as entitlement is "dollared down." Presently, a pensioner loses his entire aid and attendance allowance should he become ineligible for pension.

A limited amount of income earned by the spouse of a veteran in need of aid and attendance or permanently housebound is excluded.

Consistent with the objectives and principals of a need-based pension program, the entitlement rates for widows are equalized with those for veterans. Currently, entitlement rates for widows are but two-thirds that of veteran rates.

The new pension program provides automatic annual cost-of-living adjustments to the minimum level of income support established by this act. For example, a 10-percent increase in the cost of living would automatically result in a similar percentage increase in pension for single and married pensioners to $2,970 and $4,290, respectively. According to information supplied by the Veterans' Administration, under the new pension program, no veteran or widow receiving cost-of-living increases in social security payments would as a result suffer *any* reduction in VA pension payments.

Prior to implementation of the new program, all veterans and dependents currently eligible for pension will receive an 8 per centum increase in the rate and a $300 increase in the maximum annual income limitations effective January 1, 1976. After October 1, 1976, all new pensioners must qualify under the new program. Those pensioners on the rolls prior to October 1, 1976, will have the option of switching to the new program or continued coverage under existing pension programs. Those minority of veterans electing to remain under that program originally established by Public Law 86–211, would thereafter annually receive cost-of-living adjustments in their rates and maximum annual income limitations.

A new pension program based on identical principles as those explained above is established for parents receiving dependent and indemnity compensation.

Current "old law" pensioners (that is, those receiving pension under those provisions in effect prior to enactment of Public Law 86–211) would receive automatic cost-of-living increases in the maximum annual income limitations consistent with past congressional practice.

The House, however, did not act on S. 2635 during the Congress.

Prior to Senate passage and as a result of the lack of time available to the House to consider the reform measure prior to the end of the session, the Senate, on December 10, considered H.R. 10355 and passed it unanimously as amended in the nature of a substitute to include the provisions of titles II and IV of S. 2635. On December 18, 1975, the House agreed to the Senate amendment and forwarded the measure to the President who signed it into law as Public Law 94–169 on December 23, 1975.

As enacted, the Veterans and Survivors Pension Interim Adjustment Act of 1975 Public Law 94–169:

(1) Increases the maximum annual income limitations for eligible veterans and their survivors receiving pension by $300 and provides an average 8-percent increase in the rates of pensions.

(2) Increases the maximum annual income limitations of "old law" pensioners by $300.

(3) Increases the maximum annual income limitations by $300 for parents receiving dependency and indemnity compensation (DIC) and provides an average 8-percent increase in the rates for DIC.

(4) Increases by 8 percent the allowances payable to those in receipt of pension who are in need of aid and attendance or who are deemed permanently housebound.

During the 2nd session of the 94th Congress, the House again did not act upon the comprehensive pension reform program provided for in S. 2635. On June 21, 1976, the House considered and forwarded to the Senate H.R. 14298. On June 22, the measure was held at the desk in the Senate rather than being referred to the Committee. On August 4, H.R. 14298 was considered and passed by the Senate as amended to contain the provisions of titles I and III of S. 2635, the Veterans and Survivors Pension Reform Act. Subsequently, on September 9, the House agreed to the Senate amendment to H.R. 14298 with an amendment; the House struck those provisions of H.R. 14298 relating to S. 2635 and added those provisions included as part of H.R. 14298 as it had originally cleared the House and in addition included Congressional findings in regard to the pension program and further mandated the VA to conduct a study on the non-service-connected disability pension program. The Senate agreed to the House Amendments in September and on September 30 the President signed the Veterans and Survivors Pension Adjustment Act of 1976 into law as P.L. 94–432.

As enacted, Public Law 94–432:

(1) Makes permanent the 8-percent increase in non-service-connected pension provided for in the Veterans and Survivors Pension Interim Adjustment Act of 1975 (Public Law 94–169) otherwise scheduled to expire on September 30, 1976.

(2) Provides a 7-percent increase in pension rates for totally disabled wartime veterans, eligible survivors, and eligible children effective January 1, 1977.

(3) Increases the annual countable income limitation governing payment of pension to—

(A) eligible veterans,

(i) $3,300 to $3,540 for single veterans,

(ii) $4,500 to $4,760 for veterans with wife and children.

(B) eligible widows,

(i) $3,300 to $3,540 for widows alone,

(ii) $4,500 to $4,760 for widows and children,

(C) eligible children from $2,700 to $2,890,

(D) eligible dependent parents,

(i) $3,300 to $3,540 for 1 parent,

(ii) $3,300 to $3,540 for 2 parents not together, and

(iii) $4,500 to $4,760 for 2 parents together or remarried.

(4) Increases by 7 percent the rates and annual income limitations for disability and indemnity compensation (DIC) for eligible parents.

(5) Increases the monthly housebound rate for veterans from $53 to $57.

(6) Increases the monthly aid and attendance allowance for veterans from $133 to $155.

(7) Increases the monthly aid and attendance allowance for widows and dependent parents from $69 to $74.

(8) Provides for a graduated reduction in aid and attendance allowances for those veterans whose income exceeds maximum allowable income limitations.

(9) Provides a 25-percent add-on in pension rates for eligible veterans who are 78 years of age or older.

(10) Revises the definition of permanent and total disability to permit payment from date of unemployability after age 65 if claim is filed within 1 year as now done for those filing within 1 year of age 65 or of becoming permanently and totally disabled before that age.

(11) Increases the annual income limitations for the protected (old) law pensioners to—

(A) single veterans and widows without children, $2,900 to $3,100, and

(B) veterans or widows with a child, $4,200 to $4,460.

(12) Increases by 7 percent (from $69 to $74) the aid and attendance allowance for widows receiving death compensation under the protected (old) law.

(13) Revises the rule governing determination of dependency of a parent and allows the Administrator to set guidelines in considering cost-of-living increases.

(14) Requires heads of other Federal agencies to furnish the Administrator of VA, upon request, available information to assist in determining eligibility for benefits.

That section of P.L. 94–432 (§ 404) making Congressional findings and declarations concerning the non-service-connected pension program and mandating a comprehensive report in regard to it is as follows:

SEC. 404. (a) The Congress finds and declares that the pension program for non-service-connected disability or death, authorized in chapter 15 of title 38, United States Code, and administered by the Veterans' Administration—

(1) does not provide sufficient assistance to meet the needs of some eligible veterans and survivors;

(2) has developed some inconsistencies, inequities, and anomalies which prevent it from operating in the most efficient and equitable manner; and

(3) subjects many pensioners annually to reductions in their pensions.

The Congress further finds and declares that it lacks sufficient long-range information as to actual and anticipated financial characteristics of potential pensioners (and their families) upon which to estimate costs of existing alternative pension programs.

(b) No later than October 1, 1977, the Administrator of Veterans' Affairs shall submit a report to Congress and the President. The report shall contain the findings and recommendations of a comprehensive investigation, analysis, and evaluation of existing and alternative non-service-connected pension programs, and shall include, but not be limited to, the following:

(1) Income characteristics of veterans and survivors currently in receipt of non-service-connected pension.

(2) Actual and anticipated long-term financial characteristics of pensioners including those veterans and survivors (and their families) who may be potentially eligible for benefits under the non-service-connected pension program during the next 25 years.

(3) Identification and analysis of existing inequities, anomalies, and inconsistencies contained in the current non-service-connected pension program.

(4) Current and proposed income exclusions.

(5) Particular problems and needs of catastrophically disabled non-service-connected pensioners.

(6) Alternative proposals which—

(A) assure a level of income for eligible veterans at or above the national minimum standard of need;

(B) treat similarly circumstanced pensioners alike; and

(C) provide the greatest amount of assistance to those with the greatest amount of need.

(c) On the basis of the investigation, analysis, and evaluation required to be made in subsection (b), the report shall identify alternative courses of legislative or administrative action (including proposed legislation) and long-range cost estimates therefore which, in the judgment of the Administrator, would result in a more equitable non-service-connected pension program.

THE NATIONAL DEFENSE BUDGET CATEGORY

Mr. NUNN. Mr. President, I want to express my serious concern over some of the recommendations for reductions that are being made as the Congress develops the target for the national defense budget category in the first concurrent budget resolution.

The unrelenting quantitative and qualitative military buildup by the Soviet Union has been well documented and it is not my intention today to recite the detailed comparisons that give us all concern. The recent collapse of the SALT negotiations must give us all pause in making any reductions in our defense capabilities. This is not the time to let down our guard or give the Soviets a signal of weakness and weak resolve. The budget for fiscal year 1978 must provide an adequate national defense program to meet current needs and to continue a program sufficient to deter our potential adversaries in the future.

The defense budget has been presented with this basic national priority in mind. President Carter has recommended a level of $120.1 billion for national defense. President Ford recommended a budget level of $122.9 billion. The Authorization and Appropriation Committees in both the House and Senate have recommended levels within this range. This consensus view should not be dismissed lightly. Some continued real growth in the defense budget is necessary for national security and it appears to the Senator from Georgia that a budget in the range of $121 billion is the minimum level necessary.

REDUCTIONS IMPERIL ADEQUATE DEFENSE

Some of the recommendations now being made to change the budget target are based on apparently innocent financial and accounting adjustments. There is no such thing as free money—something has to give. I am concerned that what will give in the end is our defense capability.

What is likely to happen is that these easy adjustments would result in real decreases in necessary force levels and procurement. A $1 billion reduction based on "prior year unobligated balances" actually means reducing already approved programs for aircraft and shipbuilding. There may be areas in the President's budget where the Congress feels the additional investment is necessary. Similarly, budgeters may recommend a change in the inflation assumptions in the operations and maintenance accounts. But we should not base the already poor readiness of our forces on uncertain estimates of inflation over a year from now. I hope that inflation subsides in the future. But I doubt that inflation will be zero in fiscal year 1978 as is assumed in some suggested reductions. We simply cannot base our force readiness on these kind of estimates. Reductions would require decreased readiness levels of current forces—including decreases in necessary maintenance and operational capability of forces and equipment now in being.

Manpower cost account for a large part of the defense budget—56 percent of the total defense spending as proposed in the Carter budget. This is an increase from 47 percent in fiscal year 1964, which is primarily due to increases in comparability pay All-Volunteer Force requirements and increases in retirement pay, but the actual manpower levels have been sharply reduced—by 22 percent compared to the fiscal year 1964 levels. We are at the point where significant reductions in manpower levels, in order to reduce manpower costs, are no longer prudent. Further, manpower savings in 1 year are difficult to achieve. A $500 million reduction in defense outlays from manpower savings can only be achieved by releasing perhaps 150,000 or more people from the defense payroll, or reducing the number of new people brought on by roughly 150,000. Such a large reduction in 1 year is inappropriate on the basis of our national security needs.

SUPPORT FOR THE BUDGET PROCESS

This Senator has been, and continues to be, a strong supporter of the congressional budget process. I think the Armed Services Committee has acted responsively to these new procedures and I commend the Senate Budget Committee for the determined spirit of cooperation with which it has acted. However, I am very concerned that the appropriate target for national defense not be established as part of a numbers game where apparenlty innocent budgeting assumptions translate into unwarranted reductions in national defense. I am concerned that the national defense target established by the House Budget Committee is not sufficient to meet our real national security needs and I urge the Senate Budget Committee to base its target on these real needs.

A TRIBUTE TO BLACK FASHION MODEL BILLIE BLAIR

Mr. CRANSTON. Mr. President, today, the distinguished junior Senator from Michigan, Mr. RIEGLE is conducting field hearings on the effects of the chemical PBB in the State of Michigan.

I ask unanimous consent to have printed in the RECORD a statement by the distinguished Senator from Michigan.

There being no objection, the statement was ordered to be printed in the RECORD, as follows:

STATEMENT BY SENATOR RIEGLE

It is indeed a great honor to pay tribute to black fashion model, Billie Blair.

Miss Blair was born in Flint, Michigan, to Mrs. Hattie Stewart Blair and Mr. William Blair. She attended Flint Public Schools, where during that time she worked as a volunteer at the Lapeer, Michigan Home for Retarded Children. Miss Blair also attended Mott Community College (Flint) and Arkansas University.

Today, Miss Blair is a professional model having modeled for such top designers as Christian Dior, Oscar DeLaRenta, Halston, Givenchy, Bill Blass, Calvin Klein, Rufus Barkley and others. She has been proclaimed by Newsweek Magazine as one of the top six models in the United States, and can be seen weekly and monthly in issues of Vogue, Cosmopolitan, Charm, Glamour, Women's Wear Daily, Jet, Ebony, Essence and Gentlemen's Quarterly.

I want to congratulate Miss Blair on achieving great success in the modeling profession.

(This concludes additional statements submitted by Senators today.)

CONCLUSION OF MORNING BUSINESS

The PRESIDING OFFICER. Is there further morning business? If not, morning business is closed.

PROGRAM

ORDER FOR TRANSACTION OF ROUTINE MORNING BUSINESS

Mr. ROBERT C. BYRD. Mr. President, following the recognition of the two leaders or their designees on tomorrow, the distinguished Senator from Utah (Mr. GARN) will be recognized for not to exceed 15 minutes, after which, if there is any time remaining prior to the hour of 9:45 a.m., I ask unanimous consent that there be a period for the transaction of routine morning business with statements limited therein to 2 minutes each with the understanding that no resolutions will come over under the rule.

The PRESIDING OFFICER. Without objection, it is so ordered.

TIME LIMITATION AGREEMENT—"SUNSET AMENDMENT"

Mr. ROBERT C. BYRD. Mr. President, at the hour of 9:45 a.m., the distinguished minority leader will be recognized to call up his amendment, the so-called sunset amendment, I believe it is, as modified, upon which there shall be 1 hour of debate to be equally divided and controlled by the majority and minority leaders, or their designees, and that if an amendment thereto is offered it may only be offered after the first 30 minutes of that hour have elapsed. At the end of the 1 hour on the Baker amendment, the vote will occur on any amendment offered to the Baker amendment, if any has been offered, or on a tabling motion with such vote to occur at 10:45 a.m.

Following that vote on a tabling motion or on an amendment, whichever may be the case, the vote on the Baker amendment will occur no later than 11 a.m., and following the vote on the disposition of the Baker amendment, no intervening amendment, motion, or debate will be in order and a vote will occur immediately on adoption of Senate Resolution 110. That would occur at 11:15 a.m.

This means, then, that the first rollcall vote tomorrow will occur at 10:45 a.m.

If the Senator wishes we could order the yeas and nays now.

Mr. President, I ask unanimous consent that it be in order to order the yeas and nays at this time on the Baker amendment.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. BAKER. Mr. President, I ask for the yeas and nays.

The PRESIDING OFFICER. Is there a sufficient second? There is a sufficient second.

The yeas and nays were ordered.

Mr. ROBERT C. BYRD. Mr. President, I ask unanimous consent that it be in order at this time to order the yeas and nays on a motion to table Mr. BAKER'S amendment.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. ROBERT C. BYRD. I ask for the yeas and nays on such a motion.

The PRESIDING OFFICER. Is there a sufficient second? There is a sufficient second.

The yeas and nays were ordered.

Mr. BUMPERS. Mr. President, will the majority leader yield for a question?

Mr. ROBERT C. BYRD. I yield.

Mr. BUMPERS. Is it possible that the Baker amendment could possibly be voted on before that hour? I know the Senator said not later than 11 a.m. but if both sides yielded back the remainder of their time could it occur before that hour?

Mr. ROBERT C. BYRD. The problem here is that, in the event there is an amendment offered to the amendment by Mr. BAKER, there might be a vote on that amendment. I anticipate that a tabling motion, however, will be offered at the close of that hour so that the vote on the tabling motion—and this does not rule out an amendment—will occur at 10:45 a.m. Then the vote on the Baker amendment will occur at 11 a.m.; that would be the earliest that we could vote on the Baker amendment.

H.R. 4877

Mr. President, following the disposition of the code of conduct resolution on tomorrow, the Senate will take up the supplemental appropriations bill. I have cleared this with Mr. MCCLELLAN and I, therefore, ask unanimous consent that upon the disposition of the code of conduct resolution on tomorrow the Senate proceed to the consideration of H.R. 4877, an act making supplemental appropriations.

Mr. BAKER. Mr. President, reserving the right to object, I only observe that the matter has been cleared on our sides by the distinguished senior Senator from North Dakota, the ranking Republican member of the Appropriations Committee, and those who have amendments to offer, and I do not object.

Mr. BAYH. Mr. President, reserving the right to object, is the majority leader making a unanimous-consent request that the supplemental appropriations bill be the next order of business after the disposition of the pending business?

Mr. ROBERT C. BYRD. Yes.

Mr. BAYH. May I pose the question?

Mr. ROBERT C. BYRD. Yes.

Mr. BAYH. Does either one of the leaders anticipate there is going to be a number of amendments on the supplemental appropriations bill?

Mr. ROBERT C. BYRD. I really am not able to answer that question. I do not know of any amendments on this side. There may be.

Mr. BAYH. With all respect, I think the majority leader has already partially answered it. If there were going to be some, I assume the majority leader would know at least part of the disposition.

Mr. ALLEN. Mr. President, Senator SPARKMAN and I have one amendment, and we hope the committee will accept it.

Mr. BAKER. Mr. President, if the Senator will yield, for the information of colleagues I understand there are three amendments at the desk to the supplemental appropriations bill on this side.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. ROBERT C. BYRD. Mr. President, there is one matter I have overlooked.

ORDER FOR ADMINISTRATION OF OATH OF OFFICE TOMORROW

I ask unanimous consent that upon the disposition of the code of conduct and prior to proceeding to the consideration of the supplemental appropriations bill tomorrow, there be not to exceed 15 minutes in which the swearing-in of Mr. Kimmitt to be Secretary of the Senate may take place.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. ROBERT C. BYRD. Mr. President, there will probably be some rollcall votes tomorrow afternoon on the supplemental appropriations bill and/or on amendments or motions in relation thereto. I would not anticipate that the Senate would be in any later than somewhere around 5 p.m. tomorrow. I hope that it will not take that long, but I should think that should be a reasonable hour for us at least to surmise at this point as being the final recessing of the Senate.

I believe that about wraps it up now.

RECESS UNTIL 9:15 A.M. TOMORROW

Mr. ROBERT C. BYRD. Mr. President, if there be no further business to come before the Senate, I move, in accordance with the previous order, that the Senate stand in recess until 9:15 a.m. tomorrow morning.

The motion was agreed to; and at 7:01 p.m. the Senate recessed until tomorrow, Friday, April 1, 1977, at 9:15 a.m.

NOMINATIONS

Executive nominations received by the Senate March 31, 1977:

FEDERAL ENERGY ADMINISTRATION

David J. Bardin, of New Jersey, to be a Deputy Administrator of the Federal Energy Administration, vice Eric R. Zausner, resigned.

IN THE AIR FORCE

The following officer to be placed on the Retired List in the grade indicated under the provisions of section 8962, title 10 of the United States Code:

To be lieutenant general

Lt. Gen. Ray B. Sitton, 260-22-9821FR (major general, Regular Air Force), U.S. Air Force.

The following officers to be placed on the Retired List in the grade indicated under the provisions of section 8962, title 10 of the United States Code:

To be lieutenant general

Lt. Gen. James M. Keck, 039-09-7364FR (major general, Regular Air Force), U.S. Air Force.

Lt. Gen. Joseph G. Wilson, 229-01-5510FR (major gen., Regular Air Force), U.S. Air Force.

Lt. Gen. Maurice F. Casey, 334-18-3434FR (brigadier general, Regular Air Force), U.S. Air Force.

DEPARTMENT OF THE TREASURY

Joseph Laitin, of Maryland, to be an Assistant Secretary of the Treasury, vice David Robert Macdonald, resigned.

FEDERAL HIGHWAY ADMINISTRATION

William Meredith Cox, of Kentucky, to be Administrator of the Federal Highway Administration, vice Norbert T. Tiemann, resigned.

CONFIRMATION

Executive nomination confirmed by the Senate March 31, 1977:

Vice Adm. Julien J. LeBourgeois, U.S. Navy, for appointment to the grade of vice admiral on the retired list pursuant to the provisions of title 10, United States Code, section 5233.

HOUSE OF REPRESENTATIVES—*Thursday, March 31, 1977*

The House met at 11 o'clock a.m.

Rev. Joseph Prunskis, Symphorosa Church, Chicago, Ill., offered the following prayer:

Dear Lord, who created all nations and who has made the United States of America the greatest Nation in the world, guided by the ideals of freedom and justice, inspire the noble leaders of this Nation and the brilliant men of this House of Representatives to struggle for the liberty of all captive nations and for justice in the lands now suffering under the oppression of foreign tyranny, as is the case with Lithuania.

Dear Lord, bless the efforts of these experienced representatives of the people who so many times in this great House have raised their voices for the freedom of Lithuania. Grant that Lithuania be saved from the Calvary of oppression and enjoy the resurrection of its freedom and independence, that all Lithuanians from exile in Siberia, from jails, from psychiatric wards, from slave labor camps be able to again assemble in freedom in their shrines, cleansed from present desecration, and sing hymns of gratitude for their liberation.

Lithuanians in their land at present are under the oppression of unscrupulous atheistic tyrants but they have an unshaken confidence that the Stars and Stripes will help to raise their tricolor flag of freedom. So help us God. Amen.

THE JOURNAL

The SPEAKER. The Chair has examined the Journal of the last day's proceedings and announces to the House his approval thereof.

Without objection, the Journal stands approved.

There was no objection.

NINTH ANNIVERSARY OF ASSASSINATION OF REV. MARTIN LUTHER KING, JR.

Mr. FORD of Tennessee, asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. FORD of Tennessee. Mr. Speaker, April 4, 1977, will mark the ninth anniversary of the assassination of Martin Luther King, Jr. Martin King died from the gunshot wounds of an assassin's bullet in my hometown of Memphis.

This great black man was an American leader of international stature who lived with a dream which inspired the world, a dream which has yet to be accomplished.

It is a shame Martin King died a senseless death, and it is a national embarrassment that no probe has uncovered conclusive, satisfactory findings surrounding the death of the Reverend King.

I am very pleased that we, the Members of Congress, the highest elected officials of this great country, voted yesterday to reconstitute the Select Committee on Assassinations, a committee charged with the mission of delivery to the American people a full and thorough investigation into the assassinations of President John F. Kennedy and Martin Luther King, Jr.

The Members of Congress are to be commended for the passing of this resolution on the eve of the assassination of Martin King.

I am fully optimistic that, through the professional efforts of the committee, the American people, once and for all, will be provided with the answers they so rightfully deserve.

I will include at a later point in the RECORD the final speech of Martin King, delivered in Memphis, Tenn.

PERSONAL EXPLANATION

(Mr. COLEMAN asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. COLEMAN. Mr. Speaker, Tuesday, the vagaries of the relationship of man and machine came home to me in vivid fashion. My confrontation with the technological wizards of our environs occurred as the House voted on questions of reorganization powers for the President. Specifically, my problem developed as we voted on rollcall No. 107, final passage of House Resolution 441. It was my intent, in fact it was my action, to vote for such passage. However, the electronic voting device failed to show that I had taken any such action and recorded me as not voting.

Mr. Speaker, I will not attempt to prove culpability. Suffice it to say that it was my intention to vote for final passage of the reorganization bill and that I inserted my voting card into the machine. I thought my vote had been properly recorded. In reading the CONGRESSIONAL RECORD of Tuesday, I find it was not. In the future, I will not rely on the electronic device as much as I rely on my own system of checks and balances.

PROVIDING FUNDS FOR EXPENSES OF HOUSE INFORMATION SYSTEMS OF COMMITTEE ON HOUSE ADMINISTRATION

Mr. DENT. Mr. Speaker, by direction of the Committee on House Administration, I offer a privileged resolution (H. Res. 442) and ask for its immediate consideration.

The Clerk read the resolution, as follows:

H. RES. 442

Resolved, That (a) the Committee on House Administration is authorized to incur such further expenses (not in excess of $7,980,000) as the committee considers advisable to enable House Information Systems to provide for the development, operation, maintenance, and improvement of ongoing computer services for the House of Representatives, for the investigation of additional computer services for the House of Representatives, and to provide computer support directly to the committees, Members, and administrative offices of the House of Representatives, including expenditures—

(1) for the employment of professional, technical, clerical, and other assistants,

(2) for the procurement of services of individual consultants or organizations thereof pursuant to section 202(i) of the Legislative Reorganization Act of 1946 (2 U.S.C. 72a(i)), and for the procurement of equipment by contract or otherwise, and

(3) for specialized training, pursuant to section 202(j) of such Act (2 U.S.C. 72a(j)), of committee staff personnel performing professional and nonclerical functions.

Such expenses shall be paid out of the contingent fund of the House on vouchers authorized and approved by such committee, and signed by the chairman thereof.

(b) Not to exceed $50,000 of the total amount provided by this resolution may be used to procure the temporary or intermittent services of individual consultants or organizations thereof pursuant to section 202(i) of the Legislative Reorganization Act of 1946 (2 U.S.C. 72a(i)), and not to exceed $24,000 of such total amount may be used to provide for specialized training, pursuant to section 202(j) of such Act (2 U.S.C. 72a(j)), of staff personnel of the committee performing professional and nonclerical functions; but neither of these monetary limitations shall prevent the use of such funds for any other authorized purpose.

SEC. 2. Of such funds authorized by this resolution, $2,940,000 is designated to provide computer support to other standing committees of the House of Representatives and to joint committees and offices of the Congress at the following projected levels:

(a) Committee on Appropriations, $583,000.

(b) Joint Committee on Internal Revenue Taxation, $69,000.

(c) Committee on Science and Technology, $17,000.

(d) Committee on the Judiciary, $15,000.

(e) Committee on Public Works and Transportation, $28,000.

(f) Committee on Education and Labor, $28,000.

(g) Committee on Veterans' Affairs, $28,000.

(h) General support to all committees (including calendar preparation, text processing, LEGIS, hearings publication, economic forecasting, graphics, modeling, and technical assistance), $1,753,000.

(i) Congressional Budget Office, $200,000.

(j) Commission on Administrative Review, $8,000.

(k) Legislative Counsel, $94,000.

(l) Official Reporters to Committees, $117,000.

SEC. 3. Of such funds authorized by this resolution, $750,000 is projected to provide computer support to the officers of the House of Representatives.

SEC. 4. Of such funds authorized by this resolution, $3,150,000 is projected to provide computer support to the Members of the House of Representatives, including the ongoing development and operation of such systems as electronic voting, LEGIS, Member office support, and the Member information network.

SEC. 5. No part of the funds authorized by this resolution shall be available for expenditures in connection with the study or investigation of any subject which is being investigated for the same purpose by any other committee of the House.

SEC. 6. The authorization granted by this resolution shall expire immediately prior to noon on January 3, 1978.

SEC. 7. Funds authorized by this resolution shall be expended pursuant to regulations established by the Committee on House Administration in accordance with existing law.

Mr. DENT (during the reading). Mr. Speaker, I ask unanimous consent that further reading of the resolution be dispensed with and that it be printed in the RECORD.

The SPEAKER. Is there objection to the request of the gentleman from Pennsylvania?

There was no objection.

Mr. DENT. Mr. Speaker, I move the previous question on the resolution.

The previous question was ordered.

The resolution was agreed to.

A motion to reconsider was laid on the table.

PROVIDING FOR EXPENSES OF INVESTIGATIONS AND STUDIES TO BE CONDUCTED BY SELECT COMMITTEE ON ETHICS

Mr. DENT. Mr. Speaker, by direction of the Committee on House Administration, I offer a privileged resolution (H. Res. 428) and ask for its immediate consideration.

The Clerk read the resolution, as follows:

H. RES. 428

Resolved, That, effective March 9, 1977, expenses of investigations and studies to be conducted by the Select Committee on Ethics, as authorized by House Resolution 383, acting as a whole or by subcommittee, not to exceed $283,000, including expenditures for the employment of investigators, attorneys, and clerical, and other assistants, and for the procurement of services of individual consultants or organizations thereof pursuant to section 202(i) of the Legislative Reorganization Act of 1946, as amended (2 U.S.C. 72a(i)), shall be paid out of the contingent fund of the House on vouchers authorized by such committee, signed by the chairman of such committee, and approved by the Committee on House Administration. Not to exceed $20,000 of the total amount provided by this resolution may be used to procure the temporary or intermittent services of individual consultants or organizations thereof pursuant to section 202(i) of the Legislative Reorganization Act of 1946, as amended (2 U.S.C. 72a(i)); but this monetary limitation on the procurement of such services shall not prevent the use of such funds for any other authorized purpose.

SEC. 2. No part of the funds authorized by this resolution shall be available for expenditure in connection with the study or investigation of any subject which is being investigated for the same purpose by any other committee of the House; and the chairman of the Select Committee on Ethics shall furnish the Committee on House Administration information with respect to any study or investigation intended to be financed from such funds.

SEC. 3. The authorization granted by the resolution shall expire on December 31, 1977.

SEC. 4. Funds authorized by this resolution shall be expended pursuant to regulations

established by the Committee on House Administration in accordance with existing law.

Mr. DENT (during the reading). Mr. Speaker, I ask unanimous consent that further reading of the resolution be dispensed with and that it be printed in the RECORD.

The SPEAKER. Is there objection to the request of the gentleman from Pennsylvania?

There was no objection.

Mr. DENT. Mr. Speaker, I move the previous question on the resolution.

The previous question was ordered.

The resolution was agreed to.

A motion to reconsider was laid on the table.

PROVIDING ADDITIONAL FUNDS FOR EXPENSES OF COMMITTEE ON INTERNATIONAL RELATIONS IN CONNECTION WITH VISITS TO UNITED STATES BY HEADS OF STATES AND OTHER FOREIGN DIGNITARIES

Mr. DENT. Mr. Speaker, by direction of the Committee on House Administration, I offer a privileged resolution (H. Res. 434) and ask for its immediate consideration.

The Clerk read the resolution, as follows:

H. RES. 434

Resolved, That, until otherwise provided by law, there shall be paid out of the contingent fund of the House of Representatives such sums as may be necessary, but not to exceed $15,000 in any calendar year, for the payment of expenses incurred in carrying out the first section of H. Res. 348, Eighty-seventh Congress, adopted June 29, 1961, and enacted as permanent law by the Legislative Branch Appropriation Act, 1963 (Public Law 87-730; 76 Stat. 680).

SEC. 2. Effective on the date of the enactment of the provisions of this section as permanent law, subsection (b) of the first section H. Res. 348, Eighty-seventh Congress, adopted June 29, 1961, and enacted as permanent law by the Legislative Branch Appropriation Act, 1963 (Public Law 87-730; 76 Stat. 680), is amended by striking out "$5,000" and inserting in lieu thereof "$15,000".

Mr. DENT (during the reading). Mr. Speaker, I ask unanimous consent that further reading of the resolution be dispensed with and that it be printed in the RECORD.

The SPEAKER. Is there objection to the request of the gentleman from Pennsylvania?

There was no objection.

Mr. DENT. Mr. Speaker, I move the previous question on the resolution.

The previous question was ordered.

The resolution was agreed to.

A motion to reconsider was laid on the table.

PROVIDING FOR ADMINISTRATIVE EXPENSES INCURRED IN CONCLUDING BUSINESS AND ACTIVITIES OF FORMER SELECT COMMITTEE ON PROFESSIONAL SPORTS

Mr. DENT. Mr. Speaker, by direction of the Committee on House Administration, I offer a privileged resolution (H. Res. 436) and ask for its immediate consideration.

The Clerk read the resolution, as follows:

H. RES. 436

Resolved, That effective January 3, 1977, the administrative expenses incurred in concluding the business and activities of the former Select Committee on Professional Sports, not to exceed $3,000, shall be paid out of the contingent fund of the House on vouchers signed by the former chairman of such committee, and approved by the Committee on House Administration.

SEC. 2. The authorization granted by the resolution shall expire on March 31, 1977.

SEC. 3. Funds authorized by this resolution shall be expended pursuant to regulations established by the Committee on House Administration in accordance with existing law.

Mr. DENT (during the reading). Mr. Speaker, I ask unanimous consent that the further reading of the resolution be dispensed with and that it be printed in the RECORD.

The SPEAKER. Is there objection to the request of the gentleman from Pennsylvania?

There was no objection.

Mr. DENT. Mr. Speaker, I move the previous question on the resolution.

The previous question was ordered.

The resolution was agreed to.

A motion to reconsider was laid on the table.

PROVIDING FOR EXPENSES OF INVESTIGATIONS, STUDIES, OVERSIGHT, AND FUNCTIONS TO BE CONDUCTED BY COMMITTEE ON GOVERNMENT OPERATIONS

Mr. DENT. Mr. Speaker, by direction of the Committee on House Administration, I offer a privileged resolution (H. Res. 328) and ask for its immediate consideration.

The Clerk read the resolution as follows:

H. RES. 328

Resolved, That effective January 3, 1977, expenses of investigations, studies, and oversight responsibilities and functions to be conducted pursuant to rule X, clause 2, paragraphs (b)(1), (b)(2), and (c) relating to general oversight responsibilities), clause 4(c) (relating to additional functions of the Committee on Government Operations), and rule XI, clause 1(b) (relating to the authorization of investigations and studies), by the Committee on Government Operations, acting as a whole or by subcommittee, not to exceed $1,945,598, including expenditures—

(1) for the employment of investigators, attorneys, and clerical, stenographic, and other assistants;

(2) for the procurement of services of individual consultants or organizations thereof pursuant to section 202(i) of the Legislative Reorganization Act of 1946, as amended (2 U.S.C. 72a(i)); and

(3) for specialized training, pursuant to section 202(j) of such Act, as amended (2 U.S.C. 72a(j)), of the committee staff personnel performing professional and nonclerical functions;

shall be paid out of the contingent fund of the House on vouchers authorized by such committee, signed by the chairman of such committee, and approved by the Committee on House Administration. Not to exceed $15,200 of the total amount provided by this resolution may be used to procure the temporary or intermittent services of individual consultants or organizations thereof pursuant to section 202(i) of the Legislative Reorganization Act of 1946, as amended (2 U.S.C. 72(i)); and not to exceed $2,000 of such total amount may be used to provide for specialized training, pursuant to section 202 (j) of such Act, as amended (2 U.S.C. 72a (j)), of staff personnel of the committee performing professional and nonclerical functions; but neither of these monetary limitations shall prevent the use of such funds for any other authorized purpose.

SEC. 2. The chairman of the Committee on Government Operations shall furnish the Committee on House Administration information with respect to any study or investigation intended to be financed from such funds.

SEC. 3. The authorization granted by this resolution shall expire immediately prior to noon on January 3, 1978.

SEC. 4. Funds authorized by this resolution shall be expended pursuant to regulations established by the Committee on House Administration in accordance with existing law.

With the following committee amendment:

That effective January 3, 1977, expenses of investigations, studies, and oversight responsibilities and functions to be conducted pursuant to rule X, clause 2, paragraphs (b)(1), (b)(2), and (c) (relating to general oversight responsibilities), clause 4(c) (relating to additional functions of the Committee on Government Operations), and rule XI, clause 1(b) (relating to the authorization of investigations and studies), by the Committee on Government Operations, acting as a whole or by subcommittee, not to exceed $1,645,598, including expenditures—

(1) for the employment of investigators, attorneys, and clerical, stenographic, and other assistants;

(2) for the procurement of services of individual consultants or organizations thereof pursuant to section 202(i) of the Legislative Reorganization Act of 1946, as amended (2 U.S.C. 72a(i)); and

(3) for specialized training, pursuant to section 202(j) of such Act, as amended (2 U.S.C. 72a(j)), of the committee staff personnel performing professional and nonclerical functions;

shall be paid out of the contingent fund of the House on vouchers authorized by such committee, signed by the chairman of such committee, and approved by the Committee on House Administration. Not to exceed $15,200 of the total amount provided by this resolution may be used to procure the temporary or intermittent services of individual consultants or organizations thereof pursuant to section 202(i) of the Legislative Reorganization Act of 1946, as amended (2 U.S.C. 72a(i)); and not to exceed $2,000 of such total amount may be used to provide for specialized training, pursuant to section 202(j) of such Act, as amended (2 U.S.C. 72a(j)), of staff personnel of the committee performing professional and nonclerical functions; but neither of these monetary limitations shall prevent the use of such funds for any other authorized purpose.

SEC. 2. The chairman of the Committee on Government Operations shall furnish the Committee on House Administration information with respect to any study or investigation intended to be financed from such funds.

SEC. 3. The authorization granted by this resolution shall expire immediately prior to noon on January 3, 1978.

SEC. 4. Funds authorized by this resolution shall be expended pursuant to regulations established by the Committee on House Administration in accordance with existing law.

The committee amendment was agreed to.

Mr. DENT. Mr. Speaker, I move the previous question on the resolution.

The previous question was ordered.

The resolution was agreed to.

A motion to reconsider was laid on the table.

PROVIDING FUNDS FOR EXPENSES OF INVESTIGATIONS AND STUDIES TO BE CONDUCTED BY COMMITTEE ON INTERSTATE AND FOREIGN COMMERCE

Mr. DENT. Mr. Speaker, by direction of the Committee on House Administration, I offer a privileged resolution (H. Res. 283) and ask for its immediate consideration.

The Clerk read the resolution, as follows:

H. RES. 283

Resolved, That, effective from January 3, 1977, not to exceed $4,094,075 shall be paid out of the contingent fund of the House for the expenses of the investigations and studies to be conducted pursuant to the rules of the House by the Committee on Interstate and Foreign Commerce, acting as a whole or by subcommittee, including expenditures for the employment of investigators, attorneys, individual consultants or organizations thereof, and clerical, stenographic, and other assistants. Such payment shall be made on vouchers authorized by such committee, signed by the chairman of such committee and approved by the Committee on House Administration. Not to exceed $425,000 of the amount provided by this resolution may be used to procure the temporary or intermittent services of individual consultants or organizations thereof pursuant to section 202(i) of the Legislative Reorganization Act of 1946 (2 U.S.C. 72(i)).

SEC. 2. Of the total amount provided by this resolution, not to exceed the following amounts, shall be made available for the expenses of the following subcommittees of the Committee on Interstate and Foreign Commerce, in accordance with this resolution:

(a) Subcommittee on Oversight and Investigations, $898,000;

(b) Subcommittee on Energy and Power, $705,230;

(c) Subcommittee on Health and the Environment, $471,200;

(d) Subcommittee on Communications, $498,000;

(e) Subcommittee on Transportation and Commerce, $370,000; and

(f) Subcommittee on Consumer Protection and Finance $399,645.

The amounts specified in this section shall be paid on vouchers authorized by such committee, signed by the chairman of such committee or subcommittee, and approved by the Committee on House Administration.

SEC. 3. No part of the funds authorized by this resolution shall be available for expenditure in connection with the study or investigation of any subject which is being investigated for the same purpose by any other committee of the House, and the chairman of the Committee on Interstate and Foreign Commerce shall furnish the Committee on House Administration information with respect to any study or investigation intended to be financed from such funds.

SEC. 4. Funds authorized by this resolution shall be expended pursuant to regulations established by the Committee on House Administration under existing law.

With the following committee amendment:

That, effective January 3, 1977, expenses of investigations and studies to be conducted by the Committee on Interstate and Foreign Commerce, acting as a whole or by subcommittee, not to exceed $3,197,000, including expenditures for the employment of investigators, attorneys, and clerical, and other assistants, and for the procurement of services of individual consultants or organizations thereof pursuant to section 202(i) of the Legislative Reorganization Act of 1946, as amended (2 U.S.C. 72a(i)), shall be paid out of such contingent fund of the House on vouchers authorized by such committee, signed by the chairman of such committee, and approved by the Committee on House Administration. Not to exceed $425,000 of the total amount provided by this resolution may be used to procure the temporary or intermittent services of individual consultants or organizations thereof pursuant to section 202(i) of the Legislative Reorganization Act of 1946, as amended (2 U.S.C. 72a (i)): but this monetary limitation on the procurement of such services shall not prevent the use of such funds for any other authorized purpose.

SEC. 2. No part of the funds authorized by this resolution shall be available for expenditure in connection with the study or investigation of any subject which is being investigated for the same purpose by any other committee of the House; and the chairman of the Committee on Interstate and Foreign Commerce shall furnish the Committee on House Administration information with respect to any study or investigation intended to be financed from such funds.

SEC. 3. The authorization granted by the resolution shall expire immediately prior to noon on January 3, 1978.

SEC. 4. Funds authorized by this resolution shall be expended pursuant to regulations established by the Committee on House Administration in accordance with existing law.

The committee amendment was agreed to.

Mr. DENT. Mr. Speaker, I move the previous question on the resolution.

The previous question was ordered.

The resolution was agreed to.

A motion to reconsider was laid on the table.

AUTHORIZING ADDITIONAL FUNDS FOR THE LEADERSHIP OFFICES, AND FOR OTHER PURPOSES

Mr. DENT. Mr. Speaker, by direction of the Committee on House Administration, I offer a privileged resolution (H. Res. 393) and ask for its immediate consideration.

The Clerk read the resolution, as follows:

H. RES. 393

Resolved, That (a) subject to the provisions of subsection (b), effective March 1, 1977, there shall be two additional employees in the office of the minority leader and one additional employee each in the offices of the majority whip and the chief deputy majority whip.

(b) The annual rate of compensation for any individual employed under subsection (a) shall not exceed the annual rate of basic pay of level IV of the Executive Schedule of section 5316 of title 5, United States Code, and until otherwise provided by law such compensation as may be necessary shall be paid from the contingent fund of the House.

SEC. 2. Effective March 1, 1977, and until otherwise provided by law, there shall be paid out of the contingent fund of the House such additional amounts as may be necessary for office personnel, rental or lease of necessary equipment, and other official expenses of each of the following officials of the House the following per annum amounts:

(1) The majority leader, $30,000.

(2) The minority leader, $30,000.

(3) The majority whip, $15,000.

(4) The minority whip, $15,000.

SEC. 3. (a) Effective March 1, 1977, and until otherwise provided by law, the per annum gross rate of compensation of the Postmaster of the House of Representatives shall be equal to the amount for level 13, step 5, of the House Employees Schedule.

(b) Until otherwise provided by law, such additional amounts as may be necessary to carry out subsection (a) of this section shall be paid out of the contingent fund of the House.

Mr. DENT (during the reading). Mr. Speaker, I ask unanimous consent that further reading of the resolution be dispensed with and that it be printed in the RECORD.

The SPEAKER. Is there objection to the request of the gentleman from Pennsylvania?

There was no objection.

With the following committee amendment:

That (a) subject to the provisions of subsection (b), effective March 1, 1977, there shall be two additional employees in the office of the minority leader, and one additional employee each in the offices of the majority whip and the chief majority whip.

(b) The annual rate of compensation for any individual employed under subsection (a) shall not exceed the annual rate of basic pay of level V of the Executive Schedule of section 5316 of title 5, United States Code, and until otherwise provided by law such compensation as may be necessary shall be paid from the contingent fund of the House.

SEC. 2. Effective March 1, 1977, and until otherwise provided by law, there shall be paid out of the contingent fund of the House such additional amounts as may be necessary for office personnel, and rental or lease of necessary equipment, of each of the following officials of the House the following per annum amounts:

(1) The majority leader, $30,000.

(2) The minority leader, $30,000.

(3) The majority whip, $15,000.

(4) The minority whip, $15,000.

SEC. 3. (a) Effective March 1, 1977, and until otherwise provided by law, the per annum gross rate of compensation of the Postmaster of the House of Representatives shall be equal to the amount for level 13, step 5, of the House Employees Schedule.

(b) Until otherwise provided by law, such additional amounts as may be necessary to carry out subsection (a) of this section shall be paid out of the contingent fund of the House.

Mr. DENT (during the reading). Mr. Speaker, I ask unanimous consent that the committee amendment be considered as read and printed in the RECORD.

The SPEAKER. Is there objection to the request of the gentleman from Pennsylvania?

There was no objection.

The SPEAKER. The gentleman from Pennsylvania (Mr. DENT) is recognized for 1 hour.

Mr. FRENZEL. Mr. Speaker, will the gentleman yield?

Mr. DENT. Before I yield to the gentleman from Minnesota (Mr. FRENZEL) I would like to clarify for the record, that an error was made in the printing of House Resolution 393 as amended. On page 2, line 22, the word deputy should be inserted after the word chief. So it should read chief deputy majority whip. I will be pleased to yield to the gentleman.

Mr. FRENZEL. I thank the gentleman for yielding.

I would like to invite the attention of the House to the fact that House Resolution 393 provides for four additional employees; two to go to the minority leader, one to the majority whip, and one to the chief majority whip. In addition, there are other sums appropriated or, rather, granted under this resolution: To the minority leader, $30,000; the majority leader, $30,000; the majority whip, $15,000; the minority whip, $15,000.

Section 3 provides for an increased salary for the Postmaster of the House. Mr. Speaker, section 3, I think, regarding the Postmaster is worthwhile. I think that particular employee has been skipped a couple of times, and I think that section 3 should be passed.

However, sections 1 and 2 provide extra employees and extra expense money for our leadership. I love and respect our leadership and think that they should have all the reasonable tools available to them to carry out their duties as are required in this House. However, the four additional employees that we will be creating under this resolution are to be compensated at a rate of about $47,500, more or less, and if that figure is inaccurate, I am sure that the chairman can make it accurate in later discussions. That is an awful lot of staff on top of on already large staff.

We have a great many employees in this House. We have a billion dollar budget for legislative expenses. We particularly have a lot of high-paid employees in this House. I can recall making a very strong case for the fact that the minority needed one-third of the committee staff around here for years and that, therefore, we should have more staff. Recently I have sobered up a little bit and decided that our less than 20 percent of the staff is probably adequate, and that we should reduce the majority staff until our staff equaled one-third of the total staff.

I hate to toll the mournful litany of what this House has done to the taxpayers, but I guess I will anyway because we never seem to remember. In the first instance, we raised our own pay, or allowed it to be raised, by $13,000, without a vote. Then we raised our office expenses by $5,000. Then we raised the pay of our chief staff assistants to $47,500. Then we increased the size of most of our committee budgets. And today we are creating four more positions of a very high-salaried nature and giving them more expense money.

Mr. Speaker, I believe that we have really done enough. I believe that our leadership has plenty of tools, plenty of personnel, and plenty of expense money to do its job in a responsible way.

The distinguished gentleman from Wisconsin (Mr. STEIGER) is going to offer a motion to recommit that will leave the extra positions and chop out the expense money.

I think that is the second-best alternative. I think his motion to recommit should be accepted, but really a better alternative is to vote the whole thing down and see if our leadership can struggle along on the resources which already are available to it.

Mr. Speaker, I would strongly urge that the House reject this resolution and I hope that we will have the opportunity to vote on it.

I thank the distinguished gentleman from Pennsylvania for yielding to me.

Mrs. FENWICK. Mr. Speaker, will the gentleman yield?

Mr. DENT. Yes, for purposes of debate I yield to the gentlewoman from New Jersey.

Mrs. FENWICK. I thank the gentleman for yielding.

Could we know a little more clearly the figures here? What is already the expenditure of these offices and how are they divided as between the minority and the majority parties?

Mr. THOMPSON. Mr. Speaker, will the gentleman yield?

Mr. DENT. I yield to the gentleman from New Jersey.

Mr. THOMPSON. Mr. Speaker, I asked the gentleman to yield because on behalf of the majority and the minority I appeared before the distinguished chairman of the subcommittee, the gentleman from Pennsylvania (Mr. DENT). At the moment the majority leader has two level 3 positions and one level 5 position. The lump sum allowance is $168,603. The minority leader has an identical amount. The majority whip has one level 3 and the minority whip has one level 3, for a total each of $173,661.

Mrs. FENWICK. Mr. Speaker, if the gentleman will yield further, I am a little confused, if the gentleman will forgive me. How could one level 3 and another level 3 total $173,000?

Mr. THOMPSON. It is dollars. No, the dollars are lump sum allowances, not for staff.

Mrs. FENWICK. Well, what are they for?

Mr. THOMPSON. They can be used for additional clerical staff or other matters.

Mrs. FENWICK. But I am confused. If I understood the gentleman correctly, he said the minority whip and the majority whip each had one level 3, and the total for that was $173,000.

Mr. THOMPSON. And in addition to the level 3 position they each have $173,661.

Mrs. FENWICK. For what?

Mr. THOMPSON. For staff and for other expenses which they have. Perhaps when I am finished answering the gentlewoman's question the gentleman from Pennsylvania will yield to the minority leader who will explain what he does with it. The proposed additions here are one for the majority, two level 4's for the minority leader, one for the majority whip, and one for the chief deputy whip, so they balance out.

Mr. STEIGER. Mr. Speaker, will the gentleman yield?

Mr. DENT. Yes, but before I do I would like to say that included in the sums the gentleman just mentioned are office expenses and equipment. It is not all salaries.

I yield to the gentleman from Wisconsin for debate purposes.

Mr. STEIGER. Mr. Speaker, I wonder if I could help the gentlewoman from New Jersey and the gentleman from New Jersey, because on the figures I went back and looked at the Clerk's report for fiscal year 1976, July 1 through September 30, 1976. The figures are in fact somewhat different from those which were given as I understand it on a 6-month basis by the gentleman from New Jersey. In fact the majority leader has $359,995, the whip has $323,525, and the minority leader has $359,995.

Mr. THOMPSON. Mr. Speaker, if the gentleman will yield further on how he calculates that, one can add the actual salary in with the lump sum or not. These figures are accurate.

Mr. STEIGER. My understanding is that these figures are accurate if the Clerk's report is accurate. If the Clerk's report is not accurate, we had better look at the Clerk's report.

Mr. RHODES. Mr. Speaker, if the gentleman will yield to me perhaps I can clarify a bit. Believe me, I wish the situation were actually clearer so we could know the answer a lot better than even I am going to be able to state it, but the payrolls of the majority leader and the minority leader and the Speaker's office are really divided into two parts. We have certain positions which are authorized by certain levels of pay. I think the gentleman from New Jersey stated there was a level 3 and a level 4 and a level 5 in the majority and minority leaders' offices. I do not think we have talked about the whip yet.

In addition to that there is a certain lump-sum appropriation which can be used and can be parceled out as the leaders desire to have it used and parceled out. I wish it were not that way. I would much rather have a certain amount of money that I can use any way that I can see fit as far as hiring people is concerned.

It would give me much more flexibility, but that is not the situation. The situation now is that we have the positions as set forth by the gentleman. I do not mind telling the House what I need these two positions for and perhaps the gentleman from Wisconsin and the gentleman from Minnesota will listen carefully as I do. There was an election in

November. The Republican Party did not win the Presidency. As a result of the fact that the Republican Party did not win the Presidency, certain facilities that were in the executive department, as far as research and so on and so forth, which used to be available to the Republican Party will no longer be available. They will be available to the Democratic Party; so as a result, it is rather necessary for the minority leader and the minority whip to beef up our staffs so we can hopefully fill in some of those gaps which were caused by the loss of the election in November.

I am really a little bit amazed that my good friends from Wisconsin and Minnesota did not take the time to ask me why I needed these positions. I would have been very glad to let them know, if they had asked.

Mr. THOMPSON. Mr. Speaker, will the gentleman yield?

Mr. DENT. I yield to the gentleman from New Jersey.

Mr. THOMPSON. Mr. Speaker, the discrepancy between the amount cited by the gentleman from Wisconsin and that which we used before the subcommittee of the gentleman from Pennsylvania (Mr. DENT) is caused simply by the fact that in the Clerk's report he adds in the value of the salaries of the two level 3 positions which the distinguished minority leader has and the one level 5 position and the lump-sum allowance and the official expense allowance, that comes out to the same amount.

Mr. STEIGER. Mr. Speaker, will the gentleman from Pennsylvania yield?

Mr. DENT. Yes, for purposes of debate only.

Mr. STEIGER. Mr. Speaker, I will say to my friend, the gentleman from Arizona, I am aware of the reason for the two additional staff. I am prepared at the appropriate point, Mr. Speaker, I will alert the House, to ask for a division of the committee amendment. Otherwise, a motion to recommit is not in order, which I had intended; so I do not want to disrupt the gentleman from Illinois (Mr. ROSTENKOWSKI). I do not want to disrupt the gentleman from Arizona (Mr. RHODES), or the gentleman from Indiana (Mr. BRADEMAS), or the distinguished majority leader, the gentleman from Texas (Mr. WRIGHT), on their additional personnel; but I do want the House to have a chance to vote on the $30,000 for the majority leader and the minority leader and the $15,000 for the majority and minority whips. That is a separate issue that can be determined by the House, because as I understand it the minority whip, for example, turned back—turned back in excess of $140,000 for the fiscal year 1976. The minority leader turned back in excess of $20,000. The majority leader turned back in excess of $18,000 and the majority whip turned back in excess of $60,000; so there is not, it seems to me, the same justification for an additional amount for office personnel, rental or lease of equipment and other official expenses, which is the language now in the resolution.

Mr. Speaker, I think the House would be well advised to say with respect to our leaders, for whom we have real affection and respect, that, "We do not think you need that extra money for those purposes. The personnel maybe you need."

Frankly, I think Robert Rota, the Postmaster, needs a raise. He has not had one in 6 years.

So, Mr. Speaker, I will ask for a separate vote on the committee amendment, on section 2 of the committee amendment, so we can separate out that issue. I will do that if I can.

The gentleman from New Jersey is quite right, and I am grateful to the gentleman for the further qualification and the gentleman's further response on this, because I think the figures do come out to the same; but the House ought to be aware that in the case of the majority leader it is $359,995. In the case of the majority whip it is $323,525. Those are substantial amounts of money available to the leadership.

As yet, Mr. Speaker, I am totally unpersuaded, because I see nothing in the commitee report that indicates that they need the additional $30,000.

Mr. THOMPSON. Mr. Speaker, will the gentleman from Pennsylvania yield for a parliamentary comment?

Mr. DENT. I yield to the gentleman.

Mr. THOMPSON. Mr. Speaker, the resolution which the gentleman from Pennsylvania has before us is a clean resolution in the sense it is one committee amendment. I gather what the gentleman has in mind is a motion to recommit and to strike something or other; is that correct?

Mr. STEIGER. If the gentleman from Pennsylvania will yield for debate I will say that yes, I had intended to offer a motion to recommit, to strike section 2—that is, the extra money—but I understand that with a committee amendment we cannot do that, so I will be forced to request of the Speaker, if it is possible, to divide the question and to have a separate vote on section 2 of the resolution.

PARLIAMENTARY INQUIRY

Mr. STEIGER. Mr. Speaker, a parliamentary inquiry.

The SPEAKER. The gentleman will state it.

Mr. STEIGER. I would like to inquire as to whether it is appropriate to ask for a separate vote and divide the resolution.

The SPEAKER. The answer is in the affirmative.

Mr. STEIGER. I thank the Speaker, and I make that request that it be divided and we have a separate vote on section 2.

Mr. DENT. Mr. Speaker, I would like to let the gentleman know the action taken by the committee. The committee debated this particular resolution, as it does all of them.

It is not unusual to have leftover moneys at the end of the year, because in some situations it is rather difficult to compute the exact amount of money which may be needed to sustain the necessary activities. So, it is not unusual for the leadership to have money left in their last year's appropriations.

We also took into consideration the fact that salaries are being raised around here, as they are all over the system, all over the bureaucracy. Almost everyone finding himself in the position of competing for staff and paying more for that staff than they did last year. We did set the pay ceiling at $47,500 rather than the $50,000 level as suggested in the original approach. In conclusion, I can only tell the gentleman that the committee voted unanimously for this resolution.

Mr. Speaker, I move the previous question on the amendment and on the resolution.

The SPEAKER. Does the gentleman from Wisconsin ask for a division of the question on section 2 of the committee amendment?

Mr. STEIGER. I demand a division on section 2, Mr. Speaker.

The previous question was ordered.

The SPEAKER. The question is on the remainder of the committee amendment, with the exception of section 2.

The committee amendment, with the exception of section 2, was agreed to.

The SPEAKER. The Clerk will report section 2 of the committee amendment.

The Clerk read as follows:

SEC. 2. Effective March 1, 1977, and until otherwise provided by law, there shall be paid out of the contingent fund of the House such additional amounts as may be necessary for office personnel, and rental or lease of necessary equipment, of each of the following officials of the House the following per annum amounts:

(1) The majority leader, $30,000.
(2) The minority leader, $30,000.
(3) The majority whip, $15,000.
(4) The minority whip, $15,000.

The SPEAKER. The question is on section 2 of the committee amendment.

The question was taken; and the Speaker announced that the ayes appeared to have it.

Mr. STEIGER. Mr. Speaker, I object to the vote on the ground that a quorum is not present and make the point of order that a quorum is not present.

The SPEAKER. Evidently a quorum is not present.

The Sergeant at Arms will notify absent Members.

The vote was taken by electronic device, and there were—yeas 276, nays 128, answered "present" 1, not voting 27, as follows:

The Clerk announced the following pairs:

Mr. Jones of Tennessee with Mr. Teague.
Mr. Brooks with Mr. Shipley.
Mr. Eckhardt with Mr. Diggs.
Mr. Ertel with Mr. Fraser.
Mr. Heftel with Mr. Conyers.
Mr. Milford with Mr. Koch.
Mr. Evans of Colorado with Mr. Clay.
Mr. Moffett with Mr. Mikva.
Mr. Roe with Mr. Sikes.
Mr. Stokes with Mr. Staggers.
Mrs. Spellman with Mr. Charles Wilson of Texas.

Messrs. CARNEY, ASPIN, CONTE, and BYRON changed their vote from "nay" to "yea."

Messrs. GLICKMAN, MARRIOTT, and BROWN of Ohio changed their vote from "yea" to "nay."

So section 2 of the committee amendment was agreed to.

The result of the vote was announced as above recorded.

The SPEAKER pro tempore. The question is on the resolution, as amended.

Mr. LATTA. Mr. Speaker, on that I demand the yeas and nays.

The yeas and nays were ordered.

The vote was taken by electronic device, and there were—yeas 276, nays 122, not voting 34, as follows:

The Clerk announced the following pairs:

Mr. Jones of Tennessee with Mr. Teague.

Mr. Heftel with Mr. Mikva.

Mrs. Spellman with Mr. Minish.

Mr. Staggers with Mr. Diggs.

Mr. Sikes with Mr. Carr.

Mr. Shipley with Mr. Clay.

Mr. Milford with Mr. Steed.

Mr. Moffett with Mr. Conyers.

Mr. Brooks with Mr. Stokes.

Mr. Barnard with Mr. Charles Wilson of Texas.

Mr. Eckhardt with Mr. Koch.

Mr. Roe with Mr. Lundine.

Mr. Burlison of Missouri with Mr. Allen.

Mr. Ertel with Mr. Evans of Colorado.

Mrs. LLOYD of Tennessee and Mr. ENGLISH changed their votes from "yea" to "nay."

So the resolution, as amended, was agreed to.

The result of the vote was announced as above recorded.

A motion to reconsider was laid on the table.

MESSAGE FROM THE SENATE

A message from the Senate by Mr. Sparrow, one of its clerks, announced that the Senate had passed a bill of the following title, in which the concurrence of the House is requested:

S. 1051. An act to amend the U.S. Grain Standards Act with respect to recordkeeping requirements and supervision fees, and to establish an advisory committee to provide advice to the Administrator of the Federal Grain Inspection Service, and for other purposes.

PERSONAL EXPLANATION

Mr. GILMAN. Mr. Speaker, on Monday, March 28, 1977, I was away on official business. Had I been present, I would have voted in the following fashion:

Rollcall No. 104, House Resolution 420, to establish a Select Committee on Congressional Operations, "nay."

PERMISSION FOR COMMITTEE ON INTERIOR AND INSULAR AFFAIRS TO HAVE UNTIL MIDNIGHT, FRIDAY, APRIL 1, 1977, TO FILE REPORTS ON H.R. 5306 AND H.R. 5117

Mr. UDALL. Mr. Speaker, I ask unanimous consent that the Committee on Interior and Insular Affairs may have until midnight Friday, April 1, 1977, to file reports on H.R. 5306 to amend the Land and Water Conservation Fund Act, and H.R. 5117, to provide temporary authorities to the Secretary of the Interior to facilitate emergency action to mitigate the impacts of the 1976–77 drought.

The SPEAKER pro tempore (Mr. McFALL). Is there objection to the request of the gentleman from Arizona?

There was no objection.

PERMISSION FOR COMMITTEE ON SCIENCE AND TECHNOLOGY TO HAVE UNTIL MIDNIGHT, FRIDAY, APRIL 1, 1977, TO FILE A REPORT ON H.R. 5101, ENVIRONMENTAL RESEARCH, DEVELOPMENT AND DEMONSTRATION AUTHORIZATION ACT OF 1978

Mr. FUQUA. Mr. Speaker, I ask unanimous consent that the Committee on Science and Technology may have until midnight, Friday, April 1, 1977, to file a legislative report to accompany the bill (H.R. 5101), the Environmental Research, Development and Demonstration Authorization Act of 1978.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from Florida?

There was no objection.

MAKING IN ORDER CONSIDERATION OF CONFERENCE REPORT ON H.R. 4800, EMERGENCY UNEMPLOYMENT COMPENSATION EXTENSION ACT OF 1977

Mr. CORMAN. Mr. Speaker, I ask unanimous consent that it may be in order to consider a conference report on the bill (H.R. 4800), the Emergency Unemployment Compensation Extension Act of 1977, at any time after it is filed.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from California?

There was no objection.

PROVIDING FOR CONSIDERATION OF H.R. 4895, AMENDING THE STRATEGIC AND CRITICAL MATERIALS STOCKPILING ACT

Mr. SISK. Mr. Speaker, by direction of the Committee on Rules, I call up House Resolution 451 and ask for its immediate consideration.

The Clerk read the resolution, as follows:

H. RES. 451

Resolved, That upon the adoption of this resolution it shall be in order to move that the House resolve itself into the Committee of the Whole House on the State of the Union for the consideration of the bill (H.R. 4895) to amend the Strategic and Critical Materials Stock Piling Act, and for other purposes. After general debate, which shall be confined to the bill and shall continue not to exceed one hour, to be equally divided and controlled by the chairman and ranking minority member of the Committee on Armed Services, the bill shall be read for amendment under the five-minute rule. At the conclusion of the consideration of the bill for amendment, the Committee shall rise and report the bill to the House with such amendments as may have been adopted, and the previous question shall be considered as ordered on the bill and amendments thereto to final passage without intervening motion except one motion to recommit with or without instructions.

The SPEAKER pro tempore (Mr. McFALL). The gentleman from California is recognized for 1 hour.

Mr. SISK. Mr. Speaker, I yield 30 minutes to the gentleman from Mississippi (Mr. LOTT), pending which I yield myself such time as I may consume.

Mr. Speaker, House Resolution 451 provides for the consideration of H.R. 4895 to amend the Strategic and Critical Materials Stock Piling Act. This is an open rule providing for 1 hour of general debate with the time divided between the chairman and ranking minority member of the Committee on Armed Services. The resolution also provides for one motion to recommit with or without instructions.

Mr. Speaker. H.R. 4895 amends the Strategic and Critical Materials Stock Piling Act to establish a stockpile procurement fund which would be funded from the sale of excess materials from the stockpile. Moneys deposited in this fund would then be earmarked to acquire future materials for the stockpile. Any acquisitions, of course, would be subject to the normal congressional authorization and appropriations process. Questions have been raised about the wisdom of establishing such a fund, but I am sure that any debate on this question can be handled during general debate on the bill.

H.R. 4895 also establishes a program coordinated by the General Services Administration to encourage the acquisition of strategic and critical materials through barter with foreign countries. Since the use of barter has not been very prevalent in the last few years, the bill also requires that reports on the efforts of Federal departments and agencies to acquire these strategic materials through barter be included within semiannual reports made to Congress under existing law.

The bill also requires specific rather than standing authorization for acquisition of materials.

Mr. Speaker, House Resolution 451 provides for the consideration of a bill of great importance to our Nation and I urge my colleagues to adopt it so that

we might proceed to the consideration of H.R. 4895.

Mr. LOTT. Mr. Speaker, I yield myself such time as I may consume.

Mr. Speaker, this is a 1-hour open rule providing for the consideration of H.R. 4895, the Strategic and Critical Materials Stock Piling Act Amendments of 1977.

The gentleman from California has outlined the major sections of the bill. It creates a special strategic and critical materials procurement fund to be financed from disposed sales. These moneys would be used to buy future stockpile materials, but this would be subject to the normal authorization and appropriation processes. A coordinated barter program is established to facilitate the acquisition of strategic and critical materials from foreign countries. Finally, the transfer of excess stockpile materials at fair market value is authorized as payment for the expenses of obtaining and refining of materials.

The bill does not provide any new spending authority or new budget authority, nor does it provide any new authorization of budget authority.

It has been reported that there are many items which are needed in our stockpile for national defense purposes but which we do not have. This report also indicates that procuring these items will cost billions of dollars. To help pad the drain from the Treasury, this legislation sets up a fund into which is deposited receipts from the sale of disposed stockpile materials. This fund will be independent of the General Treasury and will provide some assurance that money will be available for necessary purchases.

Additionally, the new barter system proposed by the measure will allow the United States to trade its surplus commodities to other countries for critical materials at a favorable exchange rate.

Mr. Speaker, I support this rule and urge its adoption so that we may proceed to consider and pass these welcome amendments to the Strategic and Critical Materials Stock Piling Act.

Mr. SISK. Mr. Speaker, I move the previous question on the resolution.

The previous question was ordered.

The resolution was agreed to.

A motion to reconsider was laid on the table.

PROVIDING FOR CONSIDERATION OF H.R. 4974, HEALTH PLANNING AND HEALTH SERVICES RESEARCH AND STATISTICS EXTENSION ACT OF 1977

Mr. LONG of Louisiana. Mr. Speaker, by direction of the Committee on Rules, I call up House Resolution 450 and ask for its immediate consideration.

The Clerk read the resolution, as follows:

H. RES. 450

Resolved, That upon the adoption of this resolution it shall be in order to move, section 402(a) of the Congressional Budget Act of 1974 (Public Law 93-344) to the contrary notwithstanding, that the House resolve itself into the Committee of the Whole House on the State of the Union for the consideration of the bill (H.R. 4974) to amend the Public Health Service Act to authorize appropriations for fiscal year 1978 for health planning and related programs. After general debate, which shall be confined to the bill and shall continue not to exceed one hour, to be equally divided and controlled by the chairman and ranking minority member of the Committee on Interstate and Foreign Commerce, the bill shall be read for amendment under the five-minute rule. At the conclusion of the consideration of the bill for amendment, the Committee shall rise and report the bill to the House with such amendments as may have been adopted, and the previous question shall be considered as ordered on the bill and amendments thereto to final passage without intervening motion except one motion to recommit.

The SPEAKER pro tempore. The gentleman from Louisiana (Mr. LONG) is recognized for 1 hour.

Mr. LONG of Louisiana. Mr. Speaker, I yield 30 minutes to the minority to the distinguished gentleman from Ohio (Mr. LATTA), pending which I yield myself such time as I may consume.

Mr. Speaker, House Resolution 450 provides for the consideration of H.R. 4974, the Health Planning and Health Services Research and Statistics Extension Act of 1977. The rule is an open rule with 1 hour of general debate. The rule also contains a waiver of points of order that may lie against consideration of the bill for failure to comply with section 402(a) of the Budget Act. This waiver is necessary, because the bill does contain two authorizations for fiscal year 1977 which would have had to been passed prior to May 15, 1977, in order to be in keeping with the budget process. These authorizations, however, are not necessary, because the amounts were previously appropriated. Therefore, after the rule is adopted the Committee on Interstate and Foreign Commerce will move to strike the 1977 authorizations and bring the bill into full compliance with the Budget Act.

H.R. 4974, provides for a 1-year extension of health planning and health research and health statistics programs, at essentially their existing level of funding. The authorization levels contained in the bill are 15 percent above the appropriation levels for fiscal year 1977. The Committee on Interstate and Foreign Commerce has proposed to extend these programs for a 1-year period in order to afford the new administration an opportunity to review and evaluate these programs.

Under the bill a total of $490.34 million is authorized to go to health systems agencies, State health planning and development agencies, rate regulation demonstration programs, centers for health planning, health facilities formula grants, and area health resources development funds. In addition the authorization includes funds for the National Health Services Research Center and the National Health Statistics Center.

Mr. Speaker, these programs were established in the Public Health Service Act which called for the development of a major new system of social institutions in health care throughout the country to be responsible for the public planning of our health care system. An excellent beginning has been made and I urge the adoption of this resolution and the bill, H.R. 4974, so that these programs can go forward and at the same time we can give the new administration an opportunity to review and make recommended changes in the near future.

Mr. LATTA. Mr. Speaker, I yield myself such time as I may consume.

Mr. Speaker, I agree with the remarks just made by the gentleman from Louisiana (Mr. LONG). I would like to point out to the Members of the House that there is one item that was not included in this rule which should be included, and that is the provision to recommit with or without instructions.

During the last Congress, the Members of the Committee on Rules had an understanding that this provision would be included in all of our rules, but this is not the case in this rule.

The problem arises in a limited number of cases, but it is very important that this provision be included in rules, for the consideration of bills.

Under a rule providing for a motion to recommit which does not include language "with or without instruction" a straight motion to recommit may be offered. In addition, a motion to recommit with instructions to amend a part of the bill not previously amended may be offered. However, a motion to recommit with instructions to only amend a part of the bill, which has already been amended, may not be offered. Thus, in a situation where an amendment in the nature of a substitute has been adopted, for example, a motion to recommit could not include any instructions. In order to avoid this problem, the rule can provide, and has provided in the past, for a motion to recommit with or without instructions. This language insures that a motion to recommit can include instructions in all situations.

Rules reported by the Committee on Rules in the latter part of the last Congress routinely provided for a motion to recommit with or without instructions.

Mr. Speaker, fair play alone should dictate that this policy not be changed by this Congress. I know the majority has the votes to do anything in this House that it would like, but I think fair play should prevail.

Even though we might be voted down every single time by the majority, the minority in this country still has certain rights, and certainly in this House we should have certain rights.

Mr. Speaker, we ought to have the right in the instance I have just mentioned to offer a motion to recommit with or without instructions. So in future cases we shall attempt to change these rules when this important provision is omitted.

Mr. Speaker, I have no requests for

time, and I reserve the balance of my time.

Mr. LONG of Louisiana. Mr. Speaker, I move the previous question on the resolution.

The previous question was ordered.

The resolution was agreed to.

A motion to reconsider was laid on the table.

AUTHORIZING PRINTING OF COMMITTEE PRINT ENTITLED "THE ACCOUNTING ESTABLISHMENT" AS A SENATE DOCUMENT

Mr. HAWKINS. Mr. Speaker, by direction of the Committee on House Administration, I call up the Senate concurrent resolution (S. Con. Res. 8) authorizing the printing of the committee print entitled "The Accounting Establishment" as a Senate document, and ask for its immediate consideration.

The Clerk read the Senate concurrent resolution, as follows:

Resolved by the Senate (the House of Representatives concurring), That the committee print of the Committee on Government Operations, Ninety-fourth Congress, entitled "The Accounting Establishment," prepared by its Subcommittee on Reports, Accounting, and Management, be printed as a Senate document, and that there be printed two thousand additional copies of such document for the use of that committee.

The SPEAKER pro tempore (Mr. MCFALL). The gentleman from California (Mr. HAWKINS) is recognized for 1 hour.

Mr. HAWKINS. Mr. Speaker this resolution, insofar as I know, has no opposition. It authorizes the printing as a Senate document of the committee print entitled "The Accounting Establishment' at a total cost of $39,082.20. There has been no opposition to the resolution in either body.

It is necessary that this document be printed at this time, because less than 50 copies are available. The Senate committee desires to hold a hearing on the subject matter, and it is for the purpose of the meeting that they have requested this printing, at this time together with the printing of an additional 2,000 copies. Other copies will be offered for public sale and will, I believe, return substantial amounts of the total cost of the printing to the Treasury.

Mr. Speaker, I ask for approval of the Senate concurrent resolution.

The Senate concurrent resolution was concurred in.

A motion to reconsider was laid on the table.

REPORT ON RESOLUTION PROVIDING FOR PRINTING OF SUBCOMMITTEE PRINT ENTITLED "GIVE YOURSELF CREDIT: GUIDE TO CONSUMER CREDIT LAWS"

Mr. HAWKINS, from the Committee on House Administration, submitted a privileged report (Rept. No. 95–145) on the concurrent resolution (H. Con. Res. 162) providing for the printing of 20,000 additional copies of the subcommittee print of the Subcommittee on Consumer Affairs of the Committee on Banking, Finance, and Urban Affairs entitled 'Give Yourself Credit: Guide to Consumer Credit Laws," which was referred to the House Calendar and ordered to be printed.

REPORT ON RESOLUTION AUTHORIZING PRINTING AS A HOUSE DOCUMENT OF THE DEDICATION CEREMONY OF PORTRAIT OF THE HONORABLE MELVIN PRICE

Mr. HAWKINS, from the Committee on House Administration, submitted a privileged report (Rept. No. 95–146) on the resolution (H. Res. 379) authorizing the printing as a House document of the dedication ceremony of the portrait of the Honorable MELVIN PRICE, chairman, Committee on Armed Services, which was referred to the House Calendar and ordered to be printed.

REPORT ON RESOLUTION PROVIDING FOR PRINTING OF REPORT OF SUBCOMMITTEE ON OVERSIGHT AND INVESTIGATIONS OF COMMITTEE ON INTERSTATE AND FOREIGN COMMERCE

Mr. HAWKINS, from the Committee on House Administration, submitted a privileged report (Rept. No. 95–147) on the resolution (H. Res. 246) providing for the printing as a House document of a report of the Subcommittee on Oversight and Investigations of the Committee on Interstate and Foreign Commerce, which was referred to the House Calendar and ordered to be printed.

REPORT ON RESOLUTION PROVIDING FOR PRINTING OF REPORT RELATING TO PROCUREMENT OF ADP RESOURCES

Mr. HAWKINS, from the Committee on House Administration, submitted a privileged report (Rept. No. 95–148) on the resolution (H. Res. 363) to provide for the printing of the report relating to procurement of ADP resources by the Federal Government, which was referred to the House Calendar and ordered to be printed.

PROVIDING FOR CONSIDERATION OF H.R. 4975, BIOMEDICAL RESEARCH EXTENSION ACT OF 1977

Mr. DODD. Mr. Speaker, by direction of the Committee on Rules, I call up House Resolution 449 and ask for its immediate consideration.

The Clerk read the resolution, as follows:

H. RES. 449

Resolved, That upon the adoption of this resolution it shall be in order to move that the House resolve itself into the Committee of the Whole House on the State of the Union for the consideration of the bill (H.R. 4975) to amend the Public Health Service Act to authorize appropriations for fiscal year 1978 for biomedical research and related programs. After general debate, which shall be confined to the bill and shall continue not to exceed one hour, to be equally divided and controlled by the chairman and ranking minority member of the Committee on Interstate and Foreign Commerce, the bill shall be read for amendment under the five-minute rule. At the conclusion of the consideration of the bill for amendment, the Committee shall rise and report the bill to the House with such amendments as may have been adopted, and the previous question shall be considered as ordered on the bill and amendments thereto to final passage without intervening motion except one motion to recommit.

The SPEAKER pro tempore. The gentleman from Connecticut (Mr. DODD) is recognized for 1 hour.

Mr. DODD. Mr. Speaker, I yield 30 minutes to the distinguished gentleman from Mississippi (Mr. LOTT), pending which I yield myself such time as I may consume.

Mr. Speaker, this rule is an open rule providing for 1 hour of debate on H.R. 4975, Biomedical Research Extension Act of 1975.

The purpose of this bill is to extend the programs and authorizations for 1 year under the National Cancer Act, the National Heart, Lung, and Blood Act, the National Research Service Award Act and that portion of the Public Health Service Act that deals with the National Library of Medicine.

The levels of authorization are equal to 115 percent of the actual appropriations for fiscal year 1977.

The total amount authorized under the bill would be slightly under $1.5 billion.

The Committee on Interstate and Foreign Commerce, Subcommittee on Health and the Environment, is seeking 1 year extensions for these programs in order to evaluate and review these programs and to give the new administration an opportunity to study these areas.

Mr. Speaker, I urge the adoption of House Resolution 449 in order that we might debate and vote on H.R. 4975.

Mr. LOTT. Mr. Speaker, I yield myself such time as I may consume.

Mr. Speaker, I thank the distinguished gentleman from Connecticut (Mr. DODD), the youngest Member in our history to be a member of the House Committee on Rules, for yielding me this time.

Mr. Speaker, as stated, this resolution provides a 1-hour open rule for the consideration of H.R. 4975, the Biomedical Research Extension Act of 1977.

This legislation extends the programs and authorizations of appropriations for 1 year through fiscal year 1978 under the National Cancer Act; National Heart,

Lung, and Blood Act; National Research Service Awards Act; and title II of the Public Health Service Act to support the National Library of Medicine.

The fiscal 1978 authorization of $1,499,785,150 represents a decrease from the fiscal 1977 authorization of $1.68 billion but a 15-percent increase over the fiscal 1977 appropriation of $1.3 billion.

Mr. Speaker, I know of no objections to the passage of this rule, and I support its adoption at this time.

Mr. DODD. Mr. Speaker, I yield myself 1 additional minute.

Mr. Speaker, I must point out that, being the second youngest member ever to serve on the Committee on Rules, I am proud to replace the gentleman from Mississippi (Mr. LOTT) in that unique category.

I have no further requests for time, Mr. Speaker, and I move the previous question on the resolution.

The previous question was ordered.

The resolution was agreed to.

A motion to reconsider was laid on the table.

PROVIDING FOR CONSIDERATION OF H.R. 4976, HEALTH SERVICE EXTENSION ACT OF 1977

Mr. DODD. Mr. Speaker, by direction of the Committee on Rules, I call up House Resolution 448 and ask for its immediate consideration.

The Clerk read the resolution, as follows:

Resolved, That upon the adoption of this resolution it shall be in order to move that the House resolve itself unto the Committee of the Whole House on the State of the Union for the consideration of the bill (H.R 4976) to amend the Public Health Service Act, the Community Mental Health Centers Act, title V of the Social Security Act, and the program of assistance for home health services to authorize appropriations for fiscal year 1978 for health services programs, and for other purposes. After general debate, which shall be confined to the bill and shall continue not to exceed one hour, to be equally divided and controlled by the chairman and ranking minority member of the Committee on Interstate and Foreign Commerce, the bill shall be read for amendment under the five-minute rule. At the conclusion of the consideration of the bill for amendment, the Committee shall rise and report the bill to the House with such amendments as may have been adopted, and the previous question shall be considered as ordered on the bill and amendments thereto to final passage without intervening motion except one motion to recommit.

The SPEAKER pro tempore. The gentleman from Connecticut (Mr. DODD) is recognized for 1 hour.

Mr. DODD. Mr. Speaker, I yield 30 minutes to the distinguished gentleman from Mississippi (Mr. LOTT) for the purposes of debate only, pending which I yield myself such time as I may consume.

Mr. Speaker, House Resolution 448 provides for consideration of H.R. 4976, the Health Service Extension Act of 1977. This bill would authorize $1.08 billion for fiscal 1978 for health services programs.

These programs are those authorized under the Public Health Service Act, the Community Mental Health Centers Act, title V of the Social Security Act, and the program of assistance for home health services.

The rule provided for in House Resolution 448 is a 1-hour open rule.

Mr. Speaker, the bill itself would extend the authorizations for fiscal 1978 at 115 percent of fiscal 1977 appropriations for the following health service delivery programs: grants to the States for comprehensive health services, hypertension, migrant health centers, community health centers, family planning, sudden infant death syndrome, hemophilia treatment centers, the provision of home health services, and title V of the Social Security Act (maternal and child health and crippled children's services). The bill would also continue the authority for blood separation centers and training in the provision of home health services for fiscal 1978.

H.R. 4976 makes minor revisions in the authorities for migrant health centers, community health centers, family planning research, community mental health centers, and hypertension programs. The bill also contains a series of technical and minor substantive amendments to the Health Professions Educational Assistance Act of 1976; the Alcohol Abuse and Alcoholism Prevention Treatment, and Rehabilitation Act of 1970, as amended; the Drug Abuse Office and Treatment Act of 1972, as amended; the Nurse Training Act of 1975; the Indian Health Care Improvement Act; and the Social Security Amendments of 1972.

Mr. Speaker, I urge adoption of the rule to allow for consideration of this bill by the full House.

Mr. LOTT. Mr. Speaker, I yield myself such time as I may consume.

Mr. Speaker, I believe the gentleman from Connecticut (Mr. DODD) has pretty well explained the rule. I might mention that it would also increase the authorization for maternal and child health and crippled children's services by 115 percent of the fiscal year 1977 appropriations and continue for fiscal year 1978 authority for blood separation centers.

Finally, the Public Health Services Act is amended to require HEW to take into account, in designating medically underserved populations, unusual local conditions which are a barrier to access or availability of personal health services.

The amount authorized for fiscal year 1978 in this measure is $1,082,512,300.

I might further say that I commend the gentleman from Florida (Mr. ROGERS), the chairman of the subcommittee for the work that gentleman has done in this area. I know that he is making a real effort toward getting good health legislation through this body and also is taking into consideration the conditions in the rural areas that are underserved medically.

Mr. Speaker, I know of no controversy surrounding the passage of this rule and I support its adoption.

Mr. DODD. Mr. Speaker, I have no requests for time.

Mr. Speaker, I move the previous question on the resolution.

The previous question was ordered.

The resolution was agreed to.

A motion to reconsider was laid on the table.

AMENDING STRATEGIC AND CRITICAL MATERIALS STOCK PILING ACT

Mr. BENNETT. Mr. Speaker, I move that the House resolve itself into the Committee of the Whole House on the State of the Union for the consideration of the bill (H.R. 4895) to amend the Strategic and Critical Materials Stock Piling Act, and for other purposes.

The SPEAKER pro tempore. The question is on the motion offered by the gentleman from Florida (Mr. BENNETT).

The motion was agreed to.

IN THE COMMITTEE OF THE WHOLE

Accordingly the House resolved itself into the Committee of the Whole House on the State of the Union for the consideration of the bill H.R. 4895. with Mr. BROWN of California in the chair.

The Clerk read the title of the bill.

By unanimous consent, the first reading of the bill was dispensed with.

The CHAIRMAN. Under the rule, the gentleman from Florida (Mr. BENNETT) will be recognized for 30 minutes, and the gentleman from South Carolina (Mr. SPENCE) will be recognized for 30 minutes.

The Chair recognizes the gentleman from Florida (Mr. BENNETT).

Mr. BENNETT. Mr. Chairman, I yield myself such time as I may consume.

Mr. Chairman, I have been chairman of the Stockpiling Subcommittee for a good number of years now, and procedures and processes before this committee led the committee to the conclusion that there should be some revisions made in the basic Stockpiling Act.

For one thing, Mr. Chairman, matters brought before the committee by the executive branch for declaration as surplus often were things that had only recently been acquired, which gave us some concern, as it logically should.

Another thing, when we were presented with disposal actions, we ofttimes found when we went into the disposal action hearings that in fact there had not been the proper paperwork and research on the bill.

A good example of this was opium. Opium came before us for disposal on the theory that there were substitutes for opium and on the theory that opium could be easily acquired. We found both of these statements made in the presentation of the executive branch to be

without foundation. We found that opium did not have a good substitute with regard to trauma and found that there were not very many countries that were willing to produce opium for us. As a result we had to have a very conservative bill with regard to that disposal request.

Then we found that there was a strong suspicion that the stockpile was being used to effect changes in market results, to fight inflation, or to have some objective other than the basic legislative criteria relative to having enough in the stockpile to defend ourselves in case of war.

Another thing that came up was the strong suspicion—and we have evidence in the hearings on this matter—that the stockpile was being misused in budgetary situations. When things looked bad in the budget, there was a tendency to rush in and ask to dispose of some things in the stockpile, purely to make the budget look good and not for any defense stockpiling purpose.

Then we found shifting criteria from time to time. We found the administration coming in at one time asking for things on the basis of a 5-year war, or a 3-year war, or a 1-year war, or a war which would involve a certain number of men; and shifting in all of this from time to time. For instance, they shifted from a 5-year to a 3-year war, and then to a 1-year war, and it was only at the insistence of the committee they finally went back to the criteria of having considerations based at least on a 3-year war.

Let us look for a few minutes at what this bill will do.

Mr. Chairman, the bill under consideration today has a very important and overall objective that every Member of this House should be vitally interested in. It will strengthen the control of the Congress with respect to the strategic and critical stockpile. This objective is accomplished in several ways.

First, the bill would require that funds appropriated for the acquisition of strategic and critical materials, for fiscal year 1978 and subsequent years, be specifically authorized by law. This would provide the Congress with an additional means of oversight and control over the acquisition of stockpile materials. In the past, too often the executive branch has purchased materials which later they have disclosed to be surplus. While the President would have full power and flexibility to determine the kinds and quantities of materials he would ask Congress to acquire, the Congress would hereafter review acquisition requests for need, adequacy or excessiveness in connection with an annual authorization and appropriations process.

Appropriations of funds for other stockpile functions such as transportation, maintenance, rotation, storage, refining, and processing of materials would continue to be made under a standing authorization, as is the case under existing law. Since these functions involve day-to-day operation of the stockpile, I believe that the standing authorization process is more appropriate.

Second, the bill would establish a separate fund within the Treasury to be known as the strategic and critical materials procurement fund. The source of money for this fund would come from the sales of materials declared excess from the strategic and critical materials stockpile by the Congress. The revenues realized from the sale of the materials, after the date of enactment of this bill, would be covered into the fund and be available only when authorized and appropriated by Congress for the procurement, transportation, maintenance, rotation, storage, refining, or processing of strategic and critical materials.

By placing these moneys in the fund rather than the general Treasury, to be used for other purposes, the possibility of the stockpile being used for purposes other than originally intended will be eliminated. It will encourage the maintenance of a balanced stockpile, since moneys in the fund can only be used for stockpile purposes. Most important, it will improve management of the stockpile through an assured source of funds for future materials acquisitions.

We are all mindful that the only objective of the Strategic and Critical Materials Stock Piling Act was to insure an adequate supply of critical materials for the security of the Nation. This bill, and particularly section 4, is intended to assist in meeting that objective.

Third, the bill would establish within the General Services Administration—GSA—a program to acquire strategic and critical stockpile materials through barter with foreign countries, provide for coordination of the program by the Administrator of GSA, and require the inclusion of the operation of the barter program within semiannual reports made to Congress under existing law.

The bill would not change any existing law authorizing the acquisition of strategic and critical materials through barter, nor would additional barter authority be created. Specific authority to engage in barter activities with foreign suppliers is currently contained in three statutory provisions, namely, Public Law 85–931, as amended (7 U.S.C. 1692) which authorizes the Secretary of Agriculture to barter agriculture commodities owned by the Commodity Credit Corporation in exchange for strategic and critical materials, the Foreign Assistance Act of 1961, as amended (22 U.S.C. 2423) which authorizes the President to barter defense articles under the Foreign Military Sales Act in exchange for strategic raw materials and agencies of the Federal Government may use the authority of the Federal Property and Administrative Services Act of 1949 (40 U.S.C. 485(f)) to exchange surplus property for strategic and critical materials.

While the above authority exists in statutes separate from the Strategic and Critical Materials Stock Piling Act, the Congress has not provided a program which aims to coordinate and encourage the use of barter as a device to acquire strategic and critical materials. This bill would provide such a coordinated program to be administered by the Administrator of General Services.

Fourth, the bill would also make available excess materials in the inventories maintained in the national stockpile, supplemental stockpile and Defense Production Act for transfer, at fair market value, for the purpose of acquiring strategic and critical materials and for other functions. This authority currently exists in riders in appropriations laws—for example, Public Law 94–363. However, this highly meritorious provision deserves to be incorporated into permanent law. Accordingly, section 3 of the bill would include this provision as section 8(b) of the Strategic and Critical Materials Stock Piling Act.

Mr. Speaker, it seems to me this legislation is long overdue. It would give Congress the grip and handle on the stockpile situation of our country to protect our national defense, and I urge passage of this bill.

Mr. Speaker, I wonder if the other side would have some remarks they would like to make at this time.

Mr. SPENCE. Mr. Chairman, I yield myself such time as I may consume.

Mr. Chairman, the current law we are dealing with is called the Strategic and Critical Materials Stock Piling Act (50 U.S.C. 98a). The purpose of the law is to assure that we have sufficient materials "to supply the industrial, military and naval needs of the country for common defense" and to prevent "a dangerous and costly dependence of the United States upon foreign nations for supplies of these materials in times of national emergency."

Presently the law operates in this way. At the direction of the President, the Administrator of GSA purchases from domestic and foreign sources and excesses from our other Government agencies the needed materials. Also, the President determines which materials are no longer needed in the stockpile. Then he authorizes the Administrator of the GSA to dispose of these materials. Notice is given in the Federal Register 6 months prior to these disposals. Congress has to approve these disposals. The funds then go into the General Treasury of this country.

Ninety-five percent of the stockpile we have acquired was acquired prior to 1959. Sales from the stockpile since 1958 have amounted to $7.1 billion.

A recent study initiated by the National Security Council found that many items we have in our stockpile today are not required. Also, the study found that we need many items which are not currently in the stockpile. The cost of acquiring these new items greatly exceeds the value of the items which are presently available for disposal.

In the past, disposals could be used, as our chairman has said, as a budget balancing device and to manipulate the

market price of certain materials. The stockpile was never intended to be used in this way.

This bill, H.R. 4895, will give Congress more oversight and control over acquisitions. This bill calls upon the GSA to better utilize bartering to acquire these materials. Also, it sets up a fund for the funds derived from these sales from the stockpile. This will prevent a playing of games with the setting of goals for the stockpile, budget balancing devices, and also market manipulations.

Mr. Chairman, I ask this body to vote "aye" on H.R. 4895.

Mr. MOORHEAD of Pennsylvania. Mr. Chairman, this bill troubles me, for two reasons.

First, it would make a rather significant change in our longstanding, basic stockpile legislation at a time when the new Carter administration is reviewing this entire matter—a review that will take into account the carefully developed recommendations of the National Commission on Supplies and Shortages. I share the deep reservations of the gentleman from Florida (Mr. BENNETT) on the use of stockpiles to influence prices, or sale of stockpile materials to give the appearance of balancing the budget. But we simply cannot rationally separate any longer the concept of a stockpile existing solely for national defense emergencies and the stockpile as an element of the Nation's economic defenses against cartels, supply disruptions, and the generally unpredictable actions and policies of the mainly less-developed producing countries.

I do not mean to suggest any endorsement at this point of the recommendation of the Commission on Supplies and Shortages for a new "economic stockpile." I do suggest that we should wait a while before making any changes in our stockpiling legislation, pending an administration review of the entire matter.

My second reservation is even more fundamental, and it arises from some of the work we are doing in the Subcommittee on Economic Stabilization of the Banking Committee, of which I have the honor to be chairman. The report on this bill states, on page 7, that "the bill has no inflationary impact." This is based on the fact that the bill would not, by itself, have any budgetary effect, and the statement is true as far as it goes. But the bill could have an inflationary impact all the same—just as other pieces of legislation have inflationary impact when none is intended or foreseen.

This bill requires that all receipts from sale of excess stockpile materials be placed in an earmarked fund in the Treasury for use only for purchases of other stockpile materials deemed to be required. Will this not inevitably give rise to the temptation to nudge close decisions toward purchase of more materials—and hence the propping of prices in world and domestic markets? The committee report itself recognizes this. It says on page 5:

Since moneys in the fund can only be used for stockpile purposes, the acquisition of needed materials will be expedited rather than leaving moneys in the fund as unexpended balances.

Other things equal, purchases for the stockpile raise prices, though that may not be their original purpose. The potential inflationary impact of this bill is its mechanism for expediting, and probably increasing, stockpile purchases.

Congress would have to approve each purchase, under this bill, and I applaud that change. But I can see temptations to purchase at times of soft markets when there is unexpended money lying around. We are soon going to have to recognize that achievement of a more stable general price level—that is, control of inflation—requires that some prices fall to offset those that will inevitably rise.

Mr. BENNETT. Mr. Chairman, we have no further request for time.

Mr. SPENCE. Mr. Chairman, we have no further request for time.

The CHAIRMAN. The Clerk will read.

The Clerk read as follows:

H.R. 4895

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That section 3 of the Strategic and Critical Materials Stock Piling Act (50 U.S.C. 98b) is amended—

(1) by striking out the period at the end of paragraph (e) and inserting in lieu thereof "; and "; and

(2) by adding after such paragraph the following new paragraph:

"(f) establish a program which (1) shall provide for the acquisition of strategic and critical materials from foreign countries through barter of goods owned by the United States, and (2) shall include provisions adequate to assure the active cooperation and participation of each appropriate department and agency, as determined by the President, having custody of goods owned by the United States which are deemed suitable for barter with foreign countries.".

SEC. 2. Section 4 of the Strategic and Critical Materials Stock Piling Act (50 U.S.C. 98c) is amended by adding at the end the following new sentence: "Each report submitted under this section shall include a detailed report on the efforts of each appropriate department and agency (as determined by the President under section 3(f)) to acquire strategic and critical materials through barter with foreign countries under the program established pursuant to section 3(f).".

SEC. 3. Section 8 of the Strategic and Critical Materials Stock Piling Act (50 U.S.C. 98g) is amended to read as follows:

"SEC. 8. (a)(1) No funds may be appropriated or obligated for procurement of materials under this Act unless funds for such procurement have been specifically authorized by law.

"(2) There is authorized to be appropriated, out of any money in the Treasury not otherwise appropriated, for transportation, maintenance, rotation, storage, refining, and processing of the materials to be acquired under this Act, such sums as the Congress, from time to time, may deem necessary to carry out the provisions of this Act.

"(3) Funds appropriated for procurement of materials under this Act, and funds appropriated for transportation, maintenance, rotation, storage, refining, and processing materials to be acquired under this Act, including funds heretofore appropriated for such purposes, shall remain available to carry out the purposes for which appropriated until expended.

"(b) Excess materials in the inventory maintained under the Defense Production Act of 1950 (50 U.S.C. App. 2061-2166) and excess materials in the national stockpile and supplemental stockpile, the disposition of which is authorized by law, shall be available, without reimbursement, for transfer at fair market value as payment for expenses (including transportation and other accessorial expenses) of acquisition of materials, or of refining, processing, or otherwise beneficiating materials, or of rotating materials, pursuant to section 3.".

SEC. 4. Section 9 of the Strategic and Critical Materials Stock Piling Act (50 U.S.C. 98h) is amended to read as follows:

"SEC. 9. (a) There is established in the Treasury of the United States a separate fund to be known as the Strategic and Critical Materials Procurement Fund (hereinafter in this section referred to as the 'fund'). All moneys received after the effective date of this section on account of sales of materials under this Act shall be covered into the fund.

"(b)(1) Moneys covered into the fund shall be available, when appropriated therefor, only for the procurement, transportation, maintenance, rotation, storage, refining, or processing of materials under this Act.

"(2) Any moneys covered into the fund which are appropriated shall remain available, without fiscal year limitation, for the purposes for which they are appropriated until they are expended.

"(c) The Administrator of General Services shall submit a report to the Congress not later than the first day of January of each year on the financial condition and the results of the operation of the fund during the preceding fiscal year and on its expected condition and operations during the next fiscal year. Such report shall be printed as a House document of the session of the Congress to which the report is made.".

SEC. 5. (a) Except as provided in subsection (b), the amendments made by this Act shall take effect on the date of enactment of this Act.

(b) The amendment made by section 3 shall apply with respect to fiscal year 1978 and each fiscal year thereafter.

Mr. BENNETT (during the reading). Mr. Chairman, I ask unanimous consent that the bill be considered as read, printed in the RECORD, and open to amendment at any point.

The CHAIRMAN. Is there objection to the request of the gentleman from Florida?

There was no objection.

Mr. MILLER of Ohio. Mr. Chairman, I move to strike the requisite number of words.

Mr. BENNETT. Mr. Chairman, will the gentleman yield?

Mr. MILLER of Ohio. I yield to the gentleman from Florida.

Mr. BENNETT. Mr. Chairman, I would like to pay tribute to the gentleman from Ohio. I thought he would like to say something about this bill because a part of this bill, a large part of this bill was

inspired by his remarks when the stockpiling bill came up a year ago or so. Then the gentleman suggested we really ought to pursue the idea of acquiring materials by barter. So I would like to pay tribute to him and say that for some of us in Congress who feel at times that our speeches fall on deaf ears, his speech did not fall on deaf ears and our committee pursued this bill largely because of his own expressed interest.

Mr. MILLER of Ohio. Mr. Chairman, I greatly appreciate the remarks of the gentleman from Florida and I think the gentleman should be highly commended for his outstanding work on the bill before the House.

I support the bill, H.R. 4895, unequivocally.

I am pleased and gratified that the committee has included in this bill a provision to establish within the General Services Administration a program to acquire strategic and critical raw materials through barter with foreign countries. GSA would coordinate existing barter authorities and better utilize them to procure strategic materials for future use.

As many of the Members may recall, on December 11, 1974, I offered an amendment to the Foreign Assistance Act that added language authorizing the President, when he determines it in the national interest, to extend assistance to an aid recipient country when that country agrees to exchange necessary or strategic raw material it controls, for such assistance. Necessary or strategic raw materials were defined to include petroleum, other fossil fuels, minerals, or any other natural substance in short supply in the United States.

My amendment was agreed to overwhelmingly by a recorded vote of 244 to 136. Subsequently, the language was retained in conference with the Senate, and became incorporated as section 32 of the Foreign Assistance Act of 1974 (Public Law 93–559).

By approving my barter amendment to the foreign assistance program, the Congress recognized two very important issues. One, the United States should get something in return for the billions of dollars we send overseas each year in the form of foreign aid. Barter arrangements, coordinated and utilized properly, can better jutsify foreign aid expenditures. Second, the Congress realized the United States faces critical shortages of basic raw materials necessary to the operation and growth of our economy. Through barter agreements with foreign aid recipients, this country can gain access to the abundant yet undeveloped natural resources that exist around the world. In doing so, we enhance our strategic stockpiles at less cost, and assure that our vulnerability to future world market disruptions in the flow of raw materials is minimized.

I regret that to date this and other existing authorities have not been utilized by any administration as they should. Because of this, the program to encourage and coordinate a barter system is necessary and I commend the committee for its recognition and action in this regard.

Mr. Chairman, I thank the gentleman from Florida (Mr. BENNETT) and I appreciate very much having the opportunity to discuss this matter with my colleagues.

It is important that we pass this bill today and give the administration the true impression that the Congress means business about bartering.

The CHAIRMAN. Are there any amendments? If not, under the rule, the Committee rises.

Accordingly the Committee rose; and the Speaker having resumed the chair, Mr. BROWN of California, Chairman of the Committee of the Whole House on the State of the Union, reported that that Committee, having had under consideration the bill (H.R. 4895) to amend the Strategic and Critical Materials Stock Piling Act, and for other purposes, pursuant to House Resolution 451, he reported the bill back to the House.

The SPEAKER. Under the rule, the previous question is ordered.

The question is on the engrossment and third reading of the bill.

The bill was ordered to be engrossed and read a third time, and was read the third time.

The SPEAKER. The question is on the passage of the bill.

The question was taken; and the Speaker announced that the ayes appeared to have it.

Mr. MILLER of Ohio. Mr. Speaker, I object to the vote on the ground that a quorum is not present and make the point of order that a quorum is not present.

The SPEAKER. Evidently a quorum is not present.

The Sergeant at Arms will notify absent Members.

The vote was taken by electronic device, and there were—yeas 373, nays 24, not voting 35, as follows:

The Clerk announced the following pairs:

Mr. Teague with Mr. Abdnor.
Mr. Heftel with Mr. Eckhardt.
Mr. Shipley with Mr. Brown of Michigan.
Mr. Brooks with Mr. Evans of Georgia.
Mr. Ertel with Mr. Leggett.
Mr. Milford with Mr. Lent.
Mr. Wirth with Mr. McEwen.
Mr. Stokes with Mr. Mikva.
Mr. Clay with Mr. Roe.
Mr. John L. Burton with Mr. Michel.
Mr. Dent with Mr. Quie.
Mr. Dodd with Mr. Symms.
Mr. Pickle with Mr. Charles Wilson of Texas.
Mr. Staggers with Mr. Fraser.
Mr. Koch with Mr. Steiger.
Mr. Jones of Tennessee with Mr. Rose.
Mr. Barnard with Mr. Evans of Colorado.

Messrs. MOSS, MOFFETT, NOLAN, KOSTMAYER, WEISS, OTTINGER, RANGEL, STARK, and MILLER of California changed their vote from "yea" to "nay."

So the bill was passed.

The result of the vote was announced as above recorded.

A motion to reconsider was laid on the table.

GENERAL LEAVE

Mr. BENNETT. Mr. Speaker, I ask unanimous consent that all Members may have 5 legislative days in which to revise and extend their remarks on the bill just passed.

The SPEAKER pro tempore (Mr. BROWN of California). Is there objection to the request of the gentleman from Florida?

There was no objection.

HEALTH PLANNING AND HEALTH SERVICES RESEARCH AND STATISTICS EXTENSION ACT OF 1977

Mr. ROGERS. Mr. Speaker, I move that the House resolve itself into the Committee of the Whole House on the State of the Union for the consideration of the bill (H.R. 4974) to amend the Public Health Service Act to authorize appropriations for fiscal year 1978 for health planning and related programs.

The SPEAKER pro tempore. The question is on the motion offered by the gentleman from Florida (Mr. ROGERS).

The motion was agreed to.

IN THE COMMITTEE OF THE WHOLE

Accordingly the House resolved itself into the Committee of the Whole House on the State of the Union for the consideration of the bill H.R. 4974, with Mr. DANIELSON, in the chair.

The Clerk read the title of the bill.

By unanimous consent, the first reading of the bill was dispensed with.

The CHAIRMAN. Under the rule, the gentleman from Florida (Mr. ROGERS) will be recognized for 30 minutes, and the gentleman from Kentucky (Mr. CARTER) will be recognized for 30 minutes.

The Chair recognizes the gentleman from Florida, (Mr. ROGERS).

Mr. ROGERS. Mr. Speaker, I yield myself such time as I may consume.

Mr. Chairman, H.R. 4974 extends for 1 year without modification the legislative authorities for the health planning and resources development programs authorized by titles XV and XVI of the Public Health Service Act and for health services research and health statistics programs authorized by title III. It would authorize appropriations for the planning programs for 1978 at the same level at which they were authorized for 1977, because the planning authorizations are based upon formulas related to the population served by the programs supported and because these are new programs in their initial implementation phase needing additional appropriations for new agencies and activities as well as sufficient appropriations to compensate for the effects of inflation on existing agencies and activities. The other programs would be authorized at a level which is 115 percent of 1977's appropriation; the committee approach to long-standing stable programs.

Titles XV and XVI of the Public Health Service Act:

Require the creation of a National Council on Health Planning and Development, specify national health priorities, and require the development of national guidelines for health planning;

Authorize Federal support for a system of local health planning agencies, called health systems agencies, HSA's. They required the Governors of the States to divide the country into health service areas in accordance with specified requirements. This has been done with designation of 202 areas throughout the country. An HSA is then designated for each area. The legal structure, staffing, governing body characteristics, functions, and responsibilities of these health systems agencies are also specified;

Authorize support in each State of a State health planning and development agency, SHPDA, and specifies the structure, organization, functions, and responsibilities of these agencies. In addition, each State is required to have a statewide health coordinating council, SHCC, which is to advise and supervise the State's health planning and development agency. Finally, provide authority for six demonstration programs in State rate regulations;

Provide support for a system of centers for health planning to serve as back-up agencies to the HSA's, and requirements applicable to HEW respecting technical assistance to, and evaluation of, the health planning programs; and

Make available grants, loans, and loan guarantees for the modernization of medical facilities, construction of new facilities—inpatient facilities may be assisted only in areas of rapid recent population growth—and conversion of existing medical facilities for the provision of new health services. The construction programs are to be administered by the State health planning and development agencies and the assistance is to be used only in ways which are consistent with health plans drawn by the State agencies.

The law also provides an extension of the authority for the Secretary of HEW to establish National Centers for Health Services Research and Health Statistics, and, acting through them, to engage in and support various health services research and health statistical activities.

H.R. 4974 contains one quite inadvertent violation of the requirements of the budget process—we reduced an existing authorization for fiscal year 1977 to a lower level, which is considered as providing an authorization for fiscal year 1977. I will at the appropriate time offer an amendment to correct this.

These health planning programs have been undergoing their initial implementation and development during the last 2½ years. On the whole the committee is impressed that this effort has proceeded satisfactorily. The law requires the development of a major new system of social institutions at the State and areawide level responsible for shaping the development of the health system in accordance with community needs. To write the appropriate regulations and develop the necessary organizations is a large job which the committee feels has been well begun during this time. There are criticisms, most of which are covered in the committee's report on the legislation, and it is clear that a variety of amendments to the legislation will be desired at such time in the near future as the committee undertakes substantive revision of it. In the meantime the committee feels that HEW should expedite the writing and publication of regulations, the formal designation of the planning agencies, and the development and use of an effective evaluation process for health system agencies and State agencies.

The most serious criticism of the implementation of the act to date has concerned the deficiencies in the regulations published by the last administration implementing the certificate-of-need provisions. These regulations contain a variety of omissions, such as the omission of home health agencies and ambulatory care programs, which the committee feels are inconsistent with the

law and legislative history. We have corresponded with the new administration and received some assurance of changes and assurance of continued study of these issues by the new administration. It is to be hoped that the new administration will be able to provide policy to the committee in the near future on the appropriate scope and coverage of certificate of need and indicate how much of this can be achieved without legislative change.

Particularly disturbing was the omission of home health agencies from coverage by certificate of need since these are clearly within the legislative intent, see for instance the conference committee report on Public Law 94-641.

Mr. Chairman, this is reasonable legislation which was supported by all witnesses before the committee during its consideration. It allows the new administration sufficient time to study these programs and develop their positions on them and for the committee to respond to those positions. I urge its passage.

Mr. CARTER. Mr. Chairman, I yield myself such time as I may consume.

Mr. Chairman, I support this legislation. It extends for 1 fiscal year the authorizations for the National Health Planning and Resources Development Act of 1974 which was signed into law in January of 1975. The objective of the law is to develop an effective planning network at the local level to assure rational planning for health services and resources development.

This means, in effect, Mr. Chairman, that in one area perhaps there should be only one expensive cobalt machine. In that way we can save the county, States or other areas for which such cobalt machines are used, a great deal of money. In other words, we should have one center for such expensive diagnostic and treatment methods as this.

Mr. Chairman, of course, this legislation also has to do with the allocation of hospital beds and of health facilities. It is somewhat controversial. There are many physicians, and many people, who do not agree with this legislation and there are some court cases involving it. However, there is no question but that we have 60,000 more hospital beds today than we should have. Each one of those beds is costing the public about $30,000 a year.

This is one of the reasons why health care is so expensive today. I myself think that this bill is very necessary in order to save money for the patient and for the people and for the public throughout our country.

Next year, I hope we will review this planning law very carefully.

In particular—I am interested in reevaluating the appropriateness of the definitions in the law of provider—indirect provider—and consumer—as they relate to membership on the H-S-A's governing boards. It has been pointed out to me that some of these categories have been defined so tightly that they have excluded individuals from participation in the category in which they ought to belong. Also, I think we need to reconsider the proportionate representation on these boards, called for in existing law. Of course, these are controversial issues, and we shall have to consider them carefully.

The other two programs which are included in this legislation have been part of our health laws for a longer period of time—and we have revised these authorities to reflect current needs over the years.

At this time—the National Center for Health Services Research is involved in research in a number of important areas which relate to our health care delivery system.

For example, the Center has undertaken studies in areas of financing and distribution of health manpower, as well as the design, construction, organization, and costs of health facilities and equipment. Their work is valuable both to Federal policymakers, and to those at the State and local levels, who need such information for effective program operation.

The National Center for Health Statistics is the other important informational resource program which will be extended under this legislation.

It is the principal organization within the Government responsible for collecting health statistics.

This center is actively involved in the study, development, and maintenance of health statistical systems and a variety of specific programs on illness, accidental injuries, disability, natality, mortality, health facilities, health services, and so on.

I urge the Members to support extension of all these programs for the next fiscal year as provided in this legislation.

Mr. Chairman, in general, the subcommittee and committee agreed to extend all these expiring programs at a level of authorization which is 115 percent above the fiscal year 1977 appropriation.

The one exception is the health planning legislation. Since this program is not yet fully implemented, the committee decided to recommend an authorization level for fiscal year 1978 which is the same as the current authorization level for fiscal year 1977. Thus, the total amount authorized for health planning and resources development is $431 million for fiscal year 1978.

Therefore, the grand total of this bill for fiscal year 1978 authorizations is $490,340,000.

Mr. Chairman, I urge favorable consideration of H.R. 4974, and I reserve the remainder of my time.

The CHAIRMAN. The Chair recognizes the gentleman from Florida (Mr. ROGERS).

Mr. SEIBERLING. Mr. Chairman, will the gentleman yield?

Mr. ROGERS. I yield to the gentleman from Ohio.

Mr. SEIBERLING. I thank the gentleman for yielding.

I notice that in this bill, and also in the two succeeding bills that the gentleman's subcommittee is going to bring out today, all programs have been authorized at a level of 15 percent over their fiscal year 1977 appropriation level to allow for inflation. I have the reaction that that is a rather arbitrary and odd way of assessing these programs. Should not each one be looked at on its own merits? Has inflation gone up 15 percent in the last year?

Mr. ROGERS. May I say to the gentleman that as these are existing programs, the basic judgment as to their validity has been made. These are simply a 1-year extension, as I tried to explain in my statement, and are intended to allow the administration enough time to come in and make assessments of what they want to do, and to come to the Congress with their recommendations. They were not prepared to do that earlier this year, so we determined that the programs should be extended pending a more thorough review later this year. As the gentleman knows, this is an authorizing measure and not an appropriation.

Mr. SEIBERLING. That is right.

Mr. ROGERS. With regard to the 15-percent increase, it represents an increase over the fiscal year 1977 appropriation not the fiscal year 1977 authorization. For many of the programs we have been criticized for not providing higher authorizations. We have tried to provide just a 1-year extension and will be looking at them again very soon. I might say that, because the health planning legislation is only now being implemented we have extended this program at last year's authorization level.

Mr. SEIBERLING. If the gentleman will yield further, in other words, the gentleman is saying when it gets to the Committee on Appropriations that the administration by that time will presumably come in with some specific amounts, which may be less than the 15 percent?

Mr. ROGERS. Yes. Furthermore, we will be looking further at these programs to make any significant changes that are necessary.

Mr. SEIBERLING. I thank the gentleman.

Mr. CARTER. I have no requests for time, Mr. Chairman.

Mr. STAGGERS. Mr. Chairman, I rise in support of H.R. 4974, the Health Planning and Health Services Research and Statistics Extension Act of 1977, and urge its passage by my colleagues. This is noncontroversial legislation which extends existing programs without substantive change for 1 additional year.

This has been done by the committee in order to meet the May 15 deadline imposed by the Budget Act, and thereby to give the new administration time to review these programs and develop their positions and policy with respect to them. This approach has been supported by the new administration and by all other witnesses in front of our committee even though some of them would like later

amendments considered at the time that the substance of the legislation is reviewed.

H.R. 4974 primarily extends Public Law 93-641, the Health Planning and Resources Development Act of 1974. This act reorganized Federal health planning assistance and called for the Development of a major new system of State and areawide health planning agencies to assist in shaping the evolution of our health system to meet local community needs. Since its passage implementation has been steady and satisfactory, despite some criticisms which are enumerated in the committee's report. The committee is hopeful that this evolution will continue although it remains possible that the committee will modify these programs to the extent it finds necessary at such time as full hearings are held.

Mr. Chairman, this is a reasonable approach and I urge your support for it.

Mr. BADILLO. Mr. Chairman, I rise in support of H.R. 4974, the Health Planning and Health Services Research Extension Act. The bill provides, for example, the necessary continuation of funding for local health planning agencies, State planning and development agencies, and moneys for grants for construction and modernization of outpatient facilities and construction of new inpatient facilities in areas of recent population growth, health services research and collection of national health statistics. I want to say however, that although I support this measure, which basically maintains the fiscal year 1977 authorization levels, I do so only because I know we will take a closer look into these programs during the next year. Since the House is under deadline, I know we must expedite matters to get these crucial programs funded, in order to provide a mere continuance of these programs. But, during the next year, the Congress must commit itself to reviewing the entire act, particularly focusing on increased funding authorization. For example, we have only to look at the quality of the delivery of health care to our urban citizens in order to see that maintaining the current level of appropriations is not enough. As one good example, there is a crying need for increased effort to provide modern, effective medical facilities in areas easily accessible to the needy. People in the cities need better health care and we can only begin better delivery of health services when we expand our commitment to this problem.

I close by emphasizing that I support this 1-year extension, and I look forward to the comprehensive review and upgrading of the programs under this act during the next year.

The CHAIRMAN. The Clerk will read.

The Clerk read as follows:

H.R. 4974

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled,

SECTION 1. This Act may be cited as the "Health Planning and Health Services Research and Statistics Extension Act of 1977".

SEC. 2. (a) Section 1516(c)(1) of the Public Health Service Act (relating to authorizations for planning grants) is amended by striking out "for the fiscal year ending June 30, 1977" and inserting in lieu thereof "each for the fiscal years ending September 30, 1977, and September 30, 1978".

(b) Section 1525(c) of such Act (relating to authorizations for State health planning and development agencies) is amended by striking out "for the fiscal year ending June 30, 1977" and inserting in lieu thereof "each for the fiscal years ending September 30, 1977, and September 30, 1978".

(c) Section 1526(e) of such Act (relating to authorizations for grants for rate regulation) is amended by striking out "for the fiscal year ending June 30, 1977" and inserting in lieu thereof "each for the fiscal years ending September 30, 1977, and September 30, 1978".

(d) Section 1534(d) of such Act (relating to authorizations for centers for health planning) is amended by striking out "for the fiscal year ending June 30, 1977" and inserting in lieu thereof "each for the fiscal years ending September 30, 1977, and September 30, 1978".

SEC. 3. (a) Section 1613 of the Public Health Service Act (relating to authorizations for construction) is amended by striking out "for the fiscal year ending June 30, 1977" and inserting in lieu thereof "each for the fiscal years ending September 30, 1977, and September 30, 1978".

(b) Section 1640(d) of such Act (relating to authorizations for area health services development) is amended by striking out "for the fiscal year ending June 30, 1977" and inserting in lieu thereof "each for the fiscal years ending September 30, 1977, and September 30, 1978".

SEC. 4. (a) Section 308(1)(1) of the Public Health Service Act (relating to authorizations for the National Center for Health Services Research) is amended (1) by striking out "and" after "1975,", and (2) by inserting after "1976" the following: ", $24,000,000 for the fiscal year ending September 30, 1977, and $27,600,000 for the fiscal year ending September 30, 1978".

(b) Section 308(1)(2) of such Act (relating to authorizations for the National Center for Health Statistis) is amended (1) by striking out "and" after "1975,", and (2) by inserting after "1976" the following: ", $27,600,000 for the fiscal year ending September 30, 1977, and $31,740,000 for the fiscal year ending September 30, 1978".

SEC. 5. (a) (1) Section 1903(m)(2)(A) of the Social Security Act is amended to read as follows:

"(2) (A) Except as provided in subparagraphs (B) and (C), no payment shall be made under this title to a State with respect to expenditures incurred by it for payment (determined under a prepaid capitation basis or under any other risk basis) for services provided by any entity which is responsible for the provision of inpatent hospital services and any other service described in paragraph (2), (3), (4), (5), or (7) of section 1905(a) or for the provision of any three or more of the services described in such paragraphs unless—

"(i) the Secretary (or the State as authorized by paragraph (3)) has determined that the entity is a health maintenance organization as defined in paragraph (1); and

"(ii) less than one-half of the membership of the entity consists of individuals who are insured under parts A and B of title XVIII or recipients of benefits under this title.".

(2) Section 1903(m)(2)(C) of such Act is amended by striking out "(A)(ii)" each place it occurs and inserting in lieu thereof "(A)(ii)".

(3) The amendments made by paragraphs (1) and (2) shall apply with respect to payments under title XIX of the Social Security Act to States for services provided—

(A) after October 8, 1976, under contracts under such title entered into or renegotiated after such date, or

(B) after the expiration of the one-year period beginning on such date,

whichever occurs first.

(b) Section 1309(a) of the Public Health Service Act is amended by striking out "September 30, 1977" the second time it occurs and inserting in lieu thereof "September 30, 1979".

SEC. 6. (a)(1) The third sentence of section 1503(b)(1) of the Public Health Service Act is amended by inserting "established" before "under section 1524".

(2) The first sentence of section 1511(a) of such Act is amended by striking out "There" and inserting in lieu thereof "Except as provided in section 1536, there".

(3) Section 1511(b)(5) of such Act is amended by striking out "1535" and inserting in lieu thereof "1536".

(4) Section 1512(c) of such Act is amended by striking out "agencies' " and inserting in lieu thereof "agency's".

(5) The first sentence of section 1513(a) of such Act is amended by striking out "the provision" and inserting in lieu thereof "provision".

(6) The last sentence of section 1513(a) of such Act is amended by striking out "(g)" and inserting in lieu thereof "(h)".

(7) The margin of the last sentence of paragraph (1) of section 1513(b) of such Act is indented to align with the margin of paragraph (2) of such section.

(8) Section 1513(b)(2)(C) of such Act is amended by striking out "is consistent" and inserting in lieu thereof "are consistent".

(9) The first sentence of section 1513(d) of such Act is amended by striking out "health system" and inserting in lieu thereof "health systems".

(10) Section 1514 of such Act is amended by inserting "public or" before "nonprofit private".

(11) Section 1515(d) of such Act is amended by striking out "health services area" and inserting in lieu thereof "health service area".

(12) Section 1521(a) of such Act is amended by striking out "other than" and all that follows in such section and inserting in lieu thereof a period.

(13) Section 1521(d) of such Act is amended by striking out "Policy, Planning," and inserting in lieu thereof "Planning".

(14) Section 1523(c) of such Act is amended by striking out "(6), or (7)" and inserting in lieu thereof "or (6)".

(15) Section 1526(a) of such Act is amended by inserting "grants" after "may make".

(16) Section 1536(a) of such Act is amended by striking out "Territories in" and inserting in lieu thereof "Territory of".

(17) Section 1536(b)(4) of such Act is amended (A) by striking out "office" and inserting in lieu thereof "officer", and (B) by striking out "the regulation" and inserting in lieu thereof "regulations".

(18) Section 1602(5) of such Act is amended by striking out "1503" and inserting in lieu thereof "1603".

(19) The second sentence of section 1602 of such Act is amended by striking out "supports" and inserting in lieu thereof "support".

(20) Sections 1603(a)(4), 1603(a)(5), 1603(a)(6), 1904(b)(1)(C), 1604(b)(2)(A)(i) and 1604(c)(2)(B) of such Act are each amended by striking out "1602(a)" and inserting in lieu thereof "1602".

(21) Section 1603(a)(6) of such Act is

amended by striking out "(4)" and inserting in lieu thereof "(5)".

(22) Section 1603(a)(7) of such Act is amended by striking out "standards" and inserting in lieu thereof "requirements".

(23) Section 1610(a) of such Act is amended by striking out "1513" and inserting in lieu thereof "1613".

(24) Section 1613 of such Act is amended by striking out "1510" and inserting in lieu thereof "1610".

(25) Section 1622(c) of such Act is amended by adding after paragraph (4) the following new paragraph:

"(5) If any loan to a public entity under this part is sold and guaranteed by the Secretary under this subsection, interest paid on such loan after its sale and any interest subsidy paid, under paragraph (3)(A)(ii), by the Secretary with respect to such loan which is received by the purchaser of the loan (or the purchaser's successor in interest) shall be included in gross income for the purposes of chapter 1 of the Internal Revenue Code of 1954.".

(26) Section 1622(e)(2) of such Act is amended by striking out "June 30, 1977" and inserting in lieu thereof "September 30, 1977".

(27) Section 1633(14) of such Act is amended by striking out "title XIV" and inserting in lieu thereof "title XV".

Mr. ROGERS (during the reading). Mr. Chairman, I ask unanimous consent that the bill be considered as read, printed in the RECORD, and open to amendment at any point.

The CHAIRMAN. Is there objection to the request of the gentleman from Florida?

There was no objection.

AMENDMENT OFFERED BY MR. ROGERS

Mr. ROGERS. Mr. Chairman, I offer an amendment.

The Clerk read as follows:

Amendment offered by Mr. ROGERS: Page 3, beginning in line 8 strike out "$24,000,000 for the fiscal year ending September 30, 1977,"; and beginning in line 14 strike out "$27,600,000 for the fiscal year ending September 30, 1977,".

Mr. ROGERS. Mr. Chairman, this is a technical amendment that simply makes it conform with the Budget Act, and I know of no objection to the amendment.

Mr. CARTER. Mr. President, I support the amendment.

The CHAIRMAN. The question is on the amendment offered by the gentleman from Florida (Mr. ROGERS).

The amendment was agreed to.

Mr. GARY A. MYERS. Mr. Chairman, I move to strike the requisite number of words.

Mr. Chairman, I would like to engage the Chairman of the committee in brief colloquy. With respect to the HSA's which are funded in here, I understand that Dr. CARTER has already informed the House there is some controversy that naturally arises from implementation of HSA planning.

There is a great deal of uncertainty about what the impact of their planning is going to be over the long term. As I understand presently, it deals with whether or not a local hospital desires Federal construction funds. However, it is unclear what will occur in the future if a local hospital decides not to go along with an HSA plan and provides certain services with their own funds. It is not clear now whether they may be prohibited from receiving medicare funds or certain funds for patients who would normally be funded under Federal programs in the future.

I do not expect the gentleman to be able to tell me exactly what is going to occur in this area, but I did want to take this time to lay out in the record the need for legislation that is required to provide at the local level, particularly for small communities, the opportunity for freedom of choice of providing services which the HSA's might think excess, but local communities believe worthy of funding on their own without being penalized to the extent of their not being able to receive Federal reimbursement for patients.

Is it the intent of the gentleman within this Congress to reflect on some of these concerns, particularly as we are becoming aware of them in certain small communities? Is this the type of review that the gentleman will have?

Mr. ROGERS. Yes. We will conduct a thorough review of this legislation to see whether there should be substantive changes to the health planning law. This bill constitutes an extension just for 1 year. The purpose of the HSA's is to require local decisionmaking, to insure that health planning is performed away from Washington and is instead the product of a local decision process. That is the purpose of the health planning law and I would agree with the gentleman's philosophy.

Mr. GARY A. MYERS. I thank the gentleman because, even though the philosophy is to localize decisions and I know HSA's are to be structured in the community on a basis which encompasses local people within the decisionmaking, there are certain communities which have not been represented or are not able to be represented on the HSA's. They feel, even though it is not a Washington decision, that it is a decision made under the umbrella of the Washington group and they find it frustrating.

Mr. ROGERS. We will look at the gentleman's concerns. As you know, under the law, the State must provide an appeals mechanism, so if local people are not satisfied with an HSA decision they will have an appeals mechanism within the State.

Mr. GARY A. MYERS. Is that mechanism one whereby the committee feels the individuality of every decision would be adhered to or protected? Some of the communities feel they have not been looked at as an individual case.

Mr. ROGERS. We will be glad to look at the gentleman's particular situation and any others that arise before further hearings. In my view, the existing appeals mechanisms allow local needs to be fully aired.

Mr. McCLORY. Mr. Chairman, I move to strike the requisite number of words.

I take this time to engage in a colloquy with the distinguished chairman of the committee, the gentleman from Florida (Mr. ROGERS) on a related subject. The importance of local autonomy and local decisionmaking with regard to health-related services is of vital concern and interest to me. The area that I represent surrounds the city of Chicago and the Cook County area. There is a strong desire throughout this surrounding area to maintain its independence and to prevent domination by the larger metropolitan area of Chicago.

We seem to have a relatively satisfactory health service planning agency right now. However, it seems that the final decision under the existing law rests on or is vested in the State and I wonder if there is authority for the local area to avoid being bound by the State's ultimate decision. I am encouraged by the gentleman's suggestion that there is a right of appeal and I would like to be assured that this is inherent in this law—and that this concept is retained so as to provide as much local decisionmaking as possible.

Mr. ROGERS. The gentleman is correct in that we intended to provide the local area with the decisionmaking authority, with an appeals mechanism within the State if there is disagreement so it can be resolved at that level.

Mr. McCLORY. Mr. Chairman, would the gentleman also respond to this question. In the composition of the Health Service Planning Agency, it seemed to be originally that any requirement for local public officials on the planning agency was omitted. What is the present status with regard to the requirement that local public officials be represented?

Mr. ROGERS. Local public officials can be and should be and are represented.

Mr. McCLORY. There is no particular percentage that is specified?

Mr. ROGERS. No. We have not mandated a particular percentage of local officials; but we do say they are eligible and should be represented.

Mr. McCLORY. Mr. Chairman, I thank the gentleman from Florida.

AMENDMENT OFFERED BY MR. PHILLIP BURTON

Mr. PHILLIP BURTON. Mr. Chairman, I offer an amendment.

The Clerk read as follows:

Amendment offered by Mr. PHILLIP BURTON: Page 8, insert after line 12 the following:

SEC. 7. Section 2(f) of the Public Health Service Act (relating to the definition of the term State) is amended (1) by striking out "and" after "Islands," and (2) by adding before the period the following: ", American Samoa, and the Trust Territory of the Pacific Islands".

Mr. PHILLIP BURTON. Mr. Chairman, first, I would like to express my own approbation of the enormous contribution the chairman, the gentleman from Florida (Mr. ROGERS) and the ranking minority Member, the gentleman from Kentucky (Mr. CARTER) have made to the state of health of the American people and its delivery system.

Mr. Chairman, I would also like to commend them for having included our new fellow Americans in the northern Marianas Islands.

I would note an unintended omission in the definition of a State and I urge the definition be completed, as this amendment provides, by including the

American Samoa and the Pacific Trust Territories.

Mr. ROGERS. Mr. Chairman, I thank the gentleman for his comment. I have no objection to this amendment at all.

Mr. CARTER. Mr. Chairman, if the gentlemen will yield, certainly I have no objection to the amendment.

The CHAIRMAN. The question is on the amendment offered by the gentleman from California (Mr. PHILLIP BURTON).

The amendment was agreed to.

The CHAIRMAN. Are there further amendments? If not, under the rule, the Committee rises.

Accordingly the Committee rose; and the Speaker having resumed the chair, Mr. DANIELSON, Chairman of the Committee of the Whole House on the State of the Union, reported that that Committee having had under consideration the bill (H.R. 4974) to amend the Public Health Service Act to authorize appropriations for fiscal year 1978 for health planning and related programs, pursuant to House Resolution 450, he reported the bill back to the House with sundry amendments adopted by the Committee of the Whole.

The SPEAKER. Under the rule, the previous question is ordered.

Is a separate vote demanded on any amendment? If not, the Chair will put them en gros.

The amendments were agreed to.

The bill was ordered to be engrossed and read a third time, was read the third time, and passed, and a motion to reconsider was laid on the table.

GENERAL LEAVE

Mr. ROGERS. Mr. Speaker, I ask unanimous consent that all Members may have 5 legislative days in which to revise and extend their remarks on the bill just passed.

The SPEAKER. Is there objection to the request of the gentleman from Florida?

There was no objection.

MESSAGE FROM THE PRESIDENT

A message in writing from the President of the United States was communicated to the House by Mr. Chirdon, one of his secretaries.

BIOMEDICAL RESEARCH EXTENSION ACT OF 1977

Mr. ROGERS. Mr. Speaker, I move that the House resolve itself into the Committee of the Whole House on the State of the Union for the consideration of the bill (H.R. 4975) to amend the Public Health Service Act to authorize appropriations for fiscal year 1978 for biomedical research and related programs.

The SPEAKER. The question is on the motion offered by the gentleman from Florida (Mr. ROGERS).

The motion was agreed to.

IN THE COMMITTEE OF THE WHOLE

Accordingly the House resolved itself into the Committee of the Whole House on the State of the Union for the consideration of the bill H.R. 4975, with Mr. DANIELSON in the chair.

The Clerk read the title of the bill.

By unanimous consent, the first reading of the bill was dispensed with.

The CHAIRMAN. Under the rule, the gentleman from Florida (Mr. ROGERS) is recognized for 30 minutes, and the gentleman from Kentucky (Mr. CARTER) is recognized for 30 minutes.

The Chair recognizes the gentleman from Florida (Mr. ROGERS).

Mr. ROGERS. Mr. Chairman, I am pleased to present to this body legislation to extend the authorities and authorizations of appropriations for 1 year through fiscal year 1978 for the National Library of Medicine, the National Cancer Program, the National Heart, Blood Vessel, Lung, and Blood Program, and National Research Service Awards. A 1-year extension of these programs, with few minor substantive and technical amendments, is felt to be appropriate in this instance because the timing would permit the legislation to be reviewed again shortly after the committee, the new administration, and other interested parties have the opportunity to make more substantive recommendations on these and related program areas. The Subcommittee on Health and the Environment intends to consider these recommendations during its review and consideration of legislation to substantially revise all of the biomedical research authorities. During hearings this year before the Subcommittee on Health and the Environment on legislation to extend these authorities, the administration's testimony was supportive of the concept of extending these authorities for 1 year.

The committee is proposing appropriations authorization levels at 115 percent of the actual fiscal 1977 appropriations—a 15-percent increase—for these programs. These increases are essential for the continuity of these programs, for their growth and to offset increased costs due to inflation. We propose a total new authorization of approximately $1.5 billion. This is comparable to an authorization level of approximately $1.68 billion and an actual appropriations level of approximately $1.3 billion for fiscal year 1977 for these programs under existing law. As stated in the committee report, we do not anticipate that the enactment of this legislation will have any detrimental impact on the economy. Its authorization levels represent less than .24 percent of the President's proposed budget for all Federal programs in fiscal year 1978.

The authorization levels in the proposed legislation offer a significant opportunity to lower the economic and social costs associated with our Nation's most devastating diseases and, by supporting biomedical training and library programs, insure the future quality of our national research effort and the dissemination of scientific knowledge and health information to our health care system. The estimated economic cost of cancer to this Nation in 1976 was $20 billion. The estimated total cost to the Nation in 1974 of cardiovascular, lung, and blood diseases was $57 billion. The programs authorized in the committee's bill are designed to provide support for biomedical research, training, education, and other programs in an effort to reduce pain disability, medical complications, and economic costs associated with these diseases. As new discoveries in the prevention, early detection, diagnosis, control, treatment, and rehabilitation in these disease categories are translated into our health care delivery system, they can result in a decrease in both the amount and degree of illness and injury and thus save billions of dollars in associated economic costs.

Mr. Chairman, 2 days of hearings were held on the proposed legislation and it was reported by unanimous voice vote in both the Subcommittee on Health and the Environment and the full Committee on Interstate and Foreign Commerce.

Our committee has already seen evidence that these programs are effective in saving lives and economic costs. Testimony before the Subcommittee on Health and the Environment revealed that from 1970 to 1975 deaths from heart attack declined 14 percent. Hypertensive disease mortality declined 34 percent. Mortality for stroke declined 18 percent. Mortality for rheumatic fever and rheumatic heart disease declined 25 percent, and for congenital heart disease it declined 14 percent. Further, it is estimated that 49,000 fewer deaths from cardiovascular disease occurred in 1976 compared to 1974. This savings in lives alone is greater than the number of lives that could be saved if all deaths from automobile accidents could be avoided.

For victims of cancer the outlook is also beginning to improve. The death rate from Hodgkins disease has decreased 17 percent since 1970 and the mortality rate for all forms of cancer seems to be decreasing slightly. Our subcommittee received testimony that 1.5 million Americans alive today have been cured of cancer and are free of the disease at least 5 years after diagnosis and treatment.

Although all these statistics seem to indicate that we are finally making some breakthroughs with respect to these devastating diseases, we still have a long way to go as deaths from these diseases still constitute an overwhelming proportion of total causes of all deaths of Americans. Cardiovascular diseases still account for 52.5 percent of all deaths in the United States. The over 100 forms of cancer constitute the second leading cause of deaths and emphysema and other chronic obstructive lung diseases constitute the fifth leading cause of death from all diseases in the United States. Thus, the committee has reaffirmed the importance and need for a continuation of these vital programs at the authorization levels in the proposed legislation.

Mr. Chairman, I want particularly to thank and commend the activity of the gentleman from Kentucky (Dr. CARTER), the ranking minority member on the subcommittee, and his staff, whose interest in these programs has been

demonstrated over the years. In addition, I want to thank the gentleman from West Virginia (Mr. STAGGERS) for his leadership on this legislation as chairman of the full committee. Finally, I want to thank all the other members of the Subcommittee on Health and the Environment, Mr. SATTERFIELD, Mr. PREYER, Mr. SCHEUER, Mr. WAXMAN, Mr. FLORIO, Mr. MAGUIRE, Mr. MARKEY, Mr. OTTINGER, Mr. WALGREN, Mr. BROYHILL, Mr. MADIGAN, and Mr. SKUBITZ, for their fine contributions and support of this legislation.

Mr. Chairman, I strongly urge you and my colleagues in the House to support this legislation for the continuation of these important programs.

BIOMEDICAL RESEARCH AUTHORIZATIONS, APPROPRIATIONS, AND OBLIGATIONS, COMPARED WITH PROPOSED AUTHORIZATIONS IN H.R. 4975

[In millions of dollars; fiscal years]

[1] Obligations are significantly less than appropriations due to impoundment of funds.
[2] Excludes 1973 restored funds.
[3] Includes old training programs.
[4] $7,704,000 of construction funds carried over to fiscal year 1975.
[5] Appropriation Act passed January 1976 under title III, sec. 301. Authorization passed April 1976 amending title IV., sec. 419B.
[6] Includes NIH and ADAMHA.
[7] Includes NIH, ADAMHA, and nurses training.

Mr. CARTER. Mr. Chairman, I strongly support this legislation to extend the National Cancer Institute; Heart, Lung, and Blood Institute; National Research Service Awards; and the National Library of Medicine for 1 year, as our distinguished chairman has said. The authorizations are 15 percent more than the appropriations for the year 1977.

Some people may consider that we are not appropriating enough. It is my opinion that if we use what we have, and we have, and well, perhaps no more is needed at the present time.

We have seen many things accomplished by this legislation. For instance, deaths from heart attack have diminished 14 percent in the 1970–75 period. At the present time, 52.5 percent of the deaths in this country are due to heart or heart-related vascular diseases. We have made great progress in this area.

In the area of hypertensive disease and rheumatic fever and stroke, we have had fewer deaths and much improvement. It is estimated that 49 percent fewer deaths from cardiovascular diseases occurred in 1976 as compared to 1974. In spite of these accomplishments, we must proceed—we must go forward.

Mr. Chairman, I strongly support this legislation.

Mrs. FENWICK. Mr. Chairman, will the gentleman yield?

Mr. CARTER. I yield to the distinguished gentlewoman from New Jersey (Mrs. FENWICK).

Mrs. FENWICK. I thank my distinguished colleague for yielding.

Mr. Chairman, I am not medically instructed enough to know in which category Huntington's disease might fall, but I am concerned that we should be doing some research in the field of Huntington's Disease.

I was wondering if it was covered here in this legislation.

Mr. CARTER. I do not know that it is included in this. The gentlewoman is referring to Huntington's chorea, which is a rather unusual disease, and there is some research going on in that, but funds are not in this legislation for it.

Mr. ROGERS. Mr. Chairman, if the gentleman will yield, just for research training. Actually, that falls under the genetic category.

Mrs. FENWICK. There would be funds for research training in this field?

Mrs. ROGERS. Yes.

Mrs. FENWICK. I thank the gentleman.

Mr. ROGERS. Mr. Chairman, I yield 5 minutes to the distinguished gentleman from Georgia (Mr. BRINKLEY).

Mr. BRINKLEY. Mr. Chairman, I appreciate the time, for today we approach a subject which has been important for the past years and which shall remain important until its solution has been found. This legislation today provides a vehicle through which we may proceed, if we choose to do it.

The slogan of the American Cancer Society is "to cure cancer in your lifetime." The question I would like to ask today is this: In whose lifetime shall a cure for cancer be found?

May I refer to a bill, the caption of which reads "To authorize the Public Health Service and the National Academy of Sciences jointly to investigate the means and methods for affording Federal aid in discovering a cure for cancer, and for other purposes."

That bill was introduced in 1929, 48 years ago, by Senator Harris, of Cedartown, Ga., the State from which I come.

May I refer you to a more recent action of this body, a concurrent resolution introduced by the late gentleman from New York, the Honorable John J. Rooney, which was passed by this body on July 15, 1970. The major portion of this resolution reads as follows:

Resolved by the House of Representatives (the Senate concurring), That it is the sense of the Congress that the conquest of cancer is a national crusade to be accomplished by 1976 as an appropriate commemoration of the two hundredth anniversary of the independence of our country; and be it further

Resolved, That the Congress appropriate the funds necessary for a program of cancer research and for the buildings and equipment with which to conduct the research and for whatever other purposes are necessary to the crusade so that the citizens of this land and of all other lands may be delivered from the greatest medical scourge in history.

Mr. Chairman, every one of us wants to find a cure for cancer. I, too, wish to compliment this great subcommittee for the excellent progress that has been made, but I submit today, at this hour, it is not enough.

I salute the American Cancer Society, for they have been in this battle for a long time, but the issue today is simply: How much funding, and for how long?

Three years ago, I read five paragraphs from an Atlanta Journal article of April 21, 1974, by Mr. Charles Seabrook, in which he talks about "A Place To Die":

Among the most unwanted people in Atlanta are dying cancer patients who have been ruined financially by the disease. Hospitals don't want them, and nursing home operators are increasingly reluctant to take them.

As a result, Atlanta's only free home for destitute cancer victims, Our Lady of Perpetual Help operated by the Catholic church, is being deluged with calls from families who are at the end of their financial rope but still want some decent place for their loved ones to die.

Mr. CARTER. Mr. Chairman, will the gentleman yield?

Mr. BRINKLEY. I yield to the gentleman from Kentucky.

Mr. CARTER. Mr. Chairman, along that line, if there are institutions which will not or which do not want to treat terminal cancer, I think this is terrible. I think it is a shame. Personally it is my feeling that they should be covered by a catastrophic insurance bill, and if the gentleman will join me, I certainly will introduce such legislation.

Mr. BRINKLEY. Mr. Chairman, I thank the gentleman. I shall be very happy to follow his leadership and join him in that legislation.

Mr. Chairman, the writer of the article continued as follows:

"I wake up in the middle of the night trying to decide who to take next," said Our Lady's director, Sister Mary Eucharia.

"We get frantic phone calls every day from families whose financial resources have been wiped out by cancer, and who have exhausted their chances for any possible government medical aid," she said.

"Ironically," said Sister Eucharia, "Our Lady is being filled more and more with incurable cancer victims in their mid 30s or early 40s—people who are ineligible for government medical assistance."

Mr. Chairman, that is going to the point which the gentleman from Kentucky (Mr. CARTER) raised.

That is the point. It is afflicting younger people in their most productive years, and in that respect it is our Nation's No. 1 killer.

Mr. Chairman, before the day is over 900 people in this country will have died of cancer, and one in every four sitting in this room, according to current statistics, will die of cancer.

The CHAIRMAN. The time of the gentleman from Georgia (Mr. BRINKLEY) has expired.

Mr. ROGERS. Mr. Chairman, I yield 2 additional minutes to the gentleman from Georgia (Mr. BRINKLEY).

Mr. BRINKLEY. Mr. Chairman, I will continue with my presentation.

Yet even in view of this staggering figure, this great loss of life in this country, the Cancer Institute reports they can fund only about half of the scientifically approved cancer research projects which they receive.

This is totally unacceptable to those 900 people who are going to die today, and it should be unacceptable—and I know it is—to the Members who serve in this body and whose lives are affected in one way or another by this disease.

I refer the Members now to a computer printout which I just received. These are approved but unfunded projects from the Cancer Institute for 1 year. And, remember, any one of these projects might well be the project which could produce a cure for cancer or some preventive treatment.

Mr. Chairman, every single line that is seen on this printout is an approved but unfunded project for the last year. I will ask the Members to look at it. Look at this paper. This is the printout, every line of which represents an approved but unfunded project by the National Cancer Institute. What are we to do about it?

Mr. Chairman, I have an amendment today that has open-ended authority. It provides such funds as may be necessary. The witnesses will come in again, and they will testify before the Committee on Appropriations. It would be shameful to retrogress below the authority which we had last year for this Institute. The subcommittee chairman has already stated that the 15 percent of the appropriations is less than the authority approved by this body last year.

Mr. Chairman, we should change that, and during the amending process I shall offer an amendment to provide such funding as may be necessary in order that the subcommittee of the Committee on Appropriations may address this most important project.

Mr. STAGGERS. Mr. Chairman, I urge all my colleagues in the House to join me in support of H.R. 4975, the Biomedical Research Extension Act of 1977. This bill provides for a 1-year extension of the programs and authorizations for the National Library of Medicine, for cancer, heart, blood vessel, lung, and blood diseases, and for National Research Service awards and has the administration's support.

H.R. 4975 was reported by unanimous vote of the Committee on Interstate and Foreign Commerce after being reported by its Subcommittee on Health and Environment which held 2 days of hearings on it this year.

The committee bill would extend these programs to continue for 1 year so that the new administration, and other interested parties, will have the opportunity to conduct a thorough review of these programs and make recommendations for the committee to consider when it takes up legislation in the near future to substantially revise biomedical research authorities.

Mr. Chairman, it is vitally important to our Nation that these programs continue without interruption. They are of critical importance to the public health. They are designed to provide support for research, training, demonstration, and education for our national effort in reducing devastating pain, disability, and medical complications resulting from cancer, heart, blood vessel, and blood diseases.

Cancer continues to be one of the most intolerable diseases afflicting people and causes family disruption as well as billions of dollars annually in economic loss. Deaths from diseases of the heart and blood vessels continue to be the annual leading cause of all deaths in the United States. Emphysema and other chronic obstructive lung diseases constitute the fifth cause of death from all diseases.

We have made great progress in controlling these diseases and in saving lives of Americans afflicted by them. However, much more research needs to be done if we are ever to develop effective methods to prevent these diseases or cure individuals afflicted by them.

Mr. Chairman, I again urge you and other Members of the House to vote favorably for this legislation—which is so important to all people in the United States.

Mr. CONTE. Mr. Chairman, I rise in support of this bill to provide a 1-year extension of programs under the National Cancer Act, the National Heart, Lung, and Blood Act, and certain other measures.

As a member of the Labor-HEW Appropriations Subcommittee, which oversees the budgets of these vital biomedical research programs, I am well acquainted with the tremendous advances being made in this area.

Major advances have been made in a number of areas, but I would like to mention just a few of them. New methods have been developed for the utilization of ultrasound as a diagnostic technique for breast and other types of cancer which until now depended upon the use of ionizing radiation. Clinical trials have been initiated with a new antitumor agent demonstrating a high degree of effectiveness in a variety of experimental tumor systems. Combination chemotherapy has brought about significant improvements in the rate of remission and survival from lung cancer.

In the cancer control area, a national effort has been established to assist in the timely transfer of research knowledge. Programs assist community hospitals and local physicians to implement optimal treatment and rehabilitation techniques. And we are seeing major progress in earlier detection and thus better survival rates for cancer patients.

For more than 50 years heart and blood vessel diseases have been the major cause of death in this country. They now account for 54 percent of all deaths annually. An estimated 30 million Americans have diseases of the heart and blood vessels, resulting in a huge burden of acute and chronic illness and disability.

The work of the National Heart, Lung, and Blood Institute has been instrumental in reducing the mortality rate from such diseases. Perhaps one of the most dramatic examples is in hypertension and hypertensive heart disease. Since the beginning of the Institute's program, there has been over a 50-percent increase in the number of total patient visits to physicians for such diseases. Despite the need for more research, the state of the art now exists to control most hypertension and reduce its complications—a tribute to the research and control efforts sponsored under this act.

Mr. Chairman, the programs extended in this bill are among the most worthwhile in the Federal budget. The annual cost to this Nation of cancer and heart disease easily exceeds $50 billion. And that does not attempt to measure the tragedy of human life lost, upon which no price can be placed.

Mr. Chairman, I have worked with the Appropriations Committee on which I serve to try to see that adequate levels of funding have been provided for these programs, and I will continue to do so. I urge the extension of these vital research programs through the adoption of this bill.

Mr. ROGERS. Mr. Chairman, I have no further requests for time.

Mr. CARTER. Mr. Chairman, I have no further requests for time.

The CHAIRMAN. There being no further requests for time, under the rule, the Clerk will read the bill for amendment under the 5-minute rule.

The Clerk read as follows:

H.R. 4975

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled,

SECTION 1. This Act may be cited as the "Biomedical Research Extension Act of 1977".

SEC. 2. Section 390(c) of the Public Health Service Act (relating to authorizations for medical libraries) is amended (1) by striking out "and" after "1975,", and (2) by inserting after 1976" the following: ", and $9,200,000 for the fiscal year ending September 30, 1978".

SEC. 3. (a)(1) Section 409 of the Public Health Service Act (relating to authorizations for cancer control programs) is amended (A) by striking out "and" after "1976,", and (B) by striking out "June 30, 1977" and inserting in lieu thereof "September 30, 1977, and $69,116,150 for the fiscal year ending September 30, 1978".

(2) Section 410C of such Act (relating to authorizations for programs of the National Cancer Institute) is amended (A) by striking out "and" after "1976;", and (B) by striking out "June 30, 1977" and inserting in lieu thereof "September 30, 1977; and $847,162,450 for the fiscal year ending September 30, 1978".

(b)(1) The second sentence of section 408 (b) of such Act (relating to national cancer research and demonstration centers) is amended by striking out "; but support under this subsection (other than support for construction) shall not exceed $5,000,000 per year per center.", and inserting in lieu thereof a period and the following: "The aggregate of payments (other than payments for construction) made to any center in support of such an agreement for its costs (other than indirect costs) described in the first sentence may not exceed $5,000,000 in any fiscal year, except that if in any fiscal year there is an increase, as reflected in the Consumer Price Index published by the Bureau of Labor Statistics, in the costs of a center for which payments may be made under such an agreement, the aggregate of payments in such year for such center may exceed $5,000,000 to include such increase and any such increase in any preceding fiscal year for which payments were made to such center under such an agreement to the extent that such increase resulted in payments in excess of $5,000,000. As used in this section, the term 'construction' does not include the acquisition of land, and the term 'training' does not include research training for which fellowship support may be provided under section 472.".

(2) Section 410B(a)(1) of such Act (relating to the National Cancer Advisory Board) is amended (A) by inserting "Policy" after "Technology", and (B) by striking out "(or his designee)" and inserting in lieu thereof "(or their designees)".

SEC. 4. (a)(1) Section 414(b) of the Public Health Service Act (relating to authorizations for heart, blood vessel, lung, and blood disease prevention and treatment programs) is amended (A) by striking out "and" after "1976,", and (B) by striking out "fiscal year 1977" and inserting in lieu thereof "the fiscal year ending September 30, 1977, and $29,900,000 for the fiscal year ending September 30, 1978".

(2) Section 419B of such Act (relating to authorizations for the National Heart, Lung, and Blood Institute) is amended (A) by striking out "and" after "1976,", and (B) by striking out "for fiscal year 1977" and inserting in lieu thereof the following: "for the fiscal year ending September 30, 1977, and $406,636,550 for the fiscal year ending September 30, 1978".

(b)(1) Section 415(a)(1) of such Act (relating to national research and demonstration centers) is amended—

(A) by striking out "diseases and for research in the use of blood and blood products and in the management of blood resources" in subparagraph (A) and inserting in lieu thereof "and blood vessel diseases", and

(B) by striking out ", blood vessel diseases, research in the use of blood products, and research" in subparagraph (C) and inserting in lieu thereof "diseases and research, in the use of blood products and".

(2) The third sentence of section 415(b) of such Act (relating to national research and demonstration centers) is amended by striking out "in any year" and all that follows in such sentence and inserting in lieu thereof the following: "in any fiscal year, except that if in any fiscal year there is an increase, as reflected in the Consumer Price Index published by the Bureau of Labor Statistics, in the costs of a center for which payments may be made under such an agreement, the aggregate of payments in such year for such center may exceed $5,000,000 to include such increase and any such increase in any preceding fiscal year for which payments were made to such center under such an agreement to the extent that such increase resulted in payments in excess of $5,000,000.".

(3) Section 417(a)(1) of such Act (relating to the National Heart, Lung, and Blood Advisory Council) is amended by striking out "National Science Foundation" and inserting in lieu thereof "Office of Science and Technology Policy".

(4) Section 419A(a) of such Act (relating to administration) is amended by striking out "made pursuant to section 414".

(5)(A) Section 415(b) of such Act (relating to national research and demonstration centers) is amended by striking out "five years" each place it occurs and inserting in lieu thereof "three years".

(B) The amendment made by subparagraph (A) shall apply with respect to cooperative agreements entered into under section 415(b) of the Public Health Service Act after the date of enactment of this Act.

SEC. 5. Section 472(d) of the Public Health Service Act (relating to National Research Service Awards) is amended (1) by striking out "and" after "1976,", and (2) by striking out "for fiscal year 1977" and inserting in lieu thereof the following: "for the fiscal year ending September 30, 1977, and $137,770,000 for the fiscal year ending September 30, 1978".

Mr. ROGERS (during the reading). Mr. Chairman, I ask unanimous consent that the bill be considered as read, printed in the RECORD, and open to amendment at any point.

The CHAIRMAN. Is there objection to the request of the gentleman from Florida?

There was no objection.

COMMITTEE AMENDMENTS

The CHAIRMAN. The Clerk will report the first committee amendment.

Mr. ROGERS. Mr. Chairman, I ask unanimous consent that the committee amendments be considered en bloc, considered as read, and printed in the RECORD because they are basically technical in nature.

The CHAIRMAN. Is there objection to the request of the gentleman from Florida?

There was no objection.

The committee amendments are as follows:

Page 4, line 14, insert "into blood," after "research".

Page 5, strike out lines 14 through 21.

The committee amendments were agreed to.

AMENDMENT OFFERED BY MR. BRINKLEY

Mr. BRINKLEY. Mr. Chairman, I offer an amendment.

The Clerk read as follows:

Amendment offered by Mr. BRINKLEY: On page 2, line 5, strike out "$69,116,150" and insert in lieu thereof "such sums as may be necessary".

On page 2, line 11, strike out "$847,162,450" and insert in lieu thereof "such sums as may be necessary".

Mr. BRINKLEY. Mr. Chairman, I rise in support of this amendment.

It is a spinoff, as it were, of the bill which I have introduced, H.R. 211, the vehicle being the offering of the subcommittee.

Mr. Chairman, I would like to provide a brief background of the National Cancer Institute, which was created in 1938, with the identical clause, "such funds as may be necessary" authorization.

All subsequent institutes at the National Institutes of Health were created with "as necessary" authorizations.

The National Cancer Act created a conquest of cancer program in 1971 and authorized yearly dollar amounts for the Institute. The Heart Institute also was changed later.

The fiscal year 1977 appropriation is $1,073.5 million.

The fiscal year 1977 appropriation is $814 million.

Mr. Chairman, I want to review that just for a moment. The fiscal year 1977 authorization is $1,073,500,000. The 1977 appropriation is $814 million.

Now we go to the 1978 cancer authorization request from the committee, of $937 million, which is below the current authorization, and that is wrong. It certainly should match it, and we can match it and leave to the discretion of the Committee on Appropriations the actual amount of funding if we go to the "such funds as may be necessary" as it formerly was.

Mr. Chairman, as the matter now stands, there is no bargaining room for appropriations. If a request for $937 million is made and allowed to stand, the House will, following tradition, cut that very severely. The $937 million figure would provide only a 15-percent increase over this year's appropriation. That is a compromise, and the Cancer Institute is likely to wind up with something less than the cost-of-living increase.

Mr. Chairman, Dr. Arthur James, the past president of the American Cancer Society, made this statement, which I think is really important:

The ideal chemical could be developed that would be effective in killing cancer cells or a vaccine could be developed at any time that would actually prevent cancer.

Mr. Chairman, he said that we are on the threshold of those discoveries.

How soon depends on how badly you and I want it and how much effort we are willing to make and how much support we are willing to give it.

Mr. Chairman, he is talking about funding. He is not talking about a moderate level of funding either. He is talking about accelerated funding, about the same crusade that the late gentleman from New York, Mr. Rooney, talked about back in 1970. How soon and how much depend upon what you and I want to give in terms of priority.

Mr. Chairman, again I remind the Members of Dr. Linus Pauling, the man who has been called a valuable natural resource, who discovered the red blood cell abnormality which causes sickle cell anemia, who could not even get a $37,000 grant.

Mr. Chairman, here is evidence, this printout, line by line, before us, of other researchers who did not make it simply because their projects were considered to be of low priority.

In conclusion, Mr. Chairman, I would like to show the Members the summary here, which this adds up to, in terms of money and in terms of projects. The total unfunded projects which have been approved as valid is 1,543. The total amount needed to fund them would have been $126,362,000, which would have been very well spent.

I include the following:

NATIONAL CANCER INSTITUTE, FISCAL YEAR 1977, UNFUNDED GRANT APPLICATIONS AS OF MAR. 30, 1977

ALL PROGRAMS BY TYPE AND GRANT NUMBER (INCLUDES EST. IND. COSTS)—UNFUNDED APPROVALS

Mr. Chairman, there is no person more well-intentioned than the gentleman from Florida (Mr. ROGERS). His track record is great.

But it is possible that today he is wrong in holding it at 15 percent above the last year's appropriation figure. It could be that he is mistaken. I think he is. I hope we can correct it.

Mr. KAZEN. Mr. Chairman, will the gentleman yield?

Mr. BRINKLEY. I am happy to yield to the gentleman from Texas.

Mr. KAZEN. Mr. Chairman, I would ask the gentleman from Georgia if it is his opinion that more than $69,116,000 will be needed?

Mr. BRINKLEY. That is correct.

Mr. KAZEN. That is the reason for saying "such sums as may be necessary"?

Mr. BRINKLEY. That is correct.

Mr. KAZEN. The gentleman then means that it may take more than this?

Mr. BRINKLEY. Yes.

Mr. KAZEN. My next question to the gentleman is: Can that much money prudently be spent in 1 year?

The CHAIRMAN. The time of the gentleman has expired.

(On request of Mr. KAZEN, and by unanimous consent, Mr. BRINKLEY was allowed to proceed for 1 additional minute.)

Mr. BRINKLEY. Mr. Chairman, in response to the inquiry of the gentleman from Texas, let me say that the gentleman is a lawyer. He and I as lawyers very well know the value of demonstrative evidence. It is here—here is where the money could be spent, as indicated on this printout, these projects can be considered by the National Cancer Institute. They have been approved but they are unfunded. The unfunded portion being $126,362,000 alone. The total number of those projects indicated on this printout which stretch across the floor and over to this podium are 1,543. The money could be very well spent.

We are on the threshold of discovery and we could have significant breakthroughs.

Mr. KAZEN. What is the figure that the gentleman from Georgia thinks will get the job done?

Mr. BRINKLEY. I should think that it would be the appropriation of the past year plus $126,362,000.

I hope to have an opportunity to appear before the Committee on Appropriations and suggest that the level of funding for this fiscal year will be the appropriations of last year and, in addition to that, the amount of $126 million plus, more.

Mr. KAZEN. I thank the gentleman for yielding.

Mr. BRINKLEY. I urge support of the amendment.

Mr. ROGERS. Mr. Chairman, I rise in opposition to the amendment.

Mr. Chairman, I have great respect for my distinguished colleague, the gentleman from Georgia (Mr. BRINKLEY) and for his intense interest in the cancer program as he has demonstrated so earnestly.

The committee, of course, has gone into this program in great detail over the years. I might say that the Cancer Institute is the most favored of all the NIH Institutes as this House knows. This Congress has given it the most money, even though it is not the first cause of death in this Nation. Cancer is second with approximately 365,000 deaths a year, but it is a dreaded disease. Because of that we mounted a particularly heavy campaign and we are expanding the program. Heart and other cardiovascular diseases alone, cause about 985,000 deaths per year, if the Members want to compare. We are only funding the Heart, Lung, and Blood Institute at about half the rate we are funding the Cancer Institute.

As a general rule, only about 50 percent of all approved applications submitted to all Institutes of NIH to do research are able to be funded. Similarly, the National Cancer Institute can fund about 50 percent of its approved applications at a total funding level of about twice as much as any other single Institute within NIH. So we have mounted a tremendous campaign for cancer relative to other Institutes and given current budgetary restraints.

Let me tell the Members what the funding level is for these programs. In the fiscal 1977 appropriations we provided $60 million for cancer control programs. This is the actual appropriation, the money appropriated and being spent, $60 million for cancer control programs, such as early detection programs. The general cancer research program appropriation provided an additional $736 million. This year we are going up from $60 million to $69 million. for control programs, and from $736 million to $847 million for research programs for a total of $916 million for cancer alone.

I understand the concern of the gentleman. We would all like to appropriate $2 or $3 billion for every disease. What we have tried to do is put the proper emphasis where it should be put. I would urge that the House reject this amendment pending the committee's thorough evaluation later this session.

Mr. CARTER. Mr. Chairman, I move to strike the last word.

Mr. Chairman, I have been eminently involved with this problem for quite a few years. In fact, the distinguished chairman of the subcommittee and I drafted the original bill. We have tried to authorize every dollar which was necessary. The thing about it is that cancer is not going to be cured by throwing money at it, just by dollars. It is going to be cured by men who are dedicated, men who are willing to go to school and get M.D.'s and later either doctor of science degrees or Ph. D.'s, to become microbiologists and oncologists, and have the willingness and dedication to get out and find the cause of cancer. I submit that if money would cure cancer within itself, I would immediately support the gentleman's amendment. But the fact is that it will not do that.

I am familiar with the way the money is spent throughout our country. I will say that some of our money is being wasted. We are actually funding projects in West Germany at the present time. We are funding projects in France, and I believe also in England, although I am not sure of that. As it happens, the economy of West Germany is much better than that of the United States, and some of the people in cancer work here in the United States today come to me and tell me that they object to sending money to West Germany, and so do I. I think that we should have cooperation between this country and other countries in our knowledge of cancer and in our transfer of knowledge, and in assisting one another. But certainly we have appropriated sufficient money.

What we have lacked has been the dedication of the people who are working to find the cause of cancer. Some of the specialists tell me that we will first get the cure. I rather doubt this. I believe that we have got to have someone with the dedication of Pasteur who was willing to work day after day and night after night, or someone with the dedication of Koch who found the cause of diphtheria, or of Erlich who found the treatment for syphilis, or of Madam Curie who found radium. We have got to have people of this kind, and I regret to say that throughout our country we are lacking in that dedication.

As I read, I read about vanity—vanity. Everything is vanity. I have come to believe that in many cases that is the feeling of many of our people, and I regret that. We lack dedication.

I regret that. We lack dedication. But I am going to tell the Chairman today that if we do not return to dedication, to the principles of our Forefathers, if we do not dedicate ourselves to finding the cause of such terrible and tragic diseases as cancer, if we do not dedicate ourselves to the upbuilding of this great Nation of ours, we might well go down the drain.

Mr. Chairman, it is with great reluctance that I oppose the amendment offered by the gentleman from Georgia, a very distinguished and a very fine man. If I thought that money would find the cause of cancer, certainly I should support the amendment, but dedication is what is required.

The CHAIRMAN. The question is on the amendment offered by the gentleman from Georgia (Mr. BRINKLEY).

The question was taken; and the Chairman announced that the noes appeared to have it.

Mr. BRINKLEY. Mr. Speaker, I demand a recorded vote, and pending that, I make the point of order that a quorum is not present.

The CHAIRMAN. Evidently a quorum is not present.

The Chair announces that pursuant to rule XXIII, clause 2, he will vacate proceedings under the call when a quorum of the Committee appears.

Members will record their presence by electronic device.

The call was taken by electronic device.

QUORUM CALL VACATED

The CHAIRMAN. One hundred Members have appeared. A quorum of the Committee of the Whole is present. Pursuant to clause 2, rule XXIII, further proceedings under the call shall be considered as vacated.

The Committee will resume its business.

The pending business is the demand of the gentleman from Georgia (Mr. BRINKLEY) for a recorded vote.

A recorded vote was refused.

So the amendment was rejected.

The CHAIRMAN. Are there any further amendments? There being no further amendments, under the rule, the Committee rises.

Accordingly the Committee rose; and the Speaker having resumed the chair, Mr. DANIELSON, Chairman of the Committee of the Whole House on the State of the Union, reported that that Committee, having had under consideration the bill (H.R. 4975) to amend the Public Health Service Act to authorize appropriations for fiscal year 1978 for biomedical research and related programs, pursuant to House Resolution 449, he re-

ported the bill back to the House with sundry amendments adopted by the Committee of the Whole.

The SPEAKER. Under the rule, the previous question is ordered.

Is a separate vote demanded on any amendment? If not, the Chair will put them en gros.

The amendments were agreed to.

The SPEAKER. The question is on the engrossment and third reading of the bill.

The bill was ordered to be engrossed and read a third time, and was read the third time.

The SPEAKER. The question is on the passage of the bill.

The question was taken; and the Speaker announced that the ayes appeared to have it.

Mr. ALLEN. Mr. Speaker, I object to the vote on the ground that a quorum is not present and make the point of order that a quorum is not present.

The SPEAKER. Evidently a quorum is not present.

The Sergeant at Arms will notify absent Members.

The vote was taken by electronic device, and there were—yeas 385, nays 4, not voting 43, as follows:

Mr. Thompson with Mr. Symms.
Mr. Rose with Mr. Winn.
Mr. Nolan with Mr. Young of Alaska.
Mr. Fuqua with Mr. Don H. Clausen.
Mr. Roncalio with Mr. Railsback.

So the bill was passed.

The result of the vote was announced as above recorded.

A motion to reconsider was laid on the table.

GENERAL LEAVE

Mr. ROGERS. Mr. Speaker, I ask unanimous consent that all Members may have 5 legislative days in which to revise and extend their remarks on the bill just passed, H.R. 4975.

The SPEAKER pro tempore (Mr. WRIGHT). Is there objection to the request of the gentleman from Florida?

There was no objection.

PERMISSION FOR COMMITTEE ON RULES TO FILE CERTAIN PRIVILEGED REPORTS

Mr. MURPHY of Illinois. Mr. Speaker, I ask unanimous consent that the Committee on Rules may have until midnight tonight to file certain privileged reports.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from Illinois?

There was no objection.

HEALTH SERVICE EXTENSION ACT OF 1977

Mr. ROGERS. Mr. Speaker, I move that the House resolve itself into the Committee of the Whole House on the State of the Union for the consideration of the bill (H.R. 4976) to amend the Public Health Service Act, the Community Mental Health Centers Act, title V of the Social Security Act, and the program of assistance for home health services to authorize appropriations for fiscal year 1978 for health services programs, and for other purposes.

The SPEAKER pro tempore. The question is on the motion offered by the gentleman from Florida (Mr. ROGERS).

The motion was agreed to.

IN THE COMMITTEE OF THE WHOLE

Accordingly the House resolved itself into the Committee of the Whole House on the State of the Union for the consideration of the bill H.R. 4976, with Mr. MAZZOLI in the chair.

The Clerk read the title of the bill.

By unanimous consent, the first reading of the bill was dispensed with.

The CHAIRMAN. Under the rule, the gentleman from Florida (Mr. ROGERS) will be recognized for 30 minutes, and the gentleman from Kentucky (Mr. CARTER) will be recognized for 30 minutes.

The Chair recognizes the gentleman from Florida (Mr. ROGERS).

Mr. ROGERS. Mr. Chairman, I yield myself such time as I may consume.

Mr. Chairman, this bill, H.R. 4976, extends, for fiscal year 1978, the authorizations of appropriations for the following health programs:

Grants to States for wide-ranging comprehensive health services, including communicable disease control; environmental services; chronic disease control; emergency and home health services and mental health programs.

Grants to States for prevention, detection, and treatment of hypertension, which affects some 23 million Americans.

Grants for the establishment and operation of migrant health centers. These grants provide support for 125 migrant health centers and 33 rural health initiative programs. Almost 500,000 persons are served by this program.

Grants for community health centers—better known as neighborhood health centers. These grants presently are awarded to 165 community health centers.

Grants to continue the congressional initiative in the fields of population research and family planning, which has resulted in significant increase in the availability of voluntary family planning services, with emphasis on services to low-income people.

Grants to continue the Federal effort to make information available to health professionals and the public with respect to the nature of sudden infant death syndrome and its effect on families who have lost a child to it.

Grants to provide Federal assistance to establish comprehensive hemophilia diagnostic and treatment centers and to develop and expand blood separation centers.

Grants to continue and expand the community mental health centers program, which presently provides comprehensive services to some 88 million persons. This program, which was initiated in 1963 by President Kennedy, is intended to provide startup support for a nationwide network of centers.

Grants to States to extend and improve maternal and child health services for reducing infant mortality, for promoting the health of mothers and children, and for serving the needs of crippled children.

Demonstration grants to support the initial costs of establishing and operating home health services agencies, the expansion of services provided by existing agencies, and training of professional and paraprofessional personnel in the provision of home health care.

A simple, 1-year extension of these expiring programs without substantive amendments will provide the new administration with the opportunity to carefully review these programs and make recommendations to the committee with respect to possible future revisions.

I have already instructed the subcommittee staff to undertake a thorough review of each of these programs in close cooperation with the administration. That review is underway. Because of the need for critical evaluation of all health services programs, the Health Services Extension Act authorizes the continuation, but not the substantial expansion, of these programs by extending the authorizations of appropriations at 115 percent of the fiscal year 1977 appropriations. This increase is intended to take into consideration inflationary factors.

Mr. Chairman, this legislation extends programs that provide health services to millions of Americans who otherwise would not receive them. It is a fiscally responsible bill. It has the support of the new administration, and it deserves the overwhelming support of this body.

Mr. CARTER. Mr. Chairman, I yield myself such time as I may consume.

Mr. Chairman, H.R. 4976 extends the authorizations for the following health services programs at 115 percent of last year's appropriations: Grants to the States for comprehensive health services, hypertension, migrant health centers, community health centers, family planning, sudden infant death syndrome, hemophilia treatment centers, and the provision of home health services.

Also, this legislation would increase the authorization of appropriations level of title V of the Social Security Act for maternal and child health and crippled children's services by 115 percent of last year's appropriations.

It would also continue the authority for blood separation centers and training in the provision of home health services.

In addition, this bill makes minor revisions in the authorities for migrant health centers, community health centers, family planning research, and community mental health centers.

H.R. 4976 also contains a series of technical and some minor substantive amendments to the recently enacted health manpower law, as well as to the following authorities:

Alcohol Abuse and Alcoholism Prevention, Treatment and Rehabilitation Act of 1970;

Drug Abuse Office and Treatment Act of 1972;

Nurse Training Act of 1975;

Indian Health Care Improvement Act; and

Social Security Amendments of 1972.

Mr. Chairman, the thrust of this legislation is to extend the various health services programs which provide needed health services to the people of this country.

As you know, I have been a strong supporter of all these programs because I know what they mean to the people who depend upon these services.

For example, the community health center program has supported the establishment of ambulatory health care centers to serve medically needy populations. These centers attempt to coordinate Federal, State, and local resources in a single organization capable of delivering both health care and related social services to a defined population.

The family planning programs have also been extremely helpful in making voluntary family planning services available to all those who want them. This program, too, deserves our continued support.

In addition, this legislation extends the community mental health centers program. It was the intent of the original act to provide a resource, at the community level, for the treatment of the mental health problems of the community.

At the present time it is estimated that about 88 million persons are expected to be covered by the more than 500 centers in operation.

Yet we have also heard reports that too much of the Federal dollar is being spent on administration and not enough on services for the patients. This situation is of great concern to me and I have urged the committee to look at this program carefully next year.

Mr. Chairman, there are many other important programs included in this legislation, such as hypertension, hemophilia treatment centers, and the grants we provide to the States for various health service programs.

All of these programs contribute to the effective operation of our Nation's health care system, and I urge that you give favorable consideration to this legislation.

Mr. ROGERS. Mr. Chairman, I reserve the balance of my time.

Mr. CARTER. I yield to the distinguished gentlewoman from New Jersey (Mrs. FENWICK) such time as she may consume.

Mrs. FENWICK. Mr. Chairman, I thank the gentleman for yielding.

Mr. Chairman, I would like to speak most urgently on behalf of this bill and bring to the attention of the House some of the elements that I hope can be included in the services that this bill will provide. I am speaking specifically of regulations that need to be changed, of services that could well be provided at home and of people who are now institutionalized because we have no programs that will allow these people to be treated properly at home.

I have in mind two different types of institutionalizing that I think we could well avoid at considerable saving. I notice the budget chairman is here and I would like to have the attention of the budget chairman and his support for this program.

What I have in mind is this. We now have for example in the State of New Jersey a program that will take care of medicare patients in nursing homes but the regulation provides that they cannot leave the nursing home more than 18 days a year. This seems to me a totally irresponsible, cruel, and unwise rule. There have been abuses, because occasionally people have left for more than a month at a time and expected to find the bed reserved. What does it mean? It means if one is poor and is working and has a member of the family in a nursing home—and indeed I have such a case—and one wants to bring one's mother home every weekend, one cannot because if it amounts to more than 18 days a year one must sacrifice the medicare payments. A regulation allowing 1 day a week would be an answer and a practical answer, to this kind of program.

But further, supposing we have a family where both the man and wife, the couple, are working because they

have to put children through college I wonder if it would not be wiser to provide home care for an elderly parent who could bring to the family a stipend that would be considerably less, perhaps, than would be spent in the nursing home. I think it would. I think it would contribute to family solidarity and I think it would save taxpayers money, and I think it would contribute to the happiness of the elderly person. I see no reason why we should not proceed along those lines.

Further why can we not provide this for the handicapped? I had a case of an elderly women whose only family was a severely retarded boy. He grew too big for her to handle at home. He needed help at home. He could not get help at home. He had to be sent to an institution at a very great expense to the State.

What I am begging for here is this. I understand my colleague, the gentleman from Florida, has urged larger appropriations for these home elderly care services. I think if we enlarge the home health care services we could considerably cut down on the welfare costs in the nursing homes.

I think the case is clear. I just hope that these home health services will be practically and prudently done in a humane way, allowing for the need for the elderly people to see their families, for children to see their grandparents. I think we are doing incalculable harm under the present system.

Mr. ROGERS. Mr. Chairman, may I respond to the gentlewoman by saying that we do have numbers of laws that support home health services, particularly medicare and medicaid. We are spending some hundreds of millions of dollars and the figure is going up very, very rapidly.

There is a provision in this bill to continue the authority for demonstration projects in home health care. It is a very small but realistic authority. We continue the program. This is just a 1-year extension and then we will be getting into further consideration as we hold hearings later this year.

Mrs. FENWICK. Could I ask the gentleman: Is there any provision here so that, for example, we could hire profitmaking organizations which are prepared to give this kind of service? It is much easier to fire a company than it is to get rid of a bureaucrat.

Mr. ROGERS. This program is not a service delivery program. Some people have thought it was simply because we use the term "home health care." This program supports the expansion of existing agencies and the start up of new ones, but it does not provide support for the reimbursement of services. Medicare and medicaid provide that, and the committee under the gentleman from Illinois, Chairman ROSTENKOWSKI, has a program there.

Mr. SCHEUER. Mr. Chairman, will the distinguished chairman yield?

Mr. ROGERS. I yield 1 minute to the gentleman from New York (Mr. SCHEUER).

Mr. SCHEUER. Mr. Chairman, I strongly support this legislation.

Mr. Chairman, this legislation, H.R. 4976, the Health Services Extension Act, reauthorizes for 1 year the title X family planning programs administered by the Department of Health, Education, and Welfare with a 15-percent increase above current spending levels. Included in the 1978 authorization are $123 million for family planning services and $67 million for population research.

There are approximately 10 million low- and marginal-income women in this country who are in need of family planning services. Since the enactment of the Family Planning Services and Population Research Act of 1970, family planning services have been extended to some 6 million women. Despite this progress, almost 4 million women, mostly low income, still do not have access to these services. One-third of our counties, mostly rural, still are without family planning services. Hopefully in the months ahead with the President's support, we will see the expansion of a permanent nationwide system of family planning.

Perhaps the most compelling reason for expanding federally assisted family planning services is the tragically high incidence of adolescent pregnancy. One in every four American women becomes pregnant before reaching the age of 20.

Each year more than 1 million 15- to 19-year-olds, and even more appalling, 30,000 girls younger than 15, become pregnant. Approximately one-third of all legal abortions each year are obtained by teenagers. One-third of all births to teenagers occur out of wedlock.

It is tragic that while the birth rate for the population in general is on the decline, it actually rose for that age group for whom the health risks and social consequences are most severe. Between 1970 and 1974, the birth rate for 14-year-olds climbed 9 percent, from 6.6 to 7.2 per 1,000, and 3 percent for 15-year-olds.

Yet, very few of these young girls want to become mothers at so young an age. Of the 540,000 pregnancies each year to unmarried 15- to 19-year-olds, only 10 percent are intended. All in all, 667,000 unintended pregnancies and 300,000 unintended births occur each year to women between the ages of 15 and 19 years. Unfortunately, we do not know as yet how many of the pregnancies and births to girls 14 and under are intended, but we can imagine that the number would be even smaller.

Teenage mothers face substantial health risks, limited educational and employment opportunities, diminished prospects for stable marriages and other grave social and economic disadvantages.

Sixteen percent of the babies born to mothers under 15 are of low birth weight—less than 5.5 pounds. Low birth weight is not only a major cause of infant mortality, but also of many childhood illnesses and birth injuries such as neurological defects which often result in lifelong mental retardation. Teenage mothers, themselves, are also more likely to die or suffer illness or injury as a result of the pregnancy. The death rate from complications of pregnancy is 60 percent higher for women who become pregnant before they are 15.

Educational and employment opportunities are also limited for the teenage mother. A study in New York City of mothers of first-borns showed that 85 percent of those who first became mothers at ages 15 to 17 did not complete high school. Pregnancy is by far the most often cited reason for dropping out of school.

Nearly half of all teenage marriages break up within 5 years while those that are "forced" because of pregnancy are three times more likely to end in divorce. Teenage couples who marry as a result of pregnancy are also economically disadvantaged in terms of occupation, income, and assets. The New York study showed that 91 percent of the women who had their first child at age 15 to 17 were neither full- or part-time employed; 72 percent of these same mothers were on welfare.

Teenagers become pregnant because of nonuse or sporadic use of contraceptives. Many teenagers are ill-informed about contraceptives and the risks of pregnancy. In 1975, it was estimated that some 4 million girls between the ages of 15 and 19 were in need of contraceptive services. During that same year, 1.1 million visited family planning clinics for services while another 1 million received services through private physicians. The other 2 million remained unserved.

Birth control information and services must be made available to all the 4 million sexually active teenagers in this country at risk of pregnancy if we are to stop the teenage pregnancy epidemic. Despite the considerable progress that has been made over the last years, teenagers' access to family planning services are still limited legally, economically, and socially—despite the fact that premarital intercourse is beginning at younger and younger ages.

Only 26 States and the District of Columbia have confirmed the right of unmarried minors to obtain contraceptive services on their own consent, while 46 States permit unmarried women 18 or older to obtain contraceptives. While we are making an effort to expand services here at the Federal level, the States must remove the existing legal barriers to contraceptive availability to teenagers.

As these legal barriers are removed, we can expect that the demand for services will increase. The Federal Government must be prepared to meet this demand. Adequately financed programs should be developed to assist medical personnel to implement delivery mechanisms appropriate and sensitive to teenagers. Special effort should be made to insure that educational, counseling, and follow-up services are offered along with clinical care. The availability of contraceptive services for teenagers should be aggressively monitored in federally assisted programs. Since repeat pregnancies account for a large portion of teenage births, special attention should be paid to expanding contraceptive, counseling and educational services to unmarried teenagers who have already experienced a pregnancy. We must establish an outreach program to inform teenagers that contraceptive services are

available to them and that these services are provided confidentially.

We must evaluate the current extent of sex education programs and their effectiveness. Only 29 States and the District of Columbia require teaching health education courses in public schools, and of these, only 6 States and the District of Columbia require the teaching of some form of family life or sex education. Louisiana actually prohibits sex education instruction. A survey of U.S. school districts showed that only 39 percent of the districts with sex education programs taught anything about birth control.

Education is our first line of defense against pregnancy. We must expand and strengthen existing population and sex education programs in our high schools.

The facts are clear. Teenage pregnancy is dangerous to the teenagers themselves, to the children to whom they give birth, and above all to society at large. Our response to the problem has been far from adequate. The funds we are authorizing today will enable us to extend family planning services to 300,000 additional individuals, many of them teenagers. During the next year, we must work with the administration to develop a comprehensive program of family planning which will reach all the teenagers and all the low-income women in this country who are in need of services. Teenage pregnancy is a tragic and dangerous problem which deserves immediate attention.

Mr. STAGGERS. Mr. Chairman, I rise in complete support of this legislation. H.R. 4976, reported by the Committee on Interstate and Foreign Commerce by unanimous voice vote, will extend the authorizations of appropriations for fiscal year 1978 at 115 percent of fiscal year 1977 appropriations for several crucial public health service delivery programs. These programs include grants to the States for comprehensive health services; hypertension; migrant health centers; community health centers; family planning; sudden infant death syndrome; hemophilia treatment centers; and the provision of home health services.

In addition, it increases the authorization of appropriations level of title V of the Social Security Act—maternal and child health and crippled children's services—to a level reflecting 115 percent of the fiscal year 1977 appropriation and continues the authority for blood separation centers and training in the provision of home health services for fiscal year 1978.

Because the committee intends to undertake a thorough review of these authorities later in this session and hopes, at that time, to have received substantive comment from both the administration and interested members of the public, this legislation is designed to maintain rather than provide for expansion or modification of these programs.

Mr. Chairman, the important health service programs addressed in this legislation need to be maintained during the period of congressional and administration program review; those individuals who depend on these services deserve no less. I urge the adoption of this bill.

Mrs. COLLINS of Illinois. Mr. Chairman, today, I am asking my colleagues to support the extension of the Health Services Act. The bill authorizes spending $1.1 billion for fiscal year 1978 on a variety of necessary and vital health programs.

These programs include centers devoted to community health, family planning, mental health, hemophilia treatment, and other important areas of health concern, all of which are of inestimable benefit to the Nation's poor and elderly.

I do, however, have one major point of disagreement with H.R. 4876 as it presently exists. The resolution authorizes only $4.45 million for home health services—a reduction of $7.55 million from the fiscal year 1977 level.

I believe that home health services are too important to stand this sort of brutal fund slashing. Therefore, I give my full support to Representative PEPPER's amendment which would restore last year's home health services authorization to the $12 million level. As we are all aware, the development of good home health services will save the Nation money in the long run. Analysis by the General Accounting Office of 20 expert studies comparing health costs found that of "the 20 studies, 19 presented data which supported the proposition that home health care can be less expensive" than institutional care.

It is also important to note that the Department of Health, Education, and Welfare, HEW, reports it received funding requests from 2½ times as many qualified home health services applicants as it had available funding.

I urge all Members interested in improving the quality of health care to pass Mr. PEPPER's amendment and the Health Service Extension Act.

Mr. FORD of Tennessee. Mr. Chairman, I rise today to join my distinguished colleague, the Honorable CLAUDE PEPPER, in supporting an amendment to H.R. 4976, the Health Services Extension Act. I would like to take this time to say that Mr. PEPPER, with his acute interest and years of service in the area, can quite properly be deemed an expert in the field of aging, specifically in the area of health care. Having worked extensively with him on the House Select Committee on Aging, I have found him to be sympathetic to the needs of our seniors. Therefore, I feel justified in saying that any measure which he chooses to introduce should not be viewed lightly.

This amendment, as you know, restores the authorization for home health training and demonstration programs to its former level of $12 million, placing it in a more proper perspective according to the importance of these health care services. Under the provisions of H.R. 4976, this authorization level was reduced by $7.6 million to last year's appropriation, plus a 15-percent increase allowance for inflation. With $1.1 billion authorized for the extension of health services, I feel it is an insult to allow a mere $4.5 million to cover the spiraling cost of this invaluable, ever-growing service.

Both the high costs of long-term care and, the growing concern over needless institutionalization of our Nation's precious seniors, have led to a demand for alternatives to institutional care. Home health care is one such alternative which has proven highly successful in allowing many elderly the opportunity to retain the dignity and self-respect essential to each of us. No one should be denied these truly human characteristics because they are no longer self-sufficient due to age, illness, et cetera. It is as important for seniors who are able, to interact with family and friends on a day-to-day, normal, healthy basis, as it is for you and me.

It is up to us, the members of Congress, to see to it that services to this invaluable group of citizens not only continue and expand to meet their every need, but, that they are administered properly at the expense of adequate Federal funding.

Noted author Alex Haley referred to the elderly as "our greatest source of strength." Let us help to keep them strong.

Therefore, I urge you to join Mr. PEPPER and me in supporting this important health care amendment.

Mr. CONTE. Mr. Chairman, I rise in support of this measure to provide a 1-year extension for a number of health services delivery programs. As one of the original cosponsors of legislation to create many of these programs, and as one who worked hard 2 years ago to override the Presidential veto of these programs, I am pleased to support this 1-year extension.

Among the programs extended under this bill is that for community mental health centers. I have been a strong supporter of this program, which has been tremendously effective in reducing the incidence of institutionalization of mental patients. Since the mental health centers program began, the average patient residence in State hospitals has dropped over 44 percent. With the average daily cost per patient at over $37 per day, you can see the cost benefits involved, aside from the therapeutic benefits of community-based treatment.

Another of the programs extended in this bill is for maternal and child health services, one of our oldest Federal health programs, having undergone constant improvement since its foundation in 1935. In areas where maternal and child health services are available, estimates show that it prevents or corrects two-thirds of chronic handicapping conditions.

Average costs per patient have fallen constantly in this program, despite the general cost inflation in the Nation's health services. This is a tribute to the efficiency of the management of this program, and the skill which has been used in its formulation and administration.

Infant mortality is one of the few health problems in which increased medical care has a demonstrable effect in lowering the death rate. The maternal and child health program provides that care, and has cut mortality rates by as much as 50 percent in areas where programs have been established.

Another important program extended by this bill is that for sudden infant death syndrome. This program is de-

voted to public information and to training medical examiners, policemen, firemen, and parents how to deal with the leading cause of death in infants beyond the first month of life.

Mr. Chairman, I strongly urge the renewal of these programs to provide much-needed health care services for our people.

It is my understanding that the gentleman from Florida (Mr. PEPPER) may offer an amendment to increase the authorization for home health care services. I am strongly in favor of such an amendment and would like to express my support for it at this time.

Home health care offers a viable alternative to institutionalization. Dignity and self-respect are essential to all of us, but the elderly are often denied these essentials simply because they may no longer be self-sufficient.

Home health care allows older people to remain at home by providing needed care while families are unable to stay with an elderly person, and I urge the adoption of the proposed increase in authorization levels.

Mr. BADILLO. Mr. Chairman, earlier today, I rose in support of H.R. 4974, the Health Planning and Health Services Research Extension Act. At that time, I spoke of the dilemma that this Congress faces in expediting funding for health programs. I mentioned that although I supported that bill, there was the need for reviewing and expanding various programs under the act. However, the time constraints we are presently working under do not permit such a review at this time. Therefore, it is better to continue those necessary programs for 1 year while at the same time, continuing our extensive review of health services.

My feelings about H.R. 4976, the Health Services Extension Act are much the same. Though H.R. 4976 maintains most of the programs included under the act at a rate of 115 percent of fiscal year 1977 authorization, I must state emphatically that in many areas, maintaining the same level of funding with the 15-percent allowance for inflation is just not enough. The people of my district, as well as the citizens of other urban areas, need substantially more assistance in the area of health care than was provided under the previous administration. I will however, support this bill so that we can at least maintain the level of services now being provided.

When we talk about the Health Services Extension Act, we are talking about maternal and child care, community health centers, family planning, community mental health centers, home health services and the like. These services are the "nuts and bolts" of our health delivery system to the needy. Our poor, whether they live in urban or nonurban areas, deserve the best possible medical care that our advanced technology has to offer.

Maintaining the same level of expenditure in areas that are not adequately dealing with the serious health deficiencies of our Nation's needy as they stand, can obviously not stop the physical and mental suffering for all those, both young and old, who cannot provide themselves with adequate medical care. So although I support this 1-year extension, I must emphasize that the Congress must commit itself to a comprehensive review of the programs covered by this act, and to a broad expansion of those programs which are necessary to provide adequate medical care to the Nation's needy.

I do want to note that I oppose the approximately $8 million cut from the fiscal year 1977 authorization level for home health services that is proposed by this extension act. I therefore will support my colleague Congressman CLAUDE PEPPER'S amendment to put that appropriation back into the budget. This is an area where we cannot afford a cutback. There are so many individuals confined to their homes who are in the extreme need of home health services. There are also those who find it extremely difficult to get to a hospital or clinic. These people should not be denied their right to adequate medical attention.

I also want to mention that I support one of the minor changes in this bill. It is one which will change the definition of the term "medically underserved populations" for the purpose of planning, developing, and operating community health centers to serve such populations. The change will require the Secretary of HEW to take into account, in designating medically underserved populations, unusual local conditions which make it hard to obtain adequate health services. This section would therefore allow a neighborhood to be declared medically underserved, even though that community lies in a metropolitan area with an abundance, or enough medical personnel.

Mr. ROGERS. Mr. Chairman, I have no further requests for time.

Mr. CARTER. Mr. Chairman, I have no further requests for time.

The CHAIRMAN. The Clerk will read.

The Clerk read as follows:

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled,

SECTION 1. This Act may be cited as the "Health Services Extension Act of 1977".

SEC. 2. (a) (1) Section 314(d) (7) (A) of the Public Health Service Act (relating to authorizations for formula grants to States for comprehensive public health services) is amended (A) by striking out "and" after "1976,", and (B) by striking out "for fiscal year 1977" and inserting in lieu thereof the following: "for the fiscal year ending September 30, 1977, and $103,500,000 for the fiscal year ending September 30, 1978".

(2) Section 314(d) (7) (B) of such Act (relating to authorizations for grants for hypertension programs) is amended (A) by striking out "and" after "1976,", and (B) by striking out "for fiscal year 1977" and inserting in lieu thereof the following: "for the fiscal year ending September 30, 1977, and $10,350,000 for the fiscal year ending September 30, 1978".

(b) Section 314(d) (7) (B) of such Act is further amended by inserting after "treatment of" the following: ", and, where appropriate, for ambulatory care for,".

SEC. 3. (a) (1) Section 319(h) (1) of the Public Health Service Act (relating to authorizations for planning and development of migrant health centers) is amended (1) by striking out "and" after "1976,", and (2) by striking out "for fiscal year 1977" and inserting in lieu thereof the following: "for the fiscal year ending September 30, 1977, and $1,897,500 for the fiscal year ending September 30, 1978".

(2) The second sentence of section 319(h) (1) of such Act is amended by striking out "the next fiscal year" and inserting in lieu thereof "each of the next two fiscal years".

(b) (1) The first sentence of section 319 (h) (2) of such Act (relating to authorizations for operation of migrant health centers) is amended (1) by striking out "and" after "1976,", and (2) by striking out "for fiscal year 1977" and inserting in lieu thereof the following: "for the fiscal year ending September 30, 1977, and $29,152,500 for the fiscal year ending September 30, 1978".

(2) The third sentence of section 319(h) (2) of such Act is amended by striking out "fiscal year 1977" and inserting in lieu thereof "fiscal years ending September 30, 1977, and September 30, 1978".

(c) Section 319(h) (3) of such Act (relating to authorizations for inpatient and outpatient hospital services) is amended (1) by striking out "and" after "1976,", and (2) by striking out "for fiscal year 1977" and inserting in lieu thereof the following: "for the fiscal year ending September 30, 1977, and $3,450,000 for the fiscal year ending September 30, 1978".

SEC. 4. (a) (1) Section 330(g) (1) of the Public Health Service Act (relating to authorizations for planning and development of community health centers) is amended (A) by striking out "and" after "1976,", and (B) by striking out "for fiscal year 1977" and inserting in lieu thereof the following: "for the fiscal year ending September 30, 1977, and $5,750,000 for the fiscal year ending September 30, 1978".

(2) Section 330(g) (2) of such Act (relating to authorizations for operation of community health centers) is amended (A) by striking out "and" after "1976,", and (B) by striking out "for fiscal year 1977" and inserting in lieu thereof the following: "for the fiscal year ending September 30, 1977, and $241,670,200 for the fiscal year ending September 30, 1978".

(b) (1) Section 330(b) (3) of such Act (relating to the definition of medically underserved population) is amended by adding at the end thereof the following: "In designating urban and rural areas for purposes of this paragraph, the Secretary shall take into account unusual local conditions which are a barrier to access to or the availability of personal health services.".

(2) The first sentence of section 330(e) (1) of such Act is amended by striking out "subsection (e)" and inserting in lieu thereof "subsection (c)".

SEC. 5. (a) Section 1001(c) of the Public Health Service Act (relating to authorizations for family planning projects) is amended (1) by striking out "and" after "1976;", and (2) by striking out "for fiscal year 1977" and inserting in lieu thereof the following: "for the fiscal year ending September 30, 1977; and $123,625,000 for the fiscal year ending September 30, 1978".

(b) Section 1003(b) of such Act (relating to authorizations for training) is amended (1) by striking out "and" after "1976;" and (2) by striking out "for fiscal year 1977" and inserting in lieu thereof the following: "for the fiscal year ending September 30, 1977; and $3,450,000 for the fiscal year ending September 30, 1978".

(c) Section 1004(b) (1) of such Act (relating to authorizations for research) is amended (1) by striking out "and" and "1976," and (2) by striking out "for fiscal year 1977" and inserting in lieu thereof the following: "for the fiscal year ending September 30, 1977, and $62,922,250 for the fiscal year ending September 30, 1978".

(d) Section 1005(b) of such Act (relating to authorizations for informational and educational materials) is amended (1) by striking out "and" after "1976;", and (2) by striking out "for fiscal year 1977" and insert-

ing in lieu thereof the following: "for the fiscal year ending Septemoer 30, 1977; and $690,000 for the fiscal year ending September 30, 1978".

SEC. 6. (a) Section 1121(b)(5) of the Public Health Service Act (relating to authorizations for sudden infant death syndrome programs) is amended (1) by striking out "and" after "1976,", and (2) by striking out "June 30, 1977" and inserting in lieu thereof the following: "September 30, 1977, and $2,300,000 for fiscal year ending September 30, 1978".

(b) Section 1131(f) of such Act (relating to authorizations for hemophilia programs) is amended (1) by striking out "and" after "1976,", and (2) by striking out "for fiscal year 1977" and inserting in lieu thereof the following: "for the fiscal year ending September 30, 1977, and $3,450,000 for the fiscal year ending September 30, 1978".

(c) Section 1132(e) of such Act (relating to authorizations for blood separation centers) is amended (1) by striking out "and" after "1976,", and (2) by striking out "for fiscal year 1977" and inserting in lieu thereof the following: "for the fiscal year ending September 30, 1977, and $3,450,000 for the fiscal year ending September 30, 1978".

SEC. 7. (a)(1) The first sentence of section 708(a) of the Public Health Service Act (relating to health professions data) is amended (A) by inserting "program" after "health professions personnel which", and (B) by striking out "United States and its territories and possessions" and inserting in lieu thereof "States".

(2) Section 708(e)(1)(C) of such Act is amended by inserting "use" after "personal data which".

(b) Section 721(f) of such Act (relating to regional health professions programs) is amended by striking out "subsection (a)" in paragraphs (1) and (2) and inserting in lieu thereof "subsection (a) of section 720".

(c) Effective October 1, 1977, section 731(a)(2)(B) of such Act (relating to loan repayment period) is amended (1) by inserting "nor later than 12 months" after "9 months", and (2) by striking out ", and not later than the earlier of 12 months after such date or of 3 years after the date he" and inserting in lieu thereof "or".

(d) Effective October 1, 1977, section 736 of such Act (relating to participation of Federal credit unions) is amended by striking out "Director of the Bureau of Federal Credit Unions" and inserting in lieu thereof "Administrator of the National Credit Union Administration".

(e) Effective October 1, 1977, section 737(1) of such Act (relating to definition of eligible institution) is amended by striking out "that is receiving, or the Secretary determines is eligible to receive, a grant under section 770 for such fiscal year" and inserting in lieu thereof "that received a grant, or the Secretary determines met the requirements for receipt of a grant, under section 770 for the preceding fiscal year".

(f) Section 741(f)(1)(B) of such Act (relating to loan forgiveness) is amended by inserting before the semicolon the following: "or who obtained, before October 12, 1976, any other educational loan for his costs at a school of medicine, osteopathy, dentistry, veterinary medicine, optometry, pharmacy, or podiatry".

(g) Effective October 1, 1977, sections 748(b)(2) and 749(b)(2) of such Act (relating to traineeships) are each amended by inserting "tuition and fees and" before "such stipends".

(h) Effective October 1, 1977, section 758(a) of such Act (relating to scholarships for first-year students of exceptional financial need) is amended by striking out "in the school year ending in the fiscal year in which such grant is made".

(i)(1) Effective October 1, 1977, the first sentence of section 771(b)(2)(C) of such Act (relating to residencies in primary care) is amended by striking out "training program of such school in primary care" and inserting in lieu thereof "training program of any school in primary care".

(2) Effective October 1, 1977, section 771(b)(2)(E) of such Act (relating to termination of affiliation with medical residency training programs) is amended by striking out "in the fiscal year".

(3) Effective October 1, 1977, section 771(b)(3)(A) of the Public Health Service Act (relating to eligibility for capitation grants) is amended by striking out "immediately before" and inserting "in".

(4) Effective October 1, 1977, section 771(b)(3)(B) of such Act (relating to the enrollment of students of foreign schools of medicine in schools of medicine in the United States) is amended to read as follows:

"(B) No later than August 15, 1977, and August 15 of each of the next two years, the Secretary shall identify the citizens of the United States who—

"(i) before October 12, 1976—

"(I) were students in a school of medicine not in a State, or

"(II) were enrolled in programs of institutions of higher education (other than schools of osteopathy or schools of medicine of more than two years) which programs were in existence in the States before such date and which prepare students to enter the third year of schools of medicine in the States; and

"(ii) by date of the identification made under this subparagraph—

"(I) in the case of a student described in clause (i)(I), successfully completed at least two years in a school of medicine not in a State, and, in the case of a student described in clause (i)(II), successfully completed a program described in such clauses, and

"(II) successfully completed part I of the National Board of Medical Examiners' examination (or any successor to such examination).

The Secretary shall equitably apportion a number of positions among the schools of medicine in the States adequate to fill the needs of students identified in accordance with the preceding sentence.".

(j) Effective October 1, 1977, section 781(d)(2)(C) of such Act (relating to residency program requirement) is amended by striking out "or general internal medicine" and inserting in lieu thereof ", general internal medicine, or general pediatrics".

(k) Section 789(a)(1) of such Act (relating to training in emergency medical services) is amended by striking out "and to assist in meeting the cost" and all that follows in such section and inserting in lieu thereof the following: ", to assist in meeting the cost of training (including the cost of establishing programs for the training) of physicians in emergency medicine, especially training which affords clinical experience in emergency medical services systems receiving assistance under title XII of this Act, and to assist in meeting the cost of traineeships for individuals in graduate medical education programs who are in need of the traineeships and who plan to specialize or work in the practice of emergency medicine. Traineeships provided under grants or contracts under this paragraph shall provide for tuition and fees and such stipends and allowances (including travel and subsistence expenses and dependency allowances) as the Secretary may deem necessary.".

(l) Effective October 1, 1977, section 796(a)(4) of such Act (relating to project grants and contracts) is amended by striking out "of methods" and inserting in lieu thereof "or improvement of programs".

(m) Effective October 1, 1977, section 796(c) of such Act (relating to eligibility for allied health special project grants and contracts) is amended (1) by striking out "or" at the end of paragraph (2), (2) by striking out the period at the end of paragraph (3) and inserting in lieu thereof "; or", and (3) by adding after paragraph (3) the following new paragraph:

"(4) other public or nonprofit private entities capable, as determined by the Secretary, of carrying out projects described in subsection (a).".

(n)(1) Effective October 1, 1977, subpart IV of part C of title VII of such Act (relating to national Health Service Corps Scholarships) is amended by adding at the end thereof the following new section:

"INDIAN HEALTH SCHOLARSHIP PROGRAM

"SEC. 757. (a) In addition to the sums authorized to be appropriated under section 756(a) to carry out the Scholarship Program, there are authorized to be appropriated $5,450,000 for the fiscal year ending September 30, 1978, $6,300,000 for the fiscal year ending September 30, 1979, $7,200,000 for the fiscal year ending September 30, 1980, and for each of the succeeding four fiscal years such sums as may be specifically authorized by an Act enacted after the date of enactment of this section, to provide scholarships under the Scholarship Program to provide physicians, osteopaths, dentists, veterinarians, nurses, optometrists, podiatrists, pharmacists, public health personnel, and allied health professionals to provide services to Indians. Such scholarships shall be designated 'Indian Health Scholarships' and shall be made in accordance with this subpart, except as provided in subsection (b).

"(b)(1) The Secretary, acting through the Indian Health Service, shall determine the individuals who shall receive the Indian Health Scholarships, shall accord priority to applicants who are Indians, and shall determine the distribution of the scholarships on the basis of the relative needs of Indians for additional services by specific health professions.

"(2) The active duty service obligation prescribed in the written contract entered into under this subpart shall be met by the recipient of an Indian Health Scholarship by service in the Indian Health Service, in a program assisted under title V of the Indian Health Care Improvement Act, or in the private practice of his profession if, as determined by the Secretary in accordance with guidelines promulgated by him, such practice is situated in a physician or other health professional shortage area and addresses the health care needs of a substantial number of Indians.

"(c) For purposes of this section, the term 'Indians' has the same meaning given that term by subsection (c) of section 4 of the Indian Health Care Improvement Act and includes individuals described in clauses (1) through (4) of that subsection.".

(2) Section 105(a) of the Indian Health Care Improvement Act is amended by striking out "pursuant to section 104" and inserting in lieu thereof "pursuant to section 757 of the Public Health Service Act".

(o)(1) The second sentence of section 810(a) of such Act (relating to computation of capitation grants for nursing schools) is amended by inserting "for each fiscal year" after "shall be computed".

(2) Paragraphs (1), (2), and (3) of such section 810(a) are each amended by striking out "such year" each place it occurs and inserting in lieu thereof "such fiscal year".

(3) Sections 810(c)(1)(A), 810(c)(2)(A), and 810(c)(2)(B) of such Act relating to requirements for nursing school capitation grants are each amended by striking out "beginning after" and inserting in lieu thereof "beginning in".

(4) Section 810(c)(1)(B) of such Act is amended by striking out "fiscal" each place

it occurs and inserting in lieu thereof "school".

SEC. 8. (a) Section 202(d) of the Community Mental Health Centers Act (relating to authorizations for planning of community mental health center programs) is amended (1) by striking out "and" after "1976,", and (2) by striking out "for fiscal year 1977" and inserting in lieu thereof the following: "for the fiscal year ending September 30, 1977, and $100,000 for the fiscal year ending September 30, 1978".

(b) Section 203(d)(1) of such Act (relating to authorizations for initial operation) is amended (1) by striking out "and" after "1976,", and (2) by striking out "for fiscal year 1977" and inserting in lieu thereof the following: "for the fiscal year ending September 30, 1977, and $22,775,000 for the fiscal year ending September 30, 1978".

(c) Section 204(c) of such Act (relating to authorizations for consultation and education services) is amended (1) by striking out "and" after "1976,", and (2) by striking out "for fiscal year 1977" and inserting in lieu thereof the following: "for the fiscal year ending September 30, 1977, and $15,000,000 for the fiscal year ending September 30, 1978".

(d) Section 205(c) of such Act (relating to authorizations for conversion grants) is amended (1) by striking out "and" after "1976,", and (2) by striking out "for fiscal year 1977" and inserting in lieu thereof the following: "for the fiscal year ending September 30, 1977, and $22,000,000 for the fiscal year ending September 30, 1978".

(e) Section 213 of such Act (relating to authorizations for financial distress grants) is amended (1) by striking out "and" after "1976,", and (2) by striking out "for fiscal year 1977" and inserting in lieu thereof the following: "for the fiscal year ending September 30, 1977, and $12,000,000 for the fiscal year ending September 30, 1978,".

(f) Section 231(d) of such Act (relating to authorizations for rape prevention and control) is amended (1) by striking out "and" after "1976,", and (2) by striking out "for fiscal year 1977" and inserting in lieu thereof the following: "for the fiscal year ending September 30, 1977, and $5,750,000 for the fiscal year ending September 30, 1978".

(g) Section 203(e)(1)(A)(i) of such Act (relating to conversion grants) is amended by striking out "two grants" and inserting in lieu thereof "three grants".

SEC. 9. (a) Section 501 of the Social Security Act (relating to authorizations for maternal and child health and crippled children's services) is amended (1) by striking out "and" after "1972,", and (2) by striking out "and each fiscal year thereafter" and inserting in lieu thereof the following: "and for each of the next four fiscal years, and $399,864,200 for the fiscal year ending September 30, 1978, and for each fiscal year thereafter".

(b) Section 249B of the Social Security Amendments of 1972 (relating to compensation under medicaid for nursing home inspectors) is amended by striking out "June 30, 1977" and inserting in lieu thereof "September 30, 1980".

SEC. 10. (a) Section 602(a)(5) of Public Law 94-63 (relating to authorizations for home health services) is amended by inserting after "1977" the following: ", and $3,450,000 for the fiscal year ending September 30, 1978,".

(b) Section 602(b)(4) of such Public Law (relating to authorizations for home health services training) is amended (1) by striking out "and" after "1976,", and (2) by inserting after "1977" the following: ", and $1,000,000 for the fiscal year ending September 30, 1978,".

SEC. 11. (a)(1) Section 303(a) of the Comprehensive Alcohol Abuse and Alcoholism Prevention, Treatment, and Rehabilitation Act of 1970 (relating to State plans) is amended by adding after and below paragraph (16) the following:

"Each State plan shall pertain to the twelve-month period of the State fiscal year which commences in the calendar year in which the plan is submitted and shall be submitted not later than July 15 of each calendar year.".

(2) Section 303(b) of such Act is amended by adding at the end the following: "A State plan submitted under subsection (a) may also contain provisions relating to drug abuse or mental health. The Secretary, acting through the National Institute on Alcohol Abuse and Alcoholism, shall establish procedures by which the Institute shall review each State plan submitted under subsection (a) and under which it shall complete its review of each such plan not later than September 15 of the calendar year in which the plan is submitted or not later than sixty days after the plan is received by the Institute, whichever is later.".

(3) The second sentence of section 409(e) of the Drug Abuse Office and Treatment Act of 1972 (relating to State plans) is amended by striking out "commencing October 1 of the calendar year" and inserting in lieu thereof "of the State fiscal year which commences in the calendar year".

(b)(1) The first sentence of section 302(a) of the Comprehensive Alcohol Abuse and Alcoholism Prevention, Treatment, and Rehabilitation Act of 1970 (relating to allotments) is amended by striking out "shall be less than $200,000." and inserting in lieu thereof the following: "shall, except as provided in paragraph (2), be less than the greater of (A) $200,000, or (B) the amount of such State's allotment for the fiscal year ending June 30, 1976, unless the amount appropriated under section 301 for allotments for the fiscal year ending June 30, 1976, was greater than the amount appropriated for the fiscal year for which the minimum allotment determination is being made, in which case the minimum allotment prescribed by this clause shall be an amount which bears the same ratio to the amount allotted for the fiscal year ending June 30, 1976, as the amount appropriated for the fiscal year for which the minimum allotment determination is being made bears to the amount appropriated for the fiscal year ending June 30, 1976.".

(2) Section 302(a) of such Act is further amended (1) by inserting "(1)" after "(a)" and by adding at the end the following:

"(2) If the amount appropriated under section 301 for any fiscal year is less than the amount required to make for such fiscal year the minimum allotment prescribed by paragraph (1) to each State with an approved State plan, the minimum allotment for such fiscal year for a State with an approved State plan shall be an amount which bears the same ratio to the minimum allotment prescribed by paragraph (1) for such State as the amount appropriated under section 301 for such fiscal year bears to the amount of appropriations required to make the minimum allotment, as so prescribed, to each State with an approved State plan.".

(c) Section 311(c)(2)(B)(i) of such Act (relating to review of applications) is amended by striking out "his" and inserting in lieu thereof "its".

(d) The second sentence of section 202 of the Drug Abuse Office and Treatment Act of 1972 (relating to the Director of the Office of Drug Abuse Policy) is amended by striking out "any other department or agency of the United States" and inserting in lieu thereof "any department or agency of the United States engaged in any drug traffic prevention function (as defined in section 103)".

(e) Section 408(b)(2) of the Health Professions Education Assistance Act of 1976 (Public Law 94-484) (relating to effective date of revision of National Health Service Corps Scholarship Program) is amended—

(1) by striking out "Except as provided in subparagraph (B)" in subparagraph (A) and inserting in lieu thereof "Except as provided in subparagraphs (B) and (C)"; and

(2) by amending subparagraph (C) to read as follows:

"(C) If an individual received a scholarship under the Public Health and National Health Service Corps Scholarship Program for any school year ending before September 30, 1977, periods of internship or residency served by such individual in a facility of the National Health Service Corps or other facility of the Public Health Service shall be creditable in satisfying such individual's service obligation incurred under that Program for such scholarship or for any scholarship received under the National Health Service Corps Scholarship Program for any subsequent school year.".

Mr. ROGERS (during the reading). Mr. Chairman, I ask unanimous consent that the bill be considered as read, printed in the RECORD, and open to amendment at any point.

The CHAIRMAN. Is there objection to the request of the gentleman from Florida?

There was no objection.

COMMITTEE AMENDMENTS

The CHAIRMAN. The Clerk will report the committee amendments.

The Clerk read as follows:

Committee amendments: Page 5, line 14, strike out "$62,922,250" and insert in lieu thereof "$67,838,000".

Page 5, line 10, insert "(1)" after "(c)"; redesignate clauses (1) and (2) in lines 11 and 12 as clauses (A) and (B), respectively; and after line 15 insert the following:

(2) Section 1004(b)(2) of such Act (relating to limitation on source of funds) is amended by adding immediately before the period the following: "or for the administration of this section".

Page 6, line 1, strike out "June 30," and insert in lieu thereof "fiscal year".

Page 6, line 2, before "Sep-" insert "ending".

Page 8, line 16, before "and" insert "the second time it occurs".

Page 13, line 15, strike out "such" and insert in lieu thereof "the Public Health Service".

Page 14, line 10, after "for" insert "the".

Mr. ROGERS (during the reading). Mr. Chairman, I ask unanimous consent that the committee amendments be considered en bloc, considered as read, and printed in the RECORD. These are basically technical amendments.

The CHAIRMAN. Is there objection to the request of the gentleman from Florida?

There was no objection.

The CHAIRMAN. The question is on the committee amendments.

The committee amendments were agreed to.

AMENDMENTS OFFERED BY MR. PEPPER

Mr. PEPPER. Mr. Chairman, I offer amendments and ask unanimous consent that they be considered en bloc.

The CHAIRMAN. Is there objection to the request of the gentleman from Florida?

There was no objection.

The Clerk read as follows:

Amendments offered by Mr. PEPPER: Page 16, line 24, strike "$3,450,000" and insert in lieu thereof "$8,000,000".

Page 17, line 3, strike "$1,000,000" and insert in lieu thereof "$4,000,000".

Mr. PEPPER. Mr. Chairman, I am pleased that my distinguished friend and colleague from Florida has brought such a fine bill before us extending many important health programs.

However, the members of the House Select Committee on Aging, which I have the privilege of chairing, and a number of the members of the Commerce Health Subcommittee which reported this bill to the floor, and others are joining in this amendment because of concern that the bill reduces last year's home health authorization from $12 million to $4.45 million.

Last year a report of the Aging Committee called for an increase in home health demonstrations and training. We believe that at the least, last year's $12 million should be restored. Our amendment would maintain the current levels of $8 million for demonstrations and $4 million for training.

This amendment has been endorsed by the Nation's leading senior citizens' organizations, including the National Council of Senior Citizens, the American Association of Retired Persons, the National Council on Aging, the National Caucus on the Black Aged, and others.

Home health is cost-effective. A GAO report found that among 20 studies by experts, 19 supported the proposition that "home health care can be less expensive than institutional care."

Perhaps a few million dollars spent on developing home care alternatives to institutions can point us in the direction away from the $9 billion we spent on nursing homes and $41 billion on hospital care last year.

In addition, page 14 of the Commerce Committee's own report on this bill states:

Home health care has been increasingly recognized as providing in many instances, a less expensive and often more effective alternative.

Mr. Chairman, we have heard the argument that fraud and abuse exists in home health agencies. I commend my colleague, Mr. ROGERS, and others in this Congress who have brought some of these abuses to light. I share their concern and I have offered proposals to end these activities—such as full disclosure of ownership, tighter peer review, and so forth. I am as serious about fraud and abuse as anyone in this body, Mr. Chairman, But I am also serious about the need to move ahead with our program to bring relief to the 22 million elderly people of this country who count on our compassion and our vigorous efforts to provide the service they desperately need.

It is possible that we will always have fraud. One thing is for certain: We will always have the elderly who need our attention. The elimination of fraud and abuse is an ongoing operation. We have to maintain vigilance, it is the price we pay for democracy. What better way do we have to control fraud and abuse, Mr. Chairman, than through federally supervised demonstration programs. Through them we have the ability to determine what programs work and which do not; to determine which operations are run honestly and which are not.

Concerning the amount of money, the committee says it cut back the authorization to reflect the 115 percent of last year's appropriation. But the need for this program is far greater. HEW informed me that it expects 400 qualified applications this year—nearly seven times the number for which funding is now available—56.

While the Carter administration only asked for $3 million in the budget it is acknowledged that this year's Carter budget was largely the previous administration's recommendations so as to allow time for new personnel to develop new proposals. Let me quote President Carter's views in this campaign:

We do not need to wait for enactment of a national (health) program to improve health services for older people. One important reform we can begin immediately would be to shift the focus of our programs away from institutions and toward outpatient and home health services.

I met with the President's representatives at the White House last week, and they have requested our recommendations for possible budget changes. It is not too late to include items in the budget. I would point out that it is not really even necessary to clear an authorization—rather than an appropriation—in the budget. But I do hope the appropriations can be increased also.

This program is only a year old. To put it back now would cripple it even before it has really begun.

All we are seeking to do is restore the $7.55 million that has been cut from last year's authorization. You may be interested in knowing that Senator KENNEDY's Health Subcommittee has already reported to the full Senate Human Resources Committee the equivalent of our amendment.

I urge your support of the amendment.

Mr. COHEN. Mr. Chairman, will the gentleman yield?

Mr. PEPPER. I yield to the gentleman from Maine.

Mr. COHEN. Mr. Chairman, I want to commend the gentleman from Florida for this statement. I think the committee hearings last year demonstrated that the elderly people of this country want an alternative to institutionalization and that the evidence would warrant, even if we assume it were cheaper, but even if it were not, this is the more beneficial program to present as an alternative.

Second, I inquire of the gentleman in the well, in view of the $12 million authorization last year, my understanding is that there has been something like two and a half times as great application by home health agencies to participate in this program over last year. If we simply increase the appropriation figure by 15 percent, that will not nearly handle the amount of applications we now have pending. Is that not so?

Mr. PEPPER. That is correct.

Mr. COHEN. I want to commend the gentleman again, and will support him when it comes time for a vote on this amendment.

Mr. PEPPER. I thank the able gentleman. At our committee's direction, I went down to the White House the other day, last week, and had a conference with the President's representative, Mr. Eisenstadt. We laid before him the program of the Aging Committee, and invited a meeting with the President. He said he would set it up at an early date. We already have a statement from the President in his campaign which endorses the idea of more funds for home health care for the elderly. This is what the President said in his campaign:

We do not need to wait for enactment of a national health program to improve health services for our older people. One important reform we can begin immediately would be to shift the focus of our programs away from institutions and toward outpatient and home health services.

What we are seeking to do is to preserve an opportunity to appear before the Appropriations Committee and have the President join us—and we still have some hope of that being done—to ask something nearer the authorization for 1977 for fiscal year 1978, namely, $8 million for demonstration projects and $4 million for training projects.

What the committee has done is to reduce the authorization from $8 million for demonstrations down to $3.45 million, 15 percent above the amount actually appropriated for fiscal year 1977; and to reduce the $4 million authorized in the present law for training down to $1 million. We say, why should this committee reduce the authorization and deny us any hope whatsoever of getting any improved contribution from the Appropriations Committee, with the help of the executive branch.

Mr. COHEN. Mr. Chairman, if the gentleman will yield further, as I understand the gentleman's amendment, what he is seeking to do is simply to provide the Appropriations Committee with the flexibility of increasing the amount of the appropriation if it should find the facts would warrant it. But, to give the committee the flexibility it has had in the past, as it had last year, they might very well only appropriate the $4 million or $3.5 million, but they might very well find a need to go to $8 million and $4 million.

Mr. PEPPER. The gentleman is absolutely correct.

The CHAIRMAN. The time of the gentleman from Florida has expired.

(On request of Mr. BAUCUS and by unanimous consent, Mr. PEPPER was allowed to proceed for 3 additional minutes.)

Mr. BAUCUS. Mr. Chairman, will the gentleman yield?

Mr. PEPPER. I yield to the gentleman from Montana.

Mr. BAUCUS. I would like to associate myself with the remarks of the gentleman from Florida. In my experience, home health care has probably been more imaginative, more effective than any other health care delivery system I

have seen in the State of Montana. I think the gentleman is right in seeking to restore the authorization to last year's level.

As the gentleman from Maine has pointed out, it gives the Appropriations Committee the opportunity to be flexible in providing the appropriate amount. I think, we can and should go further in providing home health care services as opposed to providing other, more costly health care delivery systems. In short, home health care services cost less and provide more flexibility than other health care programs.

The home health care program is one which has just begun to assist senior citizens in my district. Currently Montana has nine such programs in operation, including such towns as Anaconda, Billings, Bozeman, Butte, Great Falls, Helena, Kalispell, and Missoula.

Additional funding is necessary for additional home health programs, particularly in more remote rural areas of Montana.

The need for home health services is clear. The number of persons receiving benefits under current programs is not sufficient in terms of need.

Home health services is less costly than the institutionalization of patients. I fully support this amendment and commend the gentleman from Florida for offering it.

Ms. OAKAR. Mr. Chairman, will the gentleman yield?

Mr. PEPPER. I yield to the gentlewoman from Ohio, a member of the Aging Committee.

Ms. OAKAR. Mr. Chairman, I just want to say that I wish to associate myself with the gentleman's remarks. It is really unthinkable that medicare is so limited in its coverage of the elderly's needs in health care. The average low-income elderly person lives on a fixed income of approximately $3,000 per year. A good portion of this income goes toward their health needs. There is no one in more dire need of adequate health care than the elderly, especially those on fixed incomes.

It seems absolutely necessary, and in fact I think the request is modest. I think if we can spend billions of dollars on the various programs we have voted for in the past few months there is no reason why we ought not to only respect the wishes of the gentleman from Florida, but to increase the amount of money for home health care.

Mr. PEPPER. I thank the gentlewoman.

Mrs. LLOYD of Tennessee. Mr. Chairman, will the gentleman yield?

Mr. PEPPER. I yield to the gentlewoman from Tennessee.

Mrs. LLOYD of Tennessee. Mr. Chairman, I rise in strong support of the amendment to restore the funding for home health services to the originally proposed $12 million level. Home health care has been increasingly recognized as providing, in many instances, a less expensive and often more effective alternative to continuing hospital and nursing home care. The entire budget proposal is needed to adequately develop these programs. Often we overlook some very basic needs of our citizens while we concentrate on other priorities. One of the vital concerns which I believe we cannot ignore is home health care for the elderly.

Unfortunately, many of our elderly are placed in long-term care facilities when they could remain at home and want to do so. Granted, sometimes institutionalization is necessary; but, more times than not, it is the only alternative that we have to offer them.

Institutions are generally well-meaning and humane in their treatment; and they very adequately serve the needs of those who need constant care and treatment, but they still cannot meet the needs of the elderly as individuals. The limited service which is provided by home health care programs is often sufficient for many elderly and still allows them the comfort and security of remaining in their homes around family and friends they love.

We have found an alternative now and that is home health care. This availability of home health care services allows older people to remain at home by providing needed care while families are at work or school, and unable to stay with an elderly parent, grandparent, husband, or wife.

National Health Center statistics show that at least 18 percent of the noninstitutionalized elderly population suffer some limitation in mobility. Many of these people can continue to live independently only through the use of in-home services. It has been estimated that at least 300,000 institutionalized older persons could be better serviced by in-home service, particularly home health care. We should not ignore this demonstrated need for continued and improved home health care.

I think that we all recognize that most of the elderly would prefer to remain in their homes for treatment whenever this is possible. There is substantial proof available that such treatment is not only more acceptable but less expensive than institutional treatment.

For these reasons, I strongly support the restoration of $12 million funding for home services; and, I urge my colleagues to do the same.

Mr. PEPPER. I thank the gentlewoman for her remarks.

Mr. BEARD of Rhode Island. Mr. Chairman, will the gentleman yield?

Mr. PEPPER. I yield to the gentleman from Rhode Island (Mr. BEARD), a member of the Select Committee on Aging.

Mr. BEARD of Rhode Island. I thank the gentleman for yielding.

Mr. Chairman, I also would like to support the gentleman from Florida (Mr. PEPPER) in his amendment. The gentleman has certainly been a champion in this area, ever since the days of Franklin Delano Roosevelt, in presenting services to our less fortunate people.

Mr. Chairman, I very proudly support the gentleman's amendment.

Mr. YOUNG of Florida. Mr. Chairman, will the gentleman yield?

Mr. PEPPER. I yield to the gentleman from Florida (Mr. YOUNG).

Mr. YOUNG of Florida. I thank the gentleman for yielding.

Mr. Chairman, I want to commend the gentleman for bringing this amendment to the floor. Mr. Chairman, I rise to support the amendment to restore last year's figure of $12 million authorized for home health services to H.R. 4976. The rationale of the committee in reducing the amount of money approved for home health care services, from $12 million to $4.45 million, is to limit total authorization for health services to 115 percent of the 1977 appropriation. The purpose of the limitation is to give Congress and the administration adequate time to review these programs, preparatory to 1979. Mr. Chairman, the record establishes my commitment to sound fiscal policies and responsible spending programs. However, in this instance, I think the committee has considered the figures and overlooked the facts.

The growth rate of aging population in the United States is more rapid than the rate of our population as a whole. It is estimated that by the year 2000, persons in the age category of 65 years of age and over will total 28 million people. In 1890, the average lifespan for an individual in this country was 49 years. Today, thanks to medical and technical advances it has advanced to 71 years.

Elderly people have problems that most of us in this room do not worry about on a day-to-day basis. Perhaps it would be well to pause for a moment, and consider that one day, most of us will deal with those problems, and on a very personal basis. If at this point in our own lives, each of us faced the choice of staying in our own homes, enjoying the free choice of when to get up and go to bed, the right to have a sandwich or a candy bar whenever we are hungry, the option of reading a book or watching television at 2 o'clock in the morning if we cannot sleep, and all of the other privileges of free choice we enjoy without thinking much about them; or, being placed in a nursing home where our hours of waking and sleeping, our scheduled mass-produced meals, and our activities day and night are necessarily determined by others—what do you think our individual choice would be?

Many of the people who are now facing this problem are virtually at the end of their lives, and undoubtedly at the end of their ability to make an independent choice of how and where they want to spend their remaining years. A great many are faced today with the decision of staying at home or going to a nursing home. They cannot wait until fiscal year 1979 for the committee to reevaluate their problem. If they lose the home health care services now available to them, many of them will be unable to remain in their homes. Frequently, in addition to the patient involved, there is the added complication of a spouse of many years, who does not need either nursing home care or home health care, but will be left to live all alone—with all of those attendant problems—if it is necessary for the patient to be admitted to a nursing home.

A number of professional people in the field of providing for the needs of the aging have communicated their concern for the reduction of funding authorized by the Health and Environmental Sub-

committee, and their comments on the subject should be considered at this time.

Mother M. Bernadette de Lourdes, O.C., president of the National Council on the Aging, Inc., states:

National Health Center statistics show that at least 18 percent of the non-institutionalized elderly population suffer some limitation in mobility. Many of these people are homebound and can continue living independently only through the use of in-home services. Estimates have been made that suggest at least 30,000 institutionalized older persons could be better served by in-home services—particularly home health care. Clearly more public attention should be given to these alternative services.

Mr. Nelson Cruikshank, president of the National Council of Senior Citizens, Inc., adds:

Home Health Care is an invaluable service. It gives older people who are no longer completely self-sufficient, but who do not require 24 hour-a-day medically supervised care, a chance to maintain a normal life style, centered around family, friends, and the familiar. The authorization level of last year's health services bill was $12 million for home services. N.C.S.C. opposes the proposed cutback to $4.5 million as H.R. 4976 recommends. This reduction of $7.55 million flies in the face of the demonstrated need for improved models of home health care services.

Mr. Peter W. Hughes, legislative counsel for the National Retired Teachers Association and the American Association of Retired Persons, has stated:

Home health services have been a long neglected part of our health care system, and it seems unwise to reduce the authorization below the level previously provided for such services if we are to continue the progressive development of a medical resource which is today by far the most acceptable alternative to institutionalization of our older citizens in need of medical care.

In view of the fact that each year there are more and more Americans who need home health services in order to maintain their independence as long as possible, are we not foolish to consider losing ground in this very important program. To be sure, the committee is to be commended for wishing a thorough evaluation of the problem to determine exactly how important this program is to how many people, but such an evaluation should be the groundwork for improving the existing program, not undermining it.

I urge my colleagues to consider the seriousness of this matter to the people who are in need of home health services right now, and to support this amendment to maintain an authorization of $12 million this year, so that this valuable contribution to the dignity and security of many of our senior citizens will not suffer.

Incidentally, Mr. Chairman, the amount of additional funding authorization this amendment provides is really nothing when compared with the millions of dollars worth of medical care the American taxpayer pays for in foreign lands all over this world.

The CHAIRMAN. The time of the gentleman from Florida (Mr. PEPPER) has expired.

(By unanimous consent, Mr. PEPPER was allowed to proceed for 2 additional minutes.)

Mr. BIAGGI. Mr. Chairman, will the gentleman yield?

Mr. PEPPER. I yield to the gentleman from New York (Mr. BIAGGI), a member of the Select Committee on Aging.

Mr. BIAGGI. Mr. Chairman, I want to congratulate the gentleman from Florida (Mr. PEPPER) for offering this amendment. I want to state for the record that I am privileged to be associated with the gentleman on the Select Committee for the Aging and, obviously, I am in support of this amendment. But I find it incredible, and what confounds me is that we are having so much discussion over a proposal which has so much merit. We talk, as the Indian, with forked tongue. We visit our constituency, we visit the senior citizens, and we espouse their cause and promise them the moon. But yet when it comes down to reality, and given the opportunity to do something substantial, we find opposition. All that is requested here is a modest increase in the authorization. It is a simple request. A modest increase in the authorization—in reality it is a restoration of funds. Traditionally, the Appropriations Committee reduces authorizations.

Mr. PEPPER. It is the same authorization for this year.

Mr. BIAGGI. Generally, Appropriations reduces the request of the authorization. Give the Appropriations Committee the opportunity to properly evaluate the need. This proposal, home care for the elderly, in my judgment, is based upon a happy experience, and bitter at the same time, because it is limited in its availability. Based upon happy experiences it is probably one of the most salutary efforts and programs that we have made in the Congress. Today we have the opportunity to do a little something. I am not excited about the magnitude of this effort. But I am depressed and disappointed in what appears to be some opposition to a simple increase in authorization.

Mr. Chairman, if we are to realize our commitment to the deinstitutionalization of the elderly, it is imperative that we restore the $7.5 million for home health services which is not contained in this bill.

As the chairman of the Federal, State, and Community Services Subcommittee of the House Select Committee on Aging, I am greatly concerned about the delivery of health care services for this Nation's 22 million elderly. The adequacy of health care delivery is based, in good part, on permitting a variety of services to be offered. For years, this Nation was of the belief that the health needs of its elderly could only be met by hospitals and nursing homes. But, as the cost of providing these services began to skyrocket, it became apparent that alternative types of care had to be explored. Congress, in response to this, began to provide funds in various pieces of legislation, for programs to aid in the development of home health services. In last year's Health Services Act, we provided one of the highest levels of funding to date for these services.

That $12 million, provided for in last year's authorization, was spent prudently for demonstration and training grants to establish home health agencies. Support and interest in this program were demonstrated clearly and in fact, the number of eligible applications submitted to the Department of Health, Education, and Welfare for funding, exceeded the number of those actually funded by 2½ times.

I can understand the committee's rationale in seeking justification for expenditures under this act. However, I feel they have chosen the wrong program to reduce at this time, since these cuts are to be implemented before initiating a review of the program. At the very least, the funding level should be restored to last year's $12 million level. If our ultimate goal is efficiency in health care spending, we cannot overlook the fact that home health care represents one of the most cost efficient means of providing health care services. When one considers that we spent some $50 billion in fiscal year 1975 for hospital and nursing home care; it seems illogical not to provide $12 million for home health programs.

The Committee on Aging has studied the health care needs of the elderly in great detail. One of our most important recommendations, contained in a report issued by the committee in the 94th Congress, was for increased Federal funding of home health care services, including grants to colleges and universities for the training of personnel to deal specifically with the elderly in the home environment. The specific figure suggested was $60 million. We realize this goal cannot be achieved at the present time, but the committee strongly feels that funding must be provided for these necessary programs and urges that the $12 million funding level be restored.

This amendment which we are offering today enjoys wide bipartisan support in the Congress and is supported by major senior citizen organizations including the National Council of Senior Citizens, the AARP, the NRTA, and the National Caucus on the Black Aged. The Licensed Practical Nurses Association has also contacted me to indicate their full support for the amendment. Adequate funding of home health service programs is consistent with President Carter's position, which he indicated during his campaign, in support of shifting the focus in health programs for the elderly, from institutional care to outpatient and home health care services.

This Nation is spending some $118 billion per year for health. The system is self-perpetuating and fiscally inefficient. Home health care has been recognized as a cost saving and efficient means of providing care for the aged. It would be a tragic mistake for this Congress to so drastically restrict funds for home health care. Support of this amendment makes good fiscal sense and is an expression of our concern for providing the elderly with adequate health care services.

The CHAIRMAN. The time of the gentleman from Florida (Mr. PEPPER) has again expired.

(On request of Mr. BIAGGI, and by unanimous consent, Mr. PEPPER was allowed to proceed for 5 additional minutes.)

Mr. BIAGGI. Mr. Chairman, I exhort each Member present to express his views—and I think that is what is necessary to impress the committee. The gentleman from Florida (Mr. PEPPER) himself is deeply concerned but feels that this may not be the procedure and may not be the place. But I say that if we reject this, what we are in effect doing is giving the appearance that we do not give a darn. The senior citizens of this Nation are sufficiently abused and sufficiently exploited politically. Let us do something right for them. In my judgment, this is right. It is not enough to get excited about, because there is not enough here. It should be larger.

The gentleman's request should be substantially larger, but he does not make a larger request; he makes a modest request.

There may be other areas for improvement and for providing better service and an enlarged service, but that will come.

Mr. Chairman, I exhort the Members to do what is right. With all due respect to the chairman of the subcommittee who is offering this bill, this bill will not be diminished one scintilla in its efficacy by agreeing to this amendment. As a matter of fact, it may provide it a more salutary glow.

Mr. FISH. Mr. Chairman, will the gentleman yield?

Mr. PEPPER. I yield to the gentleman from New York.

Mr. FISH. Mr. Chairman, I thank the gentleman for yielding, and I rise in support of his amendment.

Mr. Chairman, I would just like to commend the gentleman from Florida (Mr. PEPPER) for offering this amendment to H.R. 4976. I believe, as he does, that last year's $12 million should be restored, thereby retaining the current levels of funding of $8 million for demonstration and $4 million for training grants.

No one likes to think of spending their last days away from home. There must be an alternative to institutional care—and I believe that home health care can provide that alternative. Services should be provided which would enable older people to live happy, independent lives at home despite frailty and disability. However, these services do not currently exist on any notable scale. On the contrary, most nursing service available to older Americans is supplied only in nursing homes.

We now know, that in many instances, home health services are less costly than institutionalization and more often than not the more effective alternative to continuing hospital and nursing home care.

I believe it is time we stop warehousing our Nation's older Americans and offer them the ability to choose. In my opinion, the Pepper amendment can begin to accomplish that purpose.

Mr. WAMPLER. Mr. Chairman, will the gentleman yield?

Mr. PEPPER. I yield to the gentleman from Virginia (Mr. WAMPLER), who is a member of the Select Committee on Aging.

Mr. WAMPLER. Mr. Chairman, I am pleased to join the distinguished chairman of the Select Committee on Aging (Mr. PEPPER), and other members of the Aging Committee, in support of a critically needed amendment to H.R. 4976.

The Pepper amendment will restore the authorization for home health services to the fiscal year 1977 level of $12 million. In view of the increased demand and critical need for home health services established by the Health Revenue Sharing and Health Services Act of 1975, I find it disappointing that H.R. 4976 contains a reduction in the authorization level for home health training and demonstration grants to $4.45 million.

Rationalization for the $7,550,000 reduction in fiscal year 1977 authorization in the committee report, is the desire to limit authorizations to 115 percent of the 1977 appropriation in order that Congress and the administration may have adequate time to review these programs prior to fiscal year 1979. The Nation's elderly have waited too long for adequate health care and critically needed alternatives to institutionalization. It is our responsibility in the 95th Congress to elevate the issue of quality long-term care for the elderly to the level of a national priority, rather than the imposition of indiscriminate reductions in the allocation of resources when such formulas are antithetical to improving the quality of life for older Americans.

Hearings conducted by the Select Committee on Aging revealed the startling fact that there are approximately 2 to 3 million noninstitutionalized persons who are bedfast, homebound and need the supportive assistance provided by home health agencies. The committee report "New Perspectives in Health Care" contains the recommendation for a $60 million appropriation for grants and loans for nonprofit and public home health agencies and for the training of professional and paraprofessional home health personnel. A significant portion of the recommended appropriation would be allocated for the development of agencies in underserved counties and counties not served by certified agencies. One of the greatest concerns to the elderly residing in rural areas and small towns is the insufficiency of medical care and inaccessibility to existing medical facilities as a result of the maldistribution of health resources.

Statistics indicate that 54.8 percent of the Nation's physicians are located in the most densely populated metropolitan areas and serve the needs of 41.4 percent of the population. Only 7.3 percent of the Nation's physicians are located in nonmetropolitan areas to serve the needs of 17 percent of the population. A total of 145 counties with more than 500,000 residents have no active physician in patient care.

An efficient home health delivery system coordinated with other health and social service providers would be an initial step in reducing the disparity between urban and rural health services.

Mr. Chairman, I urge the adoption of the Pepper amendment as vital to the growth and development of the home health program—a cost effective solution to the health needs of the Nation's elderly population.

Mr. PEPPER. Mr. Chairman, I thank the gentleman from Virginia (Mr. WAMPLER) for his contribution.

Mr. Chairman, this amendment is cosponsored by the gentleman from California (Mr. ROYBAL), the gentleman from Pennsylvania (Mr. ROONEY), the gentleman from New York (Mr. BIAGGI), the gentleman from New York (Mr. SCHEUER), the gentleman from California (Mr. WAXMAN), the gentleman from New Jersey (Mr. FLORIO), the gentleman from Maine (Mr. COHEN), the gentleman from Virginia (Mr. WAMPLER), the gentleman from Arkansas (Mr. HAMMERSCHMIDT), the gentleman from New York (Mr. KOCH), the gentleman from New York (Mr. OTTINGER) and the gentleman from New Jersey (Mr. MAGUIRE). I hope the amendment will be agreed to.

Mr. ROGERS. Mr. Chairman, I rise reluctantly in opposition to the amendment.

Mr. Chairman, all the arguments we have heard are very emotional and very appealing, but they really do not go to what this bill does. This bill does not go to the point of providing home health services. This bill is not delivering home health care services.

Some of the Members have misunderstood what this bill is doing. It does not do that at all, nor was it ever designed to do that.

I know that those members of the Select Committee on Aging have a great interest in this area. The Subcommittee on Health and the Environment does, too.

When we wrote this program we said that what we wanted to be done in this particular phase of our bill was to have some demonstration projects in order to see what we can do in providing additional services through demonstrations. The statement was made that there were 2½ times the number of funded applicants who were qualified. A simple telephone call to Dr. Ed Martin—and we verified this today—showed that every qualified applicant for this program was funded. That is 56 out of the 139 who applied. There is plenty of money to continue and add to the existing program.

Mr. Chairman, I do not hear anybody getting up and saying anything about the minorities, the blacks or the Puerto Ricans in community health centers. Those centers agree that they think 115 percent, as the committee provides, is fair. They are willing to do it.

I do not see anybody standing up and saying we should go above the 115 percent formula for migrant health centers. The migrants agree that 115 percent is fair; and they would abide by what the committee purposes.

Mr. Chairman, what about the hypertension program, which includes 23 million Americans? They said it was fair to have 115 percent on a 1-year extension bill. We are proceeding this way so that the administration and the committee can work together this year to decide what revisions should be made, not to just, helter-skelter, make some emotional appeal.

Mr. Chairman, the committee has

gone into this program. This committee is interested in getting home health care.

Do the Members know what we do in medicaid and medicare? We are up to about a half-billion dollars in delivery of home health services under those programs.

Let us not have anyone come in here and tell me that this committee is against home health services. This committee handles medicaid. The committee of the gentleman from Illinois (Mr. ROSTENKOWSKI) handles medicare. Both programs authorize generous home health care benefits.

Every group wants more money, every one. Yet, they all said they could live with this 1-year extension at an 115 percent increase. However, someone, all of a sudden, says that this particular program, which is not even involved in the provisions of services, has to have more and more consideration than anybody else.

Mr. Chairman, the committee does not think so. The committee thinks the reported bill is reasonable and fair.

I hope that the House will stand by the committee and stand with those in the community mental health program as well as stand with those in the neighborhood health centers, who would have liked to have had more, too. I hope that we will also stand with the migrants and that we will stand with the hypertensives. Everyone wants to be fair.

Mr. Chairman, we are going to look carefully at this and the rest of the health services at the end of this year, with help from the administration. The committee has been reasonable, and I hope that the Members will understand that.

Mr. PEPPER. Mr. Chairman, will the gentleman yield?

Mr. ROGERS. I yield to the gentleman from Florida.

Mr. PEPPER. Mr. Chairman, my distinguished friend and colleague, the gentleman from Florida (Mr. ROGERS), has said, with respect to some of these other beneficiaries, that they apparently had agreed to the 15 percent addition of last year's appropriation.

In the case of the aging, I do not know anybody who has agreed to the authorization.

Mr. ROGERS. Mr. Chairman, if the gentleman will permit, it is not just the elderly who benefit from home health services. Surely the gentleman knows this assistance does not go just to the aging.

Mr. PEPPER. There has been a letter received by the Members of this House from the National Council on the Aging, the American Association of Retired Persons, and the National Council of Senior Citizens.

Mr. ROGERS. Mr. Chairman, I would urge that the amendment be defeated.

The CHAIRMAN. The time of the gentleman from Florida (Mr. ROGERS) has expired.

Mr. CARTER. Mr. Chairman, I move to strike the requisite number of words.

Mr. Chairman, I would like to have a colloquy with the distinguished chairman, the gentleman from Florida, Mr. ROGERS.

Of course, as the chairman said, the funds in this bill actually are for a demonstration project; is that not correct?

Mr. ROGERS. If the gentleman will yield, that is correct.

Mr. CARTER. And we did increase the amount which both of our Presidents have recommended; is that correct?

Mr. ROGERS. That is correct.

Mr. CARTER. This program is not only for our elderly; are we not right on that?

Mr. ROGERS. That is correct.

Mr. CARTER. At the same time, in this legislation which we have today we are authorizing expenditures for community health centers which would include services for the elderly. Also, under medicare and medicaid, home visits for the elderly are covered.

Furthermore, the amount authorized for community health centers comes to $247 million for fiscal year, 1978.

Mr. Chairman, I defy any man anywhere to say that the chairman and I do not have the welfare of the older people at heart. We certainly do, and we resent anyone's making the statement that we are not solicitous about the health of the elderly American people. Am I correct, Mr. Chairman?

Mr. ROGERS. The gentleman is correct.

Mr. JOHN L. BURTON. Mr. Chairman, will the gentleman yield?

Mr. CARTER. I yield to the gentleman from California.

Mr. JOHN L. BURTON. Mr. Chairman, first of all, as the gentleman from Kentucky (Mr. CARTER) knows, I have respect and affection for him and for the gentleman from Florida (Mr. ROGERS), the chairman of the subcommittee.

We are not saying that there is not anything in here for the elderly, but what we are saying—and I will address my attention to this side of the aisle and also to the enlightened side, that side of the aisle, although all are enlightened persons—is that all this amendment does is bring the authorization up to the level at which it was under the Ford administration, the previous administration.

Mr. CARTER. Mr. Chairman, I refuse to yield any further.

I want to say right now that this authorization has not been what the gentleman has stated. Last year it was a total of 12, that was 8 and 4, and in this legislation it is $3.45 million for demonstration projects and $1 million for training.

Actually that is not enough money to furnish help for the poor people of West Palm Beach if it was for assistance to the elderly.

Mr. ROGERS. Mr. Chairman, will the gentleman yield?

Mr. CARTER. I yield to the gentleman from Florida.

Mr. ROGERS. Mr. Chairman, I might say that in President Carter's budget it is $3 million. We have provided $3.5 million. There is zero provided for training here and we have provided $1 million. So that the President's budget has been exceeded by about one and a half million in this request. That is both former President Ford's and President Carter's request.

Mr. CARTER. I want to further point out, Mr. Chairman, that we have $247 million in here for community centers to help them.

Mr. JOHN L. BURTON. Mr. Chairman, I move to strike the requisite number of words, and I rise in support of the amendments.

Mr. Chairman, I think that everything everybody says is correct. It is higher than President Carter's budget. It is less than last year's authorization under the other administration.

Again I am addressing my attention basically to my Democratic colleagues.

I am sure the Members know that the principles of our party enunciated through the election, as well as the principles of the party on the other side of the aisle, are to provide economic justice for the elderly; for the elderly who cannot afford certain things for themselves. For people whose working years may have been during the depression when there was not any work or when they were not really covered under social security because they might have been in the gaps that were not covered, or when their retirement benefits, from whatever institutions, were based on wages a long time ago that we know do not keep up with inflation.

What we are saying is. and it has bipartisan support, bring it up to the level of the authorization that we had last year. That was fine.

What is an authorization? It is not a blank check. It says if the President in his wisdom, and we know that he is a fairly wise President, if he wishes to authorize more he can have some leeway, it may be he might wish to put some more money into programs such as this that are a lot more beneficial and economical for the taxpayers and as I say, more beneficial to the senior citizens than would be some kind of institutional care.

The appropriation for this will be coming up. We are not appropriating the money now. And if the money is appropriated later it may not even be spent.

What we are saying is that we recognize the need and that the need is as great, at least, as it was last year. That is all we are saying. It even might be a little bit more than that, but, let us say it is the same.

This provides the authority. It is not mandated. They do not have to spend the money for the program. This is the authority.

I think this is the least we can do if we recognize the needs of the elderly and we know that those needs have not decreased since last year.

This gives authority to the executive and to the Committee on Appropriations and to the Members seated here to perhaps feel that we can invest a certain amount of money that might improve the quality of the life of the elderly and that might at the same time even be a tax savings in the future because we will have prevented greater expenditures.

So, Mr. Chairman, I really believe that this is a piece of cake. It does not bust the budget. It does not do anything we did not do last year. I cannot see any reason for being against it. Certainly the committee came on with the thought: My God, let us never amend a committee bill.

Remember, we amended a resolution yesterday. The gentleman from Maryland had his amendment agreed to. We amend bills every day.

I have great affection and respect for this subcommittee from the Committee on Interstate and Foreign Commerce but, I mean, they do not carry my proxy and I do not think they carry the proxies of the Members. I know that they try to do the best they can and that they have an agreement with the administration to try to extend things and hold things in abeyance. We are not breaking that. We are saying there is a little more authority to help the elderly of our country and do it in a way that will even be beneficial from a fiscal standpoint. It may be a tough political vote to help the elderly and save tax dollars, but I think we ought to take the chance, because this is not an election year.

Mr. BONKER. Mr. Chairman, will the gentleman yield?

Mr. JOHN L. BURTON. I yield to the gentleman from Washington.

Mr. BONKER. I thank the gentleman for yielding.

I serve on the Select Committee on Aging with the gentleman from California. Is it not true that in our study of institutionalized care versus home health care that greater reductions in health care can be achieved by placing our emphasis on and our investment in home health care as opposed to institutionalized care? I think that is what this program is all about.

Mr. JOHN L. BURTON. Absolutely. This will provide savings of dollars yet uncounted. It is a cheaper and a better source of care, and it is better for the elderly.

Mr. BONKER. If the gentleman will yield further, is it not also true that the Senate is moving to authorize $12 million for this program and that we should at least match that amount?

Mr. JOHN L. BURTON. I believe that the other body is moving in that direction, yes.

Have courage and vote "yes".

Mrs. SPELLMAN. Mr. Chairman, I move to strike the requisite number of words.

Mr. Chairman, I want to take only a few minutes to indicate my very strong support for the amendment offered by the distinguished gentleman from Florida (Mr. PEPPER). I raced in from a markup session because I feel so strongly about this.

Home health services offer an alternative to institutionalization, an alternative which we should encourage as much as possible.

Institutionalization is such an ugly word, reflecting the loss of privacy, and even the loss of individuality which occurs when someone is institutionalized. Institutionalization of the elderly, primarily through nursing homes, is the focus of our medical care programs, and this should not be the case. So many of those who survive in nursing homes would be happier and better cared for in a home atmosphere, receiving the individual treatment and attention that they deserve. Home health care is less expensive and often more effective than continuing hospital and nursing home care—we should not be discouraging this alternative by reducing the authorization for it.

However, that is exactly what this bill proposes. While the funding level last year for home health care services was only $3 million, the authorization was $12 million. This disparity between authorization and appropriation should be recognized in this year's extension of the program. Home health services as a program has been in operation for little more than 2 years, and has yet to receive funds sufficient to make it a fully operational program. The $4.45 million proposed authorization in this bill, while greater than the amount appropriated last year, is substantially less than the amount originally authorized. Such a drastically lowered authorization gives scant room for the Appropriations Committee to work in, and most certainly denies full operational status to home health services demonstration and training programs.

I think that it is important to note that H.R. 4976 is intended to give Congress and the administration adequate time to review these health programs for fiscal year 1979. How can the effectiveness of home health services be reviewed? The program is not fully operational, and it certainly cannot become operational with such a reduced authorization.

Mr. Chairman, I urge my colleagues to join me in support of Mr. PEPPER'S amendment to restore—and this is a restoration to last year's level, not an increase of any kind—the $12 million authorization for home health services demonstration and training projects.

Mr. CARTER. Mr. Chairman, will the gentlewoman yield?

Mrs. SPELLMAN. I yield to the gentleman from Kentucky.

Mr. CARTER. I thank the gentlewoman for yielding.

Certainly I have great sympathy for our elderly people, but I would say to the gentlewoman in the well that to accomplish the purpose which she mentions $12 million is just a drop in the bucket. To do something like this throughout the United States would cost no less than $800 million for home health care for all of our senior citizens, and at the present time about 12 percent of our population is 65 or over. Moreover, medicare and medicaid already provide coverage for home health services. Those would be the proper programs for which to increase funding levels, rather than this small demonstration authority.

Mrs. SPELLMAN. I do want to say to the gentleman that to say that this is not enough is a rather sad excuse. If it is not enough, then let us not put anything in or if it is not enough, let us put more in. Let us put in the amount of money that this kind of program really deserves, because home health services is a program which needs to be made as fully operational as we possibly can.

Mr. Chairman, I move to strike the requisite number of words.

Mr. Chairman, as I listened to the debate, and I am sorry I came in late, I would be led to think that America had just been discovered, that home health care is a brand new program. I support home health care. The U.S. Government supports home health care, and supports it very well. As I understand, this is just a demonstration project as to how to improve home health care.

For those not familiar with it, let me explain. We carry home health care programs under the medicaid program. Lord knows how many millions of dollars we put into it. We carry home health care under the medicare program, and again I cannot tell Members how many dollars we put into it, but there is an awful lot of money that goes into it and there is no limit as to how much money can be spent. It is just a question of how much is the demand and how much we are able to provide. So there is no limitation on the amount of money that is being spent on home health care under medicare and medicaid.

Ms. OAKAR. Mr. Chairman, will the gentleman yield?

Mr. GIBBONS. I yield to the gentlewoman from Ohio.

Ms. OAKAR. Can the gentleman tell me where in medicare is long term home health care covered the same as it is covered in the program before us now? Where specifically?

Mr. GIBBONS. There was a project I just got through investigating in California and I can tell the gentlewoman all about that if she wants me to. We found a lady running the program there who had charged two Mercedes Benzes to the U.S. Government.

Ms. OAKAR. I am talking about the average elderly, which covers every economic group, and most of the elderly are poor, for the information of the gentleman. Where specifically under medicare is this covered?

Mr. GIBBONS. If the gentlewoman will pardon me, I just do not care to yield any more.

Mr. ROGERS. Mr. Chairman, will the gentleman yield?

Let me finish my statement, because I did not yield to the gentlewoman and I would rather not yield to the gentleman at this time.

There is plenty of help under medicaid and medicare that covers the elderly, the aged, the poor. There is an awful lot going on.

I do not know what the Rogers program is supposed to do, but Members must not think we are not doing anything in the United States and that we are not spending a great deal of money.

In fact, the biggest problem we have right now in home health care is to try to find the way to provide home health care and at the same time to see to it that not only the elderly but also the Government get their money's worth out of it.

In a recent program brought to my attention, we had to go into it because it fell within the Oversight Subcommittee

of the Committee on Ways and Means, we found in California—and I am not just picking on California, because Florida has things equally bad—the lady running the home health care charged a couple of Mercedes Benzes, a $24,000 one, and she charged a $25,000 recreational vehicle and a $1,800 brass bed and a $700 pair of jade earrings to the U.S. Government—and it just went on and on. When we asked her to explain, she took the fifth and so did her accountant. When we checked on the provider to see what was going on, we found the distinguished insurance company had been checking up on them also, but they had their own auditors hired away from them, and when they got through with that they hired away the Government auditors when they got to breathing on them.

When we get to home health care we have got to be careful not to push it past our ability to do good. I do not know what the Rogers program is going to do, but I know the gentleman from Florida is a very conscientious man and he is trying to improve health care in this country. I do not want anybody just to think we do not want to provide home health care, but we need some way to get it to the people, to get the rackets out of it, and to make sure the Government as well as the patients get their money's worth out of it.

This demonstration program, as has been proposed by the gentleman from Florida (Mr. ROGERS) and the subcommittee, I understand, is opposed to that.

Mr. ROGERS. Mr. Chairman, will the gentleman yield?

Mr. GIBBONS. I yield to the chairman.

Mr. ROGERS. Mr. Chairman, I thank the gentleman for yielding.

I think the point made by the gentleman is certainly valid. We are spending almost half a billion dollars in home health services. This provision does not go to that at all. All this is is a demonstration program.

We are over the President's budget in both instances—in the demonstration program and the training program—more than President Carter has asked for. I would hope the Democrats would take note of that.

Furthermore, as the gentleman said, this business of fraud and abuse really needs to be looked into. We have evidence coming in so rapidly now that it is frightening. In some instances, the Government is paying more to nurses and allied health professionals for home health services than for care by the doctor himself in the house.

The CHAIRMAN. The time of the gentleman from Florida has expired.

(By unanimous consent, Mr. GIBBONS was allowed to proceed for 2 additional minutes.)

Mr. GIBBONS. Mr. Chairman, I just want to yield to the gentlewoman from Ohio (Ms. OAKAR).

Ms. OAKAR. Mr. Chairman, I just want to point out specifically that medicare does not cover long-term or in-depth home health care. I agree, it is very discouraging when we hear about these Mercedes Benz and other abuses.

Mr. GIBBONS. Mr. Chairman, let me interrupt. If it does not, there is an awful lot of money spent not according to law, because in this California matter I talked about, 96 percent of the money came from medicare funds. We are talking about an awful lot of money.

Ms. OAKAR. We are talking about long-term or in-depth home health care.

Mr. GIBBONS. I am talking about home health care, yes. I understand what the gentlewoman means, the kind where the patient is in the home and they go in and deliver services to that patient in the home. We finance it under medicare and under medicaid. I am familiar with this program.

Ms. OAKAR. Let me ask one other point, because the gentleman was allowed 2 additional minutes.

Whenever we bring up isolated incidents—and I am sure there are problems with people who take advantage of a program—let us not forget the millions of elderly people who legitimately are served. I hope we do not have the attitude in this Congress that we want to penalize everyone.

Mr. GIBBONS. Oh, no.

Mr. Chairman, I think I have yielded long enough.

Ms. OAKAR. I think this is very important.

The CHAIRMAN. The time of the gentleman from Florida has again expired.

(By unanimous consent, Mr. GIBBONS was allowed to proceed for 1 additional minute.)

Mr. GIBBONS. Mr. Chairman, I just want to say that the whole home health care program is a good program, but it is not just carried under this program.

Mr. CARTER. Mr. Chairman, will the gentleman yield?

Mr. GIBBONS. I yield to the gentleman from Kentucky.

Mr. CARTER. Mr. Chairman, I certainly agree with the gentleman.

Mr. GIBBONS. It is carried on under two ongoing programs, in which we have invested millions of dollars.

Mr. CARTER. The gentleman has made an excellent statement. Every patient entitled to medicaid is entitled to unlimited coverage for home health services. Under medicare, both part A and part B provide coverage for home health care for up to 100 visits under each part. However, under part A 3 days of hospitalization must precede the home health care coverage.

The program that the chairman is talking about and has brought forth and has sponsored is only a demonstration project.

Mr. HUGHES. Mr. Chairman, I move to strike the requisite number of words.

Mr. Chairman, I, too, am a member of the Select Committee on Aging. I would like to point out that HEW testified before our committee that current home health care programs, including medicare and medicaid, are "not sufficient in terms of need."

Testimony before us shows that there are 2 or 3 million uninstitutionalized persons who are homebound or need assistance in getting around.

The HEW study shows that 1 million institutionalized elderly, between 14 and 25 percent, may be "unnecessarily maintained in an institutional environment."

My colleagues preceding me, particularly my colleague from Kentucky, have pointed to the fact that we are only talking about a demonstration project, and that is true. But, as my colleague well knows, demonstration projects will often determine to a great extent the course of future health care delivery programs, including training. Funding also is directly related to the rapidity with which we bring on line home health care delivery programs that really present alternatives to institutional care.

Mr. CARTER. Mr. Chairman, will the gentleman yield?

Mr. HUGHES. I yield to the gentleman from Kentucky.

Mr. CARTER. I would say again that every person under medicaid is entitled to an unlimited coverage for home health care. Under medicare, coverage for home health care is provided under both part A and Part B for up to 100 visits under each part. However, in order, to be covered under part A for home health care, there must be 3 days of hospitalization first. This is the area, if the gentleman will yield further, in which we should expand our care, and not on a demonstration project.

Mr. HUGHES. I appreciate that, and I appreciate the contribution. I think my colleague has made that point on many other occasions today, but it is still inadequate and the demonstration programs we are talking about are not covered under existing law. They add something new, and these demonstration programs are really charting the future for our home health care delivery services.

Mr. Chairman, I yield back the balance of my time, and ask for a vote.

The CHAIRMAN. The question is on the amendments offered by the gentleman from Florida (Mr. PEPPER).

The question was taken; and the Chairman announced that the noes appeared to have it.

RECORDED VOTE

Mr. PEPPER. Mr. Chairman, I demand a recorded vote.

A recorded vote was ordered.

The vote was taken by electronic device, and there were—ayes 322, noes 69, not voting 41, as follows:

[Roll No. 117]

Messrs. VENTO, AMBRO, GORE, FOUNTAIN, WHITTEN, SKELTON, BENNETT, BREAUX, and McKAY changed their vote from "no" to "aye."

Mr. EVANS of Georgia and Mr. ENGLISH changed their vote from "aye" to "no."

So the amendments were agreed to.

The result of the vote was announced as above recorded.

PERSONAL EXPLANATION

Mr. STANGELAND. Mr. Chairman, on rollcall No. 117, the vote on the Pepper amendments, I was unavoidably absent. Had I been present I would have voted in favor of the amendments.

The CHAIRMAN. Are there further amendments? If not, under the rule, the Committee rises.

Accordingly the Committee rose; and the Speaker having resumed the chair, Mr. MAZZOLI, Chairman of the Committee of the Whole House on the State of the Union, reported that that Committee, having had under consideration the bill (H.R. 4976) to amend the Public Health Service Act, the Community Mental Health Centers Act, title V of the Social Security Act, and the program of assistance for home health services to authorize appropriations for fiscal year 1978 for health services programs, and for other purposes, pursuant to House Resolution 448, he reported the bill back to the House with sundry amendments adopted by the Committee of the Whole.

The SPEAKER. Under the rule, the previous question is ordered.

Is a separate vote demanded on any amendment? If not, the Chair will put them in en gros.

The amendments were agreed to.

The SPEAKER. The question is on the engrossment and third reading of the bill.

The bill was ordered to be engrossed and read a third time, and was read the third time.

The SPEAKER. The question is on the passage of the bill.

Mr. ROGERS. Mr. Speaker, on that I demand the yeas and nays.

The yeas and nays were ordered.

The vote was taken by electronic device, and there were—yeas 376, nays 4, not voting 52, as follows:

[Roll No. 118]

The Clerk announced the following pairs:

Mr. Jones of Tennessee with Mr. Alexander.

Mr. Cotter with Mr. AuCoin.

Mr. Teague with Mr. Leggett.

Mr. Heftel with Mr. Mikva.

Mr. Applegate with Mr. Scheuer.

Mr. Barnard with Mr. Charles H. Wilson of California.

Mr. Brooks with Mr. Krueger.

Mr. Flippo with Mr. Clay.

Mr. Ertel with Mr. Diggs.

Mr. Hawkins with Mr. Perkins.

Mr. Howard with Mr. Luken.

Mr. Russo with Mr. Evans of Colorado.

Mr. Staggers with Mr. Fraser.

Mr. Roe with Mr. Gudger.

Mr. Rose with Mr. Jenkins.

Mr. Koch with Mr. Udall.

Mr. Milford with Mr. Charles Wilson of Texas.

Mr. Murphy of New York with Mr. Eckhardt.

Mr. Zablocki with Mr. Wirth.

Mr. Shipley with Mr. Symms.

Mr. St Germain with Mr. Fuqua.

So the bill was passed.

The result of the vote was announced as above recorded.

A motion to reconsider was laid on the table.

GENERAL LEAVE

Mr. ROGERS. Mr. Speaker, I ask unanimous consent that all Members may have 5 legislative days in which to revise and extend their remarks on the bill just passed.

The SPEAKER. Is there objection to the request of the gentleman from Florida?

There was no objection.

BUDGET OF DISTRICT OF COLUMBIA FOR FISCAL YEAR 1978—MESSAGE FROM THE PRESIDENT OF THE UNITED STATES (H. DOC. NO. 95–116)

The SPEAKER laid before the House the following message from the President of the United States; which was read and, together with the accompanying papers, referred to the Committee on Appropriations and ordered to be printed with illustrations:

To the Congress of the United States:

In accordance with the District of Columbia Self-Government and Governmental Reorganization Act, I am today transmitting for your consideration the budget of the District of Columbia for fiscal year 1978.

JIMMY CARTER.

THE WHITE HOUSE, *March 31, 1977.*

RESIGNATION AS DELEGATE TO CONFERENCE OF INTERPARLIAMENTARY UNION IN CANBERRA, AUSTRALIA

The SPEAKER laid before the House the following resignation as a delegate to the Conference of Interparliamentary Union in Canberra, Australia:

WASHINGTON, D.C.,
March 30, 1977.

Hon. THOMAS P. O'NEILL, JR.,
The Speaker, U.S. House of Representatives, Washington, D.C.

DEAR MR. SPEAKER: I respectfully request that I be removed as a delegate to the Conference of Interparliamentary Union in Canberra, Australia.

I am honored by your appointing me as a member of the delegation, and I regret very much that I am unable to participate.

With kindest regards,

Sincerely yours,

ROBERT N. GIAIMO,
Member of Congress.

The SPEAKER. Without objection, the resignation is accepted.

There was no objection.

RESIGNATION AS DELEGATE TO CONFERENCE OF INTERPARLIAMENTARY UNION IN CANBERRA, AUSTRALIA

The SPEAKER laid before the House the following resignation as a delegate to the Conference of Interparliamentary Union in Canberra, Australia:

MARCH 17, 1977.

Hon. THOMAS P. O'NEILL, Jr.,
Speaker, U.S. House of Representatives, Washington, D.C.

DEAR MR. SPEAKER: Thank you very much for your letter notifying me that I have been appointed as a delegate to the Interparliamentary Union meeting in Canberra.

I appreciate very much this opportunity, and I regret that for personal reasons and because of political commitments, I will be unable to go.

Thank you for your understanding.

Cordially,

RICHARDSON PREYER.

The SPEAKER. Without objection, the resignation is accepted.

There was no objection.

RESIGNATION AS DELEGATE TO CONFERENCE OF INTERPARLIAMENTARY UNION IN CANBERRA, AUSTRALIA

The SPEAKER laid before the House the following resignation as a delegate to the Conference of Interparliamentary Union in Canberra, Australia:

WASHINGTON, D.C.,
March 30, 1977.

Hon. THOMAS P. O'NEILL, Jr.,
Speaker of the House, Washington, D.C.

DEAR MR. SPEAKER: I am writing to submit my resignation as a member of the Interparliamentary Union Delegation.

I am requesting that this resignation become effective immediately.

Thank you very much for your attention to this matter.

Sincerely,

LEE H. HAMILTON.

The SPEAKER. Without objection, the resignation is accepted.

There was no objection.

APPOINTMENT AS MEMBERS OF DELEGATION TO ATTEND CONFERENCE OF INTERPARLIAMENTARY UNION IN CANBERRA, AUSTRALIA

The SPEAKER. Pursuant to the provisions of section 204(b), Public Law 94–141, the Chair appoints as members of the delegation to attend the Conference of the Interparliamentary Union in Canberra, Australia, from April 10 to April 16, 1977, the following Members on the part of the House to fill the vacancies thereon: The gentleman from New Jersey (Mr. PATTEN); the gentleman from Texas (Mr. PICKLE); and the gentleman from Maryland (Mr. BYRON).

LEGISLATIVE PROGRAM

(Mr. MICHEL asked and was given permission to address the House for 1 minute, to revise and extend his remarks and include extraneous matter.)

Mr. MICHEL. Mr. Speaker, I ask for this time for the purpose of inquiring of the distinguished majority leader for the program of the balance of this week and for next week.

Mr. WRIGHT. Mr. Speaker, will the gentleman yield?

Mr. MICHEL. I am happy to yield to the distinguished majority leader.

Mr. WRIGHT. Mr. Speaker, it will be our purpose to ask that when the House adjourns today, it adjourn to meet at noon on Monday next.

On Monday, which is Consent Calendar day, there are no bills. There are 10 suspensions for Monday, as follows:

H.R. 5306, relating to land and water conservation fund;

H.R. 5027, veterans medical services bill;

H.R. 3695, State grants for veterans home facilities;

H.R. 5029, hospital care for veterans in the Philippines;

H.R. 5025, construction of VA medical facilities;

H.R. 1680, relief for certain underpayments of estimated tax;

H.R. 1828, to defer effective date of sick pay for 1 year;

S. 2025, increased authorization for the SEC, fiscal year 1977;

H.R. 5117, emergency drought legislation;

H.R. 5502, military construction authorization.

In addition to those suspensions, it is expected that the House will take up

H.R. 5294, debt collection practices, subject to a rule being granted.

On Tuesday, the House would meet at noon. There are no bills on the Private Calendar. There are two suspensions scheduled. They are:

H.R. 7, career education, and

H.R. 130, Petroleum Marketing Practices Act.

In addition to those, there is scheduled H.R. 3199, Water Pollution Control Amendments, 1977. I understand a rule has been granted, and it is a 1-hour open rule.

On Wednesday, the House would meet at noon. We will take up H.R. 5262, International Lending Institutions Act, subject to a rule being granted.

At the close of business on Wednesday next, the House would adjourn until Monday noon, April 18, for the Easter district work period.

The House will adjourn by 3 p.m. on Fridays, and by 5:30 p.m. on all other days except Wednesdays, until May 15.

Of course, conference reports may be brought up at any time, and any further program will be announced later.

Mr. MICHEL. Might I ask the distinguished majority leader whether H.R. 5502, military construction, the most recent added to the program, is the omnibus, multimillion-dollar military construction program, or just one individual item?

Mr. WRIGHT. It is my understanding, if the gentleman will yield, that this is the military construction supplemental authorization.

Mr. MICHEL. Then is it expected we would have the conference report on unemployment compensation come up yet today?

Mr. WRIGHT. It is not expected that there will be any additional business today. The business of the week has been concluded.

Mr. STEIGER. Mr. Speaker, will the gentleman yield?

Mr. MICHEL. I yield to the gentleman from Wisconsin (Mr. STEIGER).

Mr. STEIGER. I thank the gentleman for yielding.

Mr. Speaker, would it be possible for the majority leader to give us a better explanation why H.R. 4800 is not scheduled? The gentleman from California got unanimous consent to bring it up today after it was filed. The program expires as of midnight tonight, and I find it difficult to understand why we should not be willing to take it up and discuss it.

Mr. WRIGHT. It is my understanding that the committee desires to take it up later.

Mr. STEIGER. If the gentleman from Illinois will yield further, may I say to the distinguished majority leader that it is my understanding that the reason the conference report may not be brought up has nothing to do with anything except the fear, apparently, perceived or real, that there may be an effort to have a vote on the pay issue. The other body voted that down. But there was an amendment offered by Senator BARTLETT in the other body, which was not adopted, which was not accepted by the conference, on which a vote could be held; and I am, frankly, disturbed—if I can use that word—that the House will adjourn tonight and allow the FSB program to expire because we are not prepared to take that issue up.

Mr. WRIGHT. If the gentleman will yield, I am not prepared to discuss the merits of the legislation with respect to the scheduling. However, as I understood the gentleman's colloquy, he was suggesting that he desired some sort of instructions to recommit the bill to conference.

If that were the case, then this act could not go into effect tonight, anyway, because the House will not be in session tomorrow, and there would not be any purpose in hurrying it through, as the gentleman earlier suggested.

Therefore, the purpose of hurrying it through, as the gentleman first suggested, and the purpose of seeking to recommit it to conference, as the gentleman suggested in the second place, are incompatible with one another.

Mr. STEIGER. Mr. Speaker, will the gentleman from Illinois yield?

Mr. MICHEL. Yes; I yield to the gentleman from Wisconsin.

Mr. STEIGER. Mr. Speaker, the other body adopted the Bartlett amendment by a vote of 82 to 13. It should not take the conferees more than 10 minutes to go back to conference, adopt it in conference, and bring back the conference report. Consent has been given to bring it up. Clearly the other body is not going to fight that proposition.

I say to the majority leader that clearly it is apparent that we could consider this conference report after the conferees reach agreement and get this bill on its way to the President. The President can sign it tonight, and that will continue the FSB benefits for those who will otherwise be without those benefits as of midnight tonight.

Mr. WRIGHT. Mr. Speaker, if the gentleman will yield further, I will just say to the gentleman from Wisconsin (Mr. STEIGER) that he may be a little too conservative in his appraisal of the loquacity of the Members of the House. The majority leader is not prepared to make any judgment in respect to that at this time.

Mr. CORMAN. Mr. Speaker, will the gentleman yield?

Mr. MICHEL. I yield to the gentleman from California.

Mr. CORMAN. Mr. Speaker, I would just respond to the gentleman from Wisconsin (Mr. STEIGER), who has fought this bill at every point and tried to kill it, by saying this: We went to conference and the vote was 8 to 2 in favor of refusing to recede, and the Senate conferees receded on this point. It is not germane.

If this comes back with a nongermane provision in the conference report, the gentleman knows enough about the rules to know that it cannot be pushed through this House in a matter of minutes or hours. He knows who is going to cut FSB off at midnight tonight, and so do I.

Mr. FRENZEL. Mr. Speaker, will the gentleman yield?

Mr. MICHEL. I yield to the gentleman from Minnesota.

Mr. FRENZEL. Mr. Speaker, I would like to point out that the gentleman from Wisconsin (Mr. STEIGER) could have objected to the consideration of the conference report if he had wanted to slow this up. The gentleman from Wisconsin has never held back this particular vote. The gentleman from California (Mr. CORMAN), I think, knows that very well.

If the House wants to move without unemployment compensation, it can do so, but if the House is afraid to grapple with the salary issue, which seems apparent at this point, then we can let unemployment compensation languish, and that will be the responsibility of the majority party.

Mr. MICHEL. Mr. Speaker, I appreciate the distinguished majority leader's telling us about the program for the balance of the day and for next week.

Mr. WRIGHT. Mr. Speaker, I appreciate the expression of appreciation by the distinguished minority whip. I am glad that he appreciates the majority leader's efforts.

DISPENSING WITH CALENDAR WEDNESDAY BUSINESS ON WEDNESDAY NEXT

Mr. WRIGHT. Mr. Speaker, I ask unanimous consent that the business in order under the Calendar Wednesday rule be dispensed with on Wednesday of next week.

The SPEAKER. Is there objection to the request of the gentleman from Texas?

There was no objection.

ADJOURNMENT TO MONDAY, APRIL 4, 1977

Mr. WRIGHT. Mr. Speaker, I ask unanimous consent that when the House adjourns today it adjourn to meet at noon on Monday next.

The SPEAKER. Is there objection to the request of the gentleman from Texas?

There was no objection.

HOUR OF MEETING ON WEDNESDAY, APRIL 6, 1977

Mr. WRIGHT. Mr. Speaker, I ask unanimous consent that when the House adjourns on Tuesday next, it adjourn to meet at noon on Wednesday, April 6, 1977.

The SPEAKER. Is there objection to the request of the gentleman from Texas?

There was no objection.

RESIGNATION AS MEMBER AND APPOINTMENT AS MEMBER OF HOUSE COMMISSION ON CONGRESSIONAL MAILING STANDARDS

The SPEAKER laid before the House the following resignation as a member of the House Commission on Congressional Mailing Standards:

WASHINGTON, D.C., *March 10 1977.*

Hon. THOMAS P. O'NEILL, Jr.,
Speaker, U.S. House of Representatives, U.S. Capitol, Washington, D.C.

DEAR MR. SPEAKER: While I am honored that I have received an appointment once again to the Franking Commission, I must with regrets decline. Increased Committee, legislative and constituent demands on my time preclude my devoting the time and

energy which I feel service on the Commission warrants.

With all best wishes, I remain

Most sincerely,

JAMES J. HOWARD,
Member of Congress.

The SPEAKER. Without objection, the resignation is accepted.

There was no objection.

The SPEAKER. Pursuant to the provisions of section 5(b), Public Law 93–131, the Chair appoints as a member of the House Commission on Congressional Mailing Standards the gentleman from New York (Mr. SOLARZ), to fill the existing vacancy thereon.

APPOINTMENT AS MEMBERS OF U.S. GROUP OF THE NORTH ATLANTIC ASSEMBLY

The SPEAKER. Pursuant to the provisions of section 1, Public Law 689, 84th Congress, as amended, the Chair appoints as members of the U.S. Group of the North Atlantic Assembly the following Members on the part of the House: The gentleman from California (Mr. BOB WILSON); the gentleman from Illinois (Mr. FINDLEY); the gentleman from Alabama (Mr. EDWARDS); and the gentleman from Virginia (Mr. WHITEHURST).

COMMUNICATION FROM CHAIRMAN OF COMMITTEE ON PUBLIC WORKS AND TRANSPORTATION

The SPEAKER laid before the House the following communication from the chairman of the Committee on Public Works and Transportation:

WASHINGTON, D.C.,
March 25, 1977.

Hon. THOMAS P. O'NEILL,
Speaker of the House, House of Representatives, Washington, D.C.

DEAR MR. SPEAKER: Pursuant to the provisions of the Public Buildings Act of 1959, as amended, the House Committee on Public Works and Transportation approved the following prospectuses on March 24, 1977:

LEASE RENEWALS

2000 M Street, N.W., Washington, D.C.
2300 E. Devon Avenue, Des Plaines, Illinois.

ALTERATIONS AND REPAIRS

Virginia Heating, Refrigeration and Sewage Disposal Plant, Arlington, Virginia.

Central Intelligence Agency Building, McLean, Virginia.

CONSTRUCTION

San Jose, California, Courthouse and Federal Building.

The original and one copy of the authorizing resolutions are enclosed with accompanying prospectuses.

Sincerely,

HAROLD T. "BIZZ" JOHNSON,
Chairman.

COMMUNICATION FROM THE CLERK OF THE HOUSE—SUBPENA IN CASE OF MACK AGAINST JENNINGS IN THE U.S. DISTRICT COURT FOR THE DISTRICT OF COLUMBIA

The SPEAKER laid before the House the following communication from the Clerk of the House of Representatives:

WASHINGTON, D.C., *March 31, 1977.*

Hon. THOMAS P. O'NEILL, Jr.,
The Speaker, U.S. House of Representatives, Washington, D.C.

DEAR MR. SPEAKER: On January 4, 1977 Wm. H. (Bill) Mack commenced an action in the United States District Court for the District of Columbia against the Clerk and the Sergeant-at-Arms of the House of Representatives (*Wm. H. (Bill) Mack* v. *Edmund L. Henshaw, et al.* [D.D.C. Civ. Action No. 77–0009]). In this action, plaintiff sought an order compelling defendants to pay him $88,000, an amount approximately equal to the salary of a Member of Congress for a two year period. Plaintiff alleged, *inter alia*, that he was entitled to this relief on the grounds that the House failed to adjudicate the election contest which he filed for the Twenty-first Congressional District of Ohio and permitted the contestant to take the oath of office and assume the duties of a Member of Congress.

On March 4, 1977, my General Counsel filed the attached motion to dismiss the action on behalf of the defendants pursuant to Rule 12(b)(1), (2) and (7) of the Federal Rules of Civil Procedure, together with the attached Memorandum of Points and Authorities in Support Thereof. By the attached order issued on March 23, 1977 by the Honorable Howard F. Corcoran, United States District Judge, the motion to dismiss was granted.

I have the honor to transmit to you the aforementioned documents and I present the matter for the consideration of the House.

With kind regards, I am

Sincerely,

EDMUND L. HENSHAW, Jr.,
Clerk,
U.S. House of Representatives.

The SPEAKER. The subpena and order will be printed in the RECORD at this point.

The subpena and order are as follows:

[In the U.S. District Court for the District of Columbia, Washington, D.C., Civil Action File No. 77–0009]

SUMMONS IN A CIVIL ACTION

Wm. H. (Bill) Mack, Relator, Plaintiff v. W. Pat Jennings, Clerk, U.S. House of Representatives, et al., Defendants.

To the above named Defendant: W. Pat Jennings. You are hereby summoned and required to serve upon Wm. H. (Bill) Mack, plaintiff's attorney, whose address 530 Terminal Tower, Cleveland, Ohio 44113, an answer to the complaint which is herewith served upon you, within 60 days after service of this summons upon you, exclusive of the day of service. If you fail to do so, judgment by default will be taken against you for the relief demanded in the complaint.

JAMES F. DAVEY,
Clerk of Court.
GREG HUGHES,
Deputy Clerk.

Date: January 4, 1977.

[In the U.S. District Court for the District of Columbia, Civil Action No. 77–009]

ORDER

Wm. H. (Bill) Mack, Plaintiff, v. Edmund L. Henshaw, Jr., et al., Defendants.

Upon consideration of defendants' unopposed motion to dismiss *, the memorandum in support thereof, and the entire record herein, it appears to the Court that subject matter jurisdiction over the present action is absent.

It is, accordingly, by the Court this 23d day of March, 1977.

Ordered that this action should be, and the same hereby is, dismissed.

———, ———,
Judge.

*No opposition to the aforementioned motion having been filed within the prescribed time, we treat defendants' motion to dismiss as conceded. *See* Local Rule 1–9(d).

TRADE ADJUSTMENT ASSISTANCE PROGRAM

(Mr. BURKE of Massachusetts asked and was given permission to address the House for 1 minute and to revise and extend his remarks and include extraneous matter.)

Mr. BURKE of Massachusetts. Mr. Speaker, I wish to take this opportunity to bring to the attention of the Members of the House the fact that a hearing was held this morning before the Subcommittee on Trade of the Committee on Ways and Means on the trade adjustment assistance program, which has been a miserable failure in this country.

The program has brought no assistance whatsoever to the unemployed shoe worker; it has brought no financial assistance to those firms that went out of business. In fact, it has been a cruel joke and a hoax on the American public.

Mr. Speaker, I want to point out further that in that hearing room this morning I brought to the attention of the members the fact that foreign imports of footwear now represent 52 percent of the domestic market. We are now seeing a great industry being destroyed as a result of inaction on the part of the U.S. Congress and on the part of the executive branch of government, and it is about time that this country of ours stood up for the American worker and gave his job some protection.

Mr. Speaker, the testimony which I gave at the hearing of the Subcommittee on Trade is included as follows:

TESTIMONY OF THE HONORABLE JAMES A. BURKE BEFORE THE HOUSE WAYS AND MEANS TRADE SUBCOMMITTEE ON THE TRADE ADJUSTMENT ASSISTANCE PROGRAM, MARCH 31, 1977

Mr. Chairman, I am grateful for the opportunity to appear before you and the other distinguished Members of the Trade Subcommittee today. I want to thank the Committee for its initiative in holding hearings on the TAA program. It is a program with many problems—conceptual and administrative—and I recommend that we take clear focus of these problems and begin overhauling the program at once.

First of all, I want to state that the program bears little or no resemblance to that originally contemplated by Congress. Congress made it quite clear when it passed the 1974 Trade Act that TAA was to be considered only if it could be shown that it would remedy demonstrated injury and be a more effective remedy than the other types of relief provided for under the Act. The Executive Branch has systematically used adjustment assistance as a palliative, most notably in the case of the domestic footwear industry, in an effort to avoid foreign criticism and in direct contravention of the Trade laws. Furthermore what little relief is rendered under this program, has been unobtainable because of regulations and administrative decisions that have made the program virtually unworkable.

Perhaps the worst aspect of this program is the fact that it has been used as a palliative by the Federal Government to avoid any rational discussion regarding the real problems of import-impacted firms, vis a vis low labor costs abroad, multinational firms' tax benefits, import barriers to American exports,

etc Adjustment assistance has been called forth time and time again as a quick fix, a cure-all for import battered firms. It seems to soothe some people's consciences as they watch the trade deficits grow and thousands of people separated from their jobs to point to this program as a panacea. Congress never intended its use as such. And as the experience of the shoe industry points up, it can no longer stand the test of scrutiny.

It will probably come to little surprise to the Members of this panel that I intend to focus my remarks on the experience of the shoe industry with TAA. My reasons are several. First of all, this industry was singled out last year as a candidate for what was termed as "expedited trade adjustment assistance". Secondly, footwear is a major domestic industry, facing import penetration better than 50 percent, and I think it is important to see if a major import-impacted industry can realistically or logically "adjust" in accordance with the expectations of this program. Third, the experiences of this industry with TAA have been documented by a recent GAO report commissioned by me over a year ago.

Mr. Chairman, with regard to the shoe industry this program has been a dismal failure. Perhaps this program works better in smaller industries with lower import penetration and the capability and opportunity to diversify into other product lines, but this is where the line must be drawn; it simply does not apply to labor-intensive industries such as footwear either from a worker or firm standpoint. The statistics speak for themselves: A 1975 Federal Reserve Board study found that shoe workers in Massachusetts who had lost their jobs in the previous 20–56 months had enormous difficulties in finding new jobs. Over a quarter had not found jobs; 50 percent had been unable to find fulltime jobs and the 25 percent who had found jobs were working for 16 percent less wages. Two thirds of the industry work force are women (often secondary wage earners), unskilled, with an average of 9 years schooling. The average age of shoe workers is far higher than in most manufacturing concerns. The shoe factory, in more instances than not, was located in a rural area with very few other industries. TAA simply becomes a dole for these workers which, when it runs out means the welfare rolls. Obviously, a program that "retrains and relocates" would not have a high success rate among the workers I have just characterized. Again, in a highly echnological industry the success rate might be greater, however, in a labor-intensive, low paying industry, the program simply does not make sense, and becomes little more than dole.

But let us go on to the firm adjustment assistance program. As a Member of the House Ways and Means Committee during consideration of the Trade Reform Act of 1974, I was involved in the liberalization of this program. I didn't think much of the concept behind the program then; however, I respected the sincere intent of many in Congress, who do not share my trade philosophy, to craft a program which would provide some meaningful relief to workers and firms stung by import competition. I am here to tell you today that this program is a slap in the face to Congress and has been rendered virtually unworkable by the most ridiculous set of regulations I have witnessed in over 40 years in public service. The program has been perverted, severely underfunded, and basic provisions completely ignored. As the only specified Federal program presently available for relief to import-battered firms, TAA is like the emperor's new clothes. On paper the program couldn't sound better—technical assistance, loans, financial assistance; but finding a firm that has benefited by all this government largesse is like trying to find the proverbial needle in the haystack.

With respect to the shoe industry, GAO reported that a Commerce Department Study anticipated that 200 firms would apply for TAA and at least 150 would be eligible for assistance. To this date, only 25 firms have applied, 16 have been certified, (3 of which had been certified under the old act and recertified in June 1975), and only 4 have received any aid at all.

In reality the program is rife with bureaucratic red tape, loan rates which hover almost two percentage points above market rates, all manner and number of governmental compliance regulations delays, no technical assistance whatsoever, and cumbersome and inscrutable application forms. The GAO study documents that there is substantial uncertainty involved in interpreting what information is required in the petition process; how much information is adequate whether all procedures have been complied with and how, if at all, assistance can be obtained in the pre-proposal steps. A firm must show compliance with EPA regulations; file what amounts to a 14 point environmental impact statement; show evidence of an affirmative action plan; sign a civil rights statement indicating it will not discriminate on the basis of sex, race or religion; submit financial records and tax returns for the past five years; undergo FBI checks on financial officers and stockholders; and document in full that imports have been a major cause of steadily declining financial conditions and prospects. All this amounts to time and money—two sorely lacking commodities in a business about to go under. It's a classic catch-22 situation.

Community Adjustment Assistance is nonexistent as government officials have told communities that the program is too complicated and they'd have better luck under other EDA administered programs, and interestingly enough, shoe firms have had more success with other government programs. Let me quote from the GAO report:

"We did note one instance where a nonrubber footwear manufacturer received a working capital loan guarantee of $500,000 under EDA's Business Development Loan Program. The decision to process the project under this program instead of the trade adjustment assistance program was based on several factors according to a Regional Business Development Chief—

"It was unlikely the principals could obtain from the previous owners the necessary information for certification under TAA, the firm did meet the requirements of the Business Development Loan Program, and time considerations.

"Regarding the latter, EDA's Atlantic Regional Office stated that even a minimal delay could probably cause the demise of this company. In this regard, it took only 96 days from application to acceptance to loan agreement signing, a considerably shorter time frame than could be expected under the TAA Program, considering certification and application requirements."

A basic requirement of the program is technical assistance in preparing a firm's application. Section 252 of the 1974 Trade Act states that:

"In order to assist a firm which has been certified as eligible to apply for adjustment assistance under this chapter in preparing a viable adjustment proposal, the Secretary may furnish a technical assistance to such firms."

GAO found "EDA has done little to assist in the preparation of applications for trade adjustment assistance."

Mr. Chairman, what it all boils down to is the fact that the government is telling the shoe industry and other industries like it, that it is expendable. We tell them this when we fail to take any effective import relief action; we tell them this when we offer them a program that is little more than a dole (not much of one at that); we tell them this, again, when we fail to effectively administer this program. Even if we accept all the givens of this program, it still remains a dole, Congress and the Administration must take a long-hard look at this program.

LEGISLATION TO PROHIBIT CHILD PORNOGRAPHY

(Mr. KILDEE asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. KILDEE. Mr. Speaker, today I am resubmitting a bill which Mr. MURPHY of New York and I have previously submitted to prohibit child pornography. With the addition of 6 names, the number of Members sponsoring this legislation has risen to 104. I think that I can safely say that many of my colleagues share my sense of outrage that children are being abused in this fashion. I know that many of us think that the time has come to shout, "Stop."

I think that the sexual exploitation of a child is one of the most indecent invasions that an adult can make on the rights of that child. The most heinous crimes in our society are those which involve the violation of either the body or the mind. The sexual abuse of children involves an element of both. The violation of a child's body is rather obvious, but there is also a violation of the mind. The psychological scars that a child will carry into adulthood as a result of such abuse could actually be greater than the scars created by physical beatings.

The problem is a national problem both in terms of scope and in terms of its interstate characteristics. One estimate places the number of children who are commercially sexually abused at greater than half a million. Such a statistic is frightening. Just as frightening is the fact that such exploitation has been found involving children as young as 2 or 3 years old. We need to stop this shameless exploitation before it damages even more children.

The second way in which the problem is a national problem is that pornographic material which depicts in embarrassing detail the sexual exploitation of children moves through interstate commerce. This material may move through a number of States and through the hands of several dummy corporations before it reaches the shelves. The people who profit from this traffic, are unbelievably perverse and deserve the punishment of our governments. When the pursuit of the god "profit" becomes so great that all sense of social responsibility or decency is lost, the Government has a responsibility to protect those who are being exploited; even more so when the victims are innocent children.

Because it is a national problem, it requires a national solution. The sexual abuse of children presents a constitutional question. The States are the proper source of sexual consent laws. They also have special responsibility in the area of child abuse. We would urge the States to actively enforce existing laws and pass new legislation where it is needed. There are presently at least 18 States which are considering legislation in this area.

When child abuse impinges on interstate and foreign commerce, though, the Federal Government has responsibilities. For that reason, Congressman JOHN MURPHY of New York and I have taken the step of initiating Federal legislation which would make the sexual abuse of children a felony punishable by 20 years imprisonment or a $50,000 fine, or both, for anyone to cause or knowingly permit a child of less than 16 years to participate in a sexual activity if that person knows, or has reason to know, that the tainted fruit of such an activity will end up in interstate commerce. The bill would also make it a felony with severe penalties to ship, receive, or sell through interstate commerce any material which depicts the sexual abuse of a child in either photographs or movies.

We have chosen to concentrate on the sexual abuse of children rather than trying to define obscenity because the issue is really an issue of the protection of children. In addition, it is particularly difficult to develop an acceptable definition of obscenity. It is presently a violation of the criminal code to ship obscene materials through interstate commerce, but that has not prevented an epidemic of materials with sexually explicit photographs of children. The courts have had a particularly difficult time arriving at a definition of obscenity. I do not think, however, that any sane person could contend that the Constitution protects an individual who abuses a child.

In the early part of this century the Congress took action to regulate the conditions of the employment of children because of the atrocious working conditions that existed. I feel that just as pernicious as the sweatshops which left physical scars are the modern day conditions which leave psychic scars.

We in America have always valued our children. They are truly our link to the future. Any abuse of a child is a crime against ourselves and against society. Coldhearted abuse in the pursuit of profit is a particularly heinous crime. These children are not capable of caring for themselves. They need our nurture and our protection.

MOSCOW SALT TALKS

(Mr. WRIGHT asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. WRIGHT. Mr. Speaker, I take this opportunity to address the House on the importance of the President's quest for peace and his efforts to provide a basis for strategic arms negotiations that is both comprehensive and equitable. In our meeting with the President yesterday he explained in detail the administration's efforts to produce a proposal which is fair and balanced, and one that provides for substantial reductions in the arms race. The plan that Secretary Vance presented to the Soviet leaders in Moscow is one which, if used as a basis for negotiations, can lead to the permanent lessening of tensions and provide mutual benefit to both of our countries, as well as to the world.

The elements of our negotiating proposal as the President explained them yesterday include:

First. A substantial reduction in the level of deployment of missile launchers below the 2,400 level, and missiles with multiple warheads or MIRV's below the 1,320 level established under the Vladivostok agreements.

Second. To stop the development and deployment of any new weapons systems.

Third. To freeze at the present level about 550 intercontinental ballistic missiles, our Minuteman, and their missiles known as the SS–17, 18, and 19.

Fourth. To ban the deployment of all mobile missiles, and

Fifth. To have a strict limit on the deployment of the Soviet backfire bomber and a strict limit on the range that would be permitted to cruise missiles.

Our proposal also includes a limit on the number of test firings each year of intercontinental and medium range missiles and an assured means of distinguishing between their mobile missles.

For the first time the United States has come forward with a plan that calls not only for limitations on the production and deployment of nuclear weapons, but for reductions on a major scale that would have a deep and lasting impact on lowering the threshold of nuclear warfare.

The negotiating proposal the President described calls for both equity and parity in the strategic balance between the United States and the Soviet Union. It is a proposal which aims not at unilateral advantage but at a realistic and open appraisal of the nuclear arms race.

The President has presented a plan that can cap the arms race. His is not a proposal that has been submitted to be withdrawn and altered. Rather it is a proposal that he will stick by and which deserves our support.

Before Secretary Vance went to Moscow, 6 weeks of active and arduous preparation went into the U.S. proposal, and it was agreed to by all the agencies and departments taking part in the process of developing our position. That includes the National Security Council, our State and Defense Departments, the Joint Chiefs of Staff, and the Arms Control and Disarmament Agency.

By approaching the problems of limiting new weapons and reducing the threat of present ones, the President and his advisers have offered the prospect for a realistic limit to the nuclear arms race. The congressional leadership fully and enthusiastically supports his efforts and his comprehensive approach.

That the Soviet Union did not accept our proposal as the framework for negotiations at this time is understandable. Perhaps they are testing the President as they have tested previous Presidents in the early days of their terms. Perhaps they need more time to assess it. That would be understandable. But let there be no misunderstanding on one point. The Congress supports the President and his efforts. He has a full term before him and neither he nor we nor the American people are under any pressure to reach an agreement that does not come to terms with the basic issues and resolve them with equity for both sides.

We hope that the Soviet Union will come to realize before the negotiations resume in Geneva in mid-May that the United States proposal represents a sincere, serious, and thoughtful basis for strategic arms negotiations that can benefit both our countries and the world. We are facing the essential and critical issue of our time—survival in the nuclear age. The U.S. proposal represents our best effort to resolve this problem.

AMERICA'S COMMITMENT TO A JUST ARMS LIMITATION PROGRAM

(Mr. BROOMFIELD asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. BROOMFIELD. Mr. Speaker, as one of the Members of Congress who was privileged to attend President Carter's briefing yesterday on the Moscow negotiations, I would like to express my admiration for the manner in which the talks were handled and to thank the President for keeping Congress fully and currently informed.

There may be a tendency to dismiss the Moscow talks as a failure because we were unable to reach agreement with the Soviet Union on a series of matters vital to our national security. I do not see it that way. We presented a series of fair and balanced proposals to our Soviet counterparts, and they were rejected. I think it is clear that we made an honest effort in Moscow to achieve arms reductions that would not jeopardize our national security. I am familiar with these proposals and I do not see how we could have been more forthcoming without making unacceptable, unilateral concessions to the Soviets.

The administration has an obligation to the American people to be firm in its dealings with the Soviets on national security matters. In these negotiations we must proceed from the assumption that no agreement is better than a bad agreement. The United States is not obliged to make its arms limitation proposals acceptable to the Soviet Union; such a concept runs contrary to the whole idea of negotiation and compromise. I believe the Secretary of State and the administration are to be commended for resisting the impulse to realize progress in our relations with the Soviets if such progress entails compromise that are contrary to our national interests.

I also believed it is important to point out that arms limitation talks with the Soviets have not collapsed. There is general agreement that the talks should continue. They will continue and I am hopeful that they will eventually be successful. However, they can only be successful if the Soviets fully understand that the United States is not prepared to pay any price for arms limitations. In this respect, the recent Moscow talks may well have served to pave the way for more productive negotiations in the future.

Finally, Mr. Speaker, I would like to point out that the Soviet Union and other potential adversaries should be aware that the security of the United States of America is not a partisan po-

litical issue. Republicans and Democrats will join in supporting just programs for limitation. They will stand together in resisting false progress, unfair concessions, and any attempt to use these negotiations as a lever to weaken our commitment to the ideals that have made America the strongest and most compassionate nation in the world.

LITHUANIAN INDEPENDENCE

The SPEAKER pro tempore (Mr. MOAKLEY). Under a previous order of the House, the gentleman from Pennsylvania (Mr. FLOOD) is recognized for 60 minutes.

GENERAL LEAVE

Mr. FLOOD. Mr. Speaker, I ask unanimous consent that all Members may have 5 legislative days in which to revise and extend their remarks on the subject of my special order today.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from Pennsylvania?

There was no objection.

Mr. FLOOD. Mr. Speaker, on February 16, 1918, the Lithuanian nation declared its independence. This was a goal for which the Lithuanian people had been striving throughout a long period of Russian domination (1795–1915) followed by German occupation during the First World War. After two decades of independence, Lithuania again fell under Russian domination when it was occupied by the Red Army in the Second World War. It was declared a constituent Republic of the U.S.S.R. on August 3, 1940. Following the German attack on the Soviet Union 10 months later, Lithuania was in Nazi hands until reoccupied by the Soviet Army in 1944. Since then, it has been considered by the Soviet Union as a component republic.

The United States has never recognized the Soviet incorporation of Lithuania or the other two Baltic States—Estonia and Latvia.

Lithuania was one of the first countries to experience the aggression of both Hitler and the Soviet Union. When the outbreak of the Second World War seemed imminent, Lithuania attempted to maintain a policy of absolute neutrality, but was gradually engulfed, nevertheless. The first loss occurred when Klaipeda—Memel—was yielded to Germany in March 22, 1939—in the face of an ultimatum and the threat of German armies.

Next, a mutual assistance treaty was forced upon Lithuania by the Soviet Union on October 10, 1939. Lithuania was required to grant air bases to the Soviet Union and to admit Soviet garrisons in spite of a Soviet-Lithuanian treaty of nonaggression which had been signed in Moscow on September 28, 1926. On June 15, 1940, the Soviets demanded immediate formation of a "friendly" government and occupied the country. In July 1940, a rigged election produced a Congress which requested the incorporation of Lithuania into the Soviet Union. On August 3, 1940, at this "request," Lithuania was declared a constituent Republic of the U.S.S.R. by the Supreme Soviet in Moscow.

Today, Soviet propagandists take great pleasure in castigating "American imperialism." Dire warnings are found almost daily in the Soviet press concerning the threat of American aggression throughout the world. Not surprisingly, the Soviets point out in the same breath that they—not the United States—are the true friends of the "oppressed peoples" of the world. According to the Soviets, their Communist "brothers"—all helpless nations of the world—should look to the Soviet Union for beneficent aid and assistance. Sadly enough, it appears that some people and nations are now falling prey to this Soviet charade.

WHAT THEN IS REALITY?

Last June, we marked the 36th anniversary of the Soviet deportation of over 34,000 Lithuanians to Siberia.

Certainly, the Lithuanian people can attest to the "fraternal assistance" rendered by the Soviet Union.

In 1940, Lithuania was forcibly absorbed into the Soviet state. The Lithuanian people—proud of their heritage and country—did not accept Soviet domination passively. Yet the struggle of Lithuania against its massive Soviet neighbor was decided before it began. Without the aid and support of their "true friends," the brave and gallant Lithuanian people were forced into subjugation.

The Soviet Union—revealing its real self—dealt harshly with Lithuania. Freedom ceased to exist. But the cruelest blow was the massive deportation in June of 1941 of over 34,000 Lithuanian citizens to Siberia. Men, women, and children, representing different sections of the Lithuanian social spectrum—but united in their love for freedom and positive opposition to Soviet rule—were forcibly removed from their homeland and send to labor in the infamous work camps of Siberia.

This then was—and still is—the reality.

We must never forget the injustices the Soviet Union inflicted upon Lithuania. Fortunately for the United States, we have many Americans of Lithuanian descent who still remember, in some cases all to vividly, the tragedy of Lithuania.

We must share those memories and remember the lessons which they embody. For although, ironically, the United States has gained immeasurably from the Soviet Union's crimes in Lithuania, gaining citizens who know and love freedom, we owe it to ourselves and the Lithuanian people not to forget their sufferings.

We here in the United States, who still cherish freedom and democracy, must continue to strive for a redressing of the Soviet crimes carried out against Lithuania and her people. Our commitment must remain ualtered and undiminished. For if we cease to remember we fail not only the Lithuanian people but also ourselves.

Mrs. FENWICK. Mr. Speaker, on March 29 of last year, I spoke on the floor of this House about a most tragic family separation. Mr. Aloyzas Jurgutis of Chicago, Ill., is separated from his wife, Marija and daughter, Daina, both of whom live in Vilnius, Lithuania.

In the year that has lapsed since I last spoke in the well of the House, the Soviet authorities have not in any way moved to reunify this family, despite the Soviet Union's commitments in the Helsinki accord to facilitate family reunification. In fact, the U.S.S.R. is now using that international accord as a pretext for denying legitimate emigration requests. It is a warping of the letter and intent of the Final Act of the Conference on Security and Cooperation in Europe and I call the attention of my colleagues to this attitude of Soviet authorities. The Jurgutis family is just one of thousands subjected to these barriers. The 35 nations which signed the Helsinki accord acknowledged that these matters of family reunification, travel for personal and professional reasons and exchange of information go well beyond purely "internal affairs." The inclusion of these principles in the accord was a milestone in international concern for human rights and has engendered great hope in Eastern Europe and the U.S.S.R. Already this year, for example, we have seen dissention in Poland, Czechoslovakia, Romania, and the Soviet Union because of the promise of the Helsinki accord. In most cases, these governments have ignored the commitments they made at Helsinki in 1975.

Since I last spoke about Aloyzas Jurgutis, the President has signed legislation I introduced to establish a Commission on Security and Cooperation in Europe. Under the very able leadership of Representative DANTE FASCELL, the Commission is now working diligently preparing a U.S. policy for the Belgrade Conference to follow up on implementation of the Helsinki accord. Our own attention to the human rights provisions of the accord has itself given hope to the people in Eastern Europe and the U.S.S.R. that the terms of this international agreement will be implemented and that this will not prove to be a hollow promise. We must, for our part, honor the Helsinki accord and compile a record of compliance by the other signatory countries. Having signed this international document, it is our duty to do so.

In commemorating Lithuanian Independence Day today, we should recognize that the people of Lithuania are not free to "leave any country, including their own, and to return to their country," as the U.N. Universal Declaration of Human Rights promises. The Jurgutis family is only one of many that we should not forget today as we commemorate that period when Lithuanians were free to determine the course of their own lives.

Mr. McHUGH. Mr. Speaker, this year the people of Lithuania commemorate the 59th anniversary of the 1918 Declaration of Independence which ushered in an era of free and independent life for this ancient nation. It is my privilege today to join my colleagues in paying tribute to the indomitable spirit of the Lithuanian people and the great contributions they have made to the world's understanding of liberty as a precious gift.

As Americans, we have just celebrated 200 years of free and independent life. But at the same time that we are proud of our remarkable achievements as a free

people, we should not forget that we are inheritors, not creators, of our own freedom. Indeed, we owe our ideals of self-determination to a spirit of independence and political individuality that had evolved in Europe for many centuries before our own Revolution. In great part, it was Lithuania's strong resistance to invaders seeking new territory that, throughout the Middle Ages, helped to stabilize the development of modern Europe. The distinct national unity that made this resistance possible began in 1251 A.D. with the formation of the Lithuanian state under King Mindaugas. And for many centuries before, the Lithuanian people had become identified—for instance by the Roman historian Tacitus in the first century A.D.—as the ancestral dwellers of the Baltic coast, possessed of a language which is now the oldest in its form of all the world's living languages.

It is thus one of the great tragedies of our time that a people of ancient national identity, culture and peaceful achievements have not been able to retain their territorial sovereignty and political independence in our own times. Untold sufferings have been wrought on humanity by the wars of this century, yet the victories won have in many ways been bitterly unsatisfactory. Ironically, the defeat of Nazi Germany lulled the free Western nations into a tragic acceptance of the Soviet Union's totalitarian activities in Eastern Europe—activities which had proven during the Second World War to be as dangerous to the survival of liberty as had been the Nazi threat.

Today, Mr. Speaker, people who love freedom are still paying a heavy price for the political arrangements that evolved from the Second World War. The business of freedom, for which our country fought, remains unfinished. The sudden breakdown in disarmament talks yesterday in Moscow points up the fact that, decades after Franklin Roosevelt rallied us to win a victory over "freedom from fear," we continue to live fearfully in an era of nuclear power struggles.

We should be truly grateful that, throughout the long period of Soviet oppression that has continued in Lithuania since 1940 to this day, the Lithuanian people have continued to nourish their ancient language, customs and art, ready to hold their national identity in trust for their children's children if necessary, but determined that the love of liberty shall be stronger in this world than the forces of territorial greed and ideological oppression. The United States has supported Lithuania's right to be free again, and has never recognized the illegal Soviet occupation of Lithuania and her sister Baltic republics, Estonia and Latvia. At the same time, our country has been especially blessed by the many tens of thousands of people of Lithuanian descent who adopted our land. They have contributed greatly to the building of America's devotion to liberty at home, and the fostering of human dignity throughout the world.

It has been a sad lesson for the American people that our country, despite its best intentions at times, must be wary of using force to attempt to change political processes abroad, as in the case of Vietnam. Yet our awareness of our limitations must never cause us to be faint-hearted in working diplomatically, economically, and by appropriate political means to further the survival of liberty for Lithuania and the other captive nations. To be worthy of our birthright as a free people, we should not only thrill to Benjamin Franklin's proud exclamation, "Where freedom is, there is my country!" We must also, if we are to be worthy of freedom's blessings, never forget Thomas Paine's magnificent and challenging reply: "Where freedom is not, there is my country!"

Mr. DERWINSKI. Mr. Speaker, I join in welcoming the Reverend Joseph Prunskis who delivered the invocation this morning and has set the stage for this special order in commemoration of Lithuanian Independence Day.

As an original sponsor, of what was to become House Resolution 864, I take this occasion to emphasize the point that it continues to be the policy of the United States in both the executive and legislative branches of Government, that we will not recognize in any way, the Soviet annexation of the Baltic States.

The people of the Baltic States are consistently subject to the deliberate "russification" of their culture, in an effort by the Soviets to eradicate the historic nationalism of the Baltic peoples.

The largest of the Baltic peoples, the Lithuanians, have a long and glorious history. They have withstood previous centures of Russian domination, and I predict that with their fortitude, they will overcome the second stage of Communist suppression and realize the ideals of personal liberty, independence, and human dignity.

Although the Lithuanians are not allowed to celebrate the anniversary of their independence, it is significant that a country whose people have not been allowed to govern themselves for centuries still have strong national ties.

The hopes and aspirations of these peoples have not diminished as evidenced by their continuing defiance of the Soviet Government.

We must not forget the fate of those who are oppressed under Communist totalitarianism, and support their ongoing efforts to achieve their sovereign rights and their dreams of self-government. We must continue to take a firm stand on the enforcement of the human rights section of the Helsinki agreement and reinforce Lithuanians and other Baltic peoples in their determination to gain national independence.

Mr. ST GERMAIN. Mr. Speaker, on this, the day set aside to commemorate the independence of the Lithuanian people on February 16, 1918, it seems fitting to cite the heritage of this proud nation.

The history of Lithuania begins in the 12th century when the various tribes that would eventually join to form the nation banded together to protect themselves from their Russian neighbors. The first great ruler of Lithuania was Mindaugas, who united the various tribes into one nation. Under the rule of Gediminas, Lithuania expanded and would eventually cover land from the Baltic to the Black Sea.

In the 14th century, the nation was unofficially united with Poland with the marriage of Grand Duke Ladislas Jagello to the Queen of Poland, Jadwiga. The two countries maintained this union until the third partition of Poland in 1795.

For over 400 years, Lithuania occupied a seat as one of the most powerful nations in Europe. With the partition of Poland and Lithuania, the country's struggle to maintain its independence began.

The first blow dealt the Lithuanian people came when the Russians tried to erase the national spirit by forbidding them to write in their native language. The Lithuanian culture was kept alive through the nonwritten arts such as painting for the next 125 years.

The struggle to maintain the Lithuanian culture and heritage was difficult and at times seemed hopeless.

In the middle of the 19th century, the present territory of Lithuania was seized by famine and, like so many of their European neighbors, the Lithuanian people began to emigrate to America.

This exodus become more marked after the Polish-Lithuanian insurrection of 1863. The bitter persecution which followed the insurrection, coupled with another severe famine led to even greater emigration to America.

The immigrants settled on New England farms and followed the railways west, across Pennsylvania.

The last large emigration of Lithuanian people to America came in the late 19th century when the Czarist government introduced compulsory military service. In addition, the bitter religious, political, and national oppression pursued by the Russians, along with continued economic hardship, caused many Lithuanians to leave their homeland.

Once in America, the Lithuanians did not forget their proud heritage.

Books and newspapers published by Lithuanians in America were smuggled across the German border into Lithuania. This underground movement, with the publications being passed from hand to hand, family to family, helped support the spirit of the Lithuanians during these trying times.

With the invasion of the German armies at the onset of World War I, the Russians were finally driven out of Lithuania.

In 1917, the German Government was prevailed upon to authorize a Congress of Lithuanian delegates. This led to the proclamation on February 16, 1918, of an independent Lithuanian state based upon democratic principles.

After centuries of hardship and oppression, the Lithuanian people were once again free. Over the next 20 years, Lithuania showed an extraordinary capability in developing a vital and prosperous modern society. This prosperity was halted in 1940 when the Soviet Union sent troops into Lithuania and declared that they were part of the Communist bloc. During World War II, Nazi troops replaced the Russian Army for a few years, but in 1944, the Russians again controlled Lithuania.

From that day, the Lithuanian people have not known a single day of freedom.

The United States has never recognized the forced absorption of Lithuania into the Soviet Union. Americans must continue to insist on the inalienable rights of the Lithuanian people to national independence and individual freedom. It is my hope that the issue of freedom and self-determination for Lithuania and the other Baltic peoples will be raised. Free men must continue to speak out until the Lithuanian dream of self-determination becomes a reality.

Mr. WYDLER. Mr. Speaker, today in the House of Representatives we are commemorating the 59th anniversary of Lithuania's Independence Day. Tragically, no such commemoration can take place in Lithuania itself. That country has been forcibly incorporated into the Soviet Union, and its people have suffered the loss of their cherished freedom and independence. But while February 16, the actual anniversary date of the Lithuanian republic, passed without official notice in Lithuania, we can be sure that in the hearts of the Lithuanian people that date did not go by unobserved. For in spite of cruel oppression on the part of Soviet authorities, the Lithuanian people maintain their love of freedom, their sense of identity as a people, their love of their country with its proud history and rich cultural heritage, and their determination to one day regain their independence.

United in the 13th century under Mindaugas, Lithuania remained unconquered until 1795, when she came under the domination of Czarist Russia. The oppressive Russian subjugation lasted until 1915, when World War I brought first a period of German occupation and then, on February 16, 1918, the event we are now commemorating, the proclamation of an independent, democratic Lithuanian State.

The young republic survived a Red Army invasion in 1919, driving the aggressors out in 1920 and securing a peace treaty in which Russia recognized the independence of Lithuania and renounced forever all rights of sovereignty over the Lithuanian people and territory. This treaty was honored for exactly 20 years, during which time the Lithuanian State flourished, accomplishing significant achievements in land reform, industrialization, education, and social legislation. This was accompanied by a vigorous revival of Lithuanian literary and cultural activity.

But in 1940 this progress and independence came to an end, when the Soviet Union, having forced Lithuania to admit Soviet garrisons into the country the year before, staged a rigged election which resulted in the incorporation of Lithuania into the U.S.S.R.

In 1954 hearings were held before the Subcommittee on Poland, Lithuania, and Slovakia of the House Select Committee on Communist Aggression. It is instructive to examine the testimony presented at these hearings, because it makes sickeningly clear the Soviet method of operation in toppling free governments. What I find almost more sinister than the brute force which the Soviets exercise is their mockery of democratic political processes, the farce that they stage in order to give the appearance that their power is derived from the people, when, in fact, it is coming out of the barrel of a gun. Following is a portion of the testimony given at these hearings by Liudas Dovydenas, a Lithuanian journalist.

Mr. DOVYDENAS. The morning of July 7, 1940, I awakened and I read in the newspaper that I was selected as a member of the People's Diet, that is, a delegate or deputy to the People's Diet.

Mr. MCTIGUE. How did you happen to be named to the People's Diet?

Mr. DOVYDENAS. No one informed me. When I read it in the paper I telephoned the office of the newspaper and they informed me that the officials had designated me as a deputy.

Mr. MCTIGUE. The officials of what group?

Mr. DOVYDENAS. The Communist——

Mr. MCTIGUE. Would that mean that you were designated by the Communists as a candidate; you didn't know anything about it; woke up one morning to find out that you were the Communist Party's selected candidate; you had nothing to say about it one way or the other; is that correct?

Mr DOVYDENAS. Correct.

Mr. MCTIGUE. Now, why do you suppose they selected you?

Mr. DOVYDENAS. First of all it was because I was a well-known writer who had written a book on the farmers, and they considered me a friend of the working people . . .

Mr. MCTIGUE. Did you make any efforts to protest your candidacy?

Mr. DOVYDENAS. Yes.

Mr. MCTIGUE. What were you told?

Mr. DOVYDENAS. I turned to the second secretary of the Communist Party, Adomas, Adomas Maskop. I protested to him regarding my designation.

Mr. MCTIGUE. And, after you protested to him, what did he say to you?

Mr. DOVYDENAS. His answer was that the Communist Party knows what it does and it does as it pleases.

The Communist secretary told me that if I do not accept this candidacy to the Deputies Diet, that I will endanger my own life and the life of my family, and those who will try to talk me out of this will be penalized.

Mr. MCTIGUE. Then, in 1940, you found yourself an unwilling candidate on the ticket of the Communist-controlled Party. This is correct: is it?

Mr. DOVYDENAS. That is correct.

Mr. MCTIGUE. Then the election was held?

Mr. DOVYDENAS. Yes.

Mr. MCTIGUE. And, of course, since you were a candidate of the Communist Party, you were elected without any difficulty?

Mr. DOVYDENAS. Yes.

Mr. MCTIGUE. So, you, therefore, found yourself a member against your will of the Peoples Assembly, so-called; is that correct?

Mr. DOVYDENAS. That's right.

Mr. MCTIGUE. Was the assembly able to take its own independent action—

Mr. DOVYDENAS. No.

Mr. MCTIGUE. Was it required that approval come from Moscow?

Mr. DOVYDENAS. Everything came from Moscow.

Mr. MCTIGUE. Now, were you at one time on a committee, while you were a member of this Assembly, to redraft the Lithuanian Constitution?

Mr. DOVYDENAS. Yes; I was 1 of 9 men elected to this constitution committee. There were altogether 3 sessions—3 meetings. At the first meeting there was Pozdniakov . . . and he informed us that the constitution had not been translated from the Russian language.

At the second meeting we were informed that the constitution had been translated, but two Lithuanian professors . . . had not approved the Lithuanian language.

Pozdniakov asked, "Who is against this?" We were all silent.

The following day the press in Moscow and Lithuania announced that the constitution had been approved by the best men of Lithuania.

Mr. MCTIGUE. Mr. Dovydenas, will you tell us briefly how Lithuania became incorporated into the U.S.S.R.?

Mr. DOVYDENAS. First of all, Red army garrisons were established in Lithuania beginning from June 1939 until June 1940.

After our election to the Peoples Diet, we were all informed that the incorporation of Lithuania into the Soviet Union had been settled and that the Peoples Diet should meet and approve.

Mr. MCTIGUE. So everybody voted "Yes," in the Assembly to the motion, or to the resolution that Lithuania be incorporated into the U.S.S.R.?

Mr. DOVYDENAS. The 79 Deputies sat in a theater among about a thousand people, and these people were unknown to us. We weren't asked to vote for this, but the question was asked, "Who is against this resolution?"

No one counted our vote. No one noticed whether we raised our hand or not, but the people in the theater began to yell, "hurrah, hurrah."

Mr. MCTIGUE. And that is how the Assembly came to approve the admission of Lithuania into the U.S.S.R.?

Mr. DOVYDENAS. That is correct.

Mr. MCTIGUE. Now, after Lithuania had become a member of the U.S.S.R. through the medium which you have just described here in your testimony, of a farcical vote in the Assembly isn't it true that the atrocities and the deportations and the tortures and the arrests started in Lithuania?

Mr. DOVYDENAS. Before my selection as a candidate, several thousand intellectual people in Lithuania were seized and arrested, and we learn soon afterwards that several of these were killed immediately.

Mr. MCTIGUE. Did you witness, yourself, these deportations and killings?

Mr. DOVYDENAS. Yes.

Mr. MCTIGUE. And arrests?

Mr. DOVYDENAS. Yes.

Mr. FEIGHAN. In that election, there was only one list of 79——

Mr. DOVYDENAS. Yes.

Mr. FEIGHAN. So that no person could vote for anyone else in opposition to any or all of the 79 names which were on the Communist list?

Mr. DOVYDENAS. That is correct. There were just 79 candidates and no other party at all.

Mr. FEIGHAN. One more question. Were there any military men or men of the police force carrying arms in this big meeting where the Assembly met and gave this so-called approval of the Communist directed resolution?

Mr. DOVYDENAS. Yes, I know around the theater there were about 50 tanks. In the theater, behind the scenery were 100 or 150 Soviet Army men. On the stage there was a table. It was covered; it was covered for the presidium table, and under the table were some Soviet men.

Mr. FEIGHAN. Soldiers?

Mr. DOVYDENAS. Yes. Soldiers. And it became evident to me that the people who were yelling "hurrah" in the theater were Soviet solders and NKVD members.

That is how Lithuania ceased to be a free and independent nation, and became incorporated into the U.S.S.R.

It is, I think, impossible to read this account without a growing sense of outrage and revulsion. This is the modus operandi of people who masquerade before the world as the saviors of a downtrodden humanity. The history of the world is replete with deeds of butchery and aggression visited on one people by another. But what we have here is not only a case of murderous aggression, not only an example of a large State greedily

swallowing up a small one. The Communists attempt to camouflage their deeds by making a mockery of democratic principles. They try to give the impression that their victims acquiesce in their own destruction. It is as though the hordes of Genghis Khan, or Attila's warrors, had attempted to present themselves as messengers of peace and joy, eagerly welcomed by the inhabitants of the villages they plundered.

Having destroyed the political freedom of the Lithuanian people, the Soviets subsequently sought to deprive the Lithuanians of their religion, distinct traditions and cultural heritage, and proud sense of their own rich history. The Soviets want Lithuanians to cease being Lithuanians and become, instead, "Soviet men" and "Soviet women," cogs in the machinery of "Soviet society."

The Lithuanians are fiercely resisting this cultural annihilation. We in the West salute these brave people—ordinary men and women, from all walks of life, exhibiting extraordinary courage.

One of the most moving lines from the Lithuanian national anthem states:

Lithuania . . . may your sons draw their strength from the past.

In commemorating Lithuanian Independence Day, we are expressing the hope that one day Lithuania will again be a free and independent nation, and that her sons will indeed draw their strength from the heritage preserved and handed down to them by these heroic people, whose bravery and endurance in this present time of persecution will also be a source of strength and inspiration to the future generations of Lithuanians.

Mr. YATRON. Mr. Speaker, I would like to join my colleagues and the Lithuanian American community today in commemorating the 59th anniversary of Lithuanian Independence Day. It is most fitting that the U.S. Congress pay tribute to the people of Lithuania, who steadfastly cling to a cultural heritage which reflects the values of freedom, and basic individual human rights on which America is based.

Fifty-nine years ago, the proud people of Lithuania valiantly proclaimed their right to stand among the free people of the world. Due to Soviet domination for the past 37 years, Lithuania has not been allowed to govern itself, however, the people of this country have resisted persistent Soviet attempts to destroy their unity and identity. A strong desire for individual freedoms and self-determination survives in Lithuania today as a source of inspiration to all the freedom loving people of the world.

Lithuania stands as a reminder to the free world of how precious and valuable our freedom truly is, and how costly the loss of this freedom can be. Let us hope that some day the Lithuanian people will achieve the independence they so richly deserve, and that we will realize a universal understanding and agreement on basic human rights and principles to eliminate government controls that stifle the independence and sovereignty of the various peoples of the world.

Mr. LEDERER. Mr. Speaker, February 16 marked the 59th anniversary of the independence of Lithuania. It is a date of both triumph and tragedy. Triumph because the Lithuanian people were able for 22 years to live and thrive in the freedom of February 16, 1918, when the years of planning and hoping, of agitation and struggle by the Lithuanian patriots, culminated in the independence of the Lithuanian State. Tragedy because this glorious era of Lithuanian independence was ended by the Soviet Union in 1941. Without deference to the Lithuanian sovereign state, the Soviets moved in and engulfed this free territory.

Mr. Speaker, the Lithuanian people have not been bowed or broken by the years of Soviet tyranny. We know that the people of this once proud land are struggling in bondage, yearning to be free.

I extend my warmest wishes to my Lithuanian friends here in the United States that the day will come soon again when their friends and families in Lithuania can be a free people again. Let us therefore mark this 59th anniversary of Lithuanian independence by encouraging this continuing struggle for freedom and by dedicating ourselves to its eventual realization.

Mr. DENT. Mr. Speaker, we have heard a lot lately about dissidents in the Soviet Union. Through the narrow channels of information available comes the story of men like Sergei Kovalev. A world-renowed biologist, Kovalev is serving a 7-year sentence in a Russian prison camp. According to his close friend, dissident leader Andrei Sakharov, the doctor requires a cancer operation or else he may die in captivity.

The tragic story is not new, but it is symbolic. It is symbolic of Kovalev's nation, which has suffered centuries of repression, yet has retained a passion for freedom. It is the nation we honor today: Lithuania.

Fifty-nine years ago, an independent Lithuania was born out of the ruins of World War I. There was little more than ruins: The nation was a charred battlefield for much of the Russian-German conflict. But the Lithuanians rebuilt their land, established their own government, and for 22 years there was sunlight of a sort by the Baltic.

That light was blotted out by the Stalinist Soviets who treacherously absorbed Lithuania as a "constituent republic" in 1940. On one night the Russians deported 30,000 Lithuanian intellectuals to Siberia, beginning a tradition that Kovalev is suffering today. The German blitzkrieg soon followed and Lithuania remained a Nazi captive till Soviet recapture in 1944.

The story is more tragic when we remember that Lithuania had been a nation for centuries before it was first annexed by tsarist Russia in 1795. This made the loss of the independence of 1918 twice as bitter.

Today the Soviets believe that the Helsinki accord of 1975 legitimizes their sovereignty over Lithuania. While tanks and missiles may give them physical control, the Russians cannot rule the minds and spirits of Sergei Kovalev and his fellow Lithuanians.

On this day, let us condemn Soviet domination of a land that can proudly call itself a dissident nation, and let us remember that as long as there are free Lithuanians—like the millions of Lithuanian Americans—there will always be a free Lithuania.

Mr. KOCH. Mr. Speaker, on February 16 of this year Lithuanians fortunate enough to live beyond the reach of the Kremlin masters who presently rule over their country celebrated the 59th anniversary of the Declaration of Independence of Lithuania. In drawing attention to that occasion, my title's twist of Shakespeare's famous lines is more than a cute play on words. Ironically, Shakespeare's verse about an object of beauty contains a message appropriate to the brutal Soviet occupation of Lithuania:

What's in a name? That which we call a rose
By any other name would smell as sweet.

—*Romeo and Juliet*, II, ii, 43

The Soviet leaders have labeled their rule "international communism" and "the dictatorship of the proletariat," but by any name the forceful incorporation of Lithuania into the Soviet Union was and is repressive imperialism.

Historically, Lithuania has been a battleground in the repeated wars between Russia and Germany. In former years the kaisers and the czars fought over possession of the Baltic States, and more recently the Nazis and the Soviets continued the struggle. For a brief period in this century the Lithuanian people enjoyed freedom and democratic self-rule, but that independence, which had been achieved in 1918, abruptly ended when Hitler and Stalin divided up eastern Europe in 1939. First Soviet forces occupied the Baltic States and half of Poland, then the Nazi war machine stormed across Lithuania when Hitler turned on Stalin, and finally the Red Army "liberated" Lithuania as it pushed the German forces back across eastern Europe. The people of Lithuania, joyful at the expulsion of the Germans and hopeful of renewed independence, quickly discovered that Soviet liberation was equal to the Nazi reign.

Most Americans know the sweet smell of a rose, but few can conceive of the horrors of Soviet imperialism. The Stalinist foreign policy that has achieved the extension of the Kremlin's rule over eastern Europe has nearly fulfilled an age-old czarist dream of Russian dominance from the Baltic to the Adriatic. To consolidate and preserve the Soviet Empire, Moscow has sought to stamp out all traces of non-Communist, non-Soviet identities within its dominions. In Lithuania, as elsewhere, the Kremlin rulers have employed mass executions and mass deportations to achieve their goal.

Between 1939 and 1959, primarily because of German and Soviet deportations and executions, the Lithuanian population declined 13.7 percent as compared to population increases over the same period of 4.3 percent in Germany, despite defeat in the war, of 29.9 percent in the Netherlands, and of 10.1 percent in the U.S.S.R. In the first 6 years after "liberation," for example, 350,000 Lithuanians were deported and thousands of Russians were imported to take their place.

Yet despite the years of terror, the

spirit of the Lithuanian people and their thirst for freedom lives on. The American people must forever stand behind them in their valiant struggle.

Mr. MARKS. Mr. Speaker, in light of the recent disclosures of political repression within the Soviet Union and East European countries, it is especially important that Americans recognize the 59th anniversary of the Republic of Lithuania.

We must assure this small nation that their quest for liberty has not been forgotten.

The history of the Republic of Lithuania reflects the strong determination of the Lithuanian people to be free. Fifty-nine years ago, on February 16, 1918, the Lithuanian Republic was able to overcome the subjugation of Tsarist Russia and formally declare its independence. For the next 20 years the Lithuanian people dedicated their energies to creating a free and prosperous nation. Tragically, the country was taken over by Nazi and then Soviet forces.

Since the close of World War II, the Soviet Union has attempted to destroy all vestiges of the Lithuanian Republic. In one 4-year period alone, beginning in 1944, over 350,000 people were forced to leave the country.

As defenders of human freedom, the American people cannot allow the Lithuanian drive for independence to be extinguished. We must insist in our public statements and at the Belgrade Conference, scheduled for this summer, that, at the very least, the Soviets must comply with the Helsinki agreement.

It is in this spirit that we celebrate the 59th anniversary of Lithuanian independence.

TRIBUTE TO FANNIE LOU HAMER

The SPEAKER pro tempore. Under a previous order of the House, the gentleman from Maryland (Mr. MITCHELL) is recognized for 60 minutes.

Mr. MITCHELL of Maryland. Mr. Speaker, I rise today on behalf of the 16 members of the Congressional Black Caucus, to pay tribute to a courageous leader in the quest for human rights and human dignity, Fannie Lou Hamer. Ms. Hamer, who died at much too young an age this month was one of the shapers of the "New South."

Fannie Lou Hamer left her sharecropper farm 15 years ago to join the movement, and quickly attained a position of leadership in the struggle. She was instrumental in voter registration drives, in the formation of labor unions, and the building of agricultural cooperatives throughout the South.

In 1964, during the Democratic National Convention, she stirred the Nation with her account of the plight of blacks in Mississippi. She helped found the Mississippi Freedom Democratic Party, an alternative to the segregated regular Mississippi Democratic Party, and led them to victory at the 1968 Democratic Convention, when they unseated the regulars and took their seats as the legitimate delegation from Mississippi.

Throughout her life, she remained in Ruleville, a small Mississippi town saying:

Why should I leave Ruleville and why should I leave Mississippi? . . . You don't run away from problems, you just face them.

Mr. Speaker, by not only facing the problems but solving many of them in her community, Fannie Lou Hamer earned a place of honor and respect among all who knew her.

Last fall, at the annual Congressional Black Caucus dinner in Washington D.C., Fannie Lou Hamer was presented with the George W. Collins Memorial Award for Community Service. Ms. Hamer was one of the giants of our time. We acknowledged that last September. Today, we grieve the loss of her leadership, her spirit, and her love.

SELECT COMMITTEE ON ASSASSINATIONS

The SPEAKER pro tempore. Under a previous order of the House, the gentleman from Texas (Mr. GONZALEZ) is recognized for 60 minutes.

Mr. GONZALEZ. Mr. Speaker, due to the length of the business being considered today, I shall not take the hour allotted me, but will, instead, submit for the RECORD the following information in respect to the documentation of the charges which I have made against the former chief counsel and staff director of the House Select Committee on Assassinations, Richard A. Sprague.

If the full committee had bothered to consider the charges which led to my firing of Mr. Sprague on February 10, the following paper is briefly what I would have said in respect to my charge of insubordination:

INSUBORDINATION

On Tuesday, February 8, 1977, at 10:00 a.m., I met with Mr. Sprague in my office. Because of the necessity to reduce personnel costs, I directed that he prepare a plan for a reduction of least essential staff positions and be prepared to submit the plan along with the names of the employees who could be necessarily terminated at a meeting of the committee at 4:00 p.m. that afternoon.

As the Members of the Committee know, Mr. Sprague did not only not comply with my directive but advised both me and the Members of the Committee that he did not intend to "fire" anyone and that he was going to prepare a budget for presentation to the Committee. I have no quarrel with the fact that Mr. Sprague could have made alternative recommendations to the Committee at that time—but he did not and has not.

On Wednesday, February 9, 1977, I directed that Mr. Sprague give me his written assurance that failing to recommend necessary reductions in force, he guarantee compliance with the financial limitations imposed by H. Res. 222 and H. Res. 11. Such assurances were to include precise plans for reducing expenditures, paying necessary expenses and conducting the ordinary and essential business of the Committee.

He responded:

"As I explained to the Committee on February 8, the Committee can stay within these financial restrictions by adhering to the pay reductions the staff has agreed to, keeping office expenses to a minimum, and having the Committee quickly approve a new budget which can be submitted to the Congress.

"This was clearly not responsive to the financial crisis facing the Select Committee. I requested that assurance by noon on Friday, Februaery 11, 1977. I received the 'response' by hand delivery on February 14."

I also directed that Mr. Sprague provide me by noon February 10, 1977, a complete listing of Committee personnel, the salaries of each and the duties assigned to each, along with a statement of that person's last previous position of employment and salaries. I received that response by hand delivery on February 14, 1977.

I requested a budget plan because if Mr. Sprague had any new or novel ideas of how the Committee could comply with the financial strictures of H. Res. 222 and H. Res. 11, without cutting staff, I wanted those assurances in writing, so that the Committee could make an intelligent judgment of this promised alternative.

I wanted to complete listing of committee personnel to enable the Members of the Committee to be able to evaluate each position as well as the staff member occupying that position, since the Members of the Committee are responsible for justifying each and every position.

In further reference to this, Mr. Speaker, it is incredible to find out, during the House debate yesterday on the further life of the committee, that somehow the committee has been granted $200,000 in House contingency funds, without any question.

There was never any indication at any time when I was chairman that such an arrangement could be worked out.

A VESTED INTEREST IN PEACE

The SPEAKER pro tempore. Under a previous order of the House, the gentleman from New York (Mr. CONABLE) is recognized for 5 minutes.

Mr. CONABLE. Mr. Speaker, I am not knowledgeable about diplomacy, and among my colleagues I claim no special awareness of its intricacies. Like many of my colleagues, however, I feel a crushing sense of disappointment at the collapse of the Moscow SALT talks. After long years of apparent progress in arms limitation, we suddenly find ourselves in impasse with the other military superpower in the world. The meaning of this impasse is still obscure; there is scant comfort in such obscurity. Without posturing, I do not believe we should change our position on human rights, make any unilateral military concessions, or retreat from areas of legitimate American interest in the world. Neither should we allow ourselves to fall back into cold war confrontation or bankrupting military competition, as long as alternatives are available for the possible reduction of tension.

I hope, Mr. Speaker, some effort will be made by the administration to work toward normalization of trade relations with Russia. Note that I am advocating normalization rather than special trade concessions. Trade is not a one-way street, nor is there disadvantage to us in the growth of American commercial strength. Russia has things we need and we have things Russia needs. Even more important, a mutually profitable trade can give another dimension to our relations with Russia while giving the participants a vested interest in peace. I am frightened by diplomatic failure when there is no other contact to use and no other easy expression of American

strength and influence except the ugly flexing of military muscle.

LEGISLATION TO REDUCE FEDERAL PAPERWORK REQUIREMENTS

The SPEAKER pro tempore. Under a previous order of the House, the gentleman from Ohio (Mr. WHALEN) is recognized for 5 minutes.

Mr. WHALEN. Mr. Speaker, I am pleased to join with my colleagues, Mr. HORTON and Mr. STEED, in sponsoring legislation to reduce Federal paperwork requirements.

The burden of excessive paperwork which has been amply documented is particularly onerous to small businessmen who cannot absorb the costs of complying with Federal information requests as easily as their larger counterparts. In addition to generating considerable expense—which usually is passed along to consumers through higher prices—these requirements often result in key personnel using their time to fill out forms rather than perform tasks which would be much more valuable to the company.

This measure will change the rules of the House to require that all committee reports which accompany legislation must contain an assessment of the paperwork which will be generated. This would implement one of the more than 350 recommendations of the Commission on Federal Paperwork, on which both of the chief sponsors of this legislation served. Although this is not a complete answer to the problem of ever-increasing Federal paperwork, it is an important beginning. In my view, it will ease the problem in at least three ways.

First, this resolution will draw attention to the problem during the process of drafting legislation. Potential paperwork burdens can be identified in advance and taken into account while a given measure is being considered.

Second, such a reporting requirement will provide agencies with guidelines in their efforts to carry out legislatively mandated programs. The agency can know more precisely what information it is expected to collect, and can limit its efforts appropriately. Additionally, there will be a solid legal basis in legislative history for making inquiries of individuals and companies.

Third, this measure will provide a means by which private individuals and groups can attack their mounting paperwork burdens. Such criteria will pinpoint agency divergences from congressional intentions. This requirement will provide a mechanism to confront demands for information which go beyond those contemplated in the original legislation.

There is no doubt that we must act to reduce the paperwork burdens which are created by often necessary Government regulations. If the proliferation of Federal paperwork is to be reduced, Congress must lead in the effort to implement the Commission's recommendations. Small business asked for help, and we expressed our concern by creating the Commission on Federal Paperwork. Now we must show that our concern is more than a hollow sentiment by acting on the Commission's proposals.

GENE HUGGINS

The SPEAKER pro tempore. Under a previous order of the House, the gentleman from California (Mr. DON H. CLAUSEN) is recognized for 10 minutes.

Mr. DON H. CLAUSEN. Mr. Speaker, it is with a feeling of deep sadness and personal loss that I call the attention of my colleagues, particularly in the California delegation, to the death of Gene Huggins, chief of public affairs for the Army Corps of Engineers, San Francisco District.

To all who knew him, Gene was a dedicated and conscientious public servant, who quite literally devoted his life to the Corps of Engineers.

In his role as a chief spokesman for the corps in the greater San Francisco area, Gene gave his all.

To all who worked closely with him, he was tireless in his efforts to develop and promote a positive image for the corps, at a time when the corps was under attack from many quarters. Yet in "getting the story out," Gene was totally honest and forthright and truly told it like it was.

At the bottom of Gene's honesty and forthrightness was his deep desire to involve concerned citizens in the public policy process.

He maintained an active liaison with a broad cross section of environmental, civic and business and professional organizations in order to encourage public comment and participation in the policymaking process, and he gave freely of his time and energy to insure that all who desired input and access got this opportunity. What is perhaps most significant is that Gene was actively working to develop alternatives to build bridges between the Government and the governed long before we were discussing "open doors," "sunshine in Government," and the like, as an employee of a Government agency that has perhaps been unfairly and inaccurately described as unresponsive and unreceptive to public opinion and criticism.

In addition, though he was not an engineer, Gene was a great "idea man," and he devoted considerable thought and energy to "brainstorming" new roles for the Corps, particularly in the area of environmental affairs. In this regard he was a leading advocate in the effort to upgrade and expand the San Francisco Bay model, which has been so important to the ongoing study and analysis of estuarine problems and potentials in the greater San Francisco Bay area as well as the San Joaquin Delta.

Gene was also an astute and farthinking student of California water resource problems and potentials, and he was particularly well aware of the key importance of the north coast of California, where 40 percent of the State's water supply originates. As we attempt to analyze our current drought-related problems, I cannot help but feel that if Gene's strong advocacy of the early completion of Warm Springs-Lake Sonoma and other major water projects throughout California had been successful we might not be facing the grim reality of a long, hot, dry summer.

With this background, it is not difficult to understand how Gene Huggins came to be so deeply respected and admired by all those with whom he was associated. On a personal note, Gene's solid working knowledge of Corps programs and activities and his longstanding personal association with other Federal, State, and local government officials throughout the Redwood empire district I represent and the State as a whole, made my job easier.

So one of my former staff members, Bill Birkhofer has said:

> Without the "education" we received from Gene, we simply would not have been as effective in our jobs.

For all these reasons Gene will be sorely missed. But the memories of our long and close friendship with him and the personal and professional example he set for us will remain with us for the rest of our lives.

LEGISLATION TO MITIGATE THE IMPACT OF FUTURE TERRORISM

The SPEAKER pro tempore. Under a previous order of the House, the gentleman from Texas (Mr. COLLINS) is recognized for 15 minutes.

Mr. COLLINS of Texas. Mr. Speaker, I have introduced a bill to mitigate the impact of future terrorism. My concern is with involvement by broadcasters that may hamper law enforcement officers who are involved in working on an active crime. Broadcasting must be free, but it must also be responsible.

In the instance where hostages are being held and tensions are high, there are primary differences between printed newspaper and voice broadcasting. Printed news is usually reviewed before being printed which provides a secondary assessment of the news. Also the printed news has a time delay, plus its nonavailability to an isolated building involved in a crime.

Broadcasting has the voice on the air immediately. Criminals may hear words just as they are uttered. If a newscaster makes quick and impetuous remarks there is no one to reassess the impact of his words. A phone interview on the air could spark off a criminal. A newscast could reveal to criminals the actions and plans of law enforcement officers.

Most broadcast executives and newscasters are fully cognizant of their heavy moral and social responsibilities. It is the exceptional individual in his desire to get a scoop, news recognition or a competitive advantage who goes beyond the line of reasonable news presentation.

Broadcasters represent a public trust. The Federal Communications Commission renews the license of each station based on its public broadcasting service to the community. For clarity in this broad definition on public service, I submit this bill:

H.R. —

> A bill to amend the Communications Act of 1934 to permit the Federal Communications Commission to deny the renewal of any radio or television broadcast license if the licensee has broadcast information regarding certain crimes in a manner which impeded law enforcement efforts.

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That section 307 of the Communications Act of 1934 (47

U.S.C. 307) is amended by redesignating subsection (e) as subsection (f) and by inserting after subsection (d) the following new subsection:

"(e)(1) The Commission, in determining whether to renew any radio broadcast station or television broadcast station license under this section, may deny such renewal if the Commission determines that the radio broadcast station or television broadcast station licensee involved—

"(A) broadcast, in the course of operating the radio or television broadcast station, any information relating to any serious crime (during the period in which such crime is in progress); and

"(B) such broadcasting resulted in unreasonable interference with the efforts of law enforcement personnel (i) to protect against any injury or loss of life; or (ii) to apprehend any person committing such crime.

"(2) For purposes of this subsection, the term 'serious crime' means any act which is prohibited by Federal or State law and the commission of which threatens, or results in, the injury or death of any individual.".

SEC. 2. The amendment made by the first section of this Act shall apply to any application for the renewal of any radio or television broadcast license which is filed with the Federal Communications Commission after the date of the enactment of this Act.

JUSTICE DEPARTMENT REASONING SUPPORTS DINGELL-BROYHILL AMENDMENTS TO ASSURE COMPETITION IN THE AUTOMOBILE AFTERMARKET

The SPEAKER pro tempore. Under a previous order of the House, the gentleman from North Carolina (Mr. BROYHILL) is recognized for 15 minutes.

Mr. BROYHILL. Mr. Speaker, H.R. 4444, a bill which I have introduced with my colleague, JOHN DINGELL, amends the Clean Air Act to establish a sound schedule for automobile pollution reduction. While this bill seeks to provide auto emission standards which are workable yet environmentally sound, it also addresses other aspects of the Clean Air Act which affect different segments of the automotive industry, namely, the "aftermarket parts" industry.

Under the Clean Air Act of 1970, vehicle manufacturers are mandated to warrant for 5 years or 50,000 miles, under both a "production" warranty and a "performance" warranty, that the emission control system installed by that manufacturer will remain effective for that length of time.

The production warranty is already effective. The performance warranty, which is conditioned upon the proper maintenance and operation of the vehicle by the owner, is mandated to become effective only when the Administrator of the Environmental Protection Agency determines that adequate testing facilities are available. It is this performance warranty that poses a very serious threat to the existence of the independent automotive aftermarket as well as to the consumer.

Since the owner of a new automobile is not going to jeopardize his position with respect to the performance warranty, he will go to the franchised dealer of the vehicle manufacturer for warranty work as well as for routine service and repair. This reaction to the auto warranty will thus effectively shut out the independent aftermarket service and parts industry presently serving the automobile owner. The consumer no longer will have the freedom of choice to use the parts and services he wishes. The law will create a monopoly for the vehicle manufacturers and their franchised dealers.

At this point in the RECORD, I am inserting the news release which was issued by the Department of Justice upon issuing their report on the anticompetitive effects of expanded automobile warranties:

DEPARTMENT OF JUSTICE NEWS RELEASE

The Department of Justice today urged the Environmental Protection Agency (EPA) to consider carefully the possible economic costs of proposed regulations to implement the vehicle emission control production warranty.

The Department's views were contained in comments filed with EPA today on that agency's proposed rulemaking procedure for the warranty program.

Under the Clean Air Act, motor vehicle manufacturers must give purchasers a warranty guaranteeing that the vehicle has been designed and built to satisfy federal air pollutant emission standards for its useful life. The useful life of a motor vehicle has been defined as five years or 50,000 miles, whichever comes first.

Despite the presence of these warranties since the 1972 model year, EPA has determined that they are not an effective device to combat pollution. As a result, EPA intends to develop more detailed regulations to make the warranty effective.

Deputy Assistant Attorney General Jonathan C. Rose of the Antitrust Division expressed concern that increased regulation, unless properly focused, could lead to increased consumer costs and other anticompetitive results beyond those necessary to attain the desired environmental goals.

He noted that the Department comments made the following points:

The EPA warranty program could not be made an effective pollution control device unless it were greatly expanded.

To obtain an effective warranty, EPA might find it necessary to broaden its scope to cover virtually any mechanical defect in the automobile related to emissions.

The costs of such an expanded warranty to consumers would be enormous.

The warranty would become, in effect, a full service contract, and the price of a new vehicle would increase dramatically.

Mr. Rose pointed out that an expanded comprehensive service warranty would significantly impede the ability of independent service stations and garages to compete with the service departments of dealers franchised by the national automobile manufacturers. Thus, he said, concentration in the automobile aftermarket—auto repair, service and parts dealers—could increase substantially, and the advantage of free competition could be lost.

As a solution, the Department recommends in its comments that EPA list the emission control devices that would be covered by the warranty and that only those devices that would not have been included in the vehicle if the Clean Air Act had not been passed would be on the list.

The Department also urged EPA to continue its efforts to develop an effective method of testing emissions so that a mandatory emission inspection program could be implemented.

According to the Department, a narrow production warranty and a mandatory inspection program could achieve the national goals set out in the Clean Air Act, while minimizing the program's social costs, including its anticompetitive impact.

Mr. Speaker, in order to give Members more complete information on the position taken by the Department of Justice, I am including excerpts from the full statement that the Department made to the Environmental Protection Agency opposing the expansion of the automobile warranty program as an efficient method for the reduction of automobile pollution:

COMMENTS OF THE U.S. DEPARTMENT OF JUSTICE

On November 16, 1976, the Environmental Protection Agency (EPA) in an Advance Notice of Proposed Rulemaking announced its intention to consider regulations to implement more effectively the coverage of Section 207(a) of the Clean Air Act. This rulemaking proceeding will attempt to clarify coverage of the emission control production warranty. The Department of Justice submits these comments to assist the Agency in its consideration of the potential social and economic costs that such regulation could have, including the impact on competition in the automotive aftermarket.

THE INTEREST AND POSITION OF THE DEPARTMENT OF JUSTICE

A. The Interest of the Department of Justice—The Department of Justice appears before federal agencies to advocate regulatory policies that will advance competition, efficiency, and consumer welfare. Our role, however, is not to advocate that these national objectives are paramount, but to ensure that they are given appropriate weight by agencies in carrying out their differing statutory missions. This we try to do by assisting the agency in evaluating the impact of its proposed action on competition and in finding the least or less anticompetitive alternatives to achieve regulatory goals as defined by Congress.

"Congress has clearly determined that cleaner, healthier air is desirable. As with many national policies, however, the particular method chosen to reach this goal may have side effects that are unnecessarily harmful to competition. Our desire to avoid such results was plainly enunciated during Congressional hearings in 1974 by Bruce B. Wilson, then-Deputy Assistant Attorney General, Antitrust Division: "We seek to encourage procedures which would limit—or if possible eliminate—potential anticompetitive fallout from the drive toward cleaner air."

B. The Position of the Department of Justice—

The following discussion will analyze why the present production warranty has not been an effective antipollution device subsequent to vehicle purchase, and why there will be serious cost-efficiency problems if the EPA attempts to expand the production warranty to compensate for the inability of the Agency to implement the performance warranty. We will show that the present emission control production warranty cannot effectively achieve the environmental objectives of the entire warranty program for two reasons: First, the current production warranty focuses on only one contributing factor in emission control, namely the pollution control devices.

Second, there do not seem to be sufficient incentives present to encourage consumers to use the warranty. We will also show that substantially broadening the scope of the production warranty via the adoption of comprehensive coverage under Options 2 or 3 is not a viable solution to the current problems. Rather, such action would, in effect, transform the 207(a) warranty into a performance warranty. By doing so, the economic costs of the warranty program would be substantially increased, including possibly

the social cost of an adverse impact on competition.

THE COST-EFFECTIVENESS OF A WARRANTY PROGRAM

While we share the EPA's concern that the emission control production warranty has not effectively achieved the ends originally intended of it we are not convinced that expanding the warranty—in effect, transforming it into a performance guarantee—will lead to an improvement in its cost effectiveness. The potential costs of extending the present production warranty to control emissions subsequent to vehicle purchase will, in all probability, far outweigh the potential benefits.

Mr. Speaker, the report goes on to say:

As a means to effect emission control beyond the initial construction of a vehicle, the warranty is unsatisfactory. The mere presence of the production warranty does not by itself encourage proper maintenance if the vehicle continues to operate despite the functional soundness of the emission control equipment.

In sum, the current emission control production warranty fails to effectively achieve environmental objectives insofar as it concentrates on only one contributing factor in emission performance, pollution control devices. In addition, as appears to be the case by virtue of these hearings, it may not even succeed in this respect if incentives are lacking to use the warranty and/or if failures in pollution control devices are not detectable.

Mr. Speaker, it should be clear that the consumer should not be forced to pay the additional costs and business should not have to suffer the anticompetitive effects of a warranty program which will not be effective in cleaning up the air.

The Justice Department report concludes by saying:

In addition to the direct costs to the consumer of such a performance guarantee, the social costs associated with the competitive disadvantage that potentially could be imposed on a sizable class of vehicle service businesses is a particular concern of the Department of Justice. This would come about if the warranty is honored only by manufacturer-affiliated dealers. Then, vehicle owners can be expected to take their vehicles exclusively to dealers for all emission related repairs and service. Independent garages and service stations that may be equally skilled in making such repairs would be placed at a disadvantage relative to dealers. Without a comprehensive warranty non-dealers would succeed or fail depending upon their ability to compete in the marketplace next to dealers; however, the presence of the warranty would make it next to impossible for non-dealers to attract customers for emission related repairs, regardless of their price and their quality of work. If an environmentally effective production warranty must cover essentially all engine repairs and service, then the warranty would have severe implications for the long run viability of independent garages and service stations. Indeed, it could effect a significant increase in concentration in the service industry to the point where a substantial adverse impact on the price of service and repair could be expected. In any event, the impact on concentration would be directly related to the comprehensiveness of the warranty.

A warranty program is clearly mandated by the Clean Air Act, and the EPA must implement that program. It is not possible to eliminate all the costs, including all the anticompetitive effects, of such a program. It is possible, however, to minimize those costs and still attain the environmental goals of the Clean Air Act.

Mr. Speaker, this is precisely what our legislation, H.R. 4444, would acomplish should it be enacted. It will allow this Nation to attain our clean air goals without excessive economic impact. This bill will provide a workable and balanced program for cleaning up our environment by setting a stringent schedule for pollution reduction and by implementing a rational and effective warranty program to back up our clean air goals.

I ask that my colleagues review H.R. 4444 and its provisions which would help eliminate any anticompetitive effects arising from implementation of the 1970 Clean Air Act requirements.

Mr. Speaker, recently I introduced H.R. 4444 with my colleague, JOHN DINGELL, and some 75 cosponsors. This bill, if adopted, would guarantee consumers the right of choice over automotive parts and service for their motor vehicles and prevent a monopoly in the sale of aftermarket parts and service. This would be accomplished by amending the Clean Air Act of 1970 to provide that the manufacturers' performance warranty for the motor vehicle emission system be reduced to 18 months or 18,000 miles, whichever occurs first.

Extensive hearings on this subject were held by the House Select Committee on Small Business, on which I served. After carefully reviewing provisions of the Clean Air Act, the committee found the performance warranty to be unnecessary, anticompetitive, and anticonsumer. All 19 members of the Small Business Committee unanimously recommended in the committee report of December 18, 1974, that the performance warranty be reduced from the statutory 5 years or 50,000 miles.

This is a complex issue which merits some explanation lest it be misinterpreted as a reduction in requirements placed on vehicle manufacturers to produce nonpolluting vehicles, or be considered as not in the best interest of the car owning public. Warranty provisions in H.R. 4444 will in no way reduce clean air standards.

Under the Clean Air Act of 1970, vehicle manufacturers are mandated to warrant for 5 years or 50,000 miles, under both a production warranty and a performance warranty, that the emission control system installed by that manufacturer will remain effective for at least that length of time.

The production warranty is already in effect. The performance warranty, which is conditioned upon the proper maintenance and operation of the vehicle by the owner, is mandated to become effective once the Administrator of the Environmental Protection Agency determines that adequate testing facilities are available. It is this performance warranty that poses a very serious threat to the existency of the independent automotive aftermarket, and strong anticonsumer problems.

It is important to note that the Clean Air Act contains sufficient protection under its design requirements and production warranties to maintain air quality, as the manufacturer would still be required to test and certify his engine in accordance with EPA test standards on emissions and durability prior to sale.

The production warranty requirements force the vehicle manufacturer to warrant that the emission control system is designed, built, and equipped in a manner that will enable it to comply with emission regulations which exist at the time the vehicle was first sold, and that it is free from defects in materials and workmanship that would cause the system to fail to conform with applicable regulations for its useful life, which is defined in the act as 5 years or 50,000 miles, whichever occurs first.

The performance warranty will only go into effect when EPA develops a quick, reliable test for precisely measuring emissions. This is likely to be somewhat in the future. Under this performance warranty, the vehicle manufacturer is then liable for the repair, at his cost, of every vehicle on the road that fails an emission inspection, so long as the vehicle owner has complied with the maintenance and operation instructions mandated by the vehicle manufacturer. These maintenance and operation instructions are the critical points insofar as the independent automotive aftermarket and the consumer are concerned.

The owner is not going to jeopardize his position with respect to that warranty, and will go to the franchised dealer of the vehicle manufacturer not only for warranty work, but also for nonwarranty work performed at the same time. This effectively will shut off the independent aftermarket from their customers. The consumer no longer will have the freedom of choice to use the parts and services he wishes, and the law will create a monopoly for the vehicle manufacturers and their franchised dealers.

The Small Business Subcommittee found that since the cost of the performance warranty has been built into the price of the vehicle:

It is also questionable that the consumer will ever truly benefit from the performance warranty as it now stands, because the vehicle manufacturer can reap windfall profits from this warranty, for every voided warranty results in an unearned profit of approximately $300. Thus, the vehicle manufacturer has a strong financial incentive to void these warranties, which might in part account for the present burdensome and restrictive care and maintenance instructions which contain innumerable opportunities for avoiding liability. These same escape clauses will exist in a warranty of any length, the longer the warranty, the greater the cost, which thereby provides a stronger incentive to escape liability. Every time a warranty is voided, it is the consumer, and only the consumer who loses. The consumer not only forfeits the money paid to the manufacturer at the time of purchase, he also pays again to have the work performed.

Thus the subcommittee found the performance warranty to be anticompetitive, anticonsumer and unnecessary to the protection of clean air. It should be noted that neither of the legislative committees that developed the Clean Air Act of 1970 had the opportunity to hold hearings on the warranty provisions of the act which might have highlighted the monopolistic and anticonsumer aspects of the law.

The vehicle manufacturers maintenance instructions, which will be required to be followed to prevent voiding the warranty, will have a major impact on the car-owning public. The vehicle owner is obligated under these circumstances to have stipulated parts replaced or serviced at the vehicle manufacturers' designated intervals, at his or her own expense. Should the vehicle fail to comply with an applicable emission standard under the performance warranty, it is not the obligation of the vehicle manufacturer to repair the emission control system until the vehicle owner has proven that the described maintenance in his owners' manual has been performed at the established time, and that the work was done with acceptable parts to the manufacturer, and by a qualified service outlet.

Of course, the antitrust laws prevent vehicle manufacturers from requiring that only their parts be used to replace those they know will wear out prior to the expiration of the 5-year, 50,000-mile warranty, or that the servicing of these parts be performed only by a franchised dealer. Consequently, because of the potential liability the vehicle manufacturer would face when the quick "tailpipe" test of EPA is approved, they must protect themselves by conditioning the validity of warranties on "recommended use of original equipment manufacturers—OEM—parts or their equivalent" and the use of franchised dealers or a "qualified service outlet." The manufacturers' owners manual instructions create a strong psychological restraint on the consumer to force him to return his vehicle to the franchised dealer for all work for 5 years or 50,000 miles, through fear of voiding his warranty.

This forcing of the consuming public to return their vehicles to a franchised dealer for all parts and service for 5 years of 50,000 miles to insure that the warranty is not invalidated will occur when the performance warranty is triggered by EPA. According to our subcommittee report—

The Subcommittee is of the opinion that there are serious anti-consumer aspects to both the proposed certification program (by EPA) and the 5 year, 50,000 mile warranty requirements of the Clean Air Act.

The restrictive maintenance instructions will cause many cautious car owners to have all servicing—whether related to the warranty or not—performed by their franchised dealer, which is a serious inconvenience as well as a serious threat to the independent automotive aftermarket. Those who continue to use their neighborhood service or garage outlets will undoubtedly void their warranties, which they have already paid for when the car was originally purchased, thereby being forced to pay again to have that system repaired at additional expense should the system ever fail an emissions inspection in the future.

The consumer cannot afford to risk a dispute with the vehicle manufacturer over the use of parts and services which might later be claimed to be improper. Therefore, the consumer is forced to go to dealers for all his work during the life of the warranty, regardless.

The warranty provisions of H.R. 4444 will have no adverse effects on air quality. This legislation, if enacted, will relieve the automotive aftermarket industry from the possibility of a monopolistic takeover by the vehicle manufacturers and will retain the rights of the auto owner to have a choice over the parts and services used to maintain his vehicle.

The Small Business Committee received testimony from representatives of vehicle manufacturers, repair garages, service stations, EPA, the Federal Trade Commission, and the Antitrust Division of the Department of Justice. All their testimony and the documentation compiled convinced the House Small Business Committee that the performance warranty of the Clean Air Act serves little meaningful purpose.

At this point in the RECORD I am inserting the recommendations of the House Small Business Committee which may be found on page 33 of House Report 93–1628:

CHAPTER IV. RECOMMENDATIONS

On the basis of the testimony, evidence and findings, the subcommittee recommends that:

A. The Environmental Protection Agency—

1. Pursue all administrative remedies to minimize the anticompetitive effects of the warranty provisions of the Clean Air Act Amendments of 1970;

2. Require the vehicle manufacturers to insert clear and conspicuous affirmative statements in their care and maintenance instructions and their emission control system warranties which would advise the vehicle owner that he or she may use nonoriginal equipment manufacturers' parts for the repair and maintenance of the car; and that nonfranchised service outlets may service that vehicle;

3. Work with appropriate governmental agencies in developing affirmative language for inclusion in these care and maintenance instructions, which clearly advise the car-owner that he or she may use nonoriginal equipment manufacturers' parts and nonfranchised service outlets without necessarily jeopardizing the validity of the emission performance warranty.

4. Determine, by testing on an individual basis, that a specific part actually increases emissions, before it decertifies or refuses to certify the part under its proposed voluntary certification program and develop due process procedures for appeal from an agency determination;

5. Expedite the development of a quick and reliable test for measuring emissions, which would thereby enable the agency to insure that in use vehicles were conforming to the applicable standards through periodic motor vehicle inspections which would insure the maintenance of existing emission level standards;

6. Issue an economic impact statement prior to the implementation of all new regulations, including the certification program, for the purpose of demonstrating that no competitive disadvantages are placed upon small businesses; and

7. Review all existing and proposed policies and regulations to determine if they are consistent with this Nation's antitrust policies.

B. The Federal Trade Commission and the Department of Justice—

1. Examine the vehicle manufacturers care and maintenance instructions and emission control system warranties to determine if they are consistent with this Nation's antitrust policies.

C. The above agencies and department advise the committee by June 1, 1975, of the actions they have taken to implement these recommendations.

D. The appropriate legislative committees of Congress consider amending the Clean Air Act by reducing the length of the 5-year/50,000-mile performance warranty to a period comparable to that presently established by the competitive forces operative in the open marketplace, such as for 12 months or 12,000 miles, whichever occurs first.

HOW TO INCREASE GOVERNMENT REVENUES BY CREATING GREATER PROSPERITY

The SPEAKER pro tempore. Under a previous order of the House, the gentleman from New York (Mr. KEMP) is recognized for 5 minutes.

Mr. KEMP. Mr. Speaker, the House and Senate Budget Committees are presently in the midst of putting together the first concurrent resolution on the budget for fiscal year 1978. As such, they are carefully weighing the impact of various programs on the budget and the sources of Federal revenues.

I suggest that one thing these committees ought seriously be considering is a reduction in tax rates in order to increase Federal revenues and reduce the projected deficit by getting the country on an expansion curve.

It is a fact, borne out by experience, that high tax rates do not increase Federal revenues. They only encourage people to reduce their taxable incomes, either by taking more leisure or hiding their money in tax shelters, such as municipal bonds. Consequently, a reduction in tax rates will encourage a more efficient use of resources and expand the tax base itself, thereby increasing revenues.

This was the argument made by President Coolidge in an address made on February 12, 1924. I believe that this speech is as timely today as it was then and I hope that my colleagues from the Budget Committee will take time to read it:

ADDRESS OF THE PRESIDENT OF THE UNITED STATES BEFORE THE NATIONAL REPUBLICAN CLUB AT THE WALDORF-ASTORIA, NEW YORK, FEBRUARY 12, 1924

The President said, in part, as follows:

Out of an income of about $60,000,000,000 a year the people of this country pay nearly $7,500,000,000 in taxes, which is over $68 for every inhabitant of the land. Of this amount the National Government collects about $3,200,000,000, and the State and local governments about $4,300,000,000. As a direct burden this is a stupendous sum, but when it is realized that in the course of our economic life it is greatly augmented when it reaches the consumer in the form of the high cost of living, its real significance begins to be appreciated. The national and local governments ought to be unremitting in their efforts to reduce expenditures and pay their debts. This the National Government is earnestly seeking to do. The war cost of more than $40,000,000,000 is already nearly half paid. Amid the disordered currencies of the warring nations our money is, and has been maintained, at the gold standard. Our budget has long since been balanced, and our debt-paying program is at the rate of $500,000,000 each year. In spite of all these expenditures, the next fiscal year has an estimated surplus revenue of over $300,000,000.

This represents a great financial achievement in the past three years. In the first place, it was necessary to provide for more than $7,000,000,000 of short-term securities.

These have all either been paid or refunded, so that they will become due in the future at orderly intervals, when they can be retired or further extended. When it is realized that such large loans were made in a way that not only left business undisturbed, but was scarcely perceptible to the public, the skill with which Secretary Mellon managed them can well be appreciated.

Coincident with this was the even greater task of reducing national expenditures. Through legislative enactment and executive effort this has gone steadily forward, and is now proceeding from day to day. Under the watchful care of the Budget Bureau every department is constantly striving to eliminate all waste and discard every unnecessary expense.

Every reasonable effort has been made to secure the liquidation of our international debts. The largest, which was that of Great Britain, and which amounted with accumulated interest to $4,600,000,000, has been settled on terms that provide for its payment over a period of 62 years. Interest runs at 3 per cent until 1933, and after that 3½ per cent. This calls for payments in the immediate future of $160,000,000 and more a year. They have the option to pay us in our own bonds, and in its practical working this agreement does not involve cash payments to this country, but simply a mutual cancellation of debts. The funding of the British debt was one of the greatest of international financial transactions. It had its effect on business confidence, which was world wide. It demonstrated the determination of a great empire faithfully to discharge its international obligations. In this respect it was much more than a financial transaction, it was an exhibition of the highest type of international honor. It showed that the moral standards of the world were going to be maintained.

All of this has laid the foundation for national tax reduction and reform. In time of war finances, like all else, must yield to national defense and preservation. In time of peace finances, like all else, should minister to the general welfare. Immediately upon my taking office it was determined after conference with Secretary Mellon that the Treasury Department should study the possibility of tax reduction for the purpose of securing relief to all taxpayers of the country and emancipating business from unreasonable and hampering exactions. The result was the proposed bill, which is now pending before the Congress. It is doubtful if any measure ever received more generous testimony of approval. Opposition has appeared to some of its details, but to the policy of immediate and drastic reduction of taxes, so arranged as to benefit all classes and all kinds of business, there has been the most general approbation. These recommendations have been made by the Treasury as the expert financial adviser of the Government. They follow, in their main principle of a decrease in high surtaxes, which is only another name for war taxes, the views of the two preceding Secretaries of the Treasury, both of them Democrats of pronounced ability. They are nonpartisan, well thought out, and sound. They carry out the policy of reducing the taxes of everybody, especially people of moderate income. They give to the country almost a million dollars every working day.

The proposed bill maintains the fixed policy of rates graduated in proportion to ability to pay. That policy has received almost universal sanction. It is sustained by sound arguments based on economic, social, and moral grounds. But in taxation, like everything else, it is necessary to test a theory by practical results. The first object of taxation is to secure revenue. When the taxation of large incomes is approached with that in view, the problem is to find a rate which will produce the largest returns. Experience does not show that the higher rate produces the larger revenue. Experience is all in the other way. When the surtax rate on incomes of $300,000 and over was but 10 per cent, the revenue was about the same as when it was at 65 per cent. There is no escaping the fact that when the taxation of large incomes is excessive, they tend to disappear. In 1916 there were 206 incomes of $1,000,000 or more. Then the high tax rate went into effect. The next year there were only 141, and in 1918 but 67. In 1919 the number declined to 65. In 1920 it fell to 33, and in 1921 it was further reduced to 21. I am not making any argument with the man who believes that 55 per cent ought to be taken away from the man with $1,000,000 income, or 68 per cent from a $5,000,000 income; but when it is considered that in the effort to get these amounts we are rapidly approaching the point of getting nothing at all, it is necessary to look for a more practical method. That can be done only by a reduction of the high surtaxes when viewed solely as a revenue proposition, to about 25 per cent.

I agree perfectly with those who wish to relieve the small taxpayer by getting the largest possible contribution from the people with large incomes. But if the rates on large incomes are so high that they disappear, the small taxpayer will be left to bear the entire burden. If, on the other hand, the rates are placed where they will produce the most revenue from large incomes, then the small taxpayer will be relieved. The experience of the Treasury Department and the opinion of the best experts place the rate which will collect most from the people of great wealth, thus giving the largest relief to people of moderate wealth, at not over 25 per cent.

A very important social and economic question is also involved in high rates. That is the result taxation has upon national development. Our progress in that direction depends upon two factors—personal ability and surplus income. An expanding prosperity requires that the largest possible amount of surplus income should be invested in productive enterprise under the direction of the best personal ability. This will not be done if the rewards of such action are very largely taken away by taxation. If we had a tax whereby on the first working day the Government took 5 per cent of your wages, on the second day 10 per cent, on the third day 20 per cent, on the fourth day 30 per cent, on the fifth day 50 per cent, and on the sixth day 60 per cent, how many of you would continue to work on the last two days of the week? It is the same with capital. Surplus income will go into tax-exempt securities. It will refuse to take the risk incidental to embarking in business. This will raise the rate which established business will have to pay for new capital, and result in a marked increase in the cost of living. If new capital will not flow into competing enterprise the present concerns tend toward monopoly, increasing again the prices which the people must pay.

The high prices paid and low prices received on the farm are directly due to our unsound method of taxation. I shall illustrate this by a simple example: A farmer ships a steer to Chicago. His tax, the tax on the railroad transporting the animal, and of the yards where the animal is sold, go into the price of the animal to the packer. The packer's tax goes into the price of the hide to the New England shoe manufacturer. The manufacturer's tax goes into the price to the wholesaler, and the wholesaler's tax goes into the price to the retailer, who in turn adds his tax in the price to the purchaser. So it may be said that if the farmer ultimately wears the shoes he pays everybody's taxes from the farm to his feet. It is for these reasons that high taxes mean a high price level, and a high price level in its turn means difficulty in meeting world competition.

Most of all, the farmer suffers from the effect of this high price level. In what he buys he meets domestic costs of high taxes and the high price level. In what he sells he meets world competition with a low price level. It is essential, therefore, for the good of the people as a whole that we pay not so much attention to the tax paid directly by a certain number of taxpayers, but we must devote our efforts to relieving the tax paid indirectly by the whole people.

Taken altogether, I think it is easy enough to see that I wish to include in the program a reduction in the high surtax rates, not that small incomes may be required to pay more and large incomes be required to pay less, but that more revenue may be secured from large incomes and taxes on small incomes may be reduced; not because I wish to relieve country.

The practical working out of the proposed schedules is best summarized by the Treasury experts, who find that $92,000,000 a year will be saved to those who have incomes under $6,000; $52,000,000 to those who have incomes between $6,000 and $10,000; and that less than 3 per cent of the proposed reduction would accrue to those who have incomes of $100,000 or more. A married man with two children, having an income of $4,000, would have his tax reduced from $28 to $15.75; having $5,000, from $68 to $38.25; having $6,000, from $128 to $72; having $8,000, from $276 to $144; and having $10,000, from $456 to $234.

In order to secure these results, the administration bill proposes to reduce the tax on earned income 25 per cent, and the normal tax on unearned income also 25 per cent. This would apply to all incomes alike, great and small, and would provide general and extensive relief. Further reductions would be secured by increasing the amount of income, exempt from surtaxes, from $6,000 to $10,000. Such surtaxes increase progressively until on incomes of $100,000 or more they reach the maximum of 25 per cent which, with the normal tax of 6 per cent, make large incomes pay in all 31 per cent. It is also proposed to repeal many troublesome and annoying rates, such as admission taxes and sales taxes, the existence of which is reflected in the increased cost of doing business and the higher prices required from the people.

That is the tax measure which has been proposed, and which has my support. Because I wish to give to all the people all the relief which it contains, I am opposed to material alteration or to compromise. It is about as far removed as anything could be from any kind of partisanship. At least, I do not charge that there is any party or any responsible party leadership that admits it is opposed to making taxes low and in favor of keeping taxes high. But the actions and proposals of some are liable to have just that result. I stand on the simple proposition that the country is entitled to all the relief from the burden of taxation that it is possible to give. The proposed measure gives such relief. Other measures which have been brought forward do not meet this requirement. They have the appearance of an indirect attempt to defeat a good measure with a bad measure. You have heard much of the Garner plan. Brought forward to have something different, it purported to relieve the greatest number of taxpayers. It gave not the slightest heed to the indirect effect of high taxes, or to the approaching drying up of the source of revenue and consequent failure of the progressive income tax, or to the destruction of business initiative. It is political in theory. When the effect of its provisions was estimated, it meant a loss of revenue beyond the expected surplus. It is impossible in practice. The people will not be misled by such proposals. It is entirely possible to have a first-class bill. I want the country to have the best there is. I am for it

because it will reduce taxes on all classes of income. I am for it because it will encourage business. I am for it because it will decrease the cost of living. I am for it because it is economically, socially, and morally sound.

But the people of the Nation must understand that this is their fight. They alone can win it. Unless they make their wishes known to the Congress without regard to party this bill will not pass. I urge them to renewed efforts.

COL. JACK REILLY, DIRECTOR OF SPECIAL EVENTS FOR CHICAGO, RETIRES

The SPEAKER pro tempore. Under a previous order of the House, the gentleman from Illinois (Mr. ANNUNZIO) is recognized for 5 minutes.

Mr. ANNUNZIO. Mr. Speaker, I would like to call to the attention of my colleagues the retirement of Col. Jack Reilly, director of special events for Chicago, who since 1955 has personally supervised the visits of the famous and near-famous to Chicago—kings, queens, astronauts, presidents, chancellors, performers, and so many others.

It has been my good fortune to know the colonel for the past 20 years. He is a living legend to hundreds and thousands of Chicagoans.

The ethnic community of Chicago is especially grateful to Colonel Reilly for organizing the first International Folk Fair which has been held for many years at the Navy Pier in the city of Chicago. At this fair, people from every ethnic group and from countries all over the world display their cooking, their art, and all aspects of their culture for the entire weekend. I personally have attended these wonderful fairs along with hundreds and thousands of my fellow Chicagoans.

Whenever the late Mayor Richard J. Daley appeared at a special event, one would see Colonel Reilly at his side. He has been dedicated and devoted to Mayor Daley and to the people of Chicago. Chicago is a better place because Colonel Reilly has been with us.

As Colonel Reilly retires from his active role as director of special events for Chicago, I know that he will be missed and that he leaves with the gratitude of so many who had the pleasure of witnessing or participating in the splendid events which he planned so well.

I extend to him my best wishes for abundant good health and many rich blessings during his retirement years.

An article from the March 31 edition of the Chicago Tribune written by Dorothy Collin about Colonel Reilly's outstanding career follows:

COLONEL REILLY MARCHES OUT

(By Dorothy Collin)

The parade has finally passed Jack Reilly by.

After 50 years of world's fairs and visiting astronauts, of Presidents and fan dancers, of St. Patrick's Days and Columbus Days, of captains and kings, he is hanging up his parade permit. The colonel retires Thursday as Chicago's director of special events.

"I've had it all, but I'm not going to miss it," he said. "Like that fellow said, 'Old soldiers never die.' Well, I'm ready to just fade away."

I was sitting in Reilly's office on the sixth floor of City Hall, an office filled with the flotsam of the spectaculars so dear to his and the late Mayor Richard Daley's hearts.

In the past that office was often a madhouse, especially as the visit of an astronaut or a particularly famous king or queen neared. This time it was quiet, subdued. And so was the crusty old colonel.

"I go way back," he said. "I always say I was on the reception committee to meet Marquette."

Well, he doesn't go back that far, but he has been around Chicago since the 1920s, and it was as director of special events for the Century of Progress in 1933 that he made his mark as a promoter.

"The whole world came to Chicago," he said. "Actually, we referred to it as a world's fair, but it wasn't really. We were short on royalty and short on foreign exhibits. Most of the buildings were built by commercial investment. They'd build these villages—an English Village, a French Village, an Italian Village, the Streets of Paris.

"Ah, the Streets of Paris. The French never forgave Chicago for that. They resented it bitterly that she should try to capture the streets of Paris."

He thought for a minute, then chuckled.

"The Streets of Paris became known all over the world. Sally started there."

Sally of course, was Sally Rand, the fan dancer who made herself and the fair legendary.

"Sally came to the Century of Progress looking for a job. She was a little girl who discovered herself," Reilly said, looking a bit dreamy.

But Sally must have had a little help from a certain promoter because the officials running the fair weren't enthusiastic about her. "The resented the publicity she received," Reilly said. "And it's true Sally hardly compared to the Hall of Science, though I never had a phone call from anyone asking me to get them into the Halls of Science, but I got lots from people who wanted to catch Sally's second show.

"She was not without rivals. Faith Bacon was appearing in Hollywood, one of the shows there, and Faith always claimed that she had invented the fan dance for George White's scandals. She and Sally didn't see eye to eye."

During the two years of the fair, Reilly got in the habit of meeting and greeting the famous, everyone from Baron de Rothschild to Father Coughlin.

The baron managed to get himself into a ticklish position when he posed helping the Diving Venus adjust her tiny costume. "I think he was a bit near sighted," Reilly said.

And Father Coughlin, the controversial radio priest, almost got a number of his faithful killed. "The women were throwing themselves at him, under the wheels of the cars," Reilly said. "It was unbelievable."

After the Century of Progress, Reilly worked in Arizona for a while and then became director of special events for the New York World's Fair. He served in the Army in World War II and ended up back in Chicago in the early 1950s.

He went to work for Daley in 1955 and since then has been official host to hundreds of visitors, ranging from the great-great-great-granddaughter of Sir Walter Scott to the Emperor of Japan, from a mariachi band to the Queen of England.

Ah, yes, the Queen, or as Reilly calls her, "one of my favorite girls."

Elizabeth II came to call on July 6, 1959, and it was "the most magnificent day of my lifetime."

"I don't think there will ever be another day or visit like that one because royalty isn't able to do the things they did then," Reilly said. "Their countries can't afford it. But to see that yacht out in the lake, to see her come to shore . . . ah boy . . ."

There were others Reilly really liked. "I'm also very fond of the Queen of Iran," he said. "She's a doll. And the Grand Duchess of Luxembourg, the mother of the present one.

"Oh, and here's one I really fell in love with," he said, scanning the lists of visitors, "Her Majesty Frederika, Queen of the Hellenes. Of course, she's been chased out of the country now, but I remember her because we became very friendly, and she said, "What's wrong with your eye?"

Reilly, who has worn a black patch over one eye for years because of cataracts, explained this to the queen. "She said that the king had had his eye operated on and that she would give me the name of the doctor and I must go to him. 'He'll restore your vision,' she said."

On a later visit she asked her lady-in-waiting if she had given Reilly the doctor's address. "When she said she couldn't find it, the queen said, 'Well, you know it's in the baggage, so find it.' And she held her train for 30 minutes so she could get the name and address of the guy. I'll never forget her."

He'll also never forget Konrad Adenauer, the chancellor of West Germany, "in front of the Palmer House with his walking stick, chasing the cameramen, saying, 'You spoil these fellows.' "

Nor Prince Philip of England, "He came back several times," Reilly said. "I liked him better when he was accompanied by Her Majesty."

Nor "this whole string of astronauts who were really polite, nice fellows. You know, the mayor and I thought we were doing a pretty lousy job with the youth, with inspiring them to love their country and be proud of it.

"We thought that maybe these fine young men could give them something to pattern themselves after. Then along comes Viet Nam, and the youth, they all looked blank and said, 'Who me?' "

As Reilly reminisced, he happened to mention the size of a crowd at some parade. So I asked him about his crowd estimates—estimates that many observers felt came straight from the old promoter's vivid imagination.

He looked at me slyly and guffawed. "I am blessed with a power," he said. "And I always say to anyone who doubts me, 'Count them yourself.' "

I also asked him what his favorite event was, in addition to Queen Elizabeth's visit. "The Venetian Night," he said. "I love the damn thing. It marks Chicago's graduation into the big leagues. It put us into a class with other cities that have festivals during the summer season."

And he got up to show me some drawings of floats for Venetian Night and photos of daredevil acts that will perform during the Lakefront Festival.

"We try to get the greatest thrill acts, acts that make your heart jump into your throat," he said, no longer sounding so subdued. "You can't find any more sensational acts than these. They can top anything that's ever been done anywhere in the world.

"You know, I can't stretch it out to believe I can be around when Chicago has its next world's fair. But there is a date that could be moved in on, the anniversary of the 1893 fair.

"They should put together a commission of younger executives to start working on it now," he said, getting more excited. "And wherever I am, I'll come staggering back for it."

TRIS: A THREAT TO AMERICA'S CHILDREN

The SPEAKER pro tempore. Under a previous order of the House, the gentleman from Massachusetts (Mr. DRINAN) is recognized for 30 minutes.

Mr. DRINAN. Mr. Speaker, during the past several years, Congress has enacted

a number of laws designed to protect unsuspecting citizens against various substances which might be hazardous to their health. Under the Federal Hazardous Substances Act and other legislation of this kind, it is imperative that the appropriate agencies act swiftly and decisively whenever a potential health hazard is detected. Each additional day of bureaucratic delay may expose thousands more of our citizens to unnecessary risk. When an agency fails to meet its public responsibility in this regard, it is the job of the Congress to expose present shortcomings and take steps to insure that the public will be better protected in the future.

WHAT IS TRIS?

The past year constitutes a valid case study of bureaucratic inaction with regard to the Consumer Product Safety Commission's treatment of the chemical additive "TRIS." TRIS is a flame-retardant chemical used extensively by the textile industry. It is the primary flame-retardant used in children's sleepware in order to meet standards promulgated in 1972 under the Flammable Fabrics Act. According to the Environmental Protection Agency, TRIS is regarded "as the only commercially significant flame retardant additive * * * in the civilian marketplace.

The EPA estimates that one-half of all children's sleepwear sold in the United States contains TRIS. Virtually all children's pajamas which are made from polyester, acetate, or triacetate fibers are TRIS-treated. As many as 45 million children wear sleepwear which contains TRIS at some point during their childhood.

THE FIRST SIGNS OF DANGER

The first indication that TRIS should be viewed with suspicion came in 1973 when preliminary tests conducted by scientific researchers in California and New York revealed that the additive caused mutations in human cells. According to Prof. Bruce Ames of Berkeley, there is a 90-percent correlation between substances which are mutagenic and those which are carcinogenic. Ames noted that TRIS was more mutagenic than several known human carcinogens, increasing the likelihood that TRIS caused cancer. Subsequent tests confirmed the preliminary findings.

While the mutagenicity of TRIS was proved beyond dispute, other studies indicated that the substance could be absorbed into the skin of persons wearing TRIS-treated garments. TRIS makes up close to 10 percent of the weight of TRIS treated garments. As much as half of that is called surface TRIS which, according to Dr. Ames, "is susceptible to extraction and possible absorption through the skin." Other studies, including one conducted by Michigan Chemical the manufacturer of TRIS, revealed that TRIS could be ingested through the common infant practice of mouthing or sucking on sleepwear.

CITIZENS PETITION FOR RELIEF

On the basis of evidence that TRIS, a potential carcinogen, was being absorbed or ingested by millions of American children, the Environmental Defense Fund, a public interest group, petitioned the Consumer Product Safety Commission to take corrective action on March 24, 1976. That petition, filed more than a year ago, recognized that the actual danger of TRIS to children, while strongly suspected, had not yet been proven. Accordingly, the petition asked the CSPC to require that garments containing TRIS be labelled to indicate the presence of the chemical and to advise consumers to wash such garments at least three times before using. Such washing, by eliminating a large proportion of surface TRIS, would reduce the potential danger. The petition also asked that CPSC to establish a mechanism for testing TRIS and alternative chemical flame-retardants more fully in the future.

The Commission responded immediately to the petition, stating that it would be considered in accordance with the provisions of the Federal Hazardous Substances Act. No further word was forthcoming for the next 7 months. On October 20, 1976, the Environmental Defense Fund filed a request for expedited consideration of its March petition on the basis of the continuing risk of injury posed by TRIS along with new scientific evidence of the chemical's toxicity. Two months later, the Commission replied that it was still studying the question. Nine months had passed without any action whatsoever by the agency responsible for safeguarding the public.

THE NATIONAL CANCER INSTITUTE REPORTS

In January 1977, Dr. Ames reported in Science that—

Bacterial studies showing that TRIS is a mutagen suggest that it is likely to be a carcinogen, but animal studies are necessary for more conclusive evidence.

That conclusive evidence was forthcoming on February 1, 1977, when the National Cancer Institute released the results of its 3-year study on the effects of TRIS on laboratory rats and mice. The results proved that TRIS was, in fact, a potent carcinogen. Some of the specific results follow: 52 percent of male rats fed TRIS developed kidney cell tumors compared to 0 percent in the control group; 45 percent of female mice fed TRIS developed stomach cell tumors compared to 4 percent in the control group; 34 percent of female mice fed TRIS developed lung tumors as compared to 7 percent in the control group; and 70 percent of female mice fed TRIS developed liver cell tumors compared to 20 percent in the control group.

In summary, both male and female rats, fed TRIS in their diets daily, showed a statistically significant increase in kidney tumors. Such tumors have rarely been observed in control animals. Both male and female mice fed TRIS showed increased incidences of tumors at multiple sites.

The significance of these laboratory test findings cannot be overemphasized. According to a National Cancer Advisory Board report issued in 1976—

"Demonstration that a compound is carcinogenic in animals should, therefore, be considered evidence that it is likely to be carcinogenic in humans, unless there is strong evidence in humans to the contrary.

As of February 1, 1977, the CPSC knew that TRIS posed a danger to American children.

RESPONSE TO THE NEW EVIDENCE

Armed with the data of the National Cancer Institute, EDF filed a second petition with the Commission on February 8, 1977. That petition called for an immediate ban on TRIS-treated garments under the Federal Hazardous Substances Act as an "imminent hazard to the public health." "Based on the results of the NCI Bioassay Study," the petition stated, "TRIS must now be considered a potent carcinogen and a carcinogenic risk to humans."

EDF noted that the U.S. Circuit Court of Appeals had twice upheld actions by the Environmental Protection Agency based on the grounds that data from animal experiments indicating carcinogenicity were sufficient to support a finding of imminent hazard to human health. If TRIS were assumed to be as carcinogenic to humans as it is to rats, the petition observed, a 1 to 8 percent increase in the U.S. cancer rate would be likely to result from its continued ingestion by infants. If skin absorption of TRIS, along with direct ingestion, was also considered, the incidence of cancer would be considerably greater.

Two days laters, on February 10, the CPSC issued a press release noting that it had the TRIS matter under "highest priority consideration." The Commission stated its belief that "TRIS-treated garments already in use and having been washed several times present little, if any, risk to consumers." That statement contradicted an observation by an EPA official in the January 1977 issue of Science that—

Even after 3 cycles of laundering with detergent, some mutagenic activity was still demonstrable.

The Commission failed to identify those garments on the market which contained TRIS, suggesting instead that—

To find out if a particular children's sleepwear garment has been directly treated with TRIS, consumers should contact the manufacturers directly.

Six weeks later, the Commission had still taken no action whatsoever against TRIS. On March 23, EDF filed suit against the Commission in Federal district court alleging that the CPSC had failed to act on its petitions "within a reasonable time" as required by the Administrative Procedures Act. The suit also charged the Commission with failing to carry out its responsibility under the Federal Hazardous Substances Act to declare TRIS a hazardous substance and take appropriate action.

WHAT MUST BE DONE

Mr. Speaker, as we sit here today, TRIS-treated pajamas remain on the shelves of department stores and children's shops throughout the Nation. Unsuspecting parents have no way of knowing the risks they needlessly expose their children to each time they purchase such a garment. Even if a parent knew about the hazards of TRIS, he or she has no way of knowing whether a particular garment is TRIS-treated or not.

The Commission has now promised to

reach a decision concerning TRIS on April 7. Assuming that the Commission carries out its obvious responsibility to ban TRIS-treated sleepwear, that decision will come many months too late. Several steps must be taken at once. First, the sale of TRIS-treated children's sleepwear should be banned. Second, TRIS-treated garments in the hands of consumers or retailers should be repurchased in accordance with the provisions of the Federal Hazardous Substances Act. Third, an appropriate warning should be broadcast to the public.

Finally, the CPSC should develop standards for testing alternatives to TRIS. Antiblaze 19, manufactured by Mobil Chemical Co., and Emulsion 212, manufactured by Apex Chemical Co., are two such alternatives which may appear on the market if TRIS is banned. The latter additive shares many of TRIS' chemical characteristics and may itself be carcinogenic. As EDF's February petition pointed out—

> It makes no sense for the Commission to ban TRIS while permitting it to be replaced by untested but chemically similar compounds which may pose a comparable health hazard to children.

Dr. Ames added:

> The use of an untested chemical as an additive to pajamas is unacceptable in view of the enormous possible risks.

Extension testing must be carried out in order to prevent a recurrence of the TRIS debacle.

There is no longer any question that TRIS treatment constitutes mistreatment. The American public has been mistreated by the Commission's failure to act swiftly and decisively against this dangerous additive. On Monday, April 4, the Government Operations Subcommittee on Commerce, Consumer and Monetary Affairs, on which I serve, will hold a hearing to investigate the conduct of the CPSC with regard to TRIS since the first EDF petition was filed more than 12 months ago. I look forward to hearing the Commission explanation of its sluggishness in acting to protect the public and to the issuance of a ban on TRIS on April 7.

A HOUSE INTELLIGENCE COMMITTEE

The SPEAKER pro tempore. Under a previous order of the House, the gentleman from Wisconsin (Mr. ASPIN) is recognized for 15 minutes.

Mr. ASPIN. Mr. Speaker, although the Senate has had a functioning committee to oversee the intelligence community since the middle of last year the House has none.

The present arrangement has satisfied very few either in the House or the Executive.

On the one hand, the President recently complained that too many persons in the legislative branch have access to the most sensitive information since current law requires that seven committees be notified about convert operations.

On the other hand, there is no single, staffed House body whose sole responsibility is the continuing oversight of all intelligence activities—not just to check on covert operations, but also to check for the inefficiencies and duplication that are endemic because the intelligence effort is scattered over several executive agencies.

Today, along with 59 other Members, I have introduced a resolution to set up a House Intelligence Committee. The resolution is identical to the one which set up the Senate committee with the exception of technical changes to conform to the rules of the House and the membership provisions.

Let me describe the major provisions one by one.

First, the membership provision. Under the resolution the committee would have a revolving membership like the Budget Committee. No member could serve longer than three terms out of any consecutive five. This is similar to the Senate Intelligence Committee and meets the concerns of those who feel a permanent membership is more likely to become a captive of the intelligence agencies unable to exercise its oversight functions. Service would be an additional committee assignment with one-third of the membership coming from Armed Services, one-third from International Relations and the remainder from the other standing committees. As a practical matter more than one-third of the membership would change each Congress.

Second, declassification procedures. The committee may not declassify any information over the objection of the President. But the committee may refer any document it thinks ought to be declassified over the objection of the President to the full House. This provision is the same provision which the Senate has.

Third, the power of authorization. The key to the committee's authority—as it is to all congressional committees—will be the power to handle authorizing legislation each year for all the intelligence agencies and for the intelligence activities of other agencies. Incidentally, the Senate committee is now working on an authorization bill and, unless we act quickly to set up a counterpart committee, the House will have no clear way to handle the bill.

The authorization power ties in directly with the fourth provision, dealing with covert operations. The committee will not have veto power over covert operations, but the resolution declares it to be the sense of the House—as it is already the sense of the Senate—that the CIA notify the committee in advance of any planned covert operations. The committee can then take to the President any objections or reservations it may have.

As a last resort, the committee can cut off funds. The power of the purse insures that the CIA is responsive to the committee's calls for information. The CIA and other intelligence agencies will know that if the committee's questions are not answered in full, their budgets are liable to suffer.

The fifth principal provision deals with jurisdiction. The committee would have exclusive jurisdiction over the CIA and would share jurisdiction over other intelligence activities with existing standing committees should they wish to exercise jurisdiction.

Mr. Speaker, I have consciously drafted this legislation as a virtual carbon copy of the resolution establishing the Senate Intelligence Committee. The reason for this was simple; after the experience of a year ago with the Pike committee report, some Members have understandably shied away from the idea of a permanent committee.

One of the problems the Pike committee had was the fact that it was a temporary committee. It faced a deadline. The administration of that time realized that. And those of us who served on the Pike committee found out quickly that we were being strung out. Delays that would not matter to a standing committee cast a dark shadow over a select committee watching the clock click down. It was this deadline which led to the final confrontation with the Ford administration, the decision of the committee to declassify information over Mr. Ford's objection, and the decision of the House to classify the Pike report itself.

The Senate has had a permanent Intelligence Committee for almost a year now. I used the Senate resolution as the basis for the resolution I am introducing today to underscore the fact that a standing committee on intelligence can operate effectively and quietly.

Last Tuesday, Tom Wicker wrote a column in the New York Times in which he put together a tentative scorecard based on the Senate committee's operations of almost a year. Without objection, Mr. Speaker, I would like to insert at this point in the RECORD a copy of this column entitled, "Oversight: Good News and Bad," from the March 29 New York Times:

OVERSIGHT: GOOD NEWS AND BAD

(By Tom Wicker)

WASHINGTON.—Recent inquiries about the new Senate Intelligence Committee produced, among other perhaps significant responses, the following:

From a member of the committee: "Just a few minutes ago, I was checking over $100,000 items in the line-item budget of the [Central Intelligence Agency]. By the end of the year, we'll even be able to trace the money in the director's contingency fund, and that's where the dirty work's been done."

From a member of the staff: The committee soon will hold public hearings, *not* on the C.I.A. budget itself but on how much of the C.I.A. budget should be made public.

From another member of the committee: "If [the C.I.A.] wanted to hold anything back from us, I'd have thought the stuff they're telling us was the kind of thing they'd be holding back."

From a Senator not a member of the committee: "I proposed [George] McGovern to the Steering Committee for an opening they had on the Intelligence Committee. They said they'd have to talk it over, there had to be balance on the committee, and so forth. The next day they came back with [Daniel Patrick] Moynihan's name penciled in. He's a freshman, he's more manageable."

So there's good news and bad news. There is an Intelligence Oversight Committee, it is functioning, perhaps effectively—but it may be too cautious, too "manageable," and already in danger of the same fate that overtook all previous oversight efforts. Close

observers and some members fear it could end up more nearly protecting C.I.A. interest against the public than the public interest against the C.I.A.

Here is a tentative scorecard, based on the record so far:

THE GOOD NEWS

The C.I.A. is keeping the committee fully informed—as far as members know—of its covert actions abroad, and several of the more "militant" members of the committee believe this is limiting the agency's willingness to undertake the riskiest and least defensible operations—the overthrow of a government, for example, or the assassination of a foreign leader.

Covert operations reported to the committee have first been authorized by President Carter; if the committee disapproves, members can first take the issue to Mr. Carter, then if necessary to an executive session of the Senate (from which the facts would be certain to leak out).

The committee is getting itself organized for the job; for example, Senator Robert Morgan of North Carolina, a former Attorney General of that state, is heading an Investigations subcommittee that may soon be able to spot-check C.I.A. reports on covert operations.

The C.I.A. budget is getting the kind of scrutiny it never had had before—another likely inhibition on its ability to get into such costly and controversial operations as the botched retrieval of the Glomar Express.

The committee has apparently made a start on drafting charters for the intelligence agencies in an attempt to control their activities and protect the rights of Americans—new and more restrictive charters for the C.I.A. and the Federal Bureau of Investigation; the first charter ever for the vast, communications-centered National Security Agency, and perhaps an overall charter governing the entire "intelligence community."

THE BAD NEWS

The committee's organizing efforts are moving too slowly and there has been too little attendance at meetings and too little rank-and-file interest in the committee's work.

This is likely to be a permanent handicap because there's no political "payoff" for members—quite the opposite; secrecy means they can claim little credit for accomplishment and must run the risk of being blamed for any "leaks"; members might also be criticized if they approved some CIA operation that later went wrong.

Some members, including Chairman Daniel Inouye, are reported to have been affected by what Daniel Ellsberg once called "the secret honeydew" of classified information, with the consequence that the committee may already be showing a tendency to be "persuaded" by the C.I.A.—in its defense, for example, of secret payments to King Hussein.

Two senior members of the Church committee, whose intelligence investigations in 1975 and 1976 led to the establishment of the Intelligence Committee, said flatly they believed it already had been "co-opted" by the C.I.A. A member said the committee now "feels comfortable" with the C.I.A., which is hardly the point.

As for legislative possibilities, the news from the committee is disturbing enough to require another article.

It is interesting to note the "bad news" as listed by Wicker. The problem of poor attendance, for example, is more likely to be a Senate problem since Senators are spread more thinly.

It is, however, a fact of life that there is no political payoff as an incentive for active membership on the committee. That is simply the nature of the beast. It is also true that there are many things that all of us do here in Congress for which there is no political payoff.

The last two items of bad news are variations on the single theme—the fear that the committee will be seduced by the intelligence community. This really depends on the committee membership. I am sure there will always be members who are relatively uncritical of the agency they are overseeing. That is not unique to an intelligence committee, as we all know from our own experiences.

Let me be quite frank and state there are some potential problems with the resolution I have introduced today. Specifically, I see two areas not fully covered by my resolution which the Rules Committee may want to address.

The first concern is House rule XI 2 (e) (2) which states:

All committee hearings, records, data, charts, and files shall . . . be the property of the House and all Members of the House shall have access thereto.

A standing committee could presumably make highly restrictive rules governing access—for example, classified data must be read on the committee premises only, no notes may be taken, every page looked at must be individually logged—that would adequately prevent abuse. But the mere fact that rule XI 2(e)(2) would remain on the books unqualified would provide the kind of red flag that critics of Congress could wave. We ought to consider amending the rule in this resolution setting up an intelligence committee—not because Members cannot be trusted, but simply to remove a potential focal point for criticism. There is precedent in the exemption to this rule granted to the Ethics Committee earlier this year.

A second concern is the Hughes-Ryan amendment to the Foreign Assistance Act which requires the President to approve CIA operations "and report, in a timely fashion, a description and scope of such operation to the appropriate committees of the Congress, including the Committee on Foreign Relations of the United States Senate and the Committee on Foreign Affairs of the United States House of Representatives."

President Carter has complained that too many people in Congress have access to information on covert operations and has said repeatedly that the Executive must report to too many committees. Hughes-Ryan is interpreted as requiring reporting to seven committees in Congress—the two Appropriations, two Armed Services, two International Relations, and Senate Intelligence.

A new House Intelligence Committee will bring the total to eight and is likely to take some fire for just that reason. We cannot amend Hughes-Ryan when we set up a committee by resolution. But the resolution could contain a clause defining Hughes-Ryan's reference to "appropriate committees" as meaning the Intelligence Committee in the House, plus International Relations which is named in the statute.

With a House resolution, we cannot affect either the Senate reporting structure or the committees named in the statute. We can reduce the number of committees being reported to six. A further reduction would require a Senate resolution or a statutory change.

Mr. Speaker, I hope this House will move quickly to establish a standing Committee on Intelligence. In a matter of weeks the Senate will have voted an intelligence authorization bill for the first time. It will authorize funds for intelligence activities in the State Department, Defense Department, Justice Department, Energy Research and Development Administration and assorted other agencies. Where are we going to send this bill? I hope we will act soon so there is some committee on this side of the Hill that can act on the bill.

INTRODUCTION OF LEGISLATION TO ESTABLISH INDEPENDENT SOCIAL SECURITY ADMINISTRATION

The SPEAKER pro tempore. Under a previous order of the House, the gentleman from Ohio (Mr. VANIK) is recognized for 5 minutes.

Mr. VANIK. Mr. Speaker, today, Senator CHURCH, 21 other Members of the Senate, and I are introducing legislation to establish an independent Social Security Administration. The reason for this legislation is well stated in its declaration of purpose:

The magnitude of these (retirement and health) social insurance programs and of the supplemental security income program—in terms of the number of people affected by them, the volume of income and expenditures, the number of persons engaged in their operation, the nationwide network of local offices, and the complexity of these huge operations—demands the utmost in skillful, nonpolitical administration. To help assure such administration and continuously high levels of service to the beneficiaries of and contributors to the program, this Act constitutes the Social Security Administration as an independent agency in the executive branch, responsible directly to the President.

The bill we are introducing takes the Social Security Administration, with its $115 billion in program expenditures, out from under the shadow of HEW and establishes it as a highly visible independent agency reporting directly to the President. The bill creates a three-person board to deal with major policy questions and an executive director in charge of day-to-day operations. The bill in no way changes any individual's benefits or rights to benefits under existing and future social security programs. The legislation is strictly limited to improving the quality of the delivery of services by the Social Security Administration.

Secretary Califano is to be commended for his recent announcements indicating an effort to reorganize, streamline, and improve the operations of the Department of Health, Education, and Welfare. As I understand his proposals, medicare would be pulled out of the Social Security Administration, but the Federal role in the aid to families with dependent

children program would be given to Social Security. In view of other efforts underway to reform the welfare laws and in light of efforts to federalize the welfare system, this may mean that Social Security will come to play a major role in the day-to-day operations of the Nation's welfare programs.

The present structure of HEW is such a mess that I believe that the Secretary's reorganization efforts will provide an important opportunity for debate on how the Department should be restructured. I am hopeful that the bill we are introducing today will contribute to that debate.

Personally, I am very opposed to adding any major new programs to the already overwhelming duties of the Social Security Administration. Social Security has one basic, vital job to do—provide for the retirement income and health insurance needs of the Nation's retirees and disabled workers and their families. It used to do that job very, very well. But the advent of new programs, in particular the supplemental security income program for the aged, blind, and disabled, has changed the mission of the Social Security Administration and reduced its efficiency and effectiveness. I personally would oppose adding another welfare program such as AFDC on top of the SSI welfare workload now crushing the Social Security Administration.

During the 94th Congress, I served as chairman of the Ways and Means Oversight Subcommittee. During that Congress, we held 12 separate hearings on the operation of the SSI program. From these hearings, I am convinced that no new programs should be given to Social Security at this time—it is still trying to properly administer the SSI program which was enacted in 1972. Second, from my experience at the Oversight Subcommittee, I believe that the Social Security Administration should be removed from the bureaucratic confusion of HEW and given its own independent status. The hearings held by the Oversight Subcommittee during the 94th Congress are one long argument for the passage of the bill we are introducing today.

I would like to take a few minutes to highlight some of the examples in our hearings which, first, argue against further welfare programs being given to social security, and second, for the creation of an independent Social Security Administration separate from HEW.

First, when SSI was given to Social Security to administer, it resulted in a significant increase in the error rate in the regular retirement and disability programs administered by Social Security. Prior to SSI, about 1 case in 20 had an error which affected the payment being received by the retiree or disabled worker. After SSI, the error rate went up to 8 percent of all cases or 1 case in 12. In addition, one out of every five social security cases now has some form of clerical error which may or may not affect the benefit payment level. This rise in error rate can be directly attributable to the workload pressure placed on Social Security by the SSI program.

In addition, the quality of office service given to our Nation's retirees declined with the advent of the SSI workload. On September 17, 1976, at our New York City field hearings, the president of the New York-New Jersey Council of Social Security District Office Employees testified:

The tremendous backlog and ongoing workload of SSI redeterminations has had an adverse affect on maintaining the level of service customarily provided by SSA employees to beneficiaries of the social security program.

Waiting times have steadily increased at all offices to the point where 3- to 4-hour waits are common. The pressures to interview such large numbers of people each day have forced employees to rush through one interview so they could get to the next one. This continuous day-to-day pressure has resulted in an increase in errors and has seriously lowered the morale of the employees.

Following is a portion of a letter which I have just received from a social security employee in Philadelphia:

Point 8—The single most serious problem facing SSA is the inability to give SSA(RSI) claimants the immediate, effective attention they most certainly deserve. Take for instance before the commencement of SSI. A claimant filing for retirement under RSI would have his claim filed, processed and receiving checks in approximately six—seven weeks the most. Even a medicare card would be generated at the appropriate time. NOT NOW. With SSI Claimants utilizing the SS employees time, checks are now received in approximately 10–12 weeks and sometimes longer.

An American Federation of Government Employees local president from Nebraska wrote me, stating:

5. SSI has had an adverse effect upon the quality of other S.S.A. programs. The claimants require more time, the interviews are longer, the constant mobility of the claimants, innumerable events which keep changing payments such as moving to another's home, into a nursing home, inheriting some money, winning at Bingo or the race track, selling a resource, all these innocuous events create a chain of administrative events.

6. Most employees believe S.S.A should not be burdened with any more multimillion beneficiary programs to administer. S.S.A. has reached a saturation point, and is spread far too thin as it is. The public expects more, is more demanding, questions the explanations of the laws and are suspicious and alienated by bigness and big bureaucracies. It is impossible to be all things to all people and do it efficiently.

Second, while I do not believe Social Security should be given any major new programs to administer, I also believe our hearings show that if Social Security had been an independent agency, free of HEW, and able to speak directly to the President, the problems which marred the startup of SSI and which still plague the Administration could have been avoided. As employee union witnesses testified at our New York hearing last September:

Politically, the decisions of the Nixon/Ford Administration's office of Management and Budget and the Civil Service Commission have seriously disrupted all national planning regarding staffing the Social Security Administration. Rather than authorize the number of full-time career employees outlined in the budget requests made by S.S.A. to the office of Management and Budget, S.S.A. Management was given minimal permanent staffing and blanketed with temporary, term, and part-time employees as a solution. It is our belief that as a part of the Executive Branch, Social Security Management officials willingly tempered their manpower requests and projections to suit the philosophy of the Administration.

This same management was aware that restrictions imposed by the last two administrations kept staffing at levels insufficient to deal with the massiveness of the new S.S.I. legislation. We feel they failed to make this case on behalf of the American people. As the result of this, chaos ensued.

Some of the strongest testimony I have heard in support of an independent Social Security Administration came from former Commissioner Robert Ball—now scholar in residence, National Academy of Sciences—who compared the startup of medicare with the startup of the SSI program:

Mr. BALL. Equally important, there was not the kind of a delegation of authority that is needed to get a mammoth job like this done in a short time.

If I can emphasize one thing, it is this point about putting in a new program, about the need to put somebody fully in charge and hold him responsible.

In 1965 when SSA was charged with the responsibility for setting up the Medicare program, SSA was fully in charge and had the complete support and help of all parts of government, all of the executive branch, budget, the President, the Congress, and so on.

This time in the implementation of SSI, and I was just there long enough to be able to know about some of this and observe the rest, levels of administration above SSA were slow to supply sufficient manpower for the new program and slow to approve needed computer capacity.

Mr. VANIK. What agencies were involved?

Mr. BALL. You had to go through HEW justification for additional manpower as a step toward getting approval in the Office of Management and Budget so that you could be delayed for months and were. This was a period when the Government was generally holding down manpower very strictly. I want to be completely fair on this, originally there was a good block of manpower given to social security for this. It was recognized and when they came back to get more, that is when the real delay set in. The same with computer capacity.

I am not arguing if you had 5 years you could not figure out a way to use SSA's existing computer capacity, but in the timeframe involved there needed to be additional computer capacity. That was held.

That did not happen in medicare.

Another point, in the same vein, Mr. Chairman, is that detailed review of policy issues at staff levels above SSA also made it impossible for the agency to respond quickly to implementation issues as they arose.

I just want to summarize that point by saying in big, new programs, medicare and SSI or if we are going to have national health insurance and welfare reform, there is no way to make these things work well until the usual levels of bureaucratic clearance give way to a full delegation. There is just no time for passing all that paper back and forth. The need for complete delegation was recognized in medicare, but not SSI.

I believe we should forever free social security from the type of bureaucratic delays and lack of top-HEW, top-OMB support which created the SSI disaster. I believe that the bill which Senator

CHURCH and I are introducing today will achieve that purpose. I hope that during the coming months of discussion on reorganization that we will be able to enact this legislation.

IMPACT AID

The SPEAKER pro tempore. Under a previous order of the House, the gentleman from Washington (Mr. DICKS) is recognized for 5 minutes.

Mr. DICKS. Mr. Speaker, today, I am introducing legislation which will increase the appropriation for Federal impact aid to schools from the $370 million requested in the President's budget to the $830 million needed to assist school districts financially burdened as a result of Federal activities. Last year's appropriation was $768 million. The table below compares the 1977 grant to schools in my district with the amounts that would be made available under President Carter's budget and under the $830 million appropriation needed to fulfill congressional intent of Public Law 81–874:

COMPARISON OF BUDGETED AND PROPOSED FISCAL YEAR 1978 APPROPRIATIONS FOR FEDERAL IMPACT AID P.L. 81–874 (ESTIMATED)

	Budgeted	Needed
Impact aid	$370,000,000	$830,000,000
King County:		
Federal way	8,000	130,000
Auburn	128,500	228,500
Kitsap County:		
North Kitsap 400	88,900	339,500
Bremerton	120,300	884,500
Central Kitsap	427,900	1,129,000
Bainbridge Island	11,000	53,500
South Kitsap	11,800	779,000
Pierce County:		
Clover Park	3,546,500	4,339,000
Franklin Pierce	(1)	248,500
Peninsula	(1)	95,000
University Place	(1)	110,500
Eatonville	15,900	39,500
Steilacoom	17,500	121,500
Tacoma	14,800	702,500
Bethel	(1)	376,500
Total	4,391,100	9,577,000

[1] None.

The table above illustrates the fiscal impact of the program cuts. The schools in my district need Federal impact aid to provide basic education to the children of Federal employees. The President's budget limits this aid to schools to only those children who reside on Federal property and have a parent on active duty in the services, or who reside on Federal property and have a parent employed on Federal property situated in the same State as the school district or within reasonable commuting distance of the district. Payments to schools for children who reside on Federal property or reside with a parent employed on Federal property, or have a parent on active duty in the services are not allowed.

The results of these proposed cuts in Federal impact aid will be a lowering of the quality of education for all children in school districts impacted by Federal activities. Sources of revenue other than Federal impact aid are often limited, and in some school districts nonexistent. In my district, the people support the schools with their property taxes. The economy is dominated by the Federal Government, an employer which does not contribute to the tax base. The people have accepted the Federal Government's decision to place these military installations and Federal agencies in their communities. In return, they should not be asked to lower the quality of their children's education, for without an increase in the President's request for impact aid, the quality of education in these communities will deteriorate immediately. I urge my fellow Members of the House of Representatives to support an increase in Federal impact aid.

PERSONAL EXPLANATION

The SPEAKER pro tempore. Under a previous order of the House, the gentleman from Pennsylvania (Mr. ERTEL) is recognized for 5 minutes.

Mr. ERTEL. Mr. Speaker, I regret that I may not be able to be present during the entire time the House meets today and will have to pair any votes that I may miss. I will have to leave, because of a longstanding commitment to be the keynote speaker at the annual meeting of the Tri-County United Way in Harrisburg. This organization funds more than 40 social agencies serving the communities and the people of Perry, Dauphin, and Cumberland Counties. I look forward to helping them in any way I can to continue their vital programs.

LEGISLATION TO PROHIBIT CHILD PORNOGRAPHY

The SPEAKER pro tempore. Under a previous order of the House, the gentleman from New York (Mr. MURPHY) is recognized for 5 minutes.

Mr. MURPHY of New York. Mr. Speaker, today I reintroduce a bill, along with Mr. KILDEE, regarding the use of children in the production and marketing of pornographic materials. With today's additional cosponsors, there are now 104 Members of Congress who have joined together—nearly one-quarter of this legislative body representing 70 percent of the States of the Union—in the battle against this incredibly virulent form of abuse of America's children.

The scope of the problem is nationwide; the reality of what is being done to these children almost defies description. The current issue of Time magazine, April 4, 1977, page 55, has published a brief article which details some of the case histories of this sexual exploitation and abuse of children. I personally find it difficult to believe that such perversity and callousness could be directed toward a young child who is unable to understand either the act itself or the lifelong effects it will have on his or her emotional development. Yet the reality exists, and the article, which I herewith include for the RECORD, only touches on the surface of those cases which are printable.

Yet there is no Federal law, specifically prohibiting the use of children in pornography.

Our legislation is currently before Mr. RODINO's Subcommittee on Monopolies and Commercial Law, and Mr. BRADEMAS' Subcommittee on Select Education, awaiting public hearings and testimony on this most odious and repulsive form of pornography. One hundred and four cosponsors strongly urge the chairmen to schedule hearings at an early date:

H.R. —

A bill to amend the Child Abuse Prevention and Treatment Act to prohibit the sexual exploitation of children and the transportation and dissemination of photographs or films depicting such exploitation

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That this Act may be cited as the "Child Exploitation Prevention Act".

SEC. 2. The "Child Abuse Prevention and Treatment Act" (P.L. 93–247, 88 Stat. 4) is amended by inserting at the end thereof the following new sections:

"SEXUAL EXPLOITATION OF CHILDREN

"SEC. 8. Sexual abuse of children:

"(a) Any individual who causes or knowingly permits a child to engage in a prohibited sexual act or in the simulation of such an act shall be punished as provided under subsection (c) if such individual knows, has reason to know, or intends—

"(1) that such act may be photographed or filmed; and

"(2) that any photograph or film depicting such act may be transported, shipped, or mailed through interstate commerce or foreign commerce or may affect interstate commerce or foreign commerce.

"(b) Any individual who photographs or films a child engaging in a prohibited sexual act or in the simulation of such an act shall be punished as prohibited under subsection (c) if such individual knows, has reason to know, or intends that any photograph or film made by such individual depicting such act may be transported, shipped, or mailed through interstate commerce or foreign commerce or may affect interstate commerce or foreign commerce.

"(c) Any individual who violates subsection (a) or (b) shall be fined not more than $50,000 or imprisoned not more than twenty years, or both.

"SEC. 9. Transportation and dissemination of certain photographs and films:

"(a) Any individual who—

"(1) knowingly transports, ships, or mails through, or in such a manner as to affect, interstate commerce or foreign commerce any photograph or film depicting a child engaging in a prohibited sexual act or in the simulation of such an act; or

"(2) receives for the purpose of selling or sells any photograph or film which has been transported, shipped, or mailed through, or in such a manner as to affect interstate commerce or foreign commerce, and which depicts a child engaging in prohibited sexual act or in the simulation of such an act, shall be punished as provided under subsection (b).

"(b) Any individual who violates subsection (a) shall be fined not more than $25,000 or imprisoned not more than fifteen years, or both.

"SEC. 10. Definitions:

"For purposes of this chapter:

"(1) The term 'child' means any individual who has not attained age sixteen.

"(2) The term 'prohibited sexual act' means—

"(A) sexual intercourse;

"(B) anal intercourse;

"(C) masturbation;

"(D) bestiality;

"(E) sadism;

"(F) masochism;

"(G) fellatio;

"(H) cunnilingus;

"(I) any other sexual activity; or

"(J) nudity; if such nudity is to be de-

picted for the purpose of sexual stimulation or gratification of any individual who may view such depiction."

SEC. 11. Enforcement:

1. For purposes of enforcement, such enforcement authority as necessary for the provisions of Section 8 and Section 9 of this Act shall be vested in the Attorney General of the United States.

SPONSOR AND COSPONSORS

Mr. Murphy of New York, for himself and Mr. Kildee of Michigan, Mr. Coughlin of Pennsylvania, Mr. Hannaford of California, Mr. Traxler of Michigan, Mr. Baucus of Montana, Mr. Brodhead of Michigan, and Ms. Oakar of Ohio.

CHILD'S GARDEN OF PERVERSITY

Lollitots magazine is one of the milder examples. It features preteen girls showing off their genitals in the gynecological style popularized by *Penthouse* and *Playboy*. Other periodicals, with names such as *Naughty Horny Imps, Children-Love* and *Child Discipline*, portray moppets in sex acts with adults or other kids. The films are even raunchier. An 8-mm. movie shows a ten-year-old girl and her eight-year-old brother in fellatio and intercourse. In another film, members of a bike gang break into a church during a First Communion service and rape six little girls.

These and a host of other equally shocking products are becoming increasingly common fare at porn shops and sex-oriented mail-order houses across the nation. They are part of the newest growth area pushed by the booming, billion-dollar pornography industry: child porn.

"I just found out about these magazines and films this summer, and I've become a raving banshee over it," says Dr. Judianne Densen-Gerber, a Manhattan psychiatrist who has been barnstorming around the country in a crusade against this abuse of minors. Her effort is only one part of a new campaign against child porn. New York City has cracked down, and police have at least temporarily forced kiddy-sex periodicals and films out of the Tawdry Times-Square area. Some twenty states are considering child-porn laws. Last week the Illinois house of representatives approved a bill setting stiff penalties for producing and selling child porn. The bill is expected to pass the senate and become state law.

Child porn is hardly new, but according to police in Los Angeles, New York and Chicago, sales began to surge a year or two ago and are still climbing. Years ago much child pornography was fake—young-looking women dressed as Lolitas. Now the use of real children is startlingly common. Cook County State's Attorney Bernard Carey says porno pictures of children as young as five and six are now generally available throughout Chicago. Adds Richard Kopelkin, a state's attorney investigator: "They are even spreading to the suburbs, where they are now considered rare items, delicacies."

Among recent developments:

Underground sex magazines are heavily stressing incest and pedophilia. One current West Coast periodical ran ten pages of photos, cartoons and articles on sex with children.

In San Francisco hard-core child-porn films were shown in a moviehouse for five weeks before police seized the films last February. Even San Francisco's Mitchell brothers, the national porn-film kings, were outraged. Says Brother Jimmy: "We think obscenity laws should start with child porn."

An Episcopal priest, the Rev. Claudius I. Vermilye Jr., who ran a farm in Winchester, Tenn., is awaiting trial on charges that he staged homosexual orgies with boys on the farm and mailed pictures of activities to donors around the country.

Until recently, much child porn sold in America was smuggled in from abroad. Now most of it appears to be home grown, with the steady stream of bewildered, broke runaways serving as a ready pool of "acting talent" for photographers. Pornographers who stalk children at big-city bus stations find many victims eager to pose for $5 or $10—or simply for a meal and a friendly word. Says Lloyd Martin, head of the Los Angeles police department's sexually abused child unit: "Sometimes for the price of an ice-cream cone a kid of eight will pose for a producer. He usually trusts the guy because he's getting from him what he can't get from his parents—love." In many cases, the porn is a byproduct of child prostitution. Pimps invite children to parties, photograph them in sex acts, and circulate the pictures as advertisements to men seeking young sex partners. Frequently, the pictures are then sold to porn magazines.

Even worse, some parents are volunteering their own children to pornographers, or producing the sex pictures themselves. Last year a Rockford, Ill., social worker was sent to jail for allowing his three foster sons to perform sex acts before a camera for $150 each. In January, a couple in Security, Colo., was charged with selling their twelve-year-old son for sexual purposes to a Texas man for $3,000.

Some children in porn photos are victims of incest. Parents will have intercourse with a son or daughter, then swap pictures with other incestuous parents, or send the photos to a sex publisher. Sex periodicals, particularly on the West Coast, publish graphic letters on parents', sexual exploits with their own children. Says Los Angeles' Martin: "We had one kid in here the other day who is eleven years old. His father started on him when he was six, then sold him twice as a sex slave. The kid had been in movies, pictures, magazines and swap clubs. After a while, he broke down and cried and said how grateful he was to have been pulled out of it."

Such experiences can of course scar a child for life. Warns New York Psychoanalyst Herbert Freudenberger: "Children who pose for pictures begin to see themselves as objects to be sold. They cut off their feelings of affection, finally responding like objects rather than people." Some psychiatrists believe that children who pose in porn pictures are often unable to find sexual fulfillment as adults. Another danger, says Los Angeles Psychiatrist Roland Summit, "is that sexually abused children may become sexually abusing adults."

Child porn poses fewer hazards for the pornographers. Producers of child porn can be prosecuted for sexual abuse of children, but the children are hard to identify and locate. So are the producers, who often hide behind a welter of dummy corporations. Thus most prosecutions are under the obscenity laws, which generally make no distinction between children and adults as porn models. One result: many lawyers believe that the genital pictures in *Lollitots*, however offensive, might be judged no more obscene under the law than similar photos of adult women routinely published in most men's magazines.

To make prosecutions easier, angry legislators in several states and Congress are proposing a kind of end run around the obscenity laws—a ban on sexually explicit pictures of children, whether legally obscene or not. One bill introduced into the House of Representatives by Democrats John Murphy of New York and Dale Kildee of Michigan already has 103 co-sponsors. It would make any proven involvement with the production and sale of explicit sex pictures of children a felony. Says a Kildee aide: "Our bill is clearly enough directed toward child abuse so that the First Amendment should not arise. This is why we defined child pornography as a form of abuse, rather than a form of obscenity."

Under this approach, a salesman in an adult bookstore could be prosecuted as an active participant in the crime of sexually exploiting the children pictured in the store's magazines. New York Lawyer Charles Rembar, who successfully defended *Lady Chatterly's Lover* and *Fanny Hill* against obscenity charges, thinks the seller of child porn is a suitable target: "It is totally unrealistic to say that the people who sell these magazines and films are not involved in the act themselves." Yet other lawyers consider a broad child-abuse law a form of backdoor censorship. Says Ira Glasser of the New York Civil Liberties Union: "I assume if you put your mind to it, you could come up with an acceptable statute prohibiting adults from using children in explicit sex films and photos, but controlling what people see or read is another matter. Everything published ought to be absolutely protected by the First Amendment."

Despite First Amendment problems, public pressure for some kind of law is likely to grow. Many Americans battling against child porn view their efforts as a last stand against the tide of pornography. Says California State Senator Newton Russell: "This is a reflection of the social and spiritual morality of this nation. If there is to be any reversal in the trend, the place to start is child porn."

ESTABLISHMENT OF A HOUSE INTELLIGENCE COMMITTEE

The SPEAKER pro tempore. Under a previous order of the House, the gentleman from Wisconsin (Mr. ZABLOCKI) is recognized for 5 minutes.

Mr. ZABLOCKI. Mr. Speaker, I am introducing today a House resolution to establish a new standing Committee of the House—the Committee on Intelligence. The committee would be comparable to that which is already established in the Senate, although there are some modifications in my resolution, as distinguished from the Senate's comparable legislation, which have been included in an effort to make improvements.

There is no need to go into historical detail at this point to demonstrate the need for establishment of an Intelligence Committee in the House. The need is clear to many Members already.

It is vital to the Nation to have an effectively-functioning foreign intelligence system. It is equally necessary that the Congress of the United States exercise proper control over U.S. intelligence activities, and to be apprised of the information obtained.

Unfortunately, in a great democracy such as ours, there must be secrecy in various aspects of the intelligence function. This need cuts against the grain of our philosophy of making the maximum amount of information available to the people.

What I am hoping the establishment of an Intelligence Committee in the House will accomplish is to maintain the largest possible flow of intelligence information to the Congress and to the public, while at the same time strengthening Congress control over intelligence activities. A single committee can more effectively achieve these goals than is now possible in the House.

The need from the standpoint of leg-

islative procedures also is apparent in our relations with the Senate. The Senate's Intelligence Committee, which has performed well so far, can report out measures but when such legislation gets to the House there is no comparable committee to consider it.

I urge the Committee on Rules to give serious consideration to the establishment of an Intelligence Committee in the House in the near future.

INTRODUCING A RESOLUTION TO PROVIDE FOR RADIO AND TELEVISION BROADCAST COVERAGE OF FLOOR PROCEEDINGS IN THE HOUSE OF REPRESENTATIVES

The SPEAKER pro tempore. Under a previous order of the House, the gentleman from Indiana (Mr. HAMILTON) is recognized for 20 minutes.

Mr. HAMILTON. Mr. Speaker, in a continuing effort to make our representative form of Government more intelligible, efficient, open, and responsive I am introducing today a resolution to provide for radio and television broadcast coverage of floor proceedings in the House of Representatives. In my estimation such coverage would benefit both the American public and the House itself. It is something that is long overdue.

Recent surveys and public opinion polls show a trend that must alarm every Member of Congress. The trend to which I refer is the precipitous decline in the number of people who approve of the performance of Congress. It is a sad fact that this vital institution has scarcely ever been held in lower esteem by those whom it serves. While there are undoubtedly many causes of this loss of confidence, one of the principal causes is a widespread ignorance of the way in which Congress conducts its business. Accompanying the ignorance is a suspicion that things are not being done right. It is not far from there to the conclusion that Members of Congress have something to hide.

In the 94th Congress a bill was passed to permit public attendance at most meetings of executive branch agencies. I supported that bill in the belief that it was time for the public to acquire a better understanding of the daily operations of its Government. For me, as for most of my constituents, the Government in the Sunshine Act was a landmark among efforts to reform the Federal bureaucracy, though in the aftermath of its passage many of us were left wondering why the excellent ideas embodied in the act were not fully extended to the legislative branch. Of course, progress has been made in Congress. The meetings of committees in both the House and Senate are more open now than ever before and the secrecy of markup sessions is rapidly becoming a thing of the past. These are appreciable gains of which we should be proud. However, much more remains to be done. The most important parts of the institution, the Chambers of the House and Senate, remain effectively closed. Reporters may sit in the galleries during floor proceedings, and they may describe what they see forthrightly and diligently, but no one will claim that the public thereby attains a deeper insight into the workings of Congress. These continue to mystify most people.

The potential benefit to the public of radio and television broadcast coverage of floor proceedings is apparent enough, but not to be overlooked is the potential benefit to Congress itself. One often hears the complaint that the job of a Member of Congress has become so complex that even the most necessary of tasks cannot be adequately performed. In an attempt to help Members meet the need to be too many places in too little time Congress has turned to such things as electronic voting, increased computer services and larger staffs. This assistance may have stemmed the overwhelming tide of work, but clearly it has done nothing to turn that tide back. Most Members will readily admit that they are as busy as ever.

One of the worst problems is that of a Member's absence from the Chamber during floor proceedings. Committee business, meetings with constituents and a hundred other duties compel such absence time and time again. However, once a Member leaves the floor for whatever reason he is effectively cut off from proceedings there. Sometimes he rushes back to the floor with only a superficial awareness of a parliamentary or legislative situation which has developed while he was away. Sometimes his votes in those situtions are not as informed as they should be. It is no exaggeration to say that Congress has handicapped itself severely by its failure to make use of communications technology to keep Members informed of ongoing floor action.

Aside from its educational impact on the public and its informational value to Members of Congress, radio and television broadcast coverage of floor proceedings would be advantageous in other ways. For example, there is every indication that it would have a salutary effect on the floor proceedings themselves. According to a recent report of the Twentieth Century Fund Task Force on Broadcasting the Legislature:

> The experience of states and foreign countries tends to prove that, far from making actors or demagogues of members, the presence of television improves the conduct of debate and increases the efficiency of the legislative session.

Doubtless the same thing could be said of the presence of radio. A positive report of this sort should allay the fear that microphones and cameras would cause Members to grandstand and play to the audience.

Another obvious advantage of such coverage, the creation for posterity of an extremely accurate and comprehensive historical document of floor proceedings, ought to be mentioned. Of course, an audiovisual document would be much more revealing and true to the facts than would a printed journal. In fact, such a document might very well serve to correct many of the abuses to which the CONGRESSIONAL RECORD and other journals are subject. The value of this rich archive to future historians and political scientists should not be underestimated.

Allow me to describe the resolution in very brief terms. It would:

Express findings that radio and television broadcast coverage of floor proceedings in the House is desirable;

State that the purpose of the resolution is to provide a proper and acceptable means of allowing such coverage, with utmost concern for maintaining the dignity and decorum of the House and insuring fair and equitable treatment to all sides of an issue;

Provide for such continuous coverage without any limitations or restrictions except in the case of a secret session;

Specify that the Speaker of the House be responsible, with assistance from a Broadcast Advisory Board, for implementing and overseeing such coverage;

Provide that all radio and television stations, systems, networks and services in the United States and its territories be given access to such coverage, which is restricted to legitimate news and research purposes and may not be used for political purposes or with commercial sponsorship;

Provide that the Library of Congress, under arrangement with the Clerk of the House, make copies of the tapes of such coverage and make such copies available through the interlibrary loan system;

Specify that such audio coverage be made available to each Member and committee through a closed-circuit radio system;

Provide for the installation of necessary equipment;

Prohibit control over microphones by anyone other than House personnel;

Prohibit copyright of such coverage;

Require House access to all such live coverage;

Specify that any station given access to such coverage pay a fair fee for it and be allowed to use it at its own discretion;

Direct the Committee on Rules to review broadcast operations before the end of the Ninety-fifth Congress and again in the Ninety-seventh Congress;

Specify that such initial coverage be by means of a contract with a network pool consisting of ABC, CBS, NBC and PBS; and

Provide for an effective date and funding.

The resolution which I have just described is thoroughgoing and carefully drafted. The changes required would be simple and economical. It would enhance the right of the American public to know about Congress, aid Members of Congress in the discharge of their duties, improve legislative sessions and create an archive for the future. Last, it would address and prevent abuses that might attend radio and television broadcast coverage of floor proceedings.

Mr. Speaker, it is time for the House of Representatives to capitalize on the revolution in communications technology. To fail to do so would be an unfortunate omission. I urge my colleagues to give the resolution their closest attention.

THE FOSTER CARE AND ADOPTION REFORM ACT OF 1977

The SPEAKER pro tempore. Under a previous order of the House, the gentleman from California (Mr. MILLER) is recognized for 10 minutes.

Mr. MILLER of California. Mr. Speaker, I am introducing today the Foster Care and Adoption Reform Act of 1977, a comprehensive piece of legislation carefully designed to remedy a continuing crisis in foster care which affects hundreds of thousands of children, and their families across this Nation.

I am very proud that eight of my colleagues are joining me in introducing this legislation today. These cosponsors include seven members of the Subcommittee on Public Assistance and Unemployment Compensation including the distinguished chairman, and the majority whip.

The thrust of this legislation is to look at the problems of foster care and adoption in a thorough manner. It is important to increase our ability to provide much needed assistance to families in crisis before placement is required. It is similarly critical to provide more services after placement which can help to reunify the family. We must provide greater accountability for children and families involved in the foster care system by extending to them better procedural and due process protections. We must improve our data collection and information dissemination systems so as to increase our knowledge about the children in the system because inadequate information systems have handicapped our ability to track children in care.

And last, we must increase the possibilities for adoption of foster children by providing cost-effective subsidies to adopting parents, rather than continue, by our Federal law, to discourage the permanent placement of these children.

In nearly 2 years of personal investigation, I am yet to find defenders of the present foster care system. But I have found many of its victims—the families who are torn apart by the Federal requirements which encourage the fragmentation of the family; the children floating in limbo, receiving none of the assistance which would enable them to return home or enter another permanent home; the foster parents, who receive minimal financial assistance and few of the services which would enable them to better provide for their foster children. This is the continuing crisis of foster care which we must remedy.

The issue is not whether we will spend Federal funds on these children and families, but when. We can either adequately support preventive service programs which can keep families together, or ignore the developing crisis and continue to pay hundreds of millions of dollars annually to maintain them in long-term foster care, without any benefit to them or their families.

Foster care was originally conceived as a short-term separation of parent and child, during which time reunification services were to attempt to remove those factors necessitating out-of-home placement. We now know that children often are thrust into placement without any type of preventive services and remain there for years with no attempts to return them to their natural homes.

The need for this legislation has recently been demonstrated by three detailed studies: "Foster Care in Five States"—California, Iowa, Vermont, Arizona, and Massachusetts—written by the Department of Health, Education, and Welfare; a multi-State review of children in placement, prepared by the General Accounting Office, commissioned by Congressman JOHN BRADEMAS, chairman of the Subcommittee on Select Education, and myself; and a review of foster care in the eight Southeastern States funded by HEW and just completed by the Regional Institute of Social Welfare Research.

The conclusions reached in these reports are alarming:

The number of children in federally funded foster care has skyrocketed from 1,020 in 1962 to over 115,000 in 1976.

The average monthly payment for children in placement in 1976 was $260—for a home-placed child—and $601—for an institutionalized foster child, roughly one-fourth of all children reported.

Almost all studies have shown that virtually no services are available to biological families after the child has been placed in foster care—at best, followup seems to be a sporadic phenomenon—HEW report—similar finding by RISWR.

Over 60 percent of the children in placement in the Southeast could be better served elsewhere. Nearly one-third could be returned to their natural homes, and another 10 percent could be adopted—RISWR report.

One-third of the children in placement, examined by GAO, had not been reviewed in 6 months as required by Federal law. In California, over half the children had not been reviewed in that period and in Massachusetts, the figure was 26 percent. Witnesses at congressional hearings have estimated that there may be as many as 100,000 children lost in the foster-care system.

In Arizona, HEW has found that children intended to remain in care for no more than 3 months actually were in placement for over 2 years. Those placed for adoption remained in indeterminate placement for over 2 years.

Massachusetts found that 66 percent of the natural parents with children in foster placement reported that they had been "unable to get assistance for their problem until placement," and 30 percent said that they did not feel that placement was warranted. Virtually no effort is made—to keep the biological family together and prevent placement of children in foster care. These findings were not unlike those in other States.

In reviewing various State programs, HEW has concluded:

> Most of the studies cite [a] lack of adequate planning, goal setting, review, and follow-up of cases as major problems hindering achievement of foster care objectives.

HEW also notes:

> Every State study cites insufficient case planning and lack of consideration of alternatives to foster care as serious failures of the program.

A potential channel for funding these services, title IV–B of the Social Security Act, has been severely underfunded for several years. Although the current authorization stands at $266 million, only about $50 million has been appropriated for child welfare services, generally those programs cited in studies and mandated in my legislation as being effective in reducing the likelihood of placement for its duration. I am extremely pleased to say that within the last few weeks, the House Ways and Means Committee, the House Budget Committee, and the Senate Finance Committee have all endorsed full funding for title IV–B and I am hopeful that the Senate Budget Committee will follow suit tomorrow.

Current Federal costs for foster care currently are about $700 million, and State and local expenditures may be several times that amount. This amounts to a major expenditure of money for a program which does little more than warehouse children for years, as most of those involved in the program in the States readily admit. Many counties are so strapped for funds that they expend money merely for maintenance, rather than for services, and the child remains in placement indefinitely as a result.

In recent years, there have appeared several demonstration service delivery and monitoring programs in selected locations throughout the country. The results of these experimental programs, in reducing unnecessary placements, providing needed services to families, and returning children to their own homes are remarkable and prove beyond doubt that, with adequate support, local administrators have the desire and expertise to revise the current state of affairs in foster care.

In Nashville, during the early 1970's, the comprehensive emergency services program, funded partly by HEW, developed services for families in crisis. The impact on reducing placements and time in placement illustrates how a successful preventive program can operate:

Number of neglect or dependent petitions filed: minus 56 percent.

Families involved in neglect and dependent proceedings: minus 54 percent.

Number of children removed from home: minus 51 percent.

Number of children institutionalized: minus 85 percent.

Number of children under age 6 institutionalized: minus 100 percent.

Recidivism rate for neglect and dependency: minus 88 percent.

Number of children in long-term care for more than 2 years reduced from 94 percent to only 34 percent.

Funds saved during Nashville program: $68,000.

In New York City, where a year of foster care can cost from $5,000 to $13,000 the Child Welfare League operated a similar program—the New York State preventive services demonstration project. For an investment of $500,000 for services, the estimated saving over

1 year was $2,000,000. A recent review of the program concluded:

The findings of the project indicate that a program of intensive counseling and concrete services—made readily available to families when foster care placement of a child has occurred or is imminent—can be effective in preventing or reducing the length of placement, enhancing the functioning of the parents and children, improving the environmental conditions of families, and *in securing considerable savings in foster care expenditures.*" (Emphasis added.)

In addition to these service programs, efforts to reduce the duration of foster care have achieved highly successful results in over a dozen cities around the Nation. Operated by the National Council of Juvenile Court Judges, the children-in-placement project—CIP—utilizes largely volunteer personnel to supplement overburdened courts charged with reviewing foster care placements. At minimal cost, the CIP project has sharply reduced the number of children in care, and reunited children with their families in every community in which it has been implemented by reducing the burden on the family and juvenile courts.

The "chief barrier to finding homes" for the tens of thousands of children in foster care who cannot return to their natural parents is "the lack of adoptive families able to assume full financial responsibility for them," according to Boston College law professor Sanford N. Katz. The Children's Bureau has estimated that there are 120,000 foster children in indeterminate placements waiting to be adopted. Professor Katz led a study by the Child Welfare League, financed by HEW, which developed a Model Subsidized Adoption Act for State legislatures. Versions of that act have been enacted by over 40 legislatures, but most programs have been handicapped by the lack of supporting Federal funds.

Where strongly supported, subsidized adoption programs have been found to be beneficial to the children and cost effective, too. The State of Washington passed an adoption support act in 1971, and 4 years later the results were reported to the State legislature, concluding:

There is a highly significant relationship between the availability of financial support for the adoption of hard-to-place children and the adoption of those children. Children for whom adoption subsidy was available experienced a higher rate of adoption than similar children for whom support was not available.

A recent Congressional Research Service report found that—

The total savings which would result from the adoption of one child would be $131,760 for the period (from age three) until that child reached age 21.

In the Washington State demonstration project, the cost effectiveness of adoption supports was evident:

When payments between foster care and adoption support are compared, there is a savings of 18.7% with adoption support.

Other States, too, have realized substantial savings through introduction of adoption supporters in place of foster care:

California, by paying $92 per month in adoption subsidy rather than $133 for foster care, saved $646,860 in 1 year alone;

Connecticut, by reducing its per child monthly charge by $10, saved $60,852 in 1 year;

In Illinois, nearly $300,000 was saved by the adoption with subsidy of 45 foster children;

In Michigan, $86,422 was saved in the first 6 months of 1974 alone, a cost equaling just 57 percent of the amount which would have been required had the children remained in foster placements.

The Washington report concluded:

(I)mplementation of an adoption support program for hard-to-place children will result in many more of these children being adopted.

The bill I today introduce, therefore, authorizes the payment of such subsidies to families under title IV–A of the Social Security Act.

The record clearly indicates that the foster care and adoption situation today is a national disgrace, that it fails to achieve a single one of the goals established for current Federal programs, and that it, in fact, makes victims of the very children and families it is supposed to benefit. The Foster Care and Adoption Reform Act of 1977 is the product of nearly 2 years of investigation, consultation with State and local administrators, children's advocates and legal organizations, Federal officials and many others who have contributed their best thoughts in assisting me to formulate this legislation. Its enactment will represent a long awaited statement of commitment by this Congress and the new administration to the children and families of this Nation.

I am submitting today a section-by-section description of the Foster Care and Adoption Reform Act, and invite my colleagues to join me in sponsoring this legislation and encouraging its swift enactment.

SECTION-BY-SECTION DESCRIPTION OF THE FOSTER CARE AND ADOPTION REFORM ACT OF 1977

Section 1. Title

Section 2. Findings and purposes

Section 3. Amends title IV–B of the Social Security Act, eliminating the $266 million authorization and replacing it with an entitlement with a cap of $300 million.

Section 4. Repeals Sec. 408 of the Social Security Act (foster care) effective September 30, 1980.

Section 5. Section 470: (a) Establishes a requirement that, by September 30, 1980, each state must have in effect a State Plan for Foster Care and Adoption Services without which no title IV–A maintenance or other payments may be made.

(b) Details of the state plan, including. a maintenance of effort by the state for expenditures under title IV–B at 90 per cent of current spending; voluntary or involuntary placement of a child in foster care approved only after adequate preventive services (defined) have been offered and either failed to alleviate the situation, or have been refused, except in certain emergency cases; development of a voluntary placement detailing rights, obligations and responsibilities of all parties during the period of placement; the child's right to placement with relatives or in his own neighborhood; a prohibition on the placement of foster children near criminal offenders; preparation and periodic modification of an individualized case plan for each child; provision of services to the child and parents designed to achieve family reunification after placement has occurred; semi-annual impartial reviews of placement, and due process protections to assure that the full procedural rights provided in the Act are accorded the child and parents; a dispositional hearing to be conducted no later than 18 months after placement in order to determine the child's future placement either in the natural family, in a permanent adoptive home, or in long-term foster care (under specified circumstances); procedures covering a parental request for the establishment of a data collection system to provide greater knowledge regarding children in placement; annual reports to the Secretary of HEW regarding the State's program; cooperation between the states and HEW in moving toward meeting caseload standards established by national professional organizations; confidentiality provisions; a grievance procedure for parents, foster parents, or children who believe they have been denied some right under the Act.

(c) Requires the Secretary to approve plans which are in conformity with the requirements of section (b).

(d) Definitions of "parent" and "child".

Section 471: Duties of the Secretary: The Secretary's responsibilities include: development of regulations and guidelines for determining costs and reimbursements, and for setting rates; provision of technical assistance to States for help in developing standards for foster homes and institutions, and for the training of foster parents; evaluation of state reports; penalty provisions for noncompliance with the state plan; dissemination of information about successful programs, and data collection and provision of assistance in the replication of successful programs; consultation with other federal agencies to achieve better integration of other programs, specifically voluntary programs for senior citizens, in providing some of the services which are to be offered families and children.

Section 472: Foster Care Support Payments:

(a) Modified eligibility for federal reimbursement, opening eligibility to children who have been placed in accordance with the State Plan, including voluntarily placed children under specified circumstances. Also, allows children placed in conformity with the eligibility standards in this legislation prior to the approval date for state plans to be claimed for reimbursement if the administrative, procedural and due process provisions of this law are applied to each such child within three months of their having been claimed.

(b) Technical.

(c) Technical.

(d) Reenacts sections of the current Sec. 408 concerning the counting of certain administrative costs by a public agency in placing a child to be counted as maintenance payments.

(e) Definitions of "foster family home", "group home" and "child-care institution".

Section 473: Eligibility Requirements: Changes eligibility to permit federal reimbursement for children from a family with up to 60 percent of the state median income (compared to the present standard, which is AFDC eligibility). Permits a state to impose fees reasonably related to the income of the family and the cost of the service for those with incomes above the AFDC standard.

Section 474: Adoption Regulations:

(a) The Secretary is to appoint a Committee on Uniform Adoption Regulations.

(b) Obligation of the Committee, including the reporting to the Secretary of proposed adoption regulations within nine months.

(c) Secretarial responsibilities for disseminaton of draft regulations, and issuance of final regulations, which are not to be in conflict with current interstate compacts for the placement of children.

(d) Duties of the Secretary, including: dissemination of information; reports to the Congress; cooperation with the states; requirements that adoption agences subscribe to certain standards of quality; creation of a national information system to assist in locating permanent homes for adoptive children.

Section 6. Technical.

Section 7. Technical.

Section 8. Adoption Support Payments.

Section 411: (a) Allows for federal subsidies to be paid to the parents of adopted children.

(b) Adoption subsidies to be counted as maintenance payments under title IV–A of the Social Security Act for states complying with adoption regulations, providing that in cases where strong emotional ties have been established between a foster child and his foster parents, those parents must be given the first opportunity to adopt the child; in other cases, after diligent efforts have been made for six months to place the child without use of the subsidy and no suitable home has been found, the child should be certified as eligible for a subsidy.

(c) Technical provisions concerning calculation of the subsidy.

(d) Prohibits adoption subsidy payments to a state which fails to comply with federal regulations, or which discriminates against prospective adoptive parents because of race, ethnicity, marital status or age.

Section 9. (1) Technical (non-discrimination provision).

(2) Amends title IV–B to limit expenditures of new monies provided states for services designed to reduce the need for foster care.

Section 10. Amends the method of calculation title IV–B allocations to the States, eliminating the high state match currently required (although under section 470(b), states would have to continue to spend at 90 percent of their 1977 level expenditures while federal monies would increase by six times 1977 levels).

Section 11. Technical.

LEGISLATION TO PROVIDE BUSINESS AND INDUSTRY IN NORTHEAST WITH ADDITIONAL TAX INCENTIVES TO INCREASE INVESTMENT IN JOB-PRODUCING FACILITIES

The SPEAKER pro tempore. Under a previous order of the House, the gentleman from Massachusetts (Mr. BOLAND) is recognized for 5 minutes.

Mr. BOLAND. Mr. Speaker, yesterday I introduced legislation for myself and on behalf of Mr. CONTE, Mr. EARLY, Mr. MARKEY, Mr. MOAKLEY, Mr. HARRINGTON, Mr. STUDDS, and Mr. TSONGAS which is intended to provide business and industry in the Northeast with additional tax incentives to increase investment in job-producing facilities.

The legislation, which has been endorsed by the Coalition of Northeastern Governors, would provide businesses with double accelerated depreciation for new plants and equipment, provided the new investments were made in areas with unemployment rates of 6 percent or more.

Under the proposal, tax payments to the Federal Government would be postponed, though not eliminated, thereby granting economically stimulating interest-free loans to companies willing to invest in stagnant economies. All Federal tax liabilities would eventually be paid in full.

The proposal, in "targeting" financial assistance to those areas of the country with high unemployment rates, would be of particular benefit to the industrialized Northeast where unemployment continues above national averages.

Specifically, the proposal would allow firms investing in manufacturing equipment in States where the 5-year moving average of unemployment rates exceeded the national average to calculate their Federal tax liabilities using depreciation rates twice those presently allowed. The legislation would thus be restricted to those areas in long-term economic difficulty and would phase out as unemployment rates declined.

If enacted, firms would pay less in the early years of investment's life with greater payments being made in succeeding years. The program would cost the U.S. Treasury nothing in the long run as back taxes were paid, yet investors would only be obligated to pay relatively modest amounts of tax in the early years.

The depreciation allowance proposal has several advantages. First, it targets tax relief to areas most in need of aid by limiting its benefits only to areas whose average unemployment rate for the last 5 years was above 6 percent. Thus, areas with chronic unemployment would be helped the most. Second, the program would phase out automatically in any area once the 5-year average unemployment rate falls below 6 percent, thereby preventing the continuation of tax incentives where they are not needed. Third, the program would be largely self-administering. Fourth, individual taxpayers and firms operating in healthy regions of the country would not bear the burden of the program. Fifth, the program would not be inflationary, since the program's benefits are targeted to regions with underutilized resources.

LEGISLATION TO ESTABLISH A NATIONAL CLIMATE PROGRAM

The SPEAKER pro tempore. Under a previous order of the House, the gentleman from California (Mr. BROWN) is recognized for 20 minutes.

Mr. BROWN of California. Mr. Speaker, I am pleased to announce 3 days of hearings, April 4, 5, and 6, focused on provisions of legislation establishing a national climate program. The need for a national climate program is well established from extensive hearings and a report of the Subcommittee on the Environment and the Atmosphere in the last Congress. Recent events, including the current drought in the Western States and the extremely cold winter in the East, have only reemphasized the importance of the climate to human activities.

The impacts of climate fluctuations and potential human-caused climate change can override or deeply influence patterns of agricultural production and weather-crop interaction, patterns of energy demand and supply, patterns of human settlement and coastal demography, patterns of water supply and water use, and patterns of political stability and alliance.

Public interest in climatological questions is widespread. It crosses disciplinary and institutional lines and levels. The challenge is to foster an integrated, long-term national effort to understand climate as best we can and to assess the impact of climate fluctuation on human activity and society.

How well we expand the necessary sophisticated scientific research efforts of global scope will depend on how well diverse disciplines and agencies work together in a national climate program.

The program should have four major thrusts: First, establishment of a wide monitoring network to gather data and detect trends; second, advancement of our understanding of natural climate variability; third, improvement of monthly, seasonal, annual, and longer range predictions of climate parameters; and fourth, assessment of the economic, agricultural, energy, and other impacts of climate variability on human activities. Monitoring, research, and assessment activities must be coupled throughout with a network for disseminating the information generated rapidly and in useful form.

The subcommittee intends to report legislation to implement such a program. While the need for a national climate program is well established, leadership and responsibility for specific functions remain unresolved. Therefore, these hearings on this legislation are for the purpose of answering such questions as: What are the essential elements of a national climate program—NCP? What level of effort is appropriate for each element? How should they be organized and managed? How can planning, assignment of priorities, and coordination of activities in the NCP be achieved? How should existing climate-related activities be integrated into the new NCP? How can predictive and impact information outputs of the NCP best serve the user communities in agriculture, business, energy, public service, and so forth? How should the NCP be organized to best translate scientific climate data into information to help society adapt to climate fluctuations?

I am pleased to note that 41 Members have cosponsored this national climate program legislation. The proposal has had broad and bipartisan support over several years, particularly from Mr. WINN of Kansas, who is a primary cosponsor again this year.

The hearings will be in room 2325, Rayburn House Office Building, at 10 a.m. on Monday, April 4; 9:30 a.m. on

Tuesday, April 5; and at 10 a.m. on Wednesday, April 6. The list of witnesses follows:

COMMITTEE ON SCIENCE AND TECHOLOGY
SUBCOMMITTEE ON THE ENVIRONMENT AND THE ATMOSPHERE
National climate program
Witness List

April 4, 10 a.m., room 2325 Rayburn: John F. O'Leary, Federal Energy Administration.

Panel representing "consumers" of climate information and services:

Mr. Bill Burrows, Deere & Company Technical Center, Moline, Ill.

Mr. Paul S. Weller, Jr., Vice President, Public Affairs, National Council of Farmer Cooperative.

Stanley A. Changnon, Jr., Illinois State Water Survey, Urbana, Ill.

April 5, 9:30 a.m., room 2325 Rayburn:

The Honorable Juanita M. Kreps, Secretary of Commerce.

Mr. Howard Hjort, Director, Agricultural Economics, U.S. Department of Agriculture.

Panel of climate researchers:

Dr. George Benton, Vice President, Johns Hopkins University.

Charles A. Engman, Associate Director, Institute for Environmental Studies, University of Wisconsin.

Dr. Helmut Landsberg, Institute for Physical Science and Technology, University of Maryland.

April 6, 10 a.m., room 2325 Rayburn:

Dr. Edward P. Todd, Assistant Director for Astronautical, Atmospheric, Earth, and Ocean Sciences, National Science Foundation.

Lindsay Grant, U.S. Department of State.

Mr. D. A. Davies, WMO, Geneva, Switzerland.

Panel from the private sector:

Dr. James D. McQuigg, Consultant, Columbia, Mo.

E. A. Ward, Advanced Energy and Resource Systems Analysis, MITRE Corp.

FANNIE LOU HAMER

The SPEAKER pro tempore. Under a previous order of the House, the gentleman from New York (Mr. RANGEL), is recognized for 5 minutes.

Mr. RANGEL. Mr. Speaker, 2 weeks ago our Nation suffered the loss of a great American, Fannie Lou Hamer. Ms. Hamer was a prominent figure in the national civil rights movement in the 1960's. During her lifetime she founded the Freedom Democratic Party, which was seated in place of the State's all white regular delegation at the 1964 Democratic Convention.

Later she became active in the State's predominantly black Loyalist Democrats, which wrested national party recognition from the regular party organization. As a result, the State's democratic parties were merged last year.

Ms. Hamer participated in numerous civil rights marches and voting rights lawsuits. Although she was never elected to public office, her contribution to black Americans and our country should never be forgotten.

Therefore, I ask my colleagues to remember Ms. Hamer and her family in their prayers and to remember all that she accomplished in her lifetime.

A YEAR OF EDUCATION IN HONOR OF THE LUBAVITCHER REBBE

The SPEAKER pro tempore. Under a previous order of the House, the gentlewoman from New York (Ms. HOLTZMAN) is recognized for 10 minutes.

Ms. HOLTZMAN. Mr. Speaker, I have today, together with Senator HUMPHREY, introduced a joint resolution to declare 1977 a year of education in honor of the Lubavitcher Rebbe, Rabbi Menachem Mendel Schneerson.

Rabbi Schneerson is the leader of the worldwide Lubavitch movement. Under his inspired leadership, the humanitarian, educational, and religious work of Lubavitch has flourished throughout the world.

Yesterday the Rebbe and his followers celebrated his 75th birthday. On this joyous occasion, the Rebbe dedicated himself and Lubavitch to a year of education for the youth of the world.

I am privileged to represent the district in which Rabbi Schneerson has made his worldwide headquarters. In recognition of his many achievements, the respect in which he is held by millions, and his commitment to scholarship, I am honored to introduce the following joint resolution:

H.J. RES. 369

Joint resolution to authorize and request the President to issue a proclamation designating the year 1977 as the "Year of Education" in honor of the Lubavitcher Rebbe, Rabbi Menachem Mendel Schneerson

Whereas the beloved Lubavitcher Rebbe, Rabbi Menachem Mendel Schneerson, celebrated his seventy-fifth birthday on March 30, 1977; and

Whereas Rabbi Schneerson is one of the most revered and renowned spiritual leaders in the world; and

Whereas Rabbi Schneerson has provided wise and inspired leadership to the Chabad-Lubavitch movement throughout the world; and

Whereas the leadership of Rabbi Schneerson and the devotion of his followers have made the Lubavitch movement a powerful force for education and spiritual enlightenment throughout the world; and

Whereas Rabbi Schneerson has declared this year a Year of Education and dedicated himself and the Lubavitch movement to this goal: Now, therefore, be it

Resolved by the Senate and House of Representatives of the United States of America in Congress assembled, That the President is authorized and requested to issue a proclamation designating 1977 as the "Year of Education" in honor of the seventy-fifth birthday of the Lubavitcher Rebbe, Rabbi Menachem Mendel Schneerson.

WHY DOES BREZHNEV'S GOVERNMENT TORTURE A 38-YEAR-OLD LITHUANIAN WOMAN FOR BELIEVING IN GOD?

The SPEAKER pro tempore. Under a previous order of the House, the gentleman from New York (Mr. KOCH) is recognized for 10 minutes.

Mr. KOCH. Mr. Speaker, elsewhere in today's proceedings, I have joined Representative FLOOD and a number of our colleagues in commemorating the 59th anniversary of the declaration of Lithuanian independence. At this point, I think it is appropriate to bring up again the individual plight of a Lithuanian Catholic named Nijole Sadunaite which illustrates the depravity of Moscow's rule throughout the Soviet Empire and which typifies the fate of thousands of unknown persons in Soviet prison camps.

The letter I have inserted below from Mr. Lazar M. Pistrak of Amnesty International presents the details of Ms. Sadunaite's case. In brief, Ms. Sadunaite, who is a devout Catholic, was arrested when authorities found a copy of the "Chronicle of the Lithuanian Catholic Church" in her home and was sentenced to 3 years of harsh regime in a forced labor camp and 3 subsequent years of internal exile for "possession and distribution of literature defaming the Soviet state." The Chronicle, which covers religious life in the Lithuanian Catholic communities and lists factual information on prosecutions of church members, cannot be reasonably viewed as falling within this definition.

Earlier this year I joined a number of my colleagues in signing a letter to Secretary Brezhnev protesting the treatment of Ms. Sadunaite, which violates Soviet law and international agreements on universal human rights. The harsh regime imposed on her is a euphemism for slow, painful starvation resulting from exhaustive labor and insufficient nutrition. The Soviet secret police have discovered that starvation coupled with capricious and arbitrary denials of the few minimal privileges allowed prisoners is as effective a torture as the more macabre practices of Stalin's era, but one that does not elicit the same degree of international outrage as Stalin's tactics.

A low profile with respect to Soviet violations of human rights is, of course, what Brezhnev and the rest of the Kremlin leadership want. But it is incumbent upon the decent people of the world, regardless of their political persuasions, to thwart the Soviet leaders, and all other dictators who try to play down their brutalities, by speaking out about cases like Nijole Sadunaite's.

Why a state as mighty as the Soviet Union finds it necessary to repress innocent people like Ms. Sadunaite is unclear. Perhaps the state is not so mighty. One thing is certain, the colossal secret-police bureaucracy in the U.S.S.R. arises out of the same "banality of evil" that Hannah Arendt perceived as the backbone of the Third Reich.

Mr. Pistrak's letter follows:

WASHINGTON, D.C., *March 18, 1977.*

Hon. EDWARD I. KOCH,
U.S. House of Representatives,
Washington, D.C.

DEAR CONGRESSMAN KOCH: It is a well-known fact that the Catholic Church in Lithuania is being particularly persecuted by Soviet authorities. Less known are the number and names of the victims of that oppression. Nevertheless, occasionally, detailed information concerning some of the victims reaches Amnesty International, the London-based non-political organization aiding prisoners of conscience throughout the world. One such case is that of Nijole Sadunaite, a devoted member of the Lithuanian Catholic Church.

The 38-year old Miss Sadunaite was arrested on August 27, 1974. Ten months later, on June 20, 1975, she was sentenced to three years of harsh regime in a forced labor camp to be followed by three years of internal exile The "crime" was for alleged "possession and distribution" of the Chronicle of the Lithuanian Catholic Church described in the sentence as "literature defaming the Soviet

State." In fact, however, the Chronicle is an unofficial publication covering religious life in Lithuanian Catholic communities and containing factual reports about the prosecution of church members, court proceedings against them, statements in defense of religious freedom officially guaranteed by the Soviet Constitution, and similar matters.

The sentence of six years of deprivation of freedom violates not only the human rights provisions laid down in the Soviet Constitution but also international agreements signed by the Soviet Union such as the 1948 Universal Declaration of Human Rights and the 1975 Helsinki agreement.

Nijole Sadunaite has been doing hard work over a year now in the Mordovian complex of labor camps known for its protein-low rations of about 2,000 calories, completely inadequate to the high norms of production imposed on the inmates.

Amnesty International has now launched a campaign for the release of Nijole on legal and humanitarian grounds, or at least, for a reconsideration of the case.

Your help, dear Congressman Koch, is urgently needed. Would you kindly write Ambassador Anatoliy Dobrynin and the Department of State on behalf of Miss Nijole Sadunaite in which you would express your protest at this kind of inhuman treatment that she has received and at the same time request her release or a retrial of her case.

Expecting your favorable reply, I remain, a

Sincerely,

For Group 34 of Amnesty International.

LAZAR M. PISTRAK.

"I'VE BEEN TO THE MOUNTAIN TOP"

The SPEAKER pro tempore. Under a previous order of the House, the gentleman from Tennessee (Mr. FORD) is recognized for 5 minutes.

(Mr. FORD of Tennessee asked and was given permission to extend his remarks and to include extraneous matter.)

Mr. FORD of Tennessee. Mr. Speaker, I include the speech of the late Dr. Martin Luther King, Jr., which I referred to earlier during my 1-minute speech today:

"I'VE BEEN TO THE MOUNTAIN TOP"

(By Dr. Martin Luther King, Jr., April 3, 1968)

Dr. MARTIN LUTHER KING, JR. Thank you very kindly, my friends. As I listened to Ralph Abernathy in his eloquent and generous introduction and then thought about myself, I wondered who he was talking about. It's always good to have your closest friend and associate to say something good about you. And Ralph is the best friend that I have in the world.

I'm delighted to see each of you here tonight in spite of a storm warning. You reveal that you are determined to go on anyhow. Something is happening in Memphis, something is happening in our world.

As you know, if I were standing at the beginning of time, with the possibility of general and panoramic view of the whole human history up to now, and the Almighty said to me, "Martin Luther King, which age would you like to live in?"—I would take my mental flight by Egypt through, or rather across the Red Sea, through the wilderness on toward the promised land. And in spite of its magnificence, I wouldn't stop there. I would move on by Greece, and take my mind to Mount Olympus. And I would see Plato, Aristotle, Socrates, Euripides and Aristophanes assembled around the Parthenon as they discussed the great and eternal issues of reality.

But I wouldn't stop there. I would go on, even to the great hey-day of the Roman Empire. And I would see developments around there, through various emperors and leaders. But I wouldn't stop there. I would even come up to the day of the Renaissance, and get a quick picture of all that the Renaissance did for the cultural and esthetic life of man. But I wouldn't stop there. I would even go by the way that the man for whom I'm named had his habitat. And I would watch Martin Luther as he tacked his ninety-five theses on the door at the church in Wittenberg.

But I wouldn't stop there. I would come on up even to 1863, and watch a vacillating President by the name of Abraham Lincoln finally come to the conclusion that he had to sign the Emancipation Proclamation. But I wouldn't stop there. I would even come up to the early thirties, and see a man grappling with the problems of the bankruptcy of his nation. And come with an eloquent cry that we have nothing to fear but fear itself.

But I wouldn't stop there. Strangely enough, I would turn to the Almighty, and say, "If you allow me to live just a few years in the second half of the Twentieth Century, I will be happy." Now that's a strange statement to make, because the world is all messed up. The nation is sick. Trouble is in the land. Confusion all around. That's a strange statement. But I know, somehow, that only when it is dark enough, can you see the stars. And I see God working in this period of the Twentieth Century in a way that men, in some strange way, are responding—something is happening in our world. The masses of people are rising up. And wherever they are assembled today, whether they are in Johannesburg, South Africa; Nairobi, Kenya; Accra, Ghana; New York City; Atlanta, Georgia; Jackson, Mississippi; or Memphis, Tennessee—the cry is always the same—"We want to be free."

And another reason that I'm happy to live in this period is that we have been forced to a point where we're going to have to grapple with the problems that men have been trying to grapple with through history, but the demands didn't force them to do it. Survival demands that we grapple with them. Men, for years now, have been talking about war and peace. But now, no longer can they just talk about it. It is no longer a choice between violence and non-violence in this world, it's non-violence or non-existence.

That is where we are today. And also in the human rights revolution, if something isn't done, and in a hurry, to bring the colored peoples of the world out of their long years of poverty, their long years of hurt and neglect, the whole world is doomed. Now, I'm just happy that God has allowed me to live in this period, to see what is unfolding. And I'm happy that He's allowed me to be in Memphis.

I can remember. I can remember when Negroes were just going around as Ralph has said, so often, scratching where they didn't itch, and laughing when they were not tickled. But that day is all over. We mean business now, and we are determined to gain our rightful place in God's world.

And that's all this whole thing is about. We aren't engaged in any negative protest and in any negative arguments with anybody. We are saying that we are determined to be men. We are determined to be people. We are saying, that we are God's children. And that we don't have to live like we are forced to live.

Now, what does all of this mean in this great period of history? It means that we've got to stay together. We've got to stay together, and maintain unity. You know, whenever, Pharoah wanted to prolong the period of slavery in Egypt, he had a favorite, favorite formula for doing it. What was that? He kept the slaves fighting among themselves. But whenever the slaves get together something happens in Pharoah's court, and he cannot hold the slaves in slavery. When the slaves get together, that's the beginning of getting out of slavery. Now let us maintain unity.

Secondly. let us keep the issues where they are. The issue is injustice. The issue is the refusal of Memphis to be fair and honest in its dealings with its public servants, who happen to be sanitation workers. Now, we've got to keep attention on that. That's always the problem with a little violence. You know what happened the other day, and the press dealt only with the window breaking. I read the articles. They very seldom got around to mentioning the fact that one thousand, three hundred sanitation workers were on strike, and that Memphis is not being fair to them, and that Mayor Loeb is in dire need of a doctor. They didn't get around to that.

Now we're going on to march again, and we're got to march again, in order to put the issue where it is supposed to be. And force everybody to see that there are thirteen hundred of God's children here suffering, sometimes going hungry, going through dark and dreary nights wondering how this thing is going to come out. That's the issue. And we've got to say to the nation: we know it's coming out. For when people get caught up with that which is right and they are willing to sacrifice for it, there is no stopping point short of victory.

We aren't going to let any mace stop us. We are masters in our non-violent movement in disarming police forces, they don't know what to do. I've seen them so often. I remember in Birmingham, Alabama, when we were in that majestic struggle there we would move out of the 16th Street Baptist Church day after day; by the hundreds we would move out. And Bull Connor would tell them to send the dogs forth and they did come; but we just went before the dogs singing, "Ain't gonna let nobody turn me round." Bull Connor next would say, "Turn the fire hoses on." And as I said to you the other night, Bull Connor didn't know history. He knew a kind of physics that somehow didn't relate to the transphysics that we knew about. And that was the fact that there was a certain kind of fire that no water could put out. And we went before the fire hoses; we had known water. If we were Baptist or some other denomination, we had been immersed. If we were Methodist, and some others, we had been sprinkled, but we knew water.

That couldn't stop us. And we just went on before the dogs and we would look at them; and we'd go on before the water hoses and we would look at it, and we'd just go on singing "Over my head I see freedom in the air." And then we would be thrown in the paddy wagons, and sometimes we were stacked in there like sardines in a can. And they would throw us in, and old Bull would say, "Take them off," and they did; and we would just go in the paddy wagon singing, "We Shall Overcome." And every now and then we'd get in the jail, and we'd see the jailers looking through the windows being moved by our prayers, and being moved by our words and our songs. And there was a power there which Bull Connor couldn't adjust to; and so we ended up transforming Bull into a steer, and we won our struggle in Birmingham.

Now we've got to go on to Memphis just like that. I call upon you to be with us Monday. Now about injunctions: We have an

injunction and we're going into court tomorrow morning to fight this illegal, unconstitutional injunction. All we say to America is, "Be true to what you said on paper." If I lived in China or even Russia, or any totalitarian country, maybe I could understand the denial of certain basic First Amendment privileges, because they hadn't committed themselves to that over there. But somewhere I read of the freedom of assembly. Somewhere I read of the freedom of speech. Somewhere I read of the freedom of the press. Somewhere I read that the greatness of America is the right to protest for right. And so just as I say, we aren't going to let any injunction turn us around. We are going on.

We need all of you. And you know what's beautiful to me, is to see all of these ministers of the Gospel. It's a marvelous picture. Who is it that is supposed to articulate the longings and aspirations of the people more than the preacher? Somehow the preacher must be an Amos, and say, "Let justice roll down like waters and righteousness like a mighty stream." Somehow, the preacher must say with Jesus, "The spirit of the Lord is upon me, because he hath annointed me to deal with the problems of the Poor."

And I want to commend the preachers, under the leadership of these noble men: James Lawson, one who has been in this struggle for many years; he's been to jail for struggling; but he's still going on, fighting for the rights of his people. Rev. Ralph Jackson, Billy Kyles. I could just go right on down the list, but time will not permit. But I want to thank them all. And I want you to thank them, because so often, preachers aren't concerned about anything but themselves. And I'm always happy to see a relevant ministry.

It's alright to talk about "long white robes over yonder," in all of its symbolism. But ultimately people want some suits and dresses and shoes to wear down here. It's alright to talk aoout "streets flowing with milk and honey," but God has commanded us to be concerned about the slums down here, and his children who can't eat three square meals a day. It's alright to talk about the new Jerusalem, but one day, God's preacher must talk about the new New York, the new Atlanta, the new Philadelphia, the new Los Angeles, the new Memphis, Tenn. This is what we have to do.

Now the other thing we'll have to do is this: Always anchor our external direct action with the power of economic withdrawal. Now, we are poor people, individually, we are poor when you compare us with white society in America. We are poor. Never stop and forget that collectively, that means all of us together, collectively we are richer than all the nations in the world, with the exception of nine. Did you ever think about that? After you leave the United States, Soviet Russia, Great Britain, West Germany, France, and I could name the others, the Negro collectively is richer than most nations of the world. We have an annual income of more than thirty billion dollars a year, which is more than all of the exports of the United States, and more than the national budget of Canada. Did you know that? That's power right there, if we know how to pool it.

We don't have to argue with anybody. We don't have to curse and go around acting bad with our words. We don't need any bricks and bottles, we don't need any Molotov cocktails, we just need to go around to these stores, and to these massive industries in our country, and say, "God sent us by here, to say to you that you're not treating his children right. And we've come by here to ask you to make the first item on your agenda—fair treatment, where God's children are concerned. Now, if you are not prepared to do that, we do have an agenda that we must follow. And our agenda calls for withdrawing economic support from you."

And so, as a result of this, we are asking you tonight, to go out and tell your neighbors not to buy Coca-Cola in Memphis. Go by and tell them not to buy Sealtest Milk. Tell them not to buy—what is the other bread?—Wonder Bread. And what is the other bread company, Jesse? Tell them not to buy Hart's Bread. As Jesse Jackson has said, up to now, only the garbage men have been feeling pain, now we must kind of redistribute the pain. We are choosing these companies because they haven't been fair in their hiring policies; and we are choosing them because they can begin the process of saying, they are going to support the needs and the rights of these men who are on strike. And then they can move on downtown and tell Mayor Loeb to do what is right.

But not only that, we've got to strengthen black institutions. I call upon you to take your money out of the banks downtown and deposit your money in Tri-State bank—We want a "bank-in" movement in Memphis. So go by the Savings and Loan Association. I'm not asking you something that we don't do ourselves at SCLC. Judge Hooks and others will tell you that we have an account here in the savings and loan association from the Southern Christian Leadership Conference. We're just telling you to follow what we're doing. Put your money there. You have six or seven black insurance Companies in Memphis. Take out your insurance there. We want to have an "insurance-in."

Now these are some practical things we can do. We begin the process of building a greater economic base. And at the same time, we are putting pressure where it really hurts. I ask you to follow through here.

Now, let me say as I move to my conclusion that we've got to give ourselves to this struggle until the end. Nothing would be more tragic than to stop at this point, in Memphis. We've got to see it through. And when we have our march, you need to be there. Be concerned about your brother. You may not be on strike. But either we go up together, or we go down together.

Let us develop a kind of dangerous unselfishness. One day a man came to Jesus; and he wanted to raise some questions about some vital matters in life. At points, he wanted to trick Jesus, and show him that he knew a little more than Jesus knew, and through this, throw him off base. Now that question could have easily ended up in a philosophical and theological debate. But Jesus immediately pulled that question from mid-air, and placed it on a dangerous curve between Jerusalem and Jericho. And He talked about a certain man, who fell among thieves. You remember that a Levite and a priest passed by on the other side. They didn't stop to help him. And finally a man of another race came by. He got down from his beast, decided not to be compassionate by proxy.

But he got down with him, administered first aid, and helped the man in need. Jesus ended up saying, this was the good man, this was the great man, because he had the capacity to project the "I" into the "thou," and to be concerned about his brother. Now you know, we use our imagination a great deal to try to determine why the priest and the Levite didn't stop. At times we say they were busy going to church meetings—an ecclesiastical gathering—and they had to get on down to Jerusalem so they wouldn't be late for their meeting. At other times we would speculate that there was a religious law that "One who was engaged in religious ceremonials was not to touch a human body twenty-four hours before the ceremony." And every now and then we begin to wonder whether maybe they were not going down to Jerusalem, or down to Jericho, rather to organize a "Jericho Road Improvement Association." That's a possibility. Maybe they felt that it was better to deal with the problem from the casual root, rather than to get bogged down with an individual effort.

But I'm going to tell you what my imagination tells me. It's possible that those men were afraid. You see, the Jericho road is a dangerous road. I remember when Mrs. King and I were first in Jerusalem. We rented a car and drove from Jerusalem down to Jericho. And as soon as we got on that road, I said to my wife, "I can see why Jesus used this as a setting for his parable." It's a winding, meandering road. It's really conducive for ambushing. You start out in Jerusalem, which is about 1,200 miles, or rather 1,200 feet above sea level. And by the time you get down to Jericho, fifteen or twenty minutes later, you're about 2,200 feet below sea level. That's a dangerous road. In the days of Jesus it came to be known as the "Bloody Pass." And you know, it's possible that the priest and the Levite looked over that man on the ground and wondered if the robbers were still around. Or it's possible that they felt that the man on the ground was merely faking. And he was acting like he had been robbed and hurt, in order to seize them over there, lure them there for quick and easy seizure. And so the first question that the Levite asked was, "If I stop to help this man, what will happen to me?" But then the good Samaritan came by. And he reversed the question: "If I do not stop to help this man, what will happen to him?"

That's the question before you tonight. Not, "If I stop to help the sanitation workers, what will happen to all of the hours that I usually spend in my office every day and every week as a pastor?" The question is not, "If I stop to help this man in need, what will happen to me?" If I do not stop to help the sanitation workers, what will happen to them?" That's the question.

Let us rise up tonight with a greater readiness. Let us stand with a greater determination. And let us move on in these powerful days, these days of challenge to make America what it ought to be. We have an opportunity to make America a better nation. And I want to thank God, once more, for allowing me to be here with you.

You know, several years ago, I was in New York City autographing the first book that I had written. And while sitting there autographing books, a demented black woman came up. The only question I heard from her was. Are you Martin Luther King?"

And I was looking down writing, and I said yes. And the next minute I felt something beating on my chest. Before I knew it I had been stabbed by this demented woman. I was rushed to Harlem Hospital. It was a dark Saturday afternoon. And that blade had gone through, and the X-rays revealed that the tip of the blade was on the edge of my aorta, the main artery. And once that's punctured, you drown in your own blood—that's the end of you.

It came out in the New York Times the next morning, that if I had sneezed, I would have died. Well, about four days later, they allowed me, after the operation, after my chest had been opened, and the blade had been taken out, to move around in the wheel chair in the hospital. They allowed me to read some of the mail that came in, and from all over the states, and the world, kind letters came in. I read a few, but one of them I will never forget. I had received one from the President and the Vice-President. I've forgotten what those telegrams said. I'd receive a visit and a letter

from the Governor of New York, but I've forgotten what the letter said. But there was another letter that came from a little girl, a young girl who as a student at the White Plains High School. And I looked at that letter, and I'll never forget it. It said simply, "Dear Dr. King: I am a ninth-grade student at the White Plains High School." She said, "While it should not matter, I would like to mention that I'm a white girl. I read in the paper of your misfortune, and of your suffering. And I read that if you had sneezed, you would have died. And I'm simply writing you to say that I'm so happy that you didn't sneeze."

And I want to say tonight, I want to say that I, am happy that I didn't sneeze. Because if I had sneezed, I wouldn't have been around here in 1960, when students all over the South started sitting in at lunch counters. And I knew that as they were sitting in, they were really standing up for the best in the American dream. And taking the whole nation back to those great walls of democracy which were dug deep by the founding fathers in the Declaration of Independence and the Constitution. If I had sneezed, I wouldn't have been around here in 1961, when we decided to take a ride for freedom, and ended segregation in the interstate travel. If I had sneezed, I wouldn't have been around in 1962, when Negroes in Albany, Georgia, decided to straighten their backs up. And whenever men and women straighten their backs up, they are going somewhere, because a man can't ride your back unless it is bent. If I had sneezed; I wouldn't have been here in 1963, when the black people in Birmingham, Alabama, aroused the conscience of this nation, and brought into being the Civil Rights Bill. If I had sneezed, I wouldn't have had a chance later that year, in August, to try to tell America about a dream that I had had. If I had sneezed, I wouldn't have been down in Selma, Alabama, to see the great movement there. If I had sneezed, I wouldn't have been in Memphis to see a community rally around those brothers and sisters who are suffering. I'm so happy that I didn't sneeze.

And they were telling me, now it doesn't matter now. It really doesn't matter what happens now. I left Atlanta this morning, and as we got started on the plane, there were six of us, the pilot said over the public address system, "We are sorry for the delay, but we have Dr. Martin Luther King on the plane. And to be sure that all of the bags were checked, and to be sure that nothing would be wrong with the plane, we had to check out everything carefully. And we've had the plane protected and guarded all night."

And then I got into Memphis. And some began to say the threats, or talk about the threats that were out. What would happen to me from some of our sick white brothers?

Well, I don't know what will happen now. We've got some difficult days ahead. But it doesn't matter with me now. Because I've been to the mountain top. And I don't mind. Like anybody, I would like to live a long life. Longevity has its place. But I'm not concerned about that now. I just want to do God's will. And He's allowed me to go up to the mountain. And I've looked over. And I've seen the promised land. I may not get there with you. But I want you to know tonight, that we, as a people will get to the promised land. And I'm happy tonight. I'm not worried about anything. I'm not fearing any man. Mine eyes have seen the glory of the coming of the Lord.

FISCAL YEAR 1978 COAST GUARD AUTHORIZATION AND TANKER SAFETY

(Mr. DICKS asked and was given permission to extend his remarks at this point in the RECORD and to include extraneous matter.)

Mr. DICKS. Mr. Speaker, the Merchant Marine and Fisheries Committee held 2 days of hearings this week on the fiscal year 1978 Coast Guard authorization request. To my way of thinking, these hearings served to underscore the need for vigorous congressional oversight and initiatives in the area of vessel traffic control—VTS. VTS is a means by which the traffic of hazardous cargoes can be monitored and controlled. VTS can be as unsophisticated as a series of shipping lanes and radio communications, or it can employ sophisticated radar or satellite surveillance.

This administration has taken significant steps to support needed tanker safety and oil spill liability measures—measures which Members of the Merchant Marine and Fisheries Committee as well as the Congress have been pushing for years. There is still work to be done, however, as is evident in the area of vessel traffic control. In testimony before the Merchant Marine and Fisheries Committee, Adm. Owen W. Siler, Commandant of the Coast Guard, stated that the Office of Management and Budget has called for a 6-month study of VTS, while forwarding the suggestion that it may be more appropriate for local authorities to run VTS than the Coast Guard.

I understand that a number of the members of the committee questioned the wisdom of both proposals; VTS, after all, has been thoroughly studied since the early 1970's. As for turning the acquisition and operation of VTS over to the localities affected, Admiral Siler is strongly against such a move, and I could not agree with him more. The Coast Guard is charged with the responsibility of safeguarding our coastal waterways; they are the ones with the expertise to do it. Should we turn air traffic control over to the localities affected? I do not think so, and the same principle applies to vessel traffic control.

But even without OMB interference, the Coast Guard is reluctant to expand, upgrade, or accelerate current VTS efforts. At present, VTS is working in San Francisco, Puget Sound, and Houston/Galveston. During this year, two additional programs will be underway in New Orleans and Valdez. In 1978, New York Harbor will be the beneficiary of a VTS. But beyond this, the Coast Guard's VTS efforts are limited in the extreme: Detailed analyses are underway to see if the Chesapeake Bay and the Gulf Intracoastal Waterway VTS installations will be cost-effective.

Thus, with the possible exception of portions of the Chesapeake Bay and the Gulf Intracoastal Waterway, the Coast Guard does not plan to install sophisticated vessel traffic systems to any additional ports and waterways in the United States. The fiscal year 1978 Coast Guard authorization as submitted by the administration has only $1.162 million in acquisition funds for the VTS at New Orleans.

What accounts for this limited approach to save our ports and waterways from catastrophic accidents? The dimensions of the Coast Guard's caution become clearer when placed in historical perspective. The European ports of Liverpool, Hamburg, and Rotterdam have had some form of VTS in place since the mid-1960's. Our first pilot project VTS began in the early 1970's. As early as 1973, the Coast Guard conducted an analysis of port needs for vessel traffic services. The findings of this survey indicated that seven U.S. ports and waterways were experiencing the number and type of vessel casualties that would require vessel traffic services to prevent. Today, the Coast Guard is still studying two of these areas—portions of the Chesapeake Bay and Gulf Intracoastal Waterway—to determine if VTS installations would be "cost-effective."

I am somewhat confused about the Coast Guard's conception of "cost-effectiveness." Apparently by the Coast Guard's definition, health insurance would not be "cost-effective" if you or I did not get seriously ill. According to Coast Guard marine casualty statistics which were included in the Merchant Marine and Fisheries Committee's hearings on VTS during the 94th Congress, in fiscal year 1975, the reported losses to vessels, cargoes, and property was $103 million. Coast Guard marine casualty reports suggest that due to unreported casualties and underestimates of the dollar losses for those casualties that were reported, the actual dollar losses are probably several times this amount. In addition, these costs do not include the substantial damages to property ashore, such as the costs of spilled oil cleanup.

It is my hope and expectation that the Congress will enact much needed oil spill liability legislation. The compensation provided under this legislation is extensive. For example, eligible claimants might include fishermen whose fishing grounds are polluted by catastrophic oil spills, and resort communities whose peak vacation periods may be adversely affected by oil-slicked beaches.

VTS systems will vary in costs depending on their degree of sophistication. But it seems to me that the costs of even the most sophisticated VTS we now have or will have in operation are slight compared with the liabilities we may face in the future—liabilities that may be preventable with proper vessel traffic services in place. The Coast Guard has provided me with a summary of VTS costs which I would like to submit at the conclusion of my remarks. It shows that VTS costs vary from New York Harbor, with its $6.45 million acquisition and installation cost and $1.37 million operational cost per year to Valdez with its $2.9 million acquisition and installation cost and its $675 thousand per year operational cost.

In light of these statistics, the Coast Guard's "cost-effectiveness" analyses are subject to question.

My own conclusion is that we need to move decisively to expand our VTS programs nationwide to those ports and waterways which will bear the brunt of increased traffic of hazardous cargoes carried in bulk. Section 101 of H.R. 3796 which Mr. STUDDS, Mr. BONKER, Mr. PRITCHARD, and I and 33 other cosponsors

have introduced authorizes the Secretary of Transportation to establish, operate, and maintain effective vessel traffic services nationwide. The Secretary is given explicit authority to control vessel traffic by specifying times of entry, movement or departure, establishing vessel traffic routing schemes, draft, size and speed limitations, and restricting operations under certain circumstances. More sophisticated VTS applications are directed for ports and waterways through which pass an average of 100,000 barrels per day of hazardous cargo in bulk. For these areas, this legislation directs the Secretary to maintain computerized tracking and data retrieval systems. The Canadian VTS around Vancouver has this capability, whereas the U.S. computerized systems do not. Essentially, this means that as a computer tracks incoming vessels, it can routinely delve into its data bank to determine the ship's history, status of certificates and potential safety hazards. As I understand it, the Coast Guard has not opted for this relatively inexpensive capability because it has not been fully tested.

This attitude is entirely consistent with the Coast Guard's restricted vision concerning the need, scope and effectiveness of VTS programs. At present, there are 41 ports and waterways through which pass an average of over 100,000 barrels per day of hazardous cargoes carried in bulk. Many of these areas can be lumped together for coverage under a single VTS system. An entire coast can be wired for VTS protection using one large and one backup computer, for that matter. The technology for effective VTS programs is at hand; costs can be kept to a minimum through tough oversight and careful planning. All that needs to be done is to move the Coast Guard away from its current, overly restrictive definition of what the problem is and what needs to be done.

Fortunately, members of the Merchant Marine and Fisheries Committee and Members of the Congress are sensitive to this problem. It is my hope that with congressional leadership, we can establish meaningful vessel traffic systems nationwide.

DEPARTMENT OF TRANSPORTATION,
U.S. COAST GUARD,
Washington, D.C., March 17, 1977.

Hon. NORMAN D. DICKS,
House of Representatives,
Washington, D.C.

DEAR MR. DICKS: This is in further response to your letter of 2 February 1977, requesting cost and personnel estimates for extending vessel traffic services (VTS). An analysis of the volume and type of waterborne commerce carried in U.S. ports and waterways has been conducted. Those areas with a daily average throughput of at least 100,000 barrels of hazardous cargo in bulk are listed in enclosure (1).

Vessel traffic services must be individually tailored to meet the unique traffic management requirements of each port or waterway. This requires detailed, extended study of each area including its topography and geography, vessel traffic patterns and congestion, hazards to traffic flow, and past vessel casualty performance. In addition to such technical and engineering considerations, the proper level of VTS complexity in any area is determined through analysis of incremental costs and benefits. In this way national benefits will be maximized as the optimum VTS level is established in each port or waterway, with those areas of greatest need receiving first attention.

Although several discrete system components have been developed, their combination and exact system configuration are dependent upon factors unique to each area. Basically, vessel traffic services differ in complexity in two ways: surveillance capability and data analysis/diplay capacity. Some vessel traffic services may rely entirely on VHF-FM radio-telephone communications without any means of electronic surveillance. Those systems with surveillance capabilities may use one or more of several means, including magnetic sensors, low light level closed circuit television, marine radars, or specially developed high resolution radars. In addition, surveillance may cover the entire VTS area or only critical portions.

Methods of data handling, analysis and display also vary widely among vessel traffic services. Some systems in areas with lower traffic loads may process all information manually, while other systems will employ computerized equipment to assist in data management and analysis. Computer systems vary in cost and complexity from relatively simple vessel "accounting" systems to high-powered systems which perform continuous risk analysis functions and automatically generate alerts when conflict situations are predicted.

Recently developed vessel traffic services employ representative VTS components, and reflect the variety of technologies and implementation efforts required for relatively complex systems. Enclosure (2) provides manning requirements and system establishment and operation costs for the Coast Guard's four most recent VTSs which are in advanced development stages for New Orleans, LA, Valdez, AK, and New York, NY., and already operational in Houston-Galveston, TX. Since lesser vessel traffic services are comprised of subsets of these equipments, costs have been presented by VTS component. By referring to these costs of present VTS components, a gross approximation of the range of costs may be estimated for other areas.

Additional information on the vessel traffic services program was provided by the Coast Guard testimony of 21 September 1976 before the House Committee on Merchant Marine and Fisheries, Subcommittee on Coast Guard and Navigation. This and other testimony pertaining to VTS is recorded on pages 182-195 of the House Committee on Merchant Marine and Fisheries Report on Vessel Traffic Control, Serial No. 94-39. It is hoped that this information will help clarify some of the areas involved in this most complex program.

Sincerely,

T. H. RUTLEDGE,
Captain, U.S. Coast Guard, Chief,
Congressional Affairs.

INFORMATION ON PRESENT VTSs DESIGN COST AND MANNING

1. As a minimum, each VTS has a Vessel Movement Information System (VMRS), which collects and disseminates ship movement data from participating vessels over a VHF-FM communications network. Costs for the remote and local communications equipments and relay facilities for the VMRS in New Orleans include $2,000,000 for acquisition/installation and $120,000 per year for recurring maintenance and lease costs. New Orleans has a larger coverage area and contractor furnished site locations and development. In contrast, corresponding costs were $500,000 and $55,000 per year for Houston, which has a smaller coverage area and government furnished and developed sites. Between these extremes, the VMRSs for Valdez and New York, both with a mix of government and contractor furnished sites and high labor rates, cost approximately $1,400,000 plus $1455,000 per year. The availability of access to the remote sites for installation and maintenance due to terrain or weather can also affect these costs.

2. Each port also has a method of storing and retrieving data on the vessels participating in the service. These methods vary greatly, from a computer controlled dynamic and static situation display in New York, Houston, and New Orleans, to manual tracking on a radar or chart display in Valdez. The computer controlled displays vary from a cost of $1,700,000 plus $143,000 per year for New York with an almost unlimited number of vessel routes to $350,000 plus $65,000 per year for Houston with "pipeline" vessel courses along idealized straight line channels. The New Orleans computer system, which will have capabilities similar to New York but installed and maintained in a lower labor rate area, costs $1,500,000 plus $100,000 per year.

3. Low Light Level Closed Circuit Television (LLLCCTV) and high resolution shore based radar are used in some areas to provide electronic surveillance capabilities. In the Kills and East River of New York and in the Houston Ship Channel, LLLCCTV is used. The costs for this surveillance, including video relay to the control center, is $1,850,000 plus $110,000 per year for New York which has high labor rates and contractor furnished sites, and $1,000,000 plus $60,000 per year for Houston with government furnished sites and lower labor rates. In both New York and Valdez, the port entrances and the har-

bor area near the Vessel Traffic Centers (VTC) are each surveyed by separate high resolution radar sites. This coverage costs approximately $1,500,000 per port plus $175,000 per year for New York and $300,000 per year for Valdez. The costs to relay the radar video from the remote radar sites to the VTCs at these ports are included in the VMRS implementation costs, are not readily extractable. The radar sites are co-located with communications sites, and the radar and radio links use some of the same facilities. The seaward entrance to the Houston VTS at Galveston, Texas, will be surveyed by one remote high resolution radar. This radar costs approximately $790,000 plus $75,000 per year, and will use common carrier video relay services costing $137,000 plus $114,000 per year.

4. The personnel manning levels required for the different ports vary from 45 enlisted and seven officers for New York's five sector VTS to nine enlisted and four officers for Valdez's one sector VTS. New Orleans with four sectors and Houston with three sectors require 40 and 24 enlisted respectively and seven officers each. For the purpose of the financial summary below, the costs for enlisted were computed at $13,500 per year and $27,000 per year for officers.

5. Cost summaries by port and VTS element are furnished below. It should be noted that building construction costs for the VTCs and support structures such as site access piers are not included. These costs have varied enormously, from minor alteration of existing facilities to very expensive new construction in harsh environments such as Valdez, Alaska. Such costs must be developed on a port by port basis taking VTC locations and detailed architectural engineering studies into account.

VESSEL TRAFFIC SERVICES COSTS

Element	Port			
	New York	Valdez	Houston	New Orleans
VMRS	$1,400,000 plus $145,000 per year	$1,400,000 plus $145,000 per year	$500,000 plus $55,000 per year	$2,000,000 plus $120,000 plus year.
Data system	$1,700,000 plus $143,000 per year		$350,000 plus $65,000 per year	$1,500,000 plus $100,000 plus year.
LLLCCTV	$1,850,000 plus $110,000 per year		$1,000,000 plus $60,000 per year	
Radar	$1,500,000 plus $175,000 per year	$1,500,000 plus $300,000 per year	$790,000 plus $75,000 per year	
Link			$137,000 plus $114,000 per year	
Personnel	$796,500 per year	$229,500 per year	$513,000 per year	$729,000 per year.

Note: Totals (less VTC Construction) are as follows: New York, $6,450,000 plus $1,370,000 per year; Valdez, $2,900,000 plus $675,000 per year; Houston, $2,760,000 plus $882,000 per year; and New Orleans, $3,500,000 plus $949,000 per year.

COOPERATIVE ORGANIZATION COMPETITION ACT (H.R. 5540)

(Mr. SEIBERLING asked and was given permission to extend his remarks at this point in the RECORD and to include extraneous matter.)

Mr. SEIBERLING. Mr. Speaker, last week I introduced the Cooperative Organization Competition Act (H.R. 5540). The bill is intended to strengthen the authority of Federal antitrust enforcers to prevent anticompetitive mergers between argicultural co-ops, particularly the dairy co-ops. In addition, the bill would clarify the prohibition against agreements by such co-ops to fix prices or to refrain from competing by not operating in each other's market area.

Recently, the Justice Department reported that the regional monopolization of the dairy producing industry, coupled with outmoded milk marketing regulations, makes consumers pay about $245 million a year more than they should for milk and other dairy products. Although the bill does not attempt to deal with the marketing regulations problem, it does represent a necessary first step in providing a means to prevent and reduce monopolization which occurs through anticompetitive mergers between dairy co-ops.

H.R. 5540 is a response to the failure over the last decade of the Justice Department and the Federal Trade Commission to bring any test cases challenging anticompetitive mergers between dairy co-ops. Both the Justice Department and the Federal Trade Commission claim that they have the legal authority to prevent such anticompetitive mergers, but both say that the scope of the antitrust exemption for "the existence and operation" of agricultural co-ops is sufficiently ambiguous that the right of the Government to act against anticompetitive dairy co-op mergers is unclear. Spokesmen for agencies indicated this week that they would support congressional action to establish clear authority to prevent anticompetitive mergers between agricultural cooperatives.

The problem was recently explained in a Justice Department report in the following way:

[Dairy] cooperatives have used mergers as one important tool in acquiring market power. Having attained market power, the cooperatives have exercised it to realize monopoly profits . . . Significant costs to consumers arise out of the exercise of monopoly power by [dairy] cooperatives. Accordingly, society would benefit if the acquisition of monopoly power could be prevented.

In the past 25 years, the dairy co-ops have increased their share of the dairy producing market from 50 to 80 percent. That growth has been matched by an increase in monopoly power in most of the country's milk marketing areas. In approximately half of these areas, a single regional co-op represents at least 74 percent of the dairy producers. As the only important supplier of raw milk to the dairy processors in their areas, such co-op have monopoly power and are able to charge prices which are considerably above the federally established minimum prices.

Consumers end up paying unnecessarily high prices which support the local monopolies of dairy producers. Without anticompetitive mergers between dairy co-ops, there would be less monopoly power, more competition, and lower prices for milk and other dairy products.

The experience of Ohio and of the congressional district I represent will serve as an example of the need for the enforcement of a law clearly prohibiting anticompetitive dairy co-op mergers.

The district I represent includes the greater Akron area. It is in an area known as milk market order 36, along with the rest of northeastern Ohio and much of western Pennsylvania. Prior to 1970, four dairy co-ops operated in northeastern Ohio and competed against each other to some degree. In 1970, the four merged into a single large dairy co-op, which has grown to the point where it now represents approximately 80 percent of the dairy producers in northeastern Ohio. The other co-ops in order 36 operate in Pennsylvania and apparently do not compete with the large co-op for business in northeastern Ohio. As a result, there is virtually no meaningful competition in the area, and we have just about reached the point where northeastern Ohio dairy processors can get their raw milk from only one source, the large co-op.

If the Justice Department and the Federal Trade Commission had the clear authority to challenge the merger of the four co-ops into one, it is possible that the merger would never have occurred or would be broken up and that there would still be some effective competition between the four.

The enactment of H.R. 5540 would give the Justice Department and the Federal Trade Commission clear authority to review the 1970 merger, to challenge it even now if they felt it had resulted in a monopoly or in substantially reduced competition, and to get appropriate equitable relief—such as an order splitting the large co-op into smaller units which would compete against each other. The authority contained in H.R. 5540, in other words, would include the ability to eliminate monopoly power which has developed through mergers found to be anticompetitive.

Although H.R. 5540 addresses the problem of monopolization resulting from anticompetitive mergers, it should be noted that there are other provisions of existing law which also promote monopolies and inhibit competition. One example is the Federal milk marketing regulation system, which prohibits dairy processors in one geographic area from purchasing raw milk produced outside that area, despite the fact that technology now permits the shipment of milk over great distances without any spoilage. Another factor contributing to the development of regional monopolies in milk producing is the device known as a "marketing agency in common," which is authorized by the Capper-Volstead Act and which permits agricultural co-ops to set identical prices. As I have in-

dicated, H.R. 5540 does not address these problems. A recent Justice Department report suggests that a comprehensive examination and revision of the milk marketing system would be appropriate. I, for one, would welcome such an examination and revision by Congress. In the meantime, however, we should give the Federal antitrust enforcers clear authority to challenge anticompetitive mergers which have promoted or may promote regional monopolization in the dairy producing industry.

H.R. 5540 would clarify the agricultural co-ops' antitrust exemption, so that co-ops would understand how the law applies to them and so that the Federal enforcement agencies could feel less inhibited about challenging co-op mergers which have resulted or will result in co-op monopolies or substantial reductions in competition. The bill would make the operations of agricultural co-ops fully subject to the antitrust laws, except where there is a very specific exemption elsewhere in the laws, as is the case with the Capper-Volstead Act's authorization of co-ops' having a marketing agency in common. While the formation of agricultural co-ops would be generally exempt from the antitrust laws, this exemption would not apply if a co-op were formed through an anticompetitive merger or if the co-op had any member with annual sales in excess of $1 million. This requirement is needed to limit properly the co-ops' antitrust exemption so as to conform to the original Congressional intent, namely to enable small farms to unite for purposes of mutual help in dealing with strong agricultural middlemen. H.R. 5540 would make the antitrust laws apply fully to the formation of any agricultural co-op containing corporate agribusiness members.

The text of H.R. 5540 follows these remarks.

H.R. 5540

A bill to amend the Clayton Act to clarify the application of the antitrust laws to cooperative organizations, and for other purposes

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That this Act may be cited as the "Cooperative Organization Competition Act of 1977".

SEC. 2. Section 6 of the Clayton Act (15 U.S.C. 17) is amended to read as follows:

"SEC. 6. (a) The labor of a human being is not a commodity or article of commerce. Nothing contained in the antitrust laws shall be construed to forbid the existence and operation of labor organizations, instituted for purposes of mutual help and not conducted for profit, or to forbid or restrain individual members of such organizations from lawfully carrying out the legitimate objects thereof; nor shall such organizations, or the members thereof, be held or construed to be illegal combinations or conspiracies in restraint of trade, under the antitrust laws. The operation of agricultural and horticultural organizations is subject to the antitrust laws, but nothing contained in the antitrust laws shall be construed to forbid the existence of such organizations, instituted for purposes of mutual help and not conducted for profit: *Provided,* That such organization is not formed through an acquisition or merger the effect of which has been or may be, in any line of commerce in any section of the country, substantially to lessen competition, or tend to create a monopoly: *And provided further,* That such organization contains no member which with its affiliates has annual sales in excess of $1 million.

"(b) Appropriate injunctive and other equitable relief (including dissolution or divestiture) shall be ordered upon a finding that the effect of a merger or acquisition by an agricultural or horticultural organization has been or may be, in any line of commerce in any section of the country, substantially to lessen competition, or tend to create a monopoly, regardless of when such merger or acquisition may have been or may be consummated.

"(c) As used in this section, the term 'affiliate' of a member means any other person, corporation, association, organization, or joint venture, which controls, is controlled by, or is under common control with, such member."

LEAVE OF ABSENCE

By unanimous consent, leave of absence was granted as follows to:

Mr. ASHBROOK (at the request of Mr. RHODES) for March 28, on account of official business.

Mr. JONES of Tennessee (at the request of Mr. WRIGHT), for today, on account of official business.

SPECIAL ORDERS GRANTED

By unanimous consent, permission to address the House, following the legislative program and any special orders heretofore entered, was granted to:

(The following Members (at the request of Mr. KASTEN) to revise and extend their remarks and include extraneous matter:)

Mr. CONABLE, for 5 minutes, today.
Mr. WHALEN, for 5 minutes, today.
Mr. DON H. CLAUSEN, for 10 minutes, today.
Mr. COLLINS of Texas, for 15 minutes, today.
Mr. BROYHILL, for 15 minutes, today.
Mr. KEMP, for 5 minutes, today.

(The following Members (at the request of Mr. GEPHARDT) and to revise and extend their remarks and include extraneous matter:)

Mr. ANNUNZIO, for 5 minutes, today.
Mr. DRINAN, for 30 minutes, today.
Mr. ASPIN, for 15 minutes, today.
Mr. GIBBONS, for 5 minutes, today.
Mr. VANIK, for 5 minutes, today.
Mr. DICKS, for 5 minutes, today.
Mr. ERTEL, for 5 minutes, today.
Mr. MURPHY of New York, for 5 minutes, today.
Mr. ZABLOCKI, for 5 minutes, today.
Mr. HAMILTON, for 20 minutes, today.
Mr. MILLER of California, for 10 minutes, today.
Mr. BOLAND, for 5 minutes, today.
Mr. BROWN of California, for 20 minutes, today.
Mr. RANGEL, for 5 minutes, today.
Ms. HOLTZMAN, for 10 minutes, today.
Mr. KOCH, for 10 minutes, today.
Mr. FORD of Tennessee, for 5 minutes, today.

EXTENSION OF REMARKS

By unanimous consent, permission to revise and extend remarks was granted to:

Mr. BRINKLEY, and to include extraneous material on his amendment to H.R. 4975 in the Committee of the Whole today.

(The following Members (at the request of Mr. KASTEN), and to include extraneous matter:)

MRS. PETTIS.
Mr. VANDER JAGT.
Mr. RUPPE in two instances.
Mr. SCHULZE.
Mr. DERWINSKI in two instances.
Mr. COHEN.
Mr. O'BRIEN in two instances.

Mr. DINGELL.
Mr. STARK.
Mr. BOLAND.

ENROLLED JOINT RESOLUTION SIGNED

Mr. THOMPSON, from the Committee on House Administration, reported that that committee had examined and found truly enrolled a joint resolution of the House of the following title, which was thereupon signed by the Speaker:

H.J. Res. 351. Joint resolution making further continuing appropriations for the fiscal year 1977, and for other purposes.

SENATE BILL REFERRED

A bill of the Senate of the following title was taken from the Speaker's table and, under the rule, referred as follows:

S. 1051. An act to amend the United States Grain Standards Act with respect to record-keeping requirements and supervision fees, and to establish an advisory committee to provide advice to the Administrator of the Federal Grain Inspection Service, and for other purposes; to the Committee on Agriculture.

ADJOURNMENT

Mr. GEPHARDT. Mr. Speaker, I move that the House do now adjourn.

The motion was agreed to; accordingly (at 4 o'clock and 41 minutes p.m.), under its previous order, the House adjourned until Monday, April 4, 1977, at 12 o'clock noon.

EXECUTIVE COMMUNICATIONS, ETC.

Under clause 2 of rule XXIV, executive communications were taken from the Speaker's table and referred as follows:

1132. A letter from the General Counsel, U.S. General Accounting Office, transmitting confirmation of the release of certain budget authority, the rescission or deferral of which was proposed by the President and not approved by the Congress; to the Committee on Appropriations.

1133. A letter from the Secretary of the Navy, transmitting a draft of proposed legislation to amend title 10, United States Code, to authorize reimbursement for expenses incurred in obtaining quarters by certain members of the uniformed services on sea duty who are deprived of their quarters aboard ship, and for other purposes; to the Committee on Armed Services.

1134. A letter from the Secretary of the Navy, transmitting a draft of proposed legislation to amend section 409 of title 37, United States Code, to eliminate restrictions for transporting a house trailer or mobile dwelling by a member of the uniformed services, and for other purposes; to the Committee on Armed Services.

1135. A letter from the Deputy Assistant Secretary of Defense (Installations and Housing), transmitting notice of the location, nature, and estimated cost of various construction projects proposed to be undertaken by the Army National Guard, pursuant to 10 U.S.C. 2233a(1); to the Committee on Armed Services.

1136. A letter from the Deputy Assistant Secretary of Defense (Military Personnel Policy), transmitting a list of present and former Defense officers and employees who have filed reports pertaining to their Defense Department and defense-related industry employment for fiscal year 1976, pursuant to section 410(d) of Public Law 91–121; to the Committee on Armed Services.

1137. A letter from the Deputy Assistant Secretary of Defense (Military Personnel Policy), transmitting a report that no use was made of the authority to make payments to officers holding positions of a critical nature during calendar year 1976, pursuant to 37 U.S.C. 306(f); to the Committee on Armed Services.

1138. A letter from the Mayor of the District of Columbia, transmitting his response to the Comptroller General's report (FGMSD–76–75), relating to the District of Columbia government's accounting controls over undelivered checks and the adequacy of internal controls established to prevent duplicate payments, pursuant to section 736 (b)(3) of Public Law 93–198; to the Committee on the District of Columbia.

1139. A letter from the Secretary of Housing and Urban Development, transmitting notice of proposed new and altered records systems, pursuant to 5 U.S.C. 552a(o); to the Committee on Government Operations.

1140. A letter from the Assistant Secretary of State for Congressional Relations, transmitting notice of the proposed issuance of a license for the export of major defense equipment sold commercially to the Government of the Netherlands (transmittal No. MC–26–77), pursuant to section 36(c) of the Arms Export Control Act; to the Committee on International Relations.

1141. A letter from the Assistant Secretary of State for Congressional Relations, transmitting notice of the proposed issuance of a license for the export of major defense equipment sold commercially to the Government of Singapore (transmittal No. MC–29–77), pursuant to section 36(c) of the Arms Export Control Act; to the Committee on International Relations.

1142. A letter from the Director, Defense Security Assistance Agency, transmitting notice of the intention of the Department of the Navy to offer to sell certain military equipment to Norway (transmittal No. 77–19), pursuant to section 36(b) of the Arms Export Control Act; to the Committee on International Relations.

1143. A letter from the Vice President for Government Affairs, National Railroad Passenger Corporation, transmitting the financial report of the Corporation for December 1976, pursuant to section 308(a)(1) of the Rail Passenger Service Act of 1970, as amended; to the Committee on Interstate and Foreign Commerce.

1144. A letter from the Chairman and Chief Executive Officer, Consolidated Rail Corporation, transmitting a report on the Corporation's activities during the 9 months ended December 31, 1976, pursuant to section 301(g) of the Regional Rail Reorganization Act of 1973; to the Committee on Interstate and Foreign Commerce.

1145. A letter from the Secretary of Housing and Urban Development, transmitting a draft of proposed legislation to amend the Disaster Relief Act of 1974 to provide for authorization of appropriations thereunder through fiscal year 1978; to the Committee on Public Works and Transportation.

1146. A letter from the Chairman, Board of Directors, Tennessee Valley Authority, transmitting the Board's 43d annual report, covering fiscal year 1976 and the transition quarter, pursuant to section 9(a) of the Tennessee Valley Authority Act of 1933 (48 Stat. 63; 16 U.S.C. 831h); to the Committee on Public Works and Transportation.

1147. A letter from the Federal and State Cochairmen, Upper Great Lakes Regional Commission, transmitting the Commission's 1976 annual report, pursuant to section 510 of the Public Works and Economic Development Act of 1965, as amended; to the Committee on Public Works and Transportation.

1148. A letter from the Secretary of Health, Education, and Welfare, transmitting a report covering fiscal year 1976 on Federal activities related to welfare programs, pursuant to section 704 of the Social Security Act; to the Committee on Ways and Means.

1149. A letter from the Acting Administrator, U.S. Energy Research and Development Administration, transmitting a draft of proposed legislation to authorize appropriations to the Energy Research and Development Administration in accordance with section 261 of the Atomic Energy Act of 1954, as amended, section 305 of the Energy Reorganization Act of 1974, and section 16 of the Federal Nonnuclear Energy Research and Development Act of 1974, and for other purposes; jointly, to the Committees on Armed Services, and Science and Technology.

1150. A letter from the Comptroller General of the United States, transmitting a report on the recruitment and retention of Veterans' Administration health care workers (HRD–77–57, March 31, 1977); jointly, to the Committees on Government Operations, and Veterans' Affairs.

1151. A letter from the Comptroller General of the United States, transmitting a report on the possibility of consolidating and sharing functions and facilities and reducing Government investment and expenditures for Federal support of aviation (LCD–76–445, March 31, 1977); jointly, to the Committees on Government Operations, Public Works and Transportation, and Armed Services.

REPORTS OF COMMITTEES ON PUBLIC BILLS AND RESOLUTIONS

Under clause 2 of rule XIII, reports of committees were delivered to the Clerk for printing and reference to the proper calendar, as follows:

Mr. HAWKINS: Committee on House Administration. House Concurrent Resolution 162. Concurrent resolution providing for the printing of 20,000 additional copies of the subcommittee print of the Subcommittee on Consumer Affairs of the Committee on Banking, Finance, and Urban Affairs entitled "Give Yourself Credit: Guide to Consumer Credit Laws"; with amendment (Rept. H.R. 5890. A bill to amend section 601(a)(2) of the Legislative Reorganization Act of 1946 to provide that the salaries of Senators and Representatives may not be subject to any cost-of-living adjustment under such section before October 1, 1978; to the Committee on Post Office and Civil Service.

By Mr. MARKEY (for himself, Mr. SKELTON, Mr. STEERS, Mr. STOCKMAN, Mr. STRATTON, Mr. THONE, Mr. WEAVER, Mr. WEISS, Mr. WON PAT, Mr. VAN DEERLIN, and Mr. YOUNG of Missouri):

H.R. 5891. A bill to amend section 601(a)(2) of the Legislative Reorganization Act of 1946 to provide that the salaries of Senators and Representatives may not be subject to any cost-of-living adjustment under such section before October 1, 1978; to the Committee on Post Office and Civil Service.

By Ms. MIKULSKI (for herself, Mr. GILMAN, and Mr. NOLAN):

H.R. 5892. A bill to repeal the changes made by the Tax Reform Act of 1976 in the exclusion of sick pay; to the Committee on Ways and Means.

By Mr. MILLER of California (for himself, Mr. BRADEMAS, Mr. BRODHEAD, Mr. CORMAN, Mr. JACOBS, Mr. KETCHUM, Mrs. KEYS, Mr. RANGEL, and Mr. STARK):

H.R. 5893. A bill to amend title IV of the Social Security Act to provide improved assistance to children and families in need of service, to provide greater accountability for children in foster placement, and to promote greater permanency for children, by requiring each State to have a plan specifically covering foster care and adoption services, and for other purposes; to the Committee on Ways and Means.

By Mr. MITCHELL of New York:

H.R. 5894. A bill to provide financial aid to local fire departments in the purchase of advanced firefighting equipment; to the Committee on Science and Technology.

By Mr. RICHMOND (for himself, Mr. AKAKA, Mr. BADILLO, Mr. BINGHAM, Mrs. CHISHOLM, Mr. CONYERS, Mr. CORRADA, Mr. DELLUMS, Mr. DOWNEY, Mr. EDGAR, Mr. EDWARDS of California, Mr. FAUNTROY, Mr. GILMAN, Ms. KEYS, Ms. MIKULSKI, Mr. MITCHELL of Maryland, Mr. NOLAN, Mr. NOWAK, Mr. SCHEUER, Mr. SEIBERLING, Mr. STEERS, Mr. UDALL, Mr. VENTO, Mr. WEISS, and Mr. WON PAT):

H.R. 5895. A bill to amend the Food Stamp Act of 1964, as amended, by simplifying administration, encouraging participation, and eliminating fraud, and for other purposes; to the Committee on Agriculture.

By Mr. RUSSO (for himself, Mr. MURPHY of Illinois, Mr. HUGHES, Mr. MOAKLEY, Mr. DERWINSKI, Mr. BRODHEAD, Mr. TREEN, Mrs. COLLINS of Illinois, and Mr. BONIOR):

H.R. 5896. A bill to authorize the Comptroller General to audit the programs, activities, and financial operations of the Federal National Mortgage Association, and to amend certain housing laws for the purpose of improving Federal programs which insure home mortgages; to the Committee on Banking, Finance and Urban Affairs.

By Mr. RUSSO (for himself, Mrs. FENWICK and Mr. HAWKINS):

H.R. 5897. A bill to amend title 18 of the United States Code with respect to firearms; to the Committee on the Judiciary.

By Mr. SEIBERLING:

H.R. 5898. A bill to authorize the home production of beer and wine; to the Committee on Ways and Means.

By Mrs. SPELLMAN (for herself, Ms. OAKAR, and Mr. LEDERER):

H.R. 5899. A bill to amend title VIII of the Act commonly called the Civil Rights Act of 1968 with respect to the awarding of attorney's fees and the authority of the Department of Housing and Urban Development to initiate a civil action to enforce the provisions of such title; to the Committee on the Judiciary.

By Mr. VANIK:

H.R. 5900. A bill to amend titles II, VII, XI, XVI, XVIII, and XIX of the Social Security Act to provide for the improved administration of the old-age, survivors, and disability insurance program, the supplemental security income program, and the medicare program by a newly established independent Social Security Administration, to separate social security trust fund items from the general Federal budget, to prohibit the mailing of certain notices with social security and supplemental security income benefit checks, and for other purposes; jointly, to the Committees on Ways and Means, Interstate and Foreign Commerce, Education and Labor, and Government Operations.

By Mr. WHALEN (for himself, Mr. SEIBERLING, Mr. FORD of Michigan, and Ms. OAKAR):

H.R. 5901. A bill to provide that certain cost-of-living and other increased benefits received under title II of the Social Security Act will not be considered as income for purposes of determining eligibility and the amount of benefits of participants in the food stamp program and for purposes of determining eligibility and the amount of benefits of participants in certain programs concerning surplus agricultural commodities; to the Committee on Agriculture.

H.R. 5902. A bill to provide that social security benefit increases occurring after May 1977 shall not be considered as income or resources for the purposes of determining the eligibility for or amount of assistance when any individual or family is provided under certain Federal housing laws; to the Committee on Banking, Finance and Urban Affairs.

H.R. 5903. A bill to amend title XIX of the Social Security Act to make certain that individuals otherwise eligible for medicaid benefits do not lose such eligibility, or have the amount of such benefits reduced, because of increases in monthly social security benefits; to the Committee on Interstate and Foreign Commerce.

By Mr. WHALEN (for himself, Mr. SEIBERLING, Mr. FORD of Michigan, Mr. LONG of Louisiana, and Ms. OAKAR):

H.R. 5904. A bill to amend title 38 of the United States Code to make certain that recipients of veterans' pension and compensation will not have the amount of such pension or compensation reduced because of increases in monthly social security benefits; to the Committee on Veterans' Affairs.

By Mr. WHALEN (for himself, Mr. SEIBERLING, Mr. FORD of Michigan, and Ms. OAKAR):

H.R. 5905. A bill to amend the Social Security Act to make certain that recipients of aid to families with dependent children and recipients of supplemental security income benefits will not have the amount of such aid or benefits reduced because of increases in monthly social security benefits; to the Committee on Ways and Means.

By Mr. YOUNG of Alaska:

H.R. 5906. A bill to amend title 5 of the United States Code to prohibit the consideration of certain matters in the determination of cost-of-living allowances for employees stationed outside the continental United States; to the Committee on Post Office and Civil Service.

By Mr. DRINAN (for himself, Mr. AKAKA, Mr. AUCOIN, Mr. BADILLO, Mr. BEARD of Rhode Island, Mr. BEILENSON, Mr. BLANCHARD, Mr. BLOUIN, Mr. BONIOR, Mr. CARR, Mr. CLEVELAND, Mrs. COLLINS of Illinois, Mr. CORMAN, Mr. CORNWELL, Mr. D'AMOURS, Mr. DANIELSON, Mr. DELLUMS, Mr. DOWNEY, Mr. EDGAR, Mr. EDWARDS of California, and Mr. EMERY):

H.R. 5907. A bill to provide for incentives for the commercial application of solar energy, energy conservation, and renewable resource equipment and devices in homes, neighborhood and community structures, small businesses, and facilities owned or occupied by nonprofit organizations; jointly, to the Committees on Banking, Finance and Urban Affairs, and Small Business.

By Mr. DRINAN (for himself, Mr. FLORIO, Mr. FORD of Michigan, Mr. FRASER, Mr. GAYDOS, Mr. GEPHARDT, Mr. GLICKMAN, Mr. GORE, Mr. HARKIN, Mr. HARRIS, Mr. HOWARD, Mr. HUGHES, Mr. HYDE, Mr. JENRETTE, Mr. KILDEE, Mr. KOCH, Mr. LAFALCE, Mr. LUNDINE, Ms. MIKULSKI, and Mr. MITCHELL of Maryland):

H.R. 5908. A bill to provide for incentives for the commercial application of solar energy, energy conservation, and renewable resource equipment and devices in homes, neighborhood and community structures, small businesses, and facilities owned or occupied by nonprofit organizations; jointly, to the Committees on Banking, Finance and Urban Affairs, and Small Business.

By Mr. DRINAN (for himself, Mr. MOAKLEY, Mr. MOFFETT, Mr. MURPHY, of Pennsylvania, Mr. NOLAN, Ms. OAKAR, Mr. PANETTA, Mr. PATTERSON, of California, Mr. PEPPER, Mr. PEASE, Mr. PRESSLER, Mr. PRITCHARD, Mr. PURSELL, Mr. RINALDO, Mr. RISENHOOVER, Mr. RODINO, Mr. ROE, Mr. ROONEY, Mr. ROSE, Mr. ST GERMAIN, and Mr. SCHEUER):

H.R. 5909. A bill to provide for incentives for the commercial application of solar energy, energy conservation, and renewable resource equipment and devices in homes, neighborhood and community structures, small businesses, and facilities owned or occupied by nonprofit organizations; jointly, to the Committees on Banking, Finance and Urban Affairs, and Small Business.

By Mr. DRINAN (for himself, Mr. SEIBERLING, Mr. STARK, Mr. THONE, Mr. TSONGAS, Mr. UDALL, Mr. VAN DEERLIN, Mr. WALGREN, Mr. WAXMAN, Mr. WEAVER, Mr. WEISS, Mr. CHARLES H. WILSON of California, Mr. CHARLES WILSON of Texas, Mr. WINN, Mr. WOLFF, and Mr. WON PAT):

H.R. 5910. A bill to provide for incentives for the commercial application of solar energy, energy conservation, and renewable resource equipment and devices in homes, neighborhood and community structures, small businesses, and facilities owned or occupied by nonprofit organizations; jointly, to the Committees on Banking, Finance and Urban Affairs, and Small Business.

By Mr. BROWN of California (for himself, Mr. BADILLO, Mr. BEARD of Rhode Island, Mr. BEILENSON, Mr. BLANCHARD, Mr. BONIOR, Mr. CARR, Mrs. COLLINS of Illinois, Mr. D'AMOURS, Mr. DANIELSON, Mr. DELLUMS, Mr. DOWNEY, Mr. EDGAR, Mr. EDWARDS of California, Mr. GAYDOS, Mr. GEPHARDT, Mr. HARKIN, Mr. HOWARD, Mr. HUGHES, Mr. HYDE, Mr. KILDEE, Mr. LAFALCE, Ms. MIKULSKI, Mr. MOFFETT, and Mr. NOLAN):

H.R. 5911. A bill to authorize the inclusion of solar energy research, development, and demonstration programs in certain agricul-

tural programs; to the Committee on Agriculture.

By Mr. BROWN of California (for himself, Mr. FORD of Michigan, Mr. PATTERSON of California, Mr. PEPPER, Mr. PEASE, Mr. PRESSLER, Mr. PURSELL, Mr. RISENHOOVER, Mr. RODINO, Mr. ROE, Mr. ROSE, Mr. ST GERMAIN, Mr. SCHEUER, Mr. SEIBERLING, Mr. TSONGAS, Mr. UDALL, Mr. VAN DEERLIN, Mr. WALGREN, Mr. WAXMAN, Mr. WEAVER, Mr. WEISS, Mr. CHARLES H. WILSON of California, Mr. CHARLES WILSON of Texas, Mr. WINN, and Mr. WON PAT):

H.R. 5912. A bill to authorize the inclusion of solar energy research, development, and demonstration programs in certain agricultural programs; to the Committee on Agriculture.

By Mr. BROWN of California (for himself, Mr. AKAKA, Mr. AUCOIN, Mr. BLOUIN, Mr. CLEVELAND, Mr. CORNELL, Mr. CORNWELL, Mr. EMERY, Mr. ERTEL, Mr. FLORIO, Mr. FRASER, Mr. GLICKMAN, Mr. GORE, Mr. HARRIS, Mr. JENRETTE, Mr. MIKVA, Mr. MURPHY of Pennsylvania, Mr. NEAL, Ms. OAKAR, Mr. PANETTA, and Mr. THONE):

H.R. 5913. A bill to authorize the inclusion of solar energy research, development, and demonstration programs in certain agricultural programs; to the Committee on Agriculture.

By Mr. JEFFORDS (for himself, Mr. WON PAT, Mr. AUCOIN, Mr. FRASER, Mr. BALDUS, Mr. CORNWELL, Mr. EMERY, Mr. ERTEL, Mr. DELLUMS, Mr. FLORIO, Mr. HOLLENBECK, Mr. LEHMAN, Mr. MCCLOSKEY, Mr. WOLFF, Mr. MIKVA, and Mr. PANETTA):

H.R. 5914. A bill to amend the Federal Nonnuclear Energy Research and Development Act of 1974 to provide for cooperative programs with less-developed countries for the development of unconventional energy technology; jointly, to the Committees on Science and Technology, and International Relations.

H.R. 5915. A bill to amend the Foreign Assistance Act of 1961 to encourage greater emphasis on the production and conservation of energy in developing countries through the development and utilization of unconventional energy technologies; to the Committee on International Relations.

By Mr. JEFFORDS (for himself, Mr. FASCELL, Mr. MINETA, Mr. BADILLO, Mr. BEARD of Rhode Island, Mr. BEILENSON, Mr. BLANCHARD, Mr. BONIOR, Mr. CARR, Mrs. COLLINS of Illinois, Mr. D'AMOURS, Mr. DANIELSON, Mr. DOWNEY, Mr. EDGAR, Mr. EDWARDS of California, Mr. FORD of Michgan, Mr. GAYDOS, Mr. GEPHARDT, Mr. HARKIN, Mr. HOWARD, Mr. HUGHES, Mr. HYDE, Mr. KILDEE, Mr. LAFALCE, and Ms. MIKULSKI):

H.R. 5916. A bill to amend the Foreign Assistance Act of 1961 to encourage greater emphasis on the production and conservation of energy in developing countries through the development and utilization of unconventional energy technologies; to the Committee on International Relations.

H.R. 5917. A bill to amend the Federal Nonnuclear Energy Research and Development Act of 1974 to provide for cooperative programs with less-developed countries for the development of unconventional energy technologies; jointly, to the Committees on Science and Technology and International Relations.

By Mr. JEFFORDS (for himself, Mr. MOFFETT, Mr. NOLAN, Mr. PATTERSON of California, Mr. PEPPER, Mr. PEASE, Mr. PRESSLER, Mr. PURSELL, Mr. RISENHOOVER, Mr. RODINO, Mr. ROE, Mr. ROSE, Mr. ST GERMAIN, Mr. SCHEUER, Mr. SEIBERLING, Mr. TSONGAS, Mr. UDALL, Mr. VAN DEERLIN, Mr. WALGREN, Mr. WAXMAN, Mr. WEAVER, Mr. WEISS, Mr. CHARLES H. WILSON of California, Mr. CHARLES WILSON of Texas):

H.R. 5918. A bill to amend the Federal Nonnuclear Energy Research and Development Act of 1974 to provide for cooperative programs with less-developed countries for the development of unconventional energy technologies; jointly, to the Committees on Science and Technology, and International Relations.

By Mr. JEFFORDS (for himself, Mr. MOFFETT, Mr. NOLAN, Mr. PATTERSON of California, Mr. PEPPER, Mr. PEASE, Mr. PRESSLER, Mr. PURSELL, Mr. RISENHOOVER, Mr. RODINO, Mr. ROE, Mr. ROSE, Mr. ST GERMAIN, Mr. SCHEUER, Mr. SEIBERLING, Mr. TSONGAS, Mr. UDALL, Mr. VAN DEERLIN, Mr. WALGREN, Mr. WAXMAN, Mr. WEAVER, Mr. WEISS, Mr. CHARLES H. WILSON of California, Mr. CHARLES WILSON of Texas, and Mr. WINN):

H.R. 5919. A bill to amend the Foreign Assistance Act of 1961 to encourage greater emphasis on the production and conservation of energy in developing countries through the development and utilization of unconventional energy technologies; to the Committee on International Relations.

By Mr. OTTINGER (for himself, Mr. MCCORMACK, Mr. GEPHARDT, Mr. GORE, Mr. HARKIN, Mr. HARRIS, Mr. HOLLENBECK, Mr. HOWARD, Mr. HUGHES, Mr. HYDE, Ms. KEYS, Mr. KILDEE, Mr. LAFALCE, Mr. LEHMAN, Mr. MCCLOSKEY, Ms. MIKULSKI, Mr. MIKVA, Mr. MOFFETT, Mr. MURPHY of Pennsylvania, Mr. NOLAN, Mr. PATTERSON of California, Mr. PEPPER, Mr. PEASE, Mr. PRESSLER, and Mr. PURSELL):

H.R. 5920. A bill to promote the use of energy conservation, solar energy, and total energy, and total energy systems in Federal buildings; to the Committee on Pubic Works and Transportation.

By Mr. BEDELL (for himself, Mr. GLICKMAN, Mr. GORE, Mr. HARKIN, Mr. HOWARD, Mr. HUGHES, Mr. HYDE, Mr. JENRETTE, Mr. KILDEE, Mr. KOSTMAYER, Mr. LAFALCE, Mr. LEHMAN, Mr. LUNDINE, Mr. MCCLOSKEY, Ms. MIKULSKI, Mr. MITCHELL of Maryland, Mr. MOFFETT, Mr. MURPHY of Pennsylvania, Mr. NOLAN, Mr. NEAL, Mr. PATTERSON of California, Mr. PANETTA, Mr. PEPPER, Mr. PEASE, and Mr. PRESSLER):

H.R. 5921. A bill to amend the Small Business Act and the Federal Nonnuclear Energy Research and Development Act of 1974 to provide certain assistance to individuals and small business concerns in the areas of solar energy equipment and energy-related inventions; jointly, to the Committees on Small Business and Science and Technology.

By Mr. BEDELL (for himself, Mr. AKAKA, Mr. AUCOIN, Mr. BADILLO, Mr. BEARD of Rhode Island, Mr. BEILENSON, Mr. BLANCHARD, Mr. BLOUIN, Mr. BONIOR, Mr. CARR, Mr. CLEVELAND, Mrs. COLLINS of Illinois, Mr. CORNWELL, Mr. D'AMOURS, Mr. DANIELSON, Mr. DELLUMS, Mr. DOWNEY, Mr. EDGAR, Mr. EDWARDS of California, Mr. ERTEL, Mr. FASCELL, Mr. FORD of Michigan, Mr. FRASER, Mr. GAYDOS, and Mr. GEPHARDT):

H.R. 5922. A bill to amend the Small Business Act and the Federal Nonnuclear Energy Research and Development Act of 1974 to provide certain assistance to individuals and small business concerns in the areas of solar energy equipment and energy-related inventions; jointly, to the Committees on Small Business, and Science and Technology.

By Mr. BEDELL (for himself, Mr. PURSELL, Mr. RINALDO, Mr. RISENHOOVER, Mr. RODINO, Mr. ROE, Mr. ROSE, Mr. ST GERMAIN, Mr. SCHEUER, Mr. SEIBERLING, Mr. THONE, Mr. TSONGAS, Mr. UDALL, Mr. VAN DEERLIN, Mr. WALGREN, Mr. WAXMAN, Mr. WEAVER, Mr. WEISS, Mr. CHARLES H. WILSON of California, Mr. CHARLES WILSON of Texas, Mr. WINN, Mr. WOLFF, and Mr. WON PAT):

H.R. 5923. A bill to amend the Small Business Act and the Federal nonnuclear Energy Research and Development Act of 1974 to provide certain assistance to individuals and small business concerns in the areas of solar energy equipment and energy-related inventions; jointly, to the Committees on Small Business, and Science and Technology.

By Mr. MOAKLEY (for himself, Mr. AKAKA, Mr. BADILLO, Mr. BAUCUS, Mr. BEARD of Rhode Island, Mr. BEDELL, Mr. BEILENSON, Mr. BINGHAM, Mr. BLANCHARD, Mr. BLOUIN, Mr. BONIOR, Mr. BROWN of California, Mr. CARR, Mr. CARNEY, Mr. CLEVELAND, Mrs. COLLINS of Illinois, Mr. CORNELL, Mr. D'AMOURS, Mr. DANIELSON, Mr. DELLUMS, Mr. DOWNEY, Mr. EDGAR, Mr. EDWARDS of California, Mr. EMERY, and Mr. ERTEL):

H.R. 5924. A bill to amend the Internal Revenue Code of 1954 to provide income tax incentives for the conservation of energy used to heat or cool residences and commercial buildings, and for the utilization of renewable fuel energy sources; to the Committee on Ways and Means.

By Mr. MOAKLEY (for himself, Mr. GAYDOS, Mr. GEPHARDT, Mr. HARKIN, Mr. HARRINGTON, Mr. FASCELL, Mrs. FENWICK, Mr. HOWARD, Mr. HOLLENBECK, Mr. HUGHES, Mr. HYDE, Mr. JEFFORDS, Mr. KILDEE, Mr. KOSTMAYER, Mr. LAFALCE, Mr. LEHMAN, Mr. LONG of Maryland, Mr. LUNDINE, Mr. MCKINNEY, Mr. MCCLOSKEY, Ms. MIKULSKI, Mr. MITCHELL of Maryland, Mr. MOFFETT, Mr. MOTTL, Mr. MURPHY of Pennsylvania, and Mr. NEAL):

H.R. 5925. A bill to amend the Internal Revenue Code of 1954 to provide income tax incentives for the conservation of energy used to heat or cool residences and commercial buildings, and for the utilization of renewable fuel energy sources; to the Committee on Ways and Means.

By Mr. MOAKLEY (for himself, Mr. NOLAN, Ms. OAKAR, Mr. OBERSTAR, Mr. OTTINGER, Mr. PATTERSON of California, Mr. PEPPER, Mr. PEASE, Mr. PRESSLER, Mr. PRITCHARD, Mr. PURSELL, Mr. RANGEL, Mr. RICHMOND, Mr. RISENHOOVER, Mr. RODINO, Mr. ROE, Mr. ROSE, Mr. ST GERMAIN, Mr. SCHEUER, Mr. SEIBERLING, Mr. THONE, Mr. TSONGAS, Mr. UDALL, Mr. VAN DEERLIN, Mr. WALGREN, and Mr. WAXMAN):

H.R. 5926. A bill to amend the Internal Revenue Code of 1954 to provide income tax incentives for the conservation of energy used to heat or cool residences and commercial buildings, and for the utilization of renewable fuel energy sources; to the Committee on Ways and Means.

By Mr. MOAKLEY (for himself, Mr. WEAVER, Mr. WEISS, Mr. CHARLES H. WILSON of California, Mr. CHARLES WILSON of Texas, Mr. WINN, Mr. WIRTH, Mr. WOLFF, and Mr. WON PAT):

H.R. 5927. A bill to amend the Internal Revenue Code of 1954 to provide income tax incentives for the conservation of energy used to heat or cool residences and commercial buildings, and for the utilization of renewable fuel energy sources; to the Committee on Ways and Means.

By Ms. HOLTZMAN:

By Mr. RHODES (for himself, Mr. DORNAN, Mr. HYDE, Mr. GLICKMAN, Mr. KREBS, Mr. HORTON, Mrs. LLOYD of Tennessee, Mr. WALKER, Mr. JOHN T. MYERS, Mrs. FENWICK, Mr. JOHNSON of California, Mr. MONTGOMERY, Mr. FARY, Mr. WAXMAN, Mr. HEFNER, Mr. STANGELAND, Mr. YOUNG of Alaska, Mr. CHARLES H. WILSON of CALIFORNIA, Mr. FISH, Mr. EVANS of Georgia, Mr. CLEVELAND, Mr. EMERY, Mr. NICHOLS, Mr. MARRIOTT, and Mrs. HOLT):

H.J. Res. 370. Joint resolution to designate the week commencing with the third Monday in February of each year as National Patriotism Week; to the Committee on Post Office and Civil Service.

By Mr. SCHULZE (for himself, Mr. ANDERSON of Illinois, Mr. AUCOIN, Mr. BEDELL, Mr. BLOUIN, Mr. COCHRAN of Mississippi, Mr. CORCORAN of Illinois, Mr. COUGHLIN, Mr. DRINAN, Mr. EDGAR, Mrs. FENWICK, Mr. GRADISON, Mr. HAGEDORN, Mr. KASTENMEIER, Mr. KOSTMAYER, Mr. LEACH, Mr. LEHMAN, Mr. LONG of Maryland, Mr. MCKINNEY, Mr. OTTINGER, Mr. PATTISON of New York, Mrs. SCHROEDER, Mr. SIMON, Mr. VENTO, and Mr. WALKER):

H. Con. Res. 185. Concurrent resolution to urge the President to reduce the risk of chemical warfare; jointly, to the Committees on Armed Services, and International Relations.

By Mr. ASPIN (for himself, Mr. BADILLO, Mr. BALDUS, Mr. BAUCUS, Mr. BEDELL, Mr. BEILENSON, Mr. BLOUIN, Mr. CARR, Mr. CONYERS, Mr. CORNELL, Mr. DOWNEY, Mr. EDGAR, Mr. GIBBONS, Mr. GLICKMAN, Mr. HAMILTON, Mr. HANNAFORD, Mr. HARRINGTON, Mr. HAWKINS, Mr. HUGHES, Mr. IRELAND, Mr. KOCH, Mr. KOSTMAYER, Mr. LONG of Maryland, and Mr. MCHUGH):

H. Res. 453. Resolution to establish a Standing Committee of the House on Intelligence, and for other purposes; to the Committee on Rules.

By Mr. ASPIN (for himself, Mr. MARKEY, Mr. MAZZOLI, Mr. METCALFE, Mrs. MEYNER, Mr. MIKVA, Mr. MILLER of California, Mr. MINETA, Mr. MITCHELL of Maryland, Mr. MOAKLEY, Mr. MURPHY of Pennsylvania, Mr. NEAL, Mr. NIX, Mr. OTTINGER, Mr. PANETTA, Mr. PATTERSON of California, Mr. PATTISON of New York, Mr. PREYER, Mr. RYAN, Mr. SEIBERLING, Mr. SOLARZ, Mr. STARK, Mr. TSONGAS, and Mr. VENTO):

H. Res. 454. Resolution to establish a Standing Committee of the House on Intelligence, and for other purposes; to the Committee on Rules.

By Mr. ASPIN (for himself, Mr. WAXMAN, Mr. WOLFF, Mr. ANDERSON of Illinois, Mr. COHEN, Mr. ERLENBORN, Mrs. FENWICK, Mr. JEFFORDS, Mr. JOHNSON of Colorado, Mr. MCCLOSKEY, Mr. MARKS, Mr. PRITCHARD, Mr. SAWYER, and Mr. WEISS):

H. Res. 455. Resolution to establish a Standing Committee of the House on Intelligence, and for other purposes; to the Committee on Rules.

By Mr. DORNAN:

H. Res. 456. Resolution relating to congressional reform; to the Committee on Rules.

By Mr. FINDLEY (for himself, Mr. MURPHY of Illinois, and Mr. SIMON):

H. Res. 457. Resolution relative to determining a telecommunications regulatory policy; to the Committee on Interstate and Foreign Commerce.

By Mr. HAMILTON:

H. Res. 458. Resolution amending the Rules of the House of Representatives to provide for television and radio coverage of the proceedings of the House; to the Committee on Rules.

By Mr. HOWARD:

H. Res. 459. Resolution urging the expeditious completion of the Subcommittee on Communication's review of the Communications Act of 1934; to the Committee on Interstate and Foreign Commerce.

By Mr. KASTEN:

H. Res. 460. Resolution to create a select committee to audit accounts of committees, Members, and officers of the House of Representatives; to the Committee on Rules.

By Mr. PICKLE (for himself, Mr. AKAKA, Mr. AUCOIN, Mr. BADILLO, Mr. BEARD of Rhode Island, Mr. BEILENSON, Mr. BLANCHARD, Mr. BONIOR, Mr. CARR, Mr. CLEVELAND, Mrs. COLLINS of Illinois, Mr. D'AMOURS, Mr. DANIELSON, Mr. DELLUMS, Mr. DICKS, Mr. DOWNEY, Mr. EDGAR, Mr. EDWARDS of California, Mr. FLORIO, Mr. FORD of Michigan, Mr. GAYDOS, Mr. GEPHARDT, Mr. GORE, Mr. HANNAFORD, and Mr. HARKIN):

H. Res. 461. Resolution to study the feasibility of installing solar energy equipment in the House office buildings; to the Committee on Public Works and Transportation.

By Mr. PICKLE (for himself, Mr. HARRIS, Mr. HOLLENBECK, Mr. HOWARD, Mr. HUGHES, Mr. HYDE, Mrs. KEYS, Mr. KILDEE, Mr. LAFALCE, Ms. MIKULSKI, Mr. MIKVA, Mr. MOFFETT, Mr. MURPHY of Pennsylvania, Mr. NEAL, Mr. NOLAN, Mr. PATTERSON of California, Mr. PEPPER, Mr. PEASE, Mr. PRESSLER, Mr. PURSELL, Mr. RISENHOOVER, Mr. RODINO, Mr. ROE, Mr. ST GERMAIN, and Mr. SCHEUER):

H. Res. 462. Resolution to study the feasibility of installing solar energy equipment in the House office buildings; to the Committee on Public Works and Transportation.

By Mr. PICKLE (for himself, Mr. SEIBERLING, Mr. TSONGAS, Mr. UDALL, Mr. VAN DEERLIN, Mr. WALGREN, Mr. WAXMAN, Mr. WEAVER, Mr. WEISS, Mr. CHARLES H. WILSON of California, Mr. CHARLES WILSON of Texas, Mr. WINN, and Mr. WON PAT):

H. Res. 463. Resolution to study the feasibility of installing solar energy equipment in the House office buildings; to the Committee on Public Works and Transportation.

By Mr. RHODES (for himself, Mrs. FENWICK, Mr. LEACH, Mr. EMERY, Mr. WALSH, Mr. WALKER, Mr. REGULA, Mr. STEERS, Mr. ROBINSON, Mr. ROBERT W. DANIEL, Jr., Mr. DORNAN, Mr. ERLENBORN, Mr. FRENZEL, Mr. MADIGAN, and Mr. NOLAN):

H. Res. 464. Resolution to create a select committee to audit accounts of committees, Members, and officers of the House of Representatives; to the Committee on Rules.

By Mr. STOKES:

H. Res. 465. Resolution to provide for the expenses of investigations and studies to be conducted by the Select Committee on Assassinations; to the Committee on House Administration.

By Mr. WHALEN:

H. Res. 466. Resolution amending clause 7 of rule XIII of the Rules of the House; to the Committee on Rules.

By Mr. ZABLOCKI:

H. Res. 467. Resolution to establish a Standing Committee of the House on Intelligence, and for other purposes; to the Committee on Rules.

MEMORIALS

Under clause 4 of rule XXII,

74. The SPEAKER presented a memorial of the Legislature of the Commonwealth of Massachusetts, relative to locating the Solar Energy Research Institute in Westborough, Mass.; to the Committee on Science and Technology.

PRIVATE BILLS AND RESOLUTIONS

Under clause 1 of rule XXII, private bills and resolutions were introduced and severally referred as follows:

By Mr. BYRON:

H.R. 5928. A bill for the relief of Miss Coralia Raposo; to the Committee on the Judiciary.

By Mr. DRINAN:

H.R. 5929. A bill for the relief of Stephen A. Levine and his spouse; to the Committee on the Judiciary.

By Mr. GIAIMO:

H.R. 5930. A bill for the relief of John J. Egan; to the Committee on the Judiciary.

By Mr. GINN:

H.R. 5931. A bill for the relief of Julious Killingsworth; to the Committee on the Judiciary.

By Mr. KAZEN:

H.R. 5932. A bill for the relief of Marcelino S. Silva and his wife, Emilie M. Silva; to the Committee on the Judiciary.

By Mr. MCKAY:

H.R. 5933. A bill for the relief of Jonathan Winston Max; to the Committee on the Judiciary.

PETITIONS, ETC.

Under clause 1 of rule XXII,

69. The SPEAKER presented a petition of the city council, Lakewood, Ohio, requesting that Congress propose an amendment to the Constitution of the United States relative to the right to life, which was referred to the Committee on the Judiciary.

FACTUAL DESCRIPTIONS OF BILLS AND RESOLUTIONS INTRODUCED

Prepared by the Congressional Research Service pursuant to clause 5(d) of House Rule X. Previous listing appeared in the CONGRESSIONAL RECORD of March 28, 1977, page 9290:

H.R. 781. January 4, 1977. Ways and Means. Amends the Internal Revenue Code to provide that canceled checks shall be treated as prima facie evidence of any expenditure allowed as a deduction against the income tax.

H.R. 782. January 4, 1977. Ways and Means. Amends the Internal Revenue Code to exclude from the estate tax life insurance benefits to the extent that the beneficiary paid the premiums on the policy. Treats premiums paid by the decedent as paid by the beneficiary where the beneficiary is the surviving spouse.

H.R. 783. January 4, 1977. Science and Technology. Directs the Secretary of Commerce to coordinate the establishment and operation of a Federal climate program for the collection, analysis, and dissemination of data concerning climatic states and the influence of human activities on climatic dynamics. Empowers the Secretary, in order to carry out the purposes of this Act, to: (1) establish advisory committees composed of experts in climatology and related fields and of representatives of interested Federal departments; and (2) transfer funds and make grants to governmental bodies and to nonprofit and educational institutions.

H.R. 784. January 4, 1977. Science and Technology. Establishes a five-year program in the Energy Research and Development Ad-

ministration designed to develop advanced automobile propulsion systems. Directs the Secretary of Transportation and the Administrator of the Environmental Protection Agency to evaluate test vehicles for compliance with applicable environmental, energy efficiency, and motor vehicle safety requirements.

H.R. 785. January 4, 1977. Science and Technology. Establishes a five-year program in the Energy Research and Development Administration designed to develop advanced automobile propulsion systems. Directs the Secretary of Transportation and the Administrator of the Environmental Protection Agency to evaluate test vehicles for compliance with applicable environmental, energy efficiency, and motor vehicles safety requirements.

H.R. 786. January 4, 1977. Ways and Means. Amends the Internal Revenue Code to prohibit the taking of a business deduction for expenses paid or incurred to advertise alcoholic beverages.

H.R. 787. January 4, 1977. Agriculture. Amends the Food Stamp Act of 1964 by revising: (1) eligibility standards; (2) the method of determining the amount of the coupon allotment; (3) administration of the program by State agencies, including the eligibility certification procedure and duties imposed on issuing agents; and (4) the method of computing the Federal share of program costs and of making payments to the States. Transfers the functions of the Secretary of Agriculture under the Food Stamp Act of 1964 to the Secretary of Health, Education, and Welfare.

H.R. 788. January 4, 1977. Armed Services. Revises the method of computing retired or retainer pay for members of the armed forces who were later called to active duty before October 1, 1973, and served on active duty for at least two years.

H.R. 789. January 4, 1977. Armed Services. Revises the method of computing retired or retainer pay for members of the armed forces who later serve on active duty.

H.R. 790. January 4, 1977. Interstate and Foreign Commerce. Amends the Natural Gas Act to authorize the Federal Power Commission to exempt from regulation sales of natural gas to interstate pipelines where such sales are not otherwise committed to interstate commerce and where the pipeline company is curtailing deliveries of natural gas supplies.

H.R. 791. January 4, 1977. Interstate and Foreign Commerce; Ways and Means. Amends Title XVIII (Medicare) of the Social Security Act to expand the coverage of the supplementary medical insurance program to include physician extender services.

H.R. 792. January 4, 1977. Veterans' Affairs. Directs the Administrator of Veterans' Affairs to pay a pension to eligible veterans of World War I.

H.R. 793. January 4, 1977. Ways and Means. Amends Title II (Old-Age, Survivors, and Disability Insurance) of the Social Security Act to provide monthly insurance benefits for dependent relatives of individuals entitled to old-age or disability insurance benefits or of individuals who were fully and currently insured at the time of their death.

Stipulates the payment of dependent's benefits to individuals under age 18 and over age 62 who were receiving at least one-half of their support from the insured individual.

H.R. 794. January 4, 1977. Education and Labor. Requires persons acquiring effective control of existing plants or business facilities to give notice to employees and the community of an intention to close or relocate such a plant or facility at least one year and 180 days prior to closing or relocating. Requires owners of plants or business facilities which have been in operation for ten years and employ 200 or more people to give such notice of a determination to close or relocate at least 180 days prior to closing or relocating.

H.R. 795. January 4, 1977. Government Operations. States that the costs of goods manufactured in the United States and required for public use shall not be deemed unreasonable under the Buy American Act unless the price of such goods is 50 percent higher than like foreign-made goods.

H.R. 796. January 4, 1977. Public Works and Transportation. Amends the Local Public Works Capital Development and Investment Act of 1976 to direct the Secretary of Commerce, acting through the Economic Development Administration, to make a redetermination of grant requests by States and localities once additional Federal funding becomes available. Authorizes appropriations for such purposes.

H.R. 797. January 4, 1977. Ways and Means. Amends the Internal Revenue Code to provide a limited exclusion from gross income of interest on savings deposits paid or accrued by an individual taxpayer.

H.R. 798. January 4, 1977. Veterans' Affairs. Provides that if any cost-of-living increase is made in old-age and survivors insurance benefits payable under title II of the Social Security Act after December 31, 1975, or, if any general benefit increase is made under such Act after such date, the Administrator of Veterans' Affairs shall increase specified benefit payments to veterans by the same percentage.

Provides that recipients of veterans' pension and compensation shall not have the amount of such pension or compensation reduced because of increases in monthly social security benefits or railroad retirement benefits.

H.R. 799. January 4, 1977. Ways and Means. Amends Title II (Old-Age, Survivors, and Disability Insurance) to increase by 20 percent the primary insurance amount for individuals covered under such Title.

H.R. 800. January 4, 1977. Ways and Means. Increases to $6,000 the amount of outside earnings which is permitted an individual each year without any deduction from benefits under Title II (Old-Age, Survivors, and Disability Insurance) of the Social Security Act.

H.R. 801. January 4, 1977. Agriculture; Ways and Means. Amends the Social Security Act by authorizing the Secretary of Health, Education, and Welfare to formulate and administer a food allowance program for the elderly.

H.R. 802. January 4, 1977. Education and Labor. Amends the Employee Retirement Income Security Act of 1974 to require as part of the private pension plan termination insurance program that the Pension Benefit Guarantee Corporation insure during periods when a beneficiary is unemployed and not eligible for benefits under the Social Security Act benefits which: (1) are forfeitable, have been in effect for less than 60 months, or are for other reasons deemed nonbasic; and (2) are payable before normal retirement age.

H.R. 803. January 4, 1977. Armed Services. Amends the National Security Act of 1947 to include the Secretary of the Treasury as a member of the National Security Council.

H.R. 804. January 4, 1977. Ways and Means. Amends Titles II (Old-Age, Survivors, and Disability Insurance) and XVIII (Medicare) of the Social Security Act and the Railroad Retirement Act to eliminate the requirement that an individual be entitled to disability benefits for at least 24 consecutive months in order to qualify for hospital insurance benefits under the Medicare program.

H.R. 805. January 4, 1977. Appropriations. Appropriates specified amounts to the Secretary of the Interior for construction of the Natchez Trace Parkway.

H.R. 806. January 4, 1977. Appropriations. Makes appropriations in specified amounts to the Secretary of the Interior for the completion of the Mission 66 Bypass Road at Vicksburg, Mississippi.

H.R. 807. January 4, 1977. Ways and Means; Interstate and Foreign Commerce. Prohibits any federally assisted continuing care institutions from requiring any cash payment in addition to or in lieu of its regular periodic charges for care and services unless such payment is made in accordance with a written contract or agreement which sets forth the rights and obligations of the parties involved.

H.R. 808. January 4, 1977. Public Works and Transportation; Banking, Finance and Urban Affairs. Amends the Public Works and Economic Development Act of 1965 to establish within the Department of Commerce an Office of Aid to Economic Communities.

Authorizes the designation of economic disaster communities in accordance with specified criteria.

Authorizes Federal agencies to assist such areas by making available certain property and personnel.

Establishes a Federal Economic Recovery Fund within the Treasury to aid economic disaster communities.

H.R. 809. January 4, 1977. Public Works and Transportation. Amends the Federal Water Pollution Control Act to authorize the Administrator of the Environmental Protection Agency to make grants to States, localities, interstate bodies, corporations, partnerships, and associations for treatment works training projects by contract without regard to generally applicable procedures with respect to expenditure of funds for public contracts.

H.R. 810. January 4, 1977. Ways and Means. Amends the Internal Revenue Code to provide a limited exclusion from the excise tax on self-dealing private foundations in order to allow the reimbursement of government officials for certain foreign travel expenses.

H.R. 811. January 4, 1977. Judiciary; Merchant Marine and Fisheries; Government Operations. Amends the Outer Continental Shelf Lands Act to create a Marine Resources Conservation and Development Fund for use by the Secretary of the Interior for various marine resources programs. Requires monies collected from leases on the Outer Continental Shelf to be deposited into the fund with a certain percentage to be returned to the States.

H.R. 812. January 4, 1977. Judiciary; Merchant Marine and Fisheries; Interior and Insular Affairs; Science and Technology. Amends the Outer Continental Shelf Lands Act to establish a policy for the development and management of oil and natural gas in the Outer Continental Shelf designed to protect the marine and coastal environment.

Directs the Secretary of the Interior to establish a comprehensive exploratory program to develop potential oil and gas leases. Directs the National Oceanic and Atmospheric Administration to assume lead responsibility in preparation of environmental impact statements.

Revises bidding and lease administration procedures.

Authorizes the Secretary of Transportation to report on pipeline safety and operation on Federal lands and in the Outer Continental Shelf.

H.R. 813. January 4, 1977. Ways and Means; Interstate and Foreign Commerce. Amends Title XVIII (Medicare) and Title II (Old-Age, Survivors', and Disability Insurance) of the Social Security Act to extend Medicare hospital coverage to include drugs. Establishes a Formulary Committee within the Department of Health, Education, and Welfare to prepare and maintain a listing of qualified drugs.

H.R. 814. January 4, 1977. Interstate and Foreign Commerce. Amends the Federal Administration Act of 1974 to direct the Federal Energy Administrator to prohibit practices involving pricing of energy supplies sold to consumers which allow per unit rates to vary inversely with total consumption.

H.R. 815. January 4, 1977. Ways and Means. Amends the Internal Revenue Code to provide identical income tax rates for single persons and married couples filing joint returns. Limits the earned income that must be reported by a married person filing a separate return to the amount actually earned by that individual.

H.R. 816. January 4, 1977. Ways and Means. Amends the Internal Revenue Code to provide a $5,000 tax exclusion for persons aged 65 or over for amounts received as an annuity, pension, or other retirement benefit.

H.R. 817. January 4, 1977. Ways and Means. Amends the Internal Revenue Code to allow as a credit against the income tax a limited amount of specified higher education expenses, including tuition, fees, books and supplies, incurred by the taxpayer for himself and any dependents.

H.R. 818. January 4, 1977. Ways and Means. Amends the Internal Revenue Code to require an automatic cost-of-living adjustment in the income tax rates, the amount of the standard deduction, personal exemption, and depreciation deduction, and the rate of interest payable on certain obligations of the United States.

H.R. 819. January 4, 1977. Ways and Means. Amends the Internal Revenue Code to allow an income tax deduction for State and local taxes paid or incurred for the furnishing of public utility services.

H.R. 820. January 4, 1977. Ways and Means. Amends the Internal Revenue Code to impose on every passenger automobile sold by a manufacturer an excise tax based upon the fuel efficiency rate of such automobile as determined by the Environmental Protection Agency.

Directs the Secretary of the Treasury to make a variable payment based upon fuel efficiency to purchasers of new passenger automobiles manufactured in the United States.

Amends the Automobile Information Disclosure Act to require each car to display its fuel efficiency rate and the resultant tax.

Prohibits adjustments to an automobile which result in causing lower fuel efficiency.

H.R. 821. January 4, 1977. Education and Labor. Establishes a comprehensive mid-career development service program to be administered by the Employment and Training Administration of the Department of Labor.

Authorizes specified programs through the Department of Labor to provide job training, employment opportunities, and unemployment assistance to middle-aged and older workers.

Directs the Secretary of Labor to study the adequacy of workmen's compensation, employee pension and health benefits, and manpower training programs to meet the needs of such workers.

Directs the Comptroller General to study means of increasing the number of part-time and subprofessional full-time positions in the executive branch which may be filled by middle-aged and older workers.

H.R. 822. January 4, 1977. Ways and Means. Amends Title II (Old-Age, Survivors, and Disability Insurance) of the Social Security Act by removing the limitation upon the amount of outside income which an individual may earn while receiving benefits.

H.R. 823. January 4, 1977. Interstate and Foreign Commerce. Amends the Federal Power Act to authorize the Federal Power Commission to take additional steps to meet anticipated power shortages.

Requires public hearings on certain proposals for utility rate increases. Authorizes the Commission to take additional measures to eliminate discriminatory and anticompetitive practices by utilities.

H.R. 824. January 4, 1977. Armed Services. Repeals the Military Selective Service Act.

H.R. 825. January 4, 1977. Banking, Finance and Urban Affairs. Authorizes the Secretary of Housing and Urban Development to make loans to homeowners and builders to assist them in purchasing and installing solar heating or solar heating and cooling equipment, and directs the Secretary to provide individuals with all current information on such equipment upon request. Directs the Energy Research and Development Administration to: (1) establish procedures for inspecting and evaluating solar heating and cooling equipment; (2) review new equipment as developed; and (3) periodically review certifications of such equipment for validity.

H.R. 826. January 4, 1977. Banking, Finance and Urban Affairs. Requires the establishment of escrow accounts in connection with federally related mortgage loans, under specified conditions. Requires that interest be paid on such accounts. Regulates the requirements of advance deposits in escrow accounts.

H.R. 827. January 4, 1977. Banking, Finance and Urban Affairs. Requires the developers of all federally assisted condominium projects to disclose specific information on proposed new condominium construction or conversion to condominium units of existing structures.

Establishes regulations to protect tenants in a leased-unit structure which is to be converted to condominium use.

Authorizes the Secretary of Housing and Urban Development to make grants to State and local governments to establish similar programs.

H.R. 828. January 4, 1977. Banking, Finance and Urban Affairs. Establishes an Emergency Housing and Economic Recovery Fund under the Secretary of Housing and Urban Development. Authorizes the Secretary to purchase mortgages on dwelling units which are the mortgagor's principal residence and meet certain other criteria.

Establishes economic limits at which the provisions of this Act will be activated and terminated.

Directs the Secretary of the Treasury to purchase any obligations of the Fund, and authorizes the Secretary to use the proceeds from the sale of securities issued under the Second Liberty Bond Act as a public debt transaction for the purposes of this Act.

H.R 829. January 4, 1977. Banking, Finance and Urban Affairs. Requires banks, savings and loan associations, and insured credit unions to disclose, upon request and in all advertising, specified information on computation and payment of the earnings on savings deposits.

Directs the Board of Governors of the Federal Reserve System to prescribe regulations to enforce the provisions of this Act.

H.R. 830. January 4, 1977. Education and Labor. Authorizes the Secretary of Health, Education, and Welfare to make grants to conduct special educational programs and activities designed to achieve conservation and nonuse of energy and materials. Establishes within the Office of Education a Council on the Conservation and Nonuse of Energy Materials to advise the Secretary on the administration of this Act.

H.R. 831. January 4, 1977. Education and Labor. Establishes, under the Elementary and Secondary Education Act of 1965, a Director of Consumers' Education whose duty shall be the making of grants, and contracts with educational and governmental entities to design projects to provide consumer education to the public.

H.R. 832. January 4, 1977. Education and Labor. Directs the Secretary of Labor to establish and maintain in counties with populations under 20,000 a pilot program designed to provide a guaranteed job opportunity to certain county residents from low-income households by partially reimbursing public and private employers for wages paid to certain such individuals, and fully reimbursing such employers for wages paid to certain other such individuals.

H.R. 833. January 4, 1977. Education and Labor. Amends the Wagner-Peyser Act to direct the Secretary of Labor to provide technical and management assistance to State public employment offices, establish a national clearing house for employment service information in the United States Employment Service, and implement an assistance program for certain State employment office job placement projects.

Directs the Secretary to study the merits of a nationwide job bank system and of replacing the State employment office system with a Federal office system.

H.R. 834. January 4, 1977. Education and Labor. Directs the Secretary of Labor, through the Bureau of Labor Statistics, to publish a monthly price index reflecting the retail prices of items purchased generally by individuals 62 years of age and older, such index to be known as the Consumer Price Index for the Elderly.

H.R. 835. January 4, 1977. House Administration. Requires the Comptroller General to conduct each year an audit of the financial transactions and accounts relating to the conduct of official business of 44 Members of the House of Representatives. Requires such an audit to be conducted whenever requested by the Committee on Standards of Official Conduct of the House of Representatives. States that information necessary to complete such an investigation shall be provided to the Comptroller General by the subject of the investigation.

H.R. 836. January 4, 1977. International Relations. Suspends sales of defense articles and services for six months to Iran, Saudi Arbia, Iraq, Qatar, Bahrain, the United Arab Emirates, Oman, and Kuwait, unless the President transmits to Congress and Congress approves by joint resolution a statement of policy with respect to sales, credit, and guarantees to such countries under the Mutual Security Act of 1954 and the Foreign Military Sales Act.

H.R. 837. January 4, 1977. Interstate and Foreign Commerce. Declares that the Federal Communications Act shall not be construed to require the availability of broadcasting time to any person. Repeals the "equal time" provision relating to availability of broadcasting time to legally qualified candidates for public office.

Repeals the prohibition on political editorializing by noncommercial educational broadcasting stations.

H.R. 838. January 4, 1977. Interstate and Foreign Commerce. Amends the Federal Cigarette Labeling and Advertising Act to require the Secretary of Health, Education, and Welfare to include in his annual report to Congress on the health consequences of smoking, effects on nonsmokers of involuntary inhalation of cigarette smoke.

H.R. 839. January 4, 1977. Interstate and Foreign Commerce. Revises the warning label on cigarette packages and requires the inclusion on such package of a label bearing a statement of the tar and nicotine content.

H.R. 840. January 4, 1977. Interstate and Foreign Commerce. Directs the President to take all necessary action to enforce price regulations and all orders issued under the Emergency Petroleum Allocation Act of 1973. Directs the Federal Trade Commission to monitor actions taken by the President or his delegate to enforce such regulations and orders.

H.R. 841. January 4, 1977. Interstate and Foreign Commerce. Prescribes criteria for Federal, State, and local agencies regulating electric utilities which would require that rate schedules accurately reflect long-run incremental costs of service and that price differentials for different customers classes reflect actual documented differentials in cost of service.

Prohibits any allowance for recoupment of any advertising costs except if such advertising is designed to discourage energy con-

sumption during peak load periods or to encourage conservation of electricity in general.

Establishes standards for the treatment of fuel adjustment clauses and for the determination of effective dates for proposed changes in rates and schedules.

H.R. 842. January 4, 1977. Judiciary. Requires the registration of all firearms. Sets forth specifications for handguns which must be met before the Secretary of the Treasury may approve the handgun for sale.

H.R. 843. January 4, 1977. Judiciary. Makes it unlawful for any person to willfully intercept or record any wire or oral communication without the consent of all parties to such communication.

Eliminates exceptions to the prohibition against manufacturing, possessing, selling, advertising, or sending in interstate or foreign commerce any electronic or mechanical device knowing or having reason to know that the design for such device renders it primarily useful for the purpose of surreptitious interception of oral or wire communications.

H.R. 844. January 4, 1977. Judiciary. Requires that a witness before Congress or a Federal court, grand jury, or agency consent and be given transactional immunity before testimony may be compelled by court order.

Directs the Attorney General to report annually to the Administrative Office of the United States Courts and to Congress with respect to such orders.

H.R. 845. January 4, 1977. Judiciary. Prohibits the Department of Justice and the Federal Bureau of Investigation from compensating any person for furnishing information unless such compensation is expressly authorized by law.

Repeals authorization for appropriations to the Federal Bureau of Investigation for expenses of unforeseen emergencies of a confidential character the purpose for the spending of which need not be specified.

H.R. 846. January 4, 1977. Judiciary. Repeals the provision excepting all positions in the Federal Bureau of Investigation from the Federal competitive service.

H.R. 847. January 4, 1977. Judiciary. Makes it unlawful for any person to import, manufacture, sell, buy, transfer, receive, transport, own, or possess any handgun or handgun ammunition. Authorizes the Secretary of the Treasury to exempt certain handguns from this prohibition.

H.R. 848. January 4, 1977. Judiciary. States that no sentence of death shall be imposed upon any person convicted under Federal, territorial, or State law and that no unexecuted death sentence shall be carried out after the enactment of this Act. Directs that each provision authorizing or requiring the imposition of capital punishment shall be deemed to authorize or require the imposition of life imprisonment and that death sentences remaining unexecuted on the date of the enactment of this Act shall be deemed sentences of life imprisonment.

H.R. 849. January 4, 1977. Post Office and Civil Service. Increases to 90 days the period before an election during which a Member of, or Member-elect to, the Congress may not make a mass mailing as franked mail if such Member or Member-elect is a candidate in such election.

H.R. 850. January 4, 1977. Ways and Means. Amends the Internal Revenue Code to provide identical income tax rates for single persons and married couples filing joint returns. Limits the earned income that must be reported by a married individual filing a separate return to the amount actually earned by that individual.

H.R. 851. January 4, 1977. Public Works and Transportation. Directs the Administrator of the Environmental Protection Agency to establish research and demonstration programs for the control of sludge. Authorizes financial assistance for sludge removal programs.

H.R. 852. January 4, 1977. Rules. Amends the Impoundment Control Act of 1974 by requiring the President to transmit a special message to Congress before rescinding or reserving any part of any budget authority. Declares that no such rescission shall become effective until Congress has acted on a bill effecting such rescission.

H.R. 853. January 4, 1977. Science and Technology. Directs the Administrator of the Energy Research and Development Administration to establish a program for research and development of industrial energy conserving technologies. Authorizes financial assistance in the form of grants and loans for the development and demonstration of such technologies, with special attention to be given to stimulation of depressed industrial areas.

H.R. 854. January 4, 1977. Small Business. Amends the Small Business Act to empower the Small Business Administration to make loans to small businesses seriously affected by a shortage of energy producing materials.

H.R. 855. January 4, 1977. Ways and Means. Amends Title II (Old-Age, Survivors, and Disability Insurance) to decrease 20 to 5 the number of years a divorced woman must have been married to an insured individual in order for her to qualify for wife's or widow's benefits on his wage record.

H.R. 856. January 4, 1977. Ways and Means. Amends Title II (Old-Age, Survivors, and Disability Insurance) of the Social Security Act to provide that the remarriage of a widow, widower, or parent shall not terminate his or her entitlement to widow's, widower's, or parent's insurance benefits or reduce the amount thereof.

H.R. 857. January 4, 1977. Ways and Means. Amends Title II (Old-Age, Survivors, and Disability Insurance) of the Social Security Act and the Railroad Retirement Act to qualify an individual for disability insurance if such individual has the required number of quarters regardless of when such quarters were attained.

H.R. 858. January 4, 1977. Ways and Means. Amends Title II (Old-Age, Survivors, and Disability Insurance) of the Social Security Act to provide that the automatic cost-of-living increases in benefits be made on a semiannual basis (rather than only on an annual basis as at present).

H.R. 859. January 4, 1977. Ways and Means. Amends Title II (Old-Age, Survivors, and Disability Insurance) of the Social Security Act by removing the limitation upon the amount of outside income which an individual may earn while receiving benefits.

H.R. 860. January 4, 1977. Ways and Means. Establishes the Internal Revenue Administration in the executive branch of the Federal Government for the purpose of administering and enforcing the Internal Revenue Code.

Transfers all present functions, instructions, rules, or regulations which were promulgated or administered by the Secretary of the Treasury or his delegate with respect to the enforcement of the Internal Revenue Code, to the Internal Revenue Administration.

H.R. 861. January 4, 1977. Ways and Means. Amends the Internal Revenue Code to disallow the deduction of oil company advertising expenses incurred for purposes other than the sale of products or services.

H.R. 862. January 4, 1977. Interstate and Foreign Commerce; Public Works and Transportation. Prohibits smoking in specified areas of Federal facilities and in interstate passenger carrier facilities. Requires the separation of smokers from nonsmokers in certain areas of such facilities.

H.R. 863. January 4, 1977. Small Business; Banking, Finance and Urban Affairs. Amends the Small Business Act by authorizing the Small Business Administration to make loans to individuals and home-builders for the purchase and installation of qualified solar heating or solar heating and cooling equipment procured from small business concerns.

Directs the Energy Research and Development Administration to: (1) establish procedures for inspecting and evaluating solar heating and cooling equipment; (2) review new equipment as developed; (3) periodically review certifications of such equipment for validity; and (4) transmit pertinent data to the Small Business Administration for its use in certifying equipment for purposes of the loan program created by this Act.

H.R. 864. January 4, 1977. House Administration. Prohibits travel at Government expense outside the United States by Members of Congress who have been defeated, or who have resigned or retired.

H.R. 865. January 4, 1977. Post Office and Civil Service. Changes the title of Federal hearing examiners to administrative law judges. Sets the salary for such officials at 90 percent of the salary paid United States district court judges.

H.R. 866. January 4, 1977. Veterans' Affairs. Provides for a burial allowance to be paid: (1) to any State or political subdivision thereof for burying a veteran in any cemetery owned by the State or subdivision if such cemetery or section thereof is used solely for the interment of veterans; or (2) to a person prescribed by the deceased veteran if burial is in a cemetery other than the kind described.

H.R. 867. January 4, 1977. Veterans' Affairs. Permits certain veterans with service-connected disabilities who are retired members of the uniformed services to receive compensation concurrently with retired pay, without deduction from either.

H.R. 868. January 4, 1977. Interstate and Foreign Commerce; Ways and Means. Amends Title XVIII (Medicare) and Title XIX (Medicaid) of the Social Security Act to include the services of licensed practical nurses under the coverage provided pursuant to such Titles.

H.R. 869. January 4, 1977. Public Works and Transportation. Establishes an Office of Ridesharing within the Urban Transportation Administration of the Department of Transportation Administration to coordinate Federal ridesharing programs. Establishes procedures and guidelines for State ridesharing programs. Authorizes financial assistance for ridesharing programs, and research and demonstration projects.

H.R. 870. January 4, 1977. Judiciary. Amends the Bankruptcy Act to include among debts which have priority specified debts to consumers based on deposits of money made in connection with the purchase, lease, or rental of goods or services for personal or household use not delivered on the date of bankruptcy or on account of a cause of action based on the breach of an implied or express warranty in connection with such goods or services.

H.R. 871. January 4, 1977. Judiciary. Amends the Immigration and Nationality Act to eliminate the limit on the number of alien children which may be adopted.

H.R. 872. January 4, 1977. House Administration. Prohibits travel at Government expense outside the United States by Members of Congress who have been defeated, or who have resigned or retired.

H.R. 873. January 4, 1977. Interstate and Foreign Commerce. Prohibits the shipment or sale in interstate commerce of nonreturnable beverage containers for which no reasonable refundable money deposit is required.

Directs the Secretary of Health, Education, and Welfare to define the term "nonreturnable containers."

H.R. 874. January 4, 1977. Ways and Means. Amends the Internal Revenue Code to provide a $5,000 tax exclusion for persons aged 65 or over for amounts received as an annuity, pension, or other retirement benefit, and for all persons receiving retirement benefits under a public retirement system.

H.R. 875. January 4, 1977. Ways and Means. Amends the Internal Revenue Code to allow a deduction to individuals who rent their principal residences for a portion of the real property taxes paid or accrued by their landlord.

H.R. 876. January 4, 1977. Ways and Means. Amends Title II (Old-Age, Survivors, and Disability Insurance) of the Social Security Act to provide that the automatic cost-of-living increases in benefits be made on a semiannual basis (rather than only on an annual basis as at present).

H.R. 877. January 4, 1977. Ways and Means. Directs the Secretary of Labor, through the Bureau of Labor Statistics, to prepare a "Consumer Price Index for the Elderly". States that the Index shall be a statistical measure of the changes in the prices of goods and services bought by individuals, as a group, who are 65 years of age or older or are otherwise entitled to monthly benefits under Title II (Old-Age, Survivors, and Disability Insurance) of the Social Security Act.

H.R. 878. January 4, 1977. Ways and Means. Amends Title II (Old-Age, Survivors, and Disability Insurance) of the Social Security Act to eliminate restrictions which are presently applicable in determining whether a person is the widow of an individual insured for benefit purposes.

H.R. 879. January 4, 1977. Ways and Means. Amends the Social Security Act to assure a minimum annual income to all elderly residents of the United States.

H.R. 880. January 4, 1977. Ways and Means. Interstate and Foreign Commerce. Amends Title XVIII (Medicare) of the Social Security Act to authorize payment for specified services performed by chiropractors, and physical examination, and related routine laboratory tests.

H.R. 881. January 4, 1977. Interior and Insular Affairs; International Relations; Interstate and Foreign Commerce. Direct the Nuclear Regulatory Commission to cease the granting of licenses or construction authorizations for certain nuclear power plants pending the outcome of a comprehensive study by the Office of Technology Assessment. Requires a five-year independent study of the nuclear fuel cycle by the Office of Technology Assessment with final reports and recommendations to be made to the Congress.

H.R. 882. January 4, 1977. Interior and Insular Affairs; International Relations; Interstate and Foreign Commerce. Directs the Nuclear Regulatory Commission to cease the granting of licenses or construction authorizations for certain nuclear power plants pending the outcome of a comprehensive study by the Office of Technology Assessment with final reports and recommendations to be made to Congress.

H.R. 883. January 4, 1977. Ways and Means. Amends the Internal Revenue Code to allow a limited income tax deduction for agency fees, court costs, attorneys' fees and other necessary costs and fees incurred in the adoption of a child.

H.R. 884. January 4, 1977. Banking, Finance and Urban Affairs. Directs the Secretary of Housing and Urban Development to convey specified lands to the city of Fayetteville, Georgia.

H.R. 885. January 4, 1977. Education and Labor. Amends the Occupational Safety and Health Act of 1970 to prohibit the assessment of penalties against an employer where such employer has corrected the violations with which he is charged within a prescribed abatement period.

H.R. 886. January 4, 1977. Education and Labor. Amends the Occupational Safety and Health Act of 1970 to require the Secretary of Labor to take the differences between the light residential construction industry and the heavy construction industry into consideration when promulgating standards for such industries.

Stipulates that the standards promulgated for the light residential construction industry shall be kept separate and distinct, and shall reflect the less hazardous conditions in such industry.

H.R. 887. January 4, 1977. Government Operations. Establishes a Department of Education within the executive branch. Transfers to the Secretary of Education educational functions now handled by various Federal offices including the Office of Education, the Office of Economic Opportunity, the Department of Health, Education, and Welfare, and the Department of Defense.

H.R. 888. January 4, 1977. Government Operations. Requires the Secretary of the Treasury to prepare and make public annual consolidated financial statements for all expenditures of the United States, utilizing the accrual method of accounting.

H.R. 889. January 4, 1977. Government Operations. Requires the Administrator of General Services, when intending to dispose of any real property by the United States, to notify the Members of Congress representing the district in which such property is located.

H.R. 890. January 4, 1977. House Administration. Provides each Representative to Congress with 98 copies of the Congressional Record, 30 more than previously allocated.

H.R. 891. January 4, 1977. International Relations. Prohibits the authorization of any appropriation or the making of any payment to the United Nations or an affiliated agency in excess of the amount determined by the devision of the total assessment of such organization by the number of member nations as to January 1 of each year.

H.R. 892. January 4, 1977. Interstate and Foreign Commerce. Amends the Uniform Time Act to revise the terminating date of daylight savings time from the last Sunday in October to the first Monday of September.

H.R. 893. January 4, 1977. Interstate and Foreign Commerce. Amends the Federal Food, Drug, and Cosmetic Act to remove the requirement that the words "margarine" or "oleomargarine" be prominently displayed on package labels. Prescribes the manner in which margarine or oleomargarine may be served at public eating places.

Requires the regulation of margarine and oleomargarine by Federal agencies to be as uniform as practicable.

H.R. 894. January 4, 1977. Judiciary. Penalizes certain activities relative to commerce in the following: (1) stolen transportation tickets; (2) counterfeit, forged, or altered transportation tickets; (3) equipment for forging or counterfeiting transportation tickets.

H.R. 895. January 4, 1977. Judiciary. Directs that, in every criminal action arising under Federal law, determination of whether any article is obscene, lewd, lascivious, or filthy be made, unless the defendant has waived a jury trial, without comment by the court upon the weight of the evidence.

States that no court of the United States or of the District of Columbia shall have jurisdiction to review or set aside a jury finding with respect to obscenity in any criminal action arising under Federal law for the possession, sale, dissemination, or use of obscene materials. States that no Federal court shall have jurisdiction to review such a jury determination in any such State or local prosecution.

H.R. 896. January 4, 1977. Judiciary. Requires specified minimum prison sentences for any individual who uses or carries a firearm during the commission of a Federal felony and for whoever is convicted by a State court of a crime punishable by a term of imprisonment exceeding one year and used or carried a firearm transported in, or affecting, interstate or foreign commerce during the commission of such crime.

H.R. 897. January 4, 1977. Post Office and Civil Service. Repeals the provisions of law establishing the Commission on Executive, Legislative, and Judicial Salaries.

H.R. 898. January 4, 1977 Veterans' Affairs. Revises the eligibility requirements for outpatient dental services and treatment for veterans who were prisoners of war.

H.R. 899. January 4, 1977. Veterans' Affairs. Revises the effective date for determining death compensation, dependency and indemnity compensation, or death pensions for veterans and their survivors.

H.R. 900. January 4, 1977. Ways and Means. Amends Title II (Old-Age, Survivors, and Disability Insurance) of the Social Security Act to provide that any individual who is entitled to a monthly benefit under such title for the month preceding the month in which such eligible individual dies shall be entitled for the month in which he dies to a prorated benefit based upon a specified formula.

H.R. 901. January 4, 1977. Judiciary; Rules. Requires that the public be given an opportunity to participate in the rulemaking proceedings of a Federal agency.

Requires that proposed rules be submitted to Congress for disapproval before they become effective.

H.R. 902. January 4, 1977. Interstate and Foreign Commerce. Amends the Fair Packaging and Labeling Act to require that packaged consumer commodities be labeled to show their total selling price.

H.R. 903. January 4, 1977. Public Works and Transportation. Amends the Federal Aviation Act of 1958 to authorize the Civil Aeronautics Board to grant exemptions from the requirements of such Act for all-cargo operations in interstate air transportation pending consideration of an application for initial certification under such Act if such exemption is in the public interest.

H.R. 904. January 4, 1977. Veterans' Affairs. Provides that recipients of veterans' pension and compensation will not have the amount of such pension or compensation reduced, or entitlement thereto discontinued, because of increases in monthly social security benefits.

H.R. 905. January 4, 1977. Ways and Means. Amends the Internal Revenue Code to allow employers to take the credit for expenses of work incentive programs for wages paid new, full-time handicapped employees over the first cumulative 12 months of their employment.

H.R. 906. January 4, 1977. Interstate and Foreign Commerce. Prohibits the sale of natural gas or electric energy except in accordance with a fixed rate schedule approved by a regulatory authority in accordance with prescribed procedures, including prior public notice and a full evidentiary hearing.

Establishes procedures for judicial review in the case of alleged violations by a regulatory authority.

H.R. 907. January 4, 1977. Ways and Means. Amends the Internal Revenue Code to provide that the income tax liability of individuals with an adjusted gross income of $30,000 or less shall not exceed ten percent of such income.

H.R. 908. January 4, 1977. Banking, Finance, and Urban Affairs. Prescribes procedures for foreclosure of multifamily mortgages owned or held by the United States encumbering real estate located in any State. Provides for the designation of a foreclosure commissioner who shall have a nonjudicial power of sale and who shall conduct foreclosures and sales as a fiduciary to both the mortgagor and the United States.

H.R. 909. January 4, 1977. Judiciary. Requires specified minimum prison sentences for felons using or carrying a firearm during the commission of a felony which may be prosecuted in a Federal court. Subjects such felons to possible increased sentence as dangerous special offenders.

H.R. 910. January 4, 1977. Post Office and Civil Service. Extends to 120 days the period before any general election involving a Member of or Member-elect to Congress within which such Member or Member-elect

is prohibited from sending mass mailings as franked mail.

H.R. 911. January 4, 1977. Education and Labor Amends the Occupational Safety and Health Act of 1970 to provide that any employer who successfully contests a citation or penalty under such Act shall be awarded a reasonable attorney's fee and other reasonable litigation costs.

H.R. 912. January 4, 1977. Interstate and Foreign Commerce. Amends the Communications Act of 1934 to prohibit the television broadcasting of programs portraying nudity, obscenity, or explicit sexual activity.

H.R. 913. January 4, 1977. Judiciary. Directs the United States to pay reasonable litigation costs, including attorney fees, to prevailing defendants in civil actions in which the United States is a plaintiff.

H.R. 914. January 4, 1977. Veterans' Affairs. Repeals the existing program of mortgage protection life insurance for veterans with a permanent and total service-connected disability. Establishes a new program of mortgage protection life insurance for such veterans.

H.R. 915. January 4, 1977. Veterans' Affairs. Increases the rates of disability compensation for disabled veterans, and the rates of dependency and indemnity compensation for their survivors.

H.R. 916. January 4, 1977. Veterans' Affairs. Increases pension payments to a surviving spouse of a war veteran when she attains age 78 years.

H.R. 917. January 4, 1977. Veterans' Affairs. Increases the rates of vocational rehabilitation, educational assistance and special training allowance paid to eligible veterans and persons.

H.R. 918. January 4, 1977. Veterans' Affairs. Extends to all career personnel of the Veterans' Administration the preference for attendance at Regional Medical Education Centers heretofore limited only to VA medical and health personnel.

H.R. 919. January 4, 1977. Veterans' Affairs. Gives the Administrator of Veterans' Affairs the authority to extend medical services to veterans of World War I who have non-service connected disabilities.

H.R. 920. January 4, 1977. Veterans' Affairs. Permits funds to be appropriated for the construction, acquisition or alteration of Veterans' Administration medical facilities upon submission to appropriate Congressional committees of written notice and a project prospectus.

H.R. 921. January 4, 1977. Veterans' Affairs. Prohibits the Administrator of Veterans' Affairs from readjusting the schedule of ratings of veterans' disabilities without prior notification to both Houses of Congress.

H.R. 922. January 4, 1977. Ways and Means. Amends Title II (Old-Age, Survivors, and Disability Insurance) of the Social Security Act by removing the limitation upon the amount of outside income which an individual may earn while receiving benefits.

H.R. 923. January 4, 1977. Judiciary; Rules. Requires any rule proposed by any Government agency to be submitted to Congress with a full explanation of such rule. States that such rule shall become effective no later than 60 days after submission to Congress unless either House adopts a resolution disapproving such rule.

H R. 924. January 4, 1977 Ways and Means; Interstate and Foreign Commerce. Amends Title XVIII (Medicare) of the Social Security Act to authorize payment for specified services performed by chiropractors, and physical examination, and related routine laboratory tests.

H.R. 925 January 4, 1977. Ways and Means; Interstate and Foreign Commerce. Amends Title XVIII (Medicare) of the Social Security Act to provide payment for optometric and medical vision care under the supplementary medical insurance program.

H.R 926 January 4, 1977 Government Operations Establishes the Government Executive Analysis and Reform (GEAR) Commission and a Task Force on American Federalism.

Directs the Commission to study the structure of Federal agencies and programs and to recommend methods to improve the efficiency of the Federal Government.

Directs the Task Force to study the appropriate levels of responsibility shared among Federal, State and local governments and to recommend constitutional legislative, and administrative changes necessary to achieve a proper balance and division of Federal, State and local roles.

H.R. 927. January 4, 1977. Education and Labor. Directs the Secretary of Labor to establish a program to: (1) fund training and employment programs for youths in jobs on public service and private employment projects; and (2) provide special employment assistance to unemployed youths, the goal of such program to be the elimination of youth unemployment. Establishes within the Department of Labor a National Youth Full Employment Board and a Youth Job Guarantee Office to assist in the administration of the program.

Amends the Comprehensive Employment and Training Act of 1973 to require prime sponsor planning councils to select, plan, and evaluate projects assisted under this Act.

H.R. 928. January 4, 1977. Public Works and Transportation. Amends the Local Public Works Capital Development and Investment Act of 1976 to restrict grants under the Act to those areas where unemployment rates exceed the national average. Increases the amount authorized to be appropriated under such Act.

H.R. 929. January 4, 1977. Judiciary. Amends the Clayton Act to prohibit companies engaged in production, refining, and marketing of petroleum products from acquiring or retaining an interest in coal, oil shale, tar sands, uranium, geothermal steam, or solar energy assets.

H.R. 930. January 4, 1977. Rules; Government Operations. Terminates within four years of the date of enactment of this Act all regulatory agencies unless before that time the President and Congress conduct separate studies, determine that such agencies continue to serve the purposes for which they were created, and recommend that any such agency or some of the functions thereof should not be eliminated. Requires similar review every seven years of each regulatory agency not eliminated by this Act or each regulatory agency created after the enactment date of this Act, with automatic termination of an agency unless the Congress and the President recommend its continuation.

H.R. 931. January 4, 1977. Government Operations. Requires the Administrator of General Services, where a specified amount of land within a State or local governmental unit is Federal real property, to pay to such unit amounts equivalent to the property taxes which would have been collected had the property been privately owned.

H.R. 932. January 4, 1977. Education and Labor; Judiciary. Eliminates the jurisdiction of any United States court to require that pupils be assigned to particular schools on the basis of their race, color, religion or national origin. Prohibits the withholding of Federal financial assistance to induce the assignment of pupils to a particular school on the basis of race, color, religion or national origin.

H.R. 933. January 4, 1977. Ways and Means. Amends the Internal Revenue Code to limit application of the Tax Reform Act's elimination of the sick pay exclusion for persons who have not retired on total disability, to taxable years beginning after December 31, 1976.

H.R. 934. January 4, 1977. Ways and Means; Interstate and Foreign Commerce Amends Title IV (Aid to Families with Dependent Children), Title XVIII (Medicare), and Title XIX (Medicaid) of the Social Security Act to provide that the Federal matching rate for purposes of reimbursement to States under the programs of aid to needy families with children and medical assistance shall be set at 75 percent.

H.R. 935. January 4, 1977. Interior and Insular Affairs; Judiciary; Merchant Marine and Fisheries. Amends the Outer Continental Shelf Lands Act to establish a policy of increased development of oil and gas resources on the Outer Continental Shelf while ameliorating any adverse impacts of such development.

Revise procedures for bidding, leasing, and exploration of Outer Continental Shelf lands. Requires consultation by the Secretary of the Interior with affected coastal States and regional advisory boards established pursuant to this Act.

Establishes an Offshore Oil Pollution Compensation Fund to ameliorate the effects of discharges of oil from offshore facilities and vessels. Details procedures for assessment of liability for oil spill damages and removal costs.

H.R. 936. January 4, 1977. Interstate and Foreign Commerce. Prohibits the sale of beverage containers without a minimum refund value of five cents. Requires labeling of refund values on all such containers. Prohibits sale of metal beverage containers with detachable openings.

H.R. 937. January 4, 1977. Interstate and Foreign Commerce. Prohibits the sale of beverage containers without a minimum refund value of five cents. Requires labeling of refund values on all such containers. Prohibits sale of metal beverage containers with detachable openings.

H.R. 938. January 4, 1977. Agriculture. Directs the Secretary of Health, Education, and Welfare, to establish minimum standards of sanitation for imported diary products. Requires inspection and labeling of imported dairy products to certify compliance with sanitation standards.

H.R. 939. January 4, 1977. Agriculture. Sets, under the Agricultural Act of 1949 as amended, the price support for milk.

H.R. 940. January 4, 1977. Judiciary. Prohibits employees of the United States from engaging in specified national secuirty crimes. Imposes penalties for the commission of such crimes.

Establishes an independent office to be known as the Legal Office of National Security Affairs to be directed by the National Security Solicitor for the purpose of enforcing the prohibitions specified in this Act.

H.R. 941. January 4, 1977. Judiciary. Amends the Clayton Act to prohibit persons with nonfarming business assets in excess of $3,000,000 from engaging in the production of agricultural products. Directs the Secretary of Agriculture to acquire, under certain circumstances, any property or interest of which a person must divest himself by virtue of this prohibition.

H.R. 942. January 4, 1977. Post Office and Civil Service. Prohibits the United States Postal Service from closing any post office which serves a rural area or small town unless: (1) a majority of the persons regularly served by such post office approve the closing; (2) it establishes a rural station or branch which provides the same postal services as the post office and does not result in any change in the address of persons served by such post office; or (3) it establishes a rural route to serve the area. Allows the Postal Service to establish a rural route as a substitute for an existing post office upon making specified determinations.

H.R. 943. January 4, 1977. Ways and Means. Amends the Internal Revenue Code to exempt corporations organized solely to provide reserves and deposit insurance for credit unions from the income tax.

H.R. 944. January 4, 1977. Interior and Insular Affairs; Interstate and Foreign Commerce; Science and Technology. Creates a

Federal Oil and Gas corporation to oversee the exploration and development of oil and gas on Federal lands in a manner consistent with environmental and conservation interests. Stipulates that sales of oil or natural gas by the Corporation shall be made at fair and reasonable prices designed to foster competition in energy-related industries.

H.R. 945. January 4, 1977. Agriculture. Extends the authority of the Secretary of Agriculture to make direct or insured loans, under the Consolidated Farm and Rural Development Act, to farmers for the acquisition and improvement of owner-operated farms up to the net worth of the farm as improved.

Grants special consideration to young farmers with respect to such loans.

Revises the repayment requirement for such loans.

H.R. 946. January 4, 1977. Judiciary. Requires candidates for Federal office, Members of the Congress, and officers and employees of the United States to file statements with the Comptroller General with respect to their income and financial transactions.

H.R. 947. January 4, 1977. Judiciary. Requires candidates for Federal office, Members of the Congress, and officers and employees of the United States to file statements with the Comptroller General with respect to their income and financial transactions.

H.R. 948. January 4, 1977. Judiciary. Requires candidates for Federal office, Members of the Congress, and officers and employees of the United States to file statements with the Comptroller General with respect to their income and financial transactions.

H.R. 949. January 4, 1977. Education and Labor. Increases the authorization of funds for grants under the Museum Services Act.

H.R. 950. January 4, 1977. International Relations. States that the place of birth of an individual issued a United States passport shall not be disclosed in the passport.

Amends the Immigration and Nationality Act to eliminate the requirement that the passport of an individual seeking entry into the United States disclose the birthplace of such individual.

H.R. 951. January 4, 1977. Interstate and Foreign Commerce. Amends the Public Health Service Act to require the Secretary of Health, Education, and Welfare to make grants to public or nonprofit entities for research projects in fertility and sterility in humans and the human reproductive process.

Authorizes the Secretary to establish specialized treatment centers in the field of human reproduction.

H.R. 952. January 4, 1977. Ways and Means. Amends the Social Security Act by adding Title XXI—Minimum Income Maintenance Benefits, which establishes a national program to guarantee a minimum adequate income for all qualified residents of the United States.

H.R. 953. January 4, 1977. Banking, Finance and Urban Affairs; Ways and Means. Authorizes the Secretary of the Treasury, upon application by a municipality, to guarantee any bond issued by the municipality.

Amends the Internal Revenue Code to exclude the interest on any municipal bond guaranteed pursuant to this Act from the gross income exemption of interest on the obligations of a State or any subdivision thereof.

H.R. 954. January 4, 1977. Interstate and Foreign Commerce; Ways and Means. Amends the Internal Revenue Code to increase the excise tax on cigarettes. Amends the Public Health Service Act to establish a National Cancer Research Fund in the Treasury to be partially funded from the additional excise taxes collected under this Act.

H.R. 955. January 4, 1977. Public Works and Transportation. Authorizes the Secretary of Transportation to make grants to States and municipalities for the construction of bikeway projects.

H.R. 956. January 4, 1977. International Relations. Amends the Export Administration Act of 1969 to regulate the export of nuclear material, equipment, and devices.

H.R. 957. January 4, 1977. Interstate and Foreign Commerce. Establishes a National Voluntary Medical and Hospital Services Insurance Agency charged with the responsibility to make all necessary preparations to offer subscriptions and enrollments, and to commence payment of claims for benefits claimed by enrollees under a National Voluntary Medical and Hospital Services Insurance Plan. Preempts all similar or duplicate hospital and medical service insurance benefits or payments provided by any other agency of the United States.

H.R. 958. January 4, 1977. Ways and Means; Interstate and Foreign Commerce. Amends Title XVIII (Medicare) of the Social Security Act to eliminate all the deductibles, coinsurance, and time limitations presently applicable to benefits thereunder. Eliminates medicare taxes as the method of financing hospital insurance benefits and premium payments as the method of financing supplementary medical insurance benefits. Includes within the coverage of Title XVIII eye care, dental care, hearing aids, prescription drugs, prosthetics, one physical checkup a year, preventive care, diagnosis of breast cancer, services of clinical psychologists, and services of registered nurses. Establishes a system of adminitrative and judicial review of claims which arise under the supplementary medical insurance program.

H.R. 959. January 4, 1977. Judiciary; Rules. Requires that the public be given an opportunity to participate in the rulemaking proceedings of a Federal agency.

Requires that proposed rules be submitted to Congress for disapproval before they become effective.

H.R. 960. January 4, 1977. Judiciary; Rules. Requires that the public be given an opportunity to participate in the rulemaking proceedings of a Federal agency.

Requires that proposed rules be submitted to Congress for disapproval before they become effective.

H.R. 961. January 4, 1977. Judiciary; Rules. Requires that the public be given an opportunity to participate in the rulemaking proceedings of a Federal agency.

Requires that proposed rules be submitted to Congress for disapproval before they become effective.

H.R. 962. January 4, 1977. Rules. Requires review of Federal programs to determine if they warrant continuation. Directs the President to conduct such review of the programs covered by the annual budget. Requires Congress to make such review every four years.

H.R. 963. January 4, 1977. Rules; Government Operations. Abolishes within three years of the enactment of this Act, or three years after they have been established, all Federal regulatory agencies unless the President and Congress determine that such agencies should continue to exist.

H.R. 964. January 4, 1977. Armed Services. Prohibits the Department of Defense from using its appropriated funds to: (1) conduct any research involving the use of dogs, for the purpose of developing or improving radioactive, chemical, or biological warfare agents; or (2) procure dogs for use in experiments involving the testing of toxic chemical substances, if alternative methods are available.

H.R. 965. January 4, 1977. Banking, Finance and Urban Affairs. Directs the Comptroller General to audit annually the Federal Reserve Board, the Federal Advisory Council, the Federal Open Market Committee, all Federal Reserve Banks and their branches, including transactions of the System Open Market Account.

H.R. 966. January 4, 1977. Ways and Means; Interstate and Foreign Commerce. Amends Title II (Old-Age, Survivors, and Disability Insurance) of the Social Security Act to permit the payment of old-age insurance to a married couple on their combined earnings record. Directs that the remarriage of a widow, widower, or parent shall not terminate or reduce entitlement to widow's, widower's, or parent's insurance benefits. Increases the amount of outside earnings which is permitted an eligible individual.

Amends Title XVIII (Medicare) of the Social Security Act to provide coverage for clinical psychologists' services and specified tests and examinations for breast cancer.

H.R. 967. January 4, 1977. Public Works and Transportation. Repeals the present provision of the Airport and Airway Development Act which limits the charges for Federal inspection or quarantine services at airports of entry or other inspection points during regularly established hours of service on Sunday and holidays to those charges applicable during regularly established hours of service on weekdays.

H.R. 968. January 4, 1977. Ways and Means. Amends the Internal Revenue Code to repeal the restrictions against income averaging by individuals recently supported by other individuals.

H.R. 969. January 4, 1977. Agriculture. Transfers all functions of the Secretary of Agriculture under the Food Stamp Act of 1964 to the Secretary of Health, Education, and Welfare.

H.R. 970. January 4, 1977. Education and Labor. Amends the Occupational Safety and Health Act of 1970 to provide that any employer who successfully contests a citation or penalty under such Act shall be awarded a reasonable attorney's fee and other reasonable litigation costs.

H.R. 971. January 4, 1977. House Administration. Prohibits travel at Government expense outside the United States by Members of Congress who have been defeated, or who have resigned or retired.

H.R. 972. January 4, 1977. International Relations. Prohibits the settlement of a debt owed to the United States by a foreign country in an amount less than the full value of the debt, unless approved by Congress by concurrent resolution.

H.R. 973. January 4, 1977. International Relations. Restricts payments of the United States to the United Nations to the ratio of the population of the United States to the total population of member nations.

H.R. 974. January 4, 1977. Interstate and Foreign Commerce. Amends the Uniform Time Act to designate the last Sunday in February as the starting date for daylight savings time.

H.R. 975. January 4, 1977. Judiciary. Directs the United States to pay reasonable litigation costs, including attorney fees, to prevailing defendants in civil actions in which the United States is a plaintiff.

H.R. 976. January 4, 1977. Judiciary. Amends the Hobbs Act to impose penalties for interfering with commerce by willfully causing property damage of at least $2,000 at or near a factory, construction site, or other place where work or business of an employer or owner is carried on or where such employer or owner transports, stores, or maintains property.

Stipulates that a violation of such provision or the provision prohibiting interference with commerce through robbery, violent acts, or extortion shall not be nullified or mitigated by certain factors.

H.R. 977. January 4, 1977. Post Office and Civil Service. Requires all persons admitted to a competitive examination given by the Civil Service Commission or appointed in the competitive service to: (1) be citizens of the United States; or (2) owe permanent allegiance to the United States.

H.R. 978. January 4, 1977 Rules. Amends the Congressional Budget Act of 1974 to require Congress to review each Federal program at least every six years as though it were being proposed to be enacted for the first time. Prohibits the extension of budget authority for any such program beyond such

six year period until the Congressional committees with jurisdiction over such programs conduct such reviews.

H.R. 979. January 4, 1977. Veterans' Affairs. Establishes a mortgage protection life insurance program for certain veterans unable to acquire commercial life insurance because of service-connected disabilities.

H.R. 980. January 4, 1977. Ways and Means. Amends the Internal Revneue Code to allow a limited income tax deduction for agency fees, court costs, attorney's fees and other necessary costs and fees incurred in the adoption of a child.

H.R. 981. January 4, 1977. Ways and Means. Amends the Internal Revenue Code to increase the excise tax on cigarettes. Amends the Public Health Service Act to establish a National Cancer Research Fund in the Treasury to be partially funded from the additional excise taxes collected under this Act.

H.R. 982. January 4, 1977. Ways and Means. Amends the Internal Revenue Code to allow as a credit against the income tax a limited amount of specified higher education expenses, including tuition, fees, books and supplies, incurred by the taxpayer for himself and any dependents.

H.R. 983. January 4, 1977. Ways and Means. Amends the Internal Revenue Code to allow a deduction for donations of blood to charitable organizations in an amount equal to $25 for each pint donated.

H.R. 984. January 4, 1977. Ways and Means. Amends Title II (Old-Age, Survivors and Disability Insurance) of the Social Security Act by removing the limitation upon the amount of outside income which an individual may earn while receiving benefits.

H.R. 985. January 4, 1977. Ways and Means. Amends Title II (Old-Age, Survivors, and Disability Insurance) of the Social Security Act to permit the payment of old-age insurance benefits to a married couple on their combined earnings record where that method of computation produces a higher combined benefit.

H.R. 986. January 4, 1977. Education and Labor; Judiciary. Amends the Work Hours Act of 1962 and the Walsh-Healey Act to permit specified government contractors to compute wages on the basis of either a four-day workweek consisting of ten-hour workdays or a five-day workweek consisting of eight-hour workdays.

H.R. 987. January 4, 1977. Ways and Means. Interstate and Foreign Commerce. Amends Title XVIII (Medicare) of the Social Security Act to provide payment for hearing aids and dentures under the supplementary medical insurance program.

H.R. 988. January 4, 1977. Judiciary. Directs that orders of a State court or a court of the District of Columbia relative to the custody of children of divorced or separated parents be given full faith and credit by every other State and the District of Columbia until such issuing court no longer has under the law of the State in which it is located, or declines to exercise, jurisdiction over modifications of such orders.

H.R. 989. January 4, 1977. Judiciary. Directs that orders of a State court or a court of the District of Columbia relative to the custody of children of divorced or separated parents be given full faith and credit by every other State and the District of Columbia until such issuing court no longer has under the law of the State in which it is located, or declines to exercise, jurisdiction over modifications of such orders.

H.R. 990. January 4, 1977. Agriculture. Directs the Secretary of Agriculture to conduct research and development related to new methods of protein production, fertilizer production, and processing vegetable protein.

Directs the Secretary of Health, Education, and Welfare to develop an educational program relating to the preparation and use of such food products.

H.R. 991. January 4, 1977. Armed Services. Authorizes the President to appoint the sons and daughters of recipients of the Distinguished Service Cross, the Navy Cross, or the Air Force Cross to the appropriate service academy.

H.R. 992. January 4, 1977. Armed Services. Entitles otherwise ineligible members of the uniformed services and their dependents to medical and dental care in a uniformed services facility during a 60-day period following separation from service. Grants post exchange and commissary privilege to such individuals during this period.

H.R. 993. January 4, 1977. Armed Services. Prohibits the contracting for the construction of any vessel for the Navy at any place outside the United States.

H.R 994. January 4, 1977. Banking, Finance and Urban Affairs. Authorizes the Secretary of Labor to make loans to industry and business in certain areas to aid in the financing of pollution control facilities.

H.R. 995. January 4, 1977. Banking, Finance and Urban Affairs. Establishes the National Bank for Cooperative Housing to make and guarantee loans to private and public housing developers for the purchase or construction of low- and middle-income cooperative housing when reasonable interest loans are not available from other sources.

H.R. 996. January 4, 1977. Banking, Finance and Urban Affairs. Establishes a presidentially-appointed National Landlord and Tenant Commission.

Directs the Commission to conduct a study of landlord-tenant problems, to review the implementation of the provisions of this act to grant funds to the States for the establishment and maintenance of housing courts, in accordance with standards established by the Commission, to develop model lease and rental agreements, and to appoint a body to develop and implement a national rent control plan.

Sets forth the rights and obligations of tenants and landlords.

H.R. 997. January 4, 1977. Education and Labor. Authorizes the President to call and conduct a White House Conference on Education in 1978.

H.R. 998. January 4, 1977. Education and Labor. Amends the Education of the Handicapped Act to provide that local educational agencies shall not receive Federal financial assistance unless they provide educational services to all handicapped children at levels of expenditure at least equal to outlays for other children.

H.R. 999. January 4, 1977. Education and Labor. Authorizes the Secretary of Health, Education, and Welfare to make grants to States for the establishment of vision screening programs for public school students.

H.R. 1000. January 4, 1977. Education and Labor. Directs the Secretary of Health, Education, and Welfare to develop and implement youth camp safety standards, including standards for day camps, resident camps, and travel camps.

Establishes the Advisory Council on Youth Camp Safety within the Department of Health, Education, and Welfare.

EXTENSIONS OF REMARKS

GUN CONTROL

HON. RICHARD T. SCHULZE

OF PENNSYLVANIA

IN THE HOUSE OF REPRESENTATIVES

Wednesday, March 30, 1977

Mr. SCHULZE. Mr. Speaker, as a sportsman, hunter, and gun collector, I believe that the time has come to focus attention on the criminal rather than the law-abiding citizen or the instrument of crime when we discuss the question of gun control. Ultimately, individuals, and not society or some inanimate object, are responsible for crime. With this in mind, I am introducing legislation which is intended to increase the mandatory sentencing for criminals who carry a firearm in the commission of a crime. When one considers that only 3 percent of those who commit serious crimes in this country are sent to jail for doing so, there is obviously some need for improvement.

Our laws should be directed toward the criminal use of firearms rather than toward restricting the vast legitimate use by law-abiding citizens. Restrictive gun control legislation is not the answer.

According to FBI reports, firearms are used in less than 4 percent of all serious crimes nationwide. While firearms ownership has gone up steadily over the years, the rate of homicides involving guns has been declinnig. Over the past 10 years, less than one-fourth of the aggravated assault cases across the Nation were committed with firearms. There are perhaps 200 million privately owned firearms in the United States today, of which only one-sixth of 1 percent are used in the commission of crimes annually, including less than 1 percent of all handguns. I do not believe that the 50 million law-abiding gun owners in this Nation must be penalized because the firearm is misused by a small and often criminal element in society.

In addition, the efficacy of restrictive Federal gun control legislation is doubtful. Nationwide, there are over 20,000 firearms statutes in effect as the crime rate continues to increase. Hawaii, which has the lowest rate of gun ownership, has twice the crime rate of Wyoming, which has the highest rate of gun ownership.

In New York City, according to the Sunday Bulletin, "robbery-murders have been on the increase, although that city has some of the strictest antigun laws in the Nation, the kind gun-control advocates see as the answer to violent crimes."

In 1975, the Philadelphia Inquirer reported that the "famous Philadelphia gun law, enacted in 1965, did regulate the sale of all firearms. Its stated purpose was to reduce crime." Interestingly enough, however, from 1965 to 1973 gun killings in the city rose from 62 to 250. The article stated further that "this is an increase of 400 percent. Robberies committed with guns increased from 662 to 3,776—a 474-percent jump. Even the most casual observer must agree that the

strict gun purchase section of the gun law did not reduce crime."

Aside from the criminal use of firearms, the firearms accident rate also concerns the advocates of strong Federal gun control legislation. Let me simply cite the fact that there are 20 times more accidental deaths with cars, 8 times more through falls, and 3 times more through drowning, according to recent National Safety Council reports.

Finally, I believe that gun ownership is a fundamental right. The right to bear arms was rooted in 17th century English Common Law, and it was so important to our Founding Fathers that it was placed second in the Bill of Rights, preceded only by the individual's freedom of expression. Noteworthy is the fact that Samuel Adams and Patrick Henry were emphatic about the need for such an amendment prior to ratification of the Constitution. They protested that as initially submitted the document did not guarantee "the right of having arms in your own defense." Thomas Jefferson stated that "No free man shall ever be debarred the use of arms." The intention of our forefathers could not have been more clearly stated.

Mr. Speaker, our efforts must be spent in improving our criminal justice system, and not just penalizing those citizens who properly use firearms. I will work to see to it that the rights of the law-abiding citizens of this country are protected, and I urge my fellow colleagues to join me in that task.

The text of my bill is as follows:

H.R. —

A bill to amend title 18 of the United States Code to increase the penalties imposed for certain firearms violations

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That section 924(c) of title 18 of the United States Code is amended—

(1) by striking out "not less than one year nor more than ten years." and inserting in lieu thereof the following: "not less than five nor more than fifteen years.";

(2) by striking out "not less than two nor more than twenty-five years and, notwithstanding" and inserting in lieu thereof the following: "not less than fifteen nor more than twenty-five years. Notwithstanding"; and

(3) by striking out "a second or subsequent conviction of such person or give him" and inserting in lieu thereof the following: "any conviction under this subsection or give".

NAVY PRESSES CASE FOR CARRIERS

HON. BOB WILSON

OF CALIFORNIA

IN THE HOUSE OF REPRESENTATIVES

Wednesday, March 30, 1977

Mr BOB WILSON. Mr. Speaker, I have long been an advocate of nuclear powered combatant ships for our Navy and was severely disappointed earlier this month when the House scuttled plans for a fourth nuclear powered aircraft carriers of the Nimitz class.

When the new "smaller" carrier recommended by the administration and a Nimitz class vessel are compared size for size and dollar for dollar, there does not seem to be all that much difference. I fail to see the rationale for opting for the "smaller" carrier. It is faulty in that we would be giving up an increased offensive/defensive capability for the lessened cost. A good rundown of these various comparisons of the two carriers is given in the March 9, 1977, issue of the Baltimore Sun and I commend it to my colleagues for their information:

NAVY PRESSES CASE FOR CARRIERS

(By Charles W. Corddry)

WASHINGTON.—The Navy made it clear to Congress yesterday that it is unwilling to give up yet on either nuclear-powered aircraft carriers or flattops of very substantial size.

Though a current of frustration ran through the House Armed Services Committee, where its carrier supporters were rebuffed by the House last week, the Navy's top uniformed officer testified that nuclear ships are superior and some should be built for the 1980's.

"I firmly believe we should build nuclear carriers in the future," Adm. James L. Holloway 3d, chief of naval operations, declared.

Questioning brought out that he meant nuclear carriers of both the so-called smaller size now being planned and the current Nimitz size. He did not believe, he said, that the Navy's three gigantic Nimitz class ships are the last of their size.

In what many saw as a historic turn, the House voted 252 to 161 last week to sink the fourth Nimitz-class ship before construction had started. This was done on recommendation of former President Ford, who had a last minute change of mind, and of President Carter.

The proposal of both, which the House vote was seen as endorsing, was to replace the fourth nuclear Nimitz class carrier with two smaller conventionally powered carriers, one in fiscal 1979 and one in fiscal 1981. Admiral Holloway and fellow admirals yielded to that but the Naval chief said yesterday that later smaller carriers should be built with nuclear power.

In his testimony, he gave the committee an idea of what is meant by smaller or "moderate" ships.

While the new-type carrier has not yet been designed, it appears that it could wind up displacing more than 70,000 tons—hardly a small ship even by comparison with the 94,400 ton Nimitz class. Its flight deck may be 900 feet or more, while the Nimitz's is 1,040.

The rationale behind the administration's pressure for "smaller" ships is that the growing size and power of the Soviet fleet require more and therefore less costly U.S. ships. The huge carrier is seen as increasingly vulnerable, though Admiral Holloway yesterday rated the proposed smaller ship as less capable of self-defense because, for one reason, of its smaller aircraft complement.

The fourth Nimitz class carrier, had it been built, would have cost $2.2 billion by Pentagon estimates. The Navy says starting from scratch and designing and building a smaller nuclear ship would cost as much. But it hopes to build the new conventional type for $1.25 billion.

The ship, though still on paper, appears to be growing in size. By the 1990's the Navy hopes to have vertical-takeoff planes, making small decks feasible. Until then, the admirals insist new carriers must be big enough to handle all current sea-going planes.

In the Pentagon's annual defense posture statement in January, the new carrier was described as displacing 40,000 to 50,000 tons. Admiral Holloway yesterday used the figures 50,000 to 60,000 tons.

Representative Les Aspin (D., Wis.), no big carrier fan, brought out that those figures were for "standard load," that is, a ship without its own fuel, reserve boiler water and aircraft fuel. With those added and under "full load," the ship would displace another 8,000 to 12,000 tons, Admiral Holloway said.

Judging by differences between standard and full load displacement for current carriers—about 13,000 tons for the Nimitz and Enterprise and 20,000 tons for the conventional Kitty Hawk—the admiral's estimate may be conservative.

He said the new ship would have to have two to three catapults, four arresting gears, two to three aircraft elevators—all factors making for size and weight. It would carry about half the Nimitz's 90 to 100 plane complement.

MOBILE TEACHERS' RETIREMENT ASSISTANCE ACT

HON. LEON E. PANETTA

OF CALIFORNIA

IN THE HOUSE OF REPRESENTATIVES

Wednesday, March 30, 1977

Mr. PANETTA. Mr. Speaker, today I am introducing the Mobile Teachers' Retirement Assistance Act of 1977.

The bill is necessary to protect the retirement benefits of teachers who move across State lines to teach. Since the bill is identical to bills introduced in the 92d, 93d, and 94th Congresses, it is my hope that the 95th Congress will recognize the urgency of this legislation which I feel would rectify a serious injustice to which public school teachers have been subjected for many years. A similar bill has already been introduced in the Senate by my good friend Senator CRANSTON of California.

Current law in effect prohibits teachers from moving across State lines because such a move would require them to lose hard-earned retirement benefits. At a time when there is severe unemployment in the teaching profession and when there is a growing need for experienced teachers in our rural areas, it is essential that Congress pass legislation which will encourage mobility for teachers so that they can relocate to areas where employment opportunities and the demand for their skills is the greatest.

In my State of California alone, over 100,000 elementary, secondary, and community college teachers have taught in other States. Nationally, 26 percent of America's teachers have taught in at least two States. Those teachers, who spent an average of 8 years working in other States, lost their retirement benefits when they moved.

The bill I am introducing today would establish a Federal-State program to assist in the funding of these benefits for public school teachers. It would en-

able teachers who have taught in two or more States to retire at the end of their careers with benefits substantially the same as they would have received by teaching in a single State for their entire careers. In addition, the bill would extend Federal funds to aid in the financing of recognized out-of-State service credit for those States who wish to participate.

Many of our State retirement systems have made attempts to rectify this prohibition of teacher mobility, but because of the limitation of State funds the interstate nature of this problem makes Federal legislation a necessity.

Mr. Speaker, I include in the RECORD, following my remarks, the text of the bill:

H.R. 5825

A bill entitled "Mobile Teachers' Retirement Assistance Act"

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That this Act may be cited as the "Mobile Teachers' Retirement Assistance Act."

FINDINGS AND STATEMENT OF PURPOSE

SEC. 2. The Congress finds that the transfer of qualified teaching personnel between schools operated by public educational agencies in one State and schools operated by public educational agencies in another State is seriously impeded because of the possibility of forfeiture of retirement benefits in the system from which a teacher transfers and that the resulting immobility of teachers impedes the mobility of the Nation's work force by hindering the growth and development of new communities. It is therefore the purpose of this Act to protect commerce by facilitating the interchange of teaching personnel from a public educational agency in another State by providing Federal financial assistance in the transfer of credits from one State to another State.

DEFINITIONS

SEC. 3. For purposes of this Act—

(1) The term "State retirement system" means a State retirement system established under State law or local public retirement system recognized or established by State law, in which teachers participate.

(2) The term "teacher" means an individual who is employed in a professional educational capacity by a board of education.

(3) The term "covered teacher" means a teacher who is a member of a State retirement system.

(4) The term "board of education" means any board, committee, commission, or agency authorized by State law to direct a public educational system, school or institution of higher education.

(5) The term "State" includes the District of Columbia and Puerto Rico, and any other territory of the United States which has a public retirement system which includes teachers.

(6) The term "Commissioner" means the United States Commissioner of Education.

(7) The term "out-of-State" means public teaching service performed in another State or in elementary or secondary schools operated by the United States Department of the Interior and United States Department of Defense and recognized by the system in which the teacher is a member for the purpose of service credit under the terms and conditions of the law governing the operation of such system.

(8) The term "vesting" means a right of a teacher who separates from covered employment after having at least the minimum years of credited service required under the State retirement system, and has left his contributions in the retirement fund of such system, to a retirement benefit upon reaching an age specified in the law governing the terms and conditions of the system, which benefit is based at least in part on public contributions.

SEC. 4. (a) In order to participate in the program provided for in this Act, a State retirement system must—

(1) provide for payment of retirement benefits on account of out-of-State service by a covered teacher as required in section 5(c).

(2) allow covered teachers at least ten years of out-of-State credit for public teaching service not covered by the system which is not vested under another State retirement system, upon payment by the covered teacher by the date of retirement of a portion of the cost involved and payment from public funds of the remainder.

(3) require no more than one year of in-State service for each year of out-of-State service credit granted.

(4) provide that the teacher's payment for out-of-State service credit shall not exceed 25 per centum of the total cost of the out-of-State service credit.

(5) provide for vesting after not more than five years of credible service in the State retirement system.

(6) provide for making such reports, in such form and containing such information as the Commissioner may reasonably require to carry out his functions under this Act, and for keeping such records and for affording such access thereto as the Commissioner may find necessary to assure the correctness and verification of such report.

(b) If the Commissioner determines a State retirement system meets the requirements of subsection (a), he shall approve it for participation in the benefits of this Act.

OUT-OF-STATE CREDIT PROVISIONS

SEC. 5. (a) The Commissioner shall, as soon as practical after the end of each calendar year, make a Federal contribution to each State retirement system which he has approved under section 4(b) on account of each covered teacher who is a member of the system who retired during the fiscal year (or other twelve-month period designated by the system) which ended in such calendar year with credited out-of-State service as a teacher. The Federal contribution on account of each year of each such teacher's credited out-of-State service as a teacher shall be an amount equal to 50 per centum of the total cost as determined by the retirement system at such teacher's age on date of retirement: *Provided,* That if the teacher has not reached age sixty, the cost shall be determined as if the teacher were age sixty.

(b) The Federal contribution under this section to a State retirement system shall be limited to the reserve required to provide not more than ten years of out-of-State service credit: *Provided,* That the Commissioner may determine maximum reserve factors at each age, beginning at age sixty, for purposes of the Federal contribution.

(c) The Federal contribution under this section to a State retirement system shall be used for the same purposes, and subject to the same terms and conditions, as are funds of the system derived from other sources. Retirement benefits under such system attributable to service credited under this section shall not be paid on a basis less favorable to the retired teacher than the payments made under such system which are attributable to service other than that so credited.

COST OF ADMINISTRATION

SEC. 6. The Commissioner shall each fiscal year make a grant to each State retirement system which is approved to participate in this Act. Each such grant shall be an amount equal to 2 per centum of the Federal contribution made under section 5.

EFFECTIVE DATE

SEC. 7. This act shall become effective October 1, 1977, with respect to teachers who retire on or after such date.

APPROPRIATIONS AUTHORIZED

SEC. 8. For the purpose of making such Federal payments, there is hereby authorized to be appropriated for the fiscal year ending September 30, 1978, and for each succeeding fiscal year the amount necessary to effectuate the provisions of this Act.

MS. CHERYL DEE MORRISSEY: WINNER OF THE VFW VOICE OF DEMOCRACY SCHOLARSHIP PROGRAM FOR THE STATE OF NEVADA

HON. JIM SANTINI

OF NEVADA

IN THE HOUSE OF REPRESENTATIVES

Thursday, March 31, 1977

Mr. SANTINI. Mr. Speaker, Ms. Cheryl Dee Morrissey, the VFW Voice of Democracy Winner for the State of Nevada, has written an eloquent and thought-provoking essay about America. Through her imaginative style and her grasp of the language, Ms. Morrissey has set forth a penetrating look at our country's past and her promising future. I am pleased and proud to share this work with my colleagues:

1976–77 VFW VOICE OF DEMOCRACY SCHOLARSHIP PROGRAM NEVADA WINNER

(By Cheryl Dee Morrissey)

There is no new thing to be said about America. No new word about the mountains, or the sea, or the stars. The years go their way, but the same mysterious sea beats upon the shore; the same silent stars keep holy vigil above a tired world. To these, men turn forever in unwearied homage. And thus with America. It is a sea in deep undervoice of mystic loneliness.

America, like the sea, changes and conforms to its environment, but it will always be a constant, such as the stars keeping their lonely vigil over the world and the sea, rushing to meet the shore.

Almost all my life I have spent around sailboats, and to me America is the flagship of the world. Living in these United States, I have the right to secure my future, for in its wake I am protected from the ravages of the world around me, an uncharted tempestuous sea.

America is a resplendent sailing vessel, structured from the bottom of its keel to the uppermost point of its mast, by the people and for the people. She was rigged to lean firmly but gently as the winds direct her, yielding always and ever to the intent of the population, her passengers. They have steered her out of slavery to equal rights, from depression to the highest standard of living in the world, from a few scattered colonies to fifty proud states.

I see her keel, reaching deep into the water, as our own Constitution, providing the balance and the weight which keeps us upright and solid in our voyage.

As she clips through the water, the ship America varies course by bearing upon the rudder, synonymous to the power of the vote, avoiding ill winds, opposite tides, and maelstroms the world about us contrives.

The ribs of this windjammer are strong and sturdy. They sustain the entire ship, weaving a network of timber which is seaworthy in all trials the ocean dares to concoct. The ribs in America's brand of democracy are the Amendments, sound and supportive.

I gaze upon three sails, flying high and full. The largest of the three, the Main Sheet, flies off the mast, as the main body of our government exists with the instrument of the Constitution and the Amendments. Ballooning on the bow of the vessel is the jib, aiding the main sail by pulling the ship America through the water, as state government helps to draw our form of democracy to success. The aftmost sheet is the Mizzen; it completes the ring from Constitutional Monarchy, representing local government.

But the whole must be greater than the sum of these parts. For this we have the ropes. Without them there would be no purpose, for they set the sails, and they serve as the combination of the will of the people and the power of electorate.

Thus, the vessel America sails the stormy ocean, avoiding all obstacles it produces, and in so doing the United States protects and secures my future. This is what America means to me, to have faith in a country which one knows cannot fail . . . who could not be proud to sail upon such a worthy vessel?

HANOVER COLLEGE CELEBRATES 150TH ANNIVERSARY

HON. LEE H. HAMILTON

OF INDIANA

IN THE HOUSE OF REPRESENTATIVES

Thursday, March 31, 1977

Mr. HAMILTON. Mr. Speaker, Hanover College in Hanover, Ind., is distinguished as the oldest 4-year liberal arts college in Indiana, and the only Presbyterian church-related college in the State. Hanover this year celebrates the 150th anniversary of its founding, 150 years of quality education within a Christian environment. Among those individuals who have shared in Hanover's heritage and are a part of her pride are alumni Harvey W. Wiley, author of the Pure Food and Drug Act, steel magnate and philanthropist William Henry Donner, and Thomas Hendricks, Vice President of the United States under Grover Cleveland.

Hanover's physical plant today includes 555 acres bordering the Ohio River in the southeastern corner of the State. The grounds contain 33 of the most modern educational and administrative facilities on any college campus of its size in the country. Course offerings in 23 academic disciplines are complemented by a strong intramural and intercollegiate athletic program, in addition to numerous cocurricular activities including music, drama, radio programing, student government, and 3 student publications. Fall and winter terms of 14 weeks are followed by a 5-week spring term which many students utilize for off-campus course work, internships, or study abroad. Two of the newest additions to the campus are the Lyman S. Ayres Athletic Field, a 70-acre physical education complex, and the Duggan Library, housing 205,000 volumes in addition to the special collections in its archives room. Construction of a center for fine arts is scheduled to begin this year. Hanover is also the site of nationally affiliated chapters of four sororities and five fraternities. Enrollment averages 1,000 men and women students per term.

Hanover College has been the sight of numerous "firsts" in the early years of its existence and these include:

The first seminary in the Northwest Territory;

The first college literary society in Indiana;

The first teacher training courses in Indiana;

The first laboratory teaching of chemistry in Indiana;

The first field study in the teaching of biology and geology in Indiana;

The first vocational education in Indiana;

The first college football and tennis in Indiana; and

The first football game played on a lighted field in Indiana.

Mr. Speaker, the educational purpose of Hanover College is summarized in the following statement: "The historic and continuing purpose of Hanover College is to provide a liberal education which will develop a searching mind sustained by Christian understanding. The aim, with clear insistence on free inquiry into the nature of man, is to lay the groundwork for a lifetime of intellectual and spiritual growth."

HIGH TAXES—A MAJOR CONCERN IN WISCONSIN

HON. ROBERT W. KASTEN, JR.

OF WISCONSIN

IN THE HOUSE OF REPRESENTATIVES

Thursday, March 31, 1977

Mr. KASTEN. Mr. Speaker, the Federal income tax burden on middle-income Americans is one of the most volatile issues in America today.

Survey after survey in Wisconsin pegs "taxes" as a major concern of the people.

Far too often when we approve billion dollar programs and deficits, I think we forget that the financial burden of Government today goes beyond the Federal level. People back home are paying more and more in State and local taxes, too. And at every level, inflation has caused overtaxation of all Americans.

My constituents in Wisconsin are particularly concerned about high taxes. They have reason to be· Wisconsin is a high tax State.

A recent study by the Federal Advisory Commission on Intergovernmental Relation shows that Wisconsin families pay the second highest personal income taxes in the Nation in three income categories—$10,000, $17,500 and $25,000. Wisconsin takes more tax out of a $10,000 income than other States take out of a $25,000 income.

I would like to share with my colleagues the complete results of this study, which appeared this week in U.S. News & World Report:

STATE INCOME TAXES—WHO PAYS MOST, LEAST

If you're wondering how your State's income-tax bite compares with that in others—

Biggest chunk of a family's income is taken by State income taxes in Delaware, Massachusetts, Minnesota, Oregon and Wisconsin

Heaviest taxed at all income levels is Minnesota.

Lightest income taxes, among States which levy them, are taken by Louisiana, Maine, Michigan, Nebraska and Ohio.

No income taxes at all are levied by nine States: Connecticut, Florida, Nevada, New Hampshire, South Dakota, Tennessee, Texas, Washington and Wyoming. New Jersey starts collecting an income tax this year

These are the findings in a new study by the staff of the Advisory Commission on Intergovernmental Relations, an independent research organization created by Congress in 1959.

The Commission computed the amount that each State levies at different levels of income. Those State tax figures on three incomes for the latest available year, 1974, are given below.

To show how widely the bite varies—

With a $10,000 income, a family will pay more than $250 in seven high-tax States, ranging from $255 in Maryland to more than twice that in Minnesota. But a similar family would pay less than $65 in eight other States.

With a $17,500 income, a Minnesota resident would pay more than $1,000, while five States levy from $801 to $611, and six others are under $200.

With a $25,000 income, the family of four will pay $1,000 or more in eight States and the District of Columbia. But five other States levy less than $400.

In fact, two States—Minnesota and Wisconsin—take more tax out of a $10,000 income than some others do out of a $25,000 income—Michigan, Louisiana, Nebraska and Maine.

On the average, State income taxes figure out to about $150 or 1.5 percent on an adjusted gross income of $10,000; $368 or 2.1 percent on $17,500, and $750 or 3 percent on $25,000.

The tax rates rise most steeply as income rises in California, Georgia, Idaho, New York, North Dakota and Oklahoma. Only in Pennsylvania is it the same for all incomes—a flat 2 percent.

Keep in mind, though, that the amount of a State's income tax is not a measure of the total tax burden it imposes. You also pay sales, property, real-estate and other taxes and fees.

A new nationwide study shows this—State's personal income tax for a married couple with two children

	At $10,000 of annual income	At $17,500 of annual income	At $25,000 of annual income
Alabama	$147	$339	$593
Alaska	182	369	668
Arizona	148	314	646
Arkansas	163	387	771
California	64	293	688
Colorado	157	382	785
Delaware	236	652	1,238
District of Columbia	250	579	1,107
Georgia	83	319	714
Hawaii	212	611	1,133
Idaho	138	474	973
Illinois	150	338	525
Indiana	150	300	450
Iowa	295	528	884
Kansas	126	297	560
Kentucky	243	444	750
Louisiana	48	125	227
Maine	60	160	359
Maryland	255	479	812
Massachusetts	277	641	1,013
Michigan	[1] 59	103	221
Minnesota	543	1,016	1,724
Mississippi	38	218	473
Missouri	109	268	567
Montana	279	499	947
Nebraska	35	158	330
New Mexico	84	238	527
New York	206	550	1,174
North Carolina	258	535	1,000
North Dakota	105	338	822
Ohio	55	188	390
Oklahoma	50	196	517
Oregon	238	633	1,184
Pennsylvania	200	350	500
Rhode Island	119	286	521
South Carolina	157	420	885
Utah	148	452	821
Vermont	216	520	946
Virginia	175	449	829
West Virginia	144	276	494
Wisconsin	365	801	1,488

[1] Refund of other taxes by State.

Ten States—Connecticut, Florida, Nevada, New Hampshire, New Jersey, South Dakota, Tennessee, Texas, Washington and Wyoming—did not levy a general personal-income tax in 1974, the year for which taxes are shown. New Jersey enacted an income tax last year.

Note: Figures assume the following—all income is from wages and salaries earned by one spouse. At $10,000, the optional standard deduction is used. At $17,500, itemized deductions of $3,520 are used. At $25,000, deductions of $4,365 are assumed.

For States that allow a deduction for federal income taxes, deductions were used: $791 at $10,000; $1,908 at $17,500, and $3,470 at $25,000. Figures for Michigan are based only on taxes for Detroit home-owners.

PROPOSED AMENDMENTS TO THE FEDERAL RULES OF CRIMINAL PROCEDURE

HON. JAMES R. MANN

OF NORTH CAROLINA

IN THE HOUSE OF REPRESENTATIVES

Thursday, March 31, 1977

Mr. MANN. Mr. Speaker, the Judiciary Committee's Subcommittee on Criminal Justice has pending before it several proposed amendments to the Federal Rules of Criminal Procedure. The subcommittee has studied these proposed amendments and has taken action on them that has resulted in the drafting of three bills. At the request of the subcommittee, I am introducing these three bills today. In order to understand the reasons for the subcommittee's action and decision to have three bills introduced, it is necessary to know something about the background of the proposed amendments.

They were promulgated last April by the Supreme Court, which was acting pursuant to statutes known as the Rules Enabling Acts—in this instance, 18 U.S.C. 3771 and 3772. At the same time, the Court also promulgated a set of rules to govern proceedings under 28 U.S.C. 2254 and 2255, sometimes referred to as habeas corpus proceedings.

The amendments to the Federal Rules of Criminal Procedure and the habeas corpus rules were to have taken effect on August 1, 1976. The Congress, however, enacted Public Law 94-349 and delayed their effective date. The effective date of all but two of the amendments to the Federal Rules of Criminal Procedure was delayed until next August 1—two of the amendments were allowed to go into effect last August 1. The effective date of the habeas corpus rules was delayed until 30 days after the 94th Congress adjourned sine die.

The subcommittee took up the habeas corpus rules last Congress and drafted legislation that approved most of them as proposed and approved the rest with modifications. The subcommittee's legislation was enacted by Congress, signed by the President and became Public Law 94-426.

The proposed amendments to the Federal Rules of Criminal Procedure are still pending before Congress. If Congress does nothing about them before August 1, 1977, the amendments as proposed by the Supreme Court will take effect. If Congress wants to have a say in what these amendments provide, it must enact legislation before August 1.

With that in mind, the Subcommittee on Criminal Justice began 3 days of hearings on the proposed amendments in February. We heard from a wide segment of the legal community during those hearings—judges, prosecutors, defenders, and law professors. On the basis of the information and testimony that it has received, the Subcommittee has drafted legislation which it is recommending to the Committee on the Judiciary. This legislation approves some of the proposed amendments, either in toto or in a modified form, and disapproves the others. I am introducing that legislation today, and it will be taken up at the next Judiciary Committee meeting. If approved by the commitee, it should come before the House by the end of April.

As I indicated, the subcommittee has decided to disapprove certain of the proposed amendments. It did so, not because it necessarily disagrees with the proposals, but because it felt that they required separate consideration and action. In the subcommittee's opinion, the proposed amendments adding a new rule to the Federal Rules of Criminal Procedure (rule 40.1) and amending an existing rule (rule 41(c)) deserve separate action by the Congress.

Because the subcommittee believes that these two proposed amendments require separate consideration and action, it has requested that I introduce legislation upon which it can act. Consequently, I am today introducing two bills, one that is substantively the same as proposed new rule 40.1 and one that is substantively the same as the proposed amendment to rule 41(c). These two bills will serve as the legislative vehicles for congressional action on the issues raised by those proposed amendments.

The subcommittee's purpose in proceeding in this manner is to insure that the Supreme Court's proposals receive thorough consideration and that the provisions of the amendments be well thought out and carefully drafted. It is not our purpose to bury the Supreme Court's proposals. The subcommittee has already scheduled a hearing on the legislation dealing with the proposed amendment to rule 41(c). The legislation dealing with proposed new rule 40.1 will also receive expeditious consideration by the subcommittee.

RULE 40.1

As I mentioned above, one of the bills embodies the substance of proposed new rule 40.1, which deals with procedures for removing a criminal case from State to Federal court. Removal of criminal, as well as civil cases is presently governed by 28 U.S.C. 1446.

The subcommittee found that some of the provisions in the proposed new rule were noncontroversial, but it also found that others raised some disturbing problems. Some of the provisions of the proposed rule are in conflict with the removal statute (28 U.S.C. 1446). For example, the statute provides that once a removal petition has been filed, the "State court shall proceed no further" (28 U.S.C. 1446(e)). The proposed new rule, however, would permit the State court to continue its proceedings up to the entry of judgment.

The subcommittee is of the opinion that it is unwise for a congressionally enacted statute and a rule of procedure to be in conflict like that. Due regard for a coordinate branch of the Government would seem to suggest that rule changes which, in effect, repeal parts of congressionally enacted statutes ought to be accomplished by means of legislation—especially here, where the proposed changes raise other problems.

Some of these other problems are illustrated by the provision in the proposed new rule requiring that a removal petition be filed no later than "10 days after the arraignment in State court." This conflicts with the present statute, which permits a petition to be filed at any time, 28 U.S.C. 1446. Changing the filing time raises problems other than questions related to the separation of powers doctrine. Pretrial procedures in State courts are quite diverse. In fact, in some jurisdictions, a State criminal trial will be concluded within 10 days of arraignment. Thus a defendant might not be able to file a petition before the State court enters judgment in his case—either in the proposed rule or by Advisory Committee note to the proposed rule. It is not clear what would happen in an instance where a removal petition was filed within the time allowed—10 days—but after the State court had entered a judgment of guilty. If the removal petition were found meritorious, could the case still be removed to Federal court? If removed, would a trial in Federal court be barred by the double jeopardy clause of the Constitution? It seems to the subcommittee that further information about arraignment and trial procedures in State courts is essential in drafting a provision that changes the present statute's provisions concerning the time for filing a removal petition.

I should also note that it has been questioned whether removal petitions really present a problem to the Federal courts. Representatives of the Judicial Conference, the people initially responsible for drafting the proposed new rule, testified at our hearings. While they testified that it was their impression that removal petitions were a problem, they had not statistics available to support this impression. The subcommittee would hope to develop further information on the need for changing the present removal statute.

RULE 41(C)

I am also introducing, at the subcommittee's request, a bill that is in substance identical to the proposed amendment to rule 41(c).

The Supreme Court's proposed amendment to rule 41(c) allows search warrants to be issued, if the circumstances make it reasonable, "upon sworn oral testimony of a person who is not in the physical presence of a Federal magistrate." Typically, the magistrate would receive such testimony over the telephone, and the whole procedure is sometimes referred to as the telephone search warrant procedure.

The proposed amendment provides that sworn oral testimony of the person shall be recorded and transcribed and that the transcription shall be certified by the magistrate and filed with the court. Before approving the issuance of a warrant, the magistrate must require the person requesting the warrant to read to him, verbatim, its contents. If the magistrate approves issuance of the warrant, the person requesting it will then sign the magistrate's name on a copy of it. If a search under this procedure is allowed, the copy of the warrant in the possession of the person who requested it must be returned to the magistrate.

Two States, Arizona and California, presently have statutes that provide procedures for obtaining a search warrant when the person requesting it is not physically present with the magistrate. The procedures in those States differ somewhat from the procedure established by the proposed amendment.

The intent of the proposed amendment according to its drafters, is to provide a method for obtaining a search warrant "when it is not reasonably practicable for the person obtaining the warrant to present a written affidavit to a magistrate." Advisory Committee note to proposed amendment to rule 41(c), in House Document No. 94–464, at 21. The rationale is that this procedure will encourage Federal law enforcement officers to seek search warrants in situations when they might otherwise conduct warrantless searches. See Advisory Committee note to proposed amendment to rule 41(c), in House Document No. 94–464, at 22. The subcommittee approves and applauds this goal.

However, several witnesses at our hearings suggested that the new procedure would not be used in lieu of warrantless searches. They asserted, instead, that it would be used in lieu of the present procedure, where the person seeking the warrant must appear in person before the magistrate. The subcommittee would, of course, be concerned if this were to come to pass.

The subcommittee is of the opinion that a Federal procedural rule on this topic ought to be drafted in light of the experience of those States that have such procedures. We can learn from them how they have dealt with the technological problems. We can find out whether and under what circumstances the procedure has proven beneficial. We can also find out whether the procedure has led to a reduction in the number of warrantless searches, or whether it has been used in lieu of the traditional procedure for obtaining a search warrant. To get answers to these questions requires additional time and study. The bill I am introducing at the subcommittee's request will give it the vehicle for conducting that study.

In conclusion, Mr. Speaker, let me reiterate what I said earlier. The subcommittee is not attempting to avoid dealing with removal petitions and telephone search warrants. The subcommittee is interested in those issues and intends to deal with them expeditiously. To this end, we have already scheduled a hearing on the bill dealing with telephone search warrants. Since many of the issues involved touch upon fundamental rights of our citizens, we believe that it is our obligation to study the problems thoroughly, decide what sort of legislation is appropriate, and then draft precise and clear language to deal with the problems.

A TRIBUTE TO DENNY BRACKEN

HON. CHARLES H. WILSON

OF CALIFORNIA

IN THE HOUSE OF REPRESENTATIVES

Thursday, March 31, 1977

Mr. CHARLES H. WILSON of California. Mr. Speaker, last Sunday, Denis Bracken, a news reporter with KNX Radio in Los Angeles and the CBS Radio Network, passed away at the age of 45. While my colleagues from outside the Los Angeles area may not immediately recognize the name, I assure you that his voice would be recognized in a second were you to hear it.

Denny Bracken's passing is an extremely sad moment. Not only was he a young and exceptionally gifted broadcaster, but he was, more importantly, a very decent person.

For every Los Angeles commuter who travels the freeways there is an instant love affair with the car radio. It makes bearable the long drive from home to work in the morning and the evening return. For every commuter who knows what it is like to measure distance in inches during rush hour, the voice of Denny Bracken was a reassuring comfort. He would reduce the headlines, usually filled with some international tragedy to a more human level. For instance, if a particular issue was the current talk of the city, Denny would call the particular individual involved, either in Washington, D.C., Sacramento, or Los Angeles, get their perspective and then present the various viewpoints in a fairly balanced report. In fact, several weeks ago, he called me in my Washington office to get my reaction to a report dealing with weaknesses in NATO. I felt we had a special relationship because if something happened that directly involved me or my congressional district, he would always try to call to get my reaction or my thoughts on the matter.

Denny was not what you would consider a straight news reporter, but more human interest oriented. In a large urban area like Los Angeles, he became the personal friend of many through the radio waves. One of his popular programs was a call-in talk show where he would get comments from average citizens, then talk about the issue and provide a little

perspective on what was going on. His programs were always informative but never impersonal.

Versatility was also a Denny Bracken trademark. With the CBS Radio Network, he cohosted the program "Mike Roy's Cooking Thing." Denny and chef Mike Roy, who ironically passed away only late last year, would discuss recipes and other cooking tidbits. The friendship and warmth expressed between the giant chef and his Irish cohort was something every person could identify with. After Mike Roy's death, Denny went on with the program, renamed "Meet the Cook," which was heard by 10 to 12 million people across the country.

He also reported sports and other major news events for KNX. As he said:

News, sports, food. I just can't make up my mind and I really don't want to. I have no desire to become a specialist and that's why KNX has been such a satisfying experience.

Jim Zaillian, a fellow coworker of Denny's and news director at KNX, said:

He was without parallel in broadcast journalism. In my 28 years in broadcasting, I've never known anybody with as much all-round talent.

Los Angeles is going to miss Denis Bracken and his reassuring voice. As one resident of that city, I will miss being able to turn on the radio on the drive from the airport to my home in Hawthorne and hear him deliver his personal kind of journalism. Good journalism is something more than the mere reporting of events. It is a journalist who is able to capture the imagination and conscience of the listening audience. Denny Bracken was able to capture that imagination. His programs raised the consciousness of Los Angeles, improved community spirit and helped to make life a little more pleasant for its residents.

He will definitely be missed.

INTRODUCES BILL TO KEEP STEAMSHIPS IN OPERATION

HON. FORTNEY H. (PETE) STARK

OF CALIFORNIA

IN THE HOUSE OF REPRESENTATIVES

Thursday, March 31, 1977

Mr. STARK. Mr. Speaker, today I am introducing a bill to amend the Merchant Marine Act of 1936 to allow a 5-year extension of Federal subsidies to the S.S. *Monterey* and the S.S. *Mariposa*. Without this action, the last two remaining U.S.-flag passenger ships will cease operation in April of next year.

Let me elaborate as to the reasons this action is in the best interest of the country. First, over 615 full-time jobs are directly connected to these ships, providing a livelihood to over 1,000 American workers. Additional jobs are provided in the longshore and shipyard industries. The loss of these jobs, especially at a time when we are working to create more employment, would be tragic and would impact heavily on the west coast.

Moreover, the operation of these vessels generates considerable amounts of money that is injected into our economy. The annual payroll of the *Mariposa* and *Monterey* is about $20 million, and it is estimated that at least an equal amount is spent in related services. This does not include the taxes paid to Federal and State governments each year. The continuation of the approximately $15 million in Federal subsidies paid to the ships' operator, the Pacific Far East Lines, would seem to be a conspicuous example of financing in which the Government receives more in direct and indirect revenues than it pays out in subsidies.

The ships also bring about 5,000 tourists each year from the west coast to Hawaii, and another 1,500 to Alaska, thereby contributing to those locales' economies. There is no reason that these vessels should not continue in operation. Pacific Far East Lines wants to keep them alive, and both the American Bureau of Shipping and the U.S. Coast Guard have indicated that the *Mariposa* and *Monterey* are in good shape and could operate until 1983.

Besides the obvious losses that would occur if we let these ships' operating subsidies be terminated in April of 1978, there are other less tangible effects. Cost cannot be attached to the ending of a tradition of American seagoing passenger service that dates back to the beginning of our Nation at a time when more passenger ships are sailing on world trade routes than at any other time. It would be reprehensible for us to sit idly by and let this happen.

We cannot turn our back on the plight of our last remaining passenger ships and on the American seamen for whom they provide jobs. I urge you to consider this bill and join me to keep the *Mariposa* and *Monterey* afloat.

BILL TO IMPROVE AND EXPAND HOME HEALTH CARE SERVICES

HON. HENRY B. GONZALEZ

OF TEXAS

IN THE HOUSE OF REPRESENTATIVES

Thursday, March 31, 1977

Mr. GONZALEZ. Mr. Speaker, I am introducing a bill today that will improve and expand the home health care services available under medicare and medicaid.

A very unfortunate situation has developed in our country in the last 10 years and that is the practice of placing the elderly in nursing homes. According to recent satistics, more than 1 million people over the age of 65 are in a nursing home and the shocking fact is that many of these people really do not belong there. They do not need the round-the-clock care provided by a nursing home nor the intensive medical care provided, but what they do need is a little skilled assistance to enable them to remain safely and happily at home.

Recent studies have determined that if adequate home health care programs were developed, these programs could prevent or postpone the institutionalization of as many as 2.5 million elderly. And the sad fact is that many of the elderly would rather remain in their own homes in comfortable and familiar surroundings within the neighborhood and among the friends that they have known for so many years. But many of them are afraid to do so because of their illness and the fear that if they become ill in the middle of the night, they could not get assistance or if they fell and broke a leg, they could not get help. So many of them are forced into spending their life savings on a nursing home because of the security it provides.

The bill I am proposing calls for a number of changes which include removing the limitation of 100 home health visits currently permitted under medicare part B, expanding home health services covered under medicare to include a full range of medical, homemaker and other correlative services, and removing the requirement that an individual need skilled nursing care in order to qualify for home health services.

I hope that the Committee on Ways and Means will explore the matter of home health coverage under medicare and medicaid in this Congress and give it the attention it deserves. HEW's director for the Office of Long Term Care recently said that no matter how good a nursing home is, it cannot substitute for a home environment, and I am sure that the elderly in our Nation would unanimously agree. Let us give the elderly the opportunity to live their golden years in familiar surroundings that hold many happy memories rather than an institutionalized environment that gives them no hope for tomorrow.

URGES ADVOCATE FOR THOSE WHO SERVED

HON. JAMES ABDNOR

OF SOUTH DAKOTA

IN THE HOUSE OF REPRESENTATIVES

Thursday, March 31, 1977

Mr. ABDNOR. Mr. Speaker, I rise today to echo the sentiments of many citizens throughout this great Nation. Yesterday the administration announced phase two of its "Bind the Wounds of the Vietnam War" program. I was appalled at phase one, but I do not think that I can find the words that express the contempt that I have for phase two. The people of this country were asked to turn the other cheek when the President announced his pardon. They did, but not without anguish. Now Mr. Carter has slapped those who served again. I speak in support of those who served this country honorably. It is about time they have an advocate. They were asked and they gave. In some cases, they were not asked but told. Not all who served agreed, but they gave their services when the country needed them. That has been the attitude which brought this country into its third century. Our Nation asked them to suffer and sacrifice. Many gave the utmost sacrifice. These are the people we owe our compassion to, not those who deserted our Nation.

Under the President's program, the guidelines for review are so all-encom-

passing that I do not know why he has included guidelines at all. Why did he not make a blanket upgrade? Then to add to it, he provides that if the review board refuses to upgrade the discharge, we will provide counsel for appeal. That is a nice thought. We have slighted those who served enough at the thought of an upgrade anyway. I could go on and on, but I think that I have made my position clear on this issue.

I would also like to touch on one other complication caused by this action that concerns me deeply. I am proud to be a member of the Veterans' Affairs Committee. I feel that our committee does its best to provide assistance to those veterans who honorably served this Nation. The Veterans' Administration provides unparalleled service to our veterans. But try as we do, we could do more. I would ask you to look at the facts for a moment. We do not have the funds to provide some of the things that our veterans sorely need. Look at unemployment, educational costs, hospital care. Need I continue? The President's proposal will not only upgrade discharges, but will make all of those people eligible for veterans' benefits. I ask you, is this just? I think not. Our committee has been struggling with the Budget Committee to get over $1 billion restored to our proposed budget. These funds are needed to provide adequate assistance to those who served. I do not have to tell you the needs of our veterans—you know them. I guess we will just have to tell our veterans, "Thanks for your time. We'll call you the next time we need your help, but don't expect much from us as we have got to be compassionate to those who decided not to help you."

I close by saying thank you, Mr. President, from those in our VA hospitals and those who are at Arlington and the other cemeteries throughout the Nation. I guess we have given them the compassion they asked for.

COCALICO HIGH SCHOOL BOYS BASKETBALL TEAM WINS STATE TITLE

HON. ROBERT S. WALKER

OF PENNSYLVANIA

IN THE HOUSE OF REPRESENTATIVES

Thursday, March 31, 1977

Mr. WALKER. Mr. Speaker, I would like to take note, for the benefit of my colleagues, of the accomplishments of a group of young athletes from Lancaster County, Pa. These young athletes are the members of the Cocalico High School basketball team.

As someone who has more than a passing interest in the sport of basketball, I find their recent victory as statewide basketball champions in Pennsylvania an outstanding accomplishment.

Their talent, their perseverance, and their dedication have brought this high honor not only to themselves and their school, but also to Lancaster County which has never before been home to a State boys basketball championship team.

I hasten to note that on their way to ultimate victory in the playoffs, the Cocalico Eagles faced perhaps their toughest adversary in the semifinals against another local team from Lancaster Catholic High School. This group of young men gave us all reason to be proud of their skill and their sportsmanship.

The spirit and magic surrounding this special group of young men from Cocalico was best evidenced last Saturday evening when thousands of supporters lined the streets of Denver, Pa., to welcome their champions home.

It is this kind of support that the Cocalico Eagles enjoyed through the regular season and the strenuous playoffs. A particularly important share of the credit goes to the families of the team players who, I am sure, figure prominently in the success of this team.

Congratulations would not be complete if I failed to mention Coach Ed McIlmoyle—the mentor, master strategist, and one of those unusual people who obviously brought out the best in those he took to the championship.

The coach, the player's families, the community of Denver, and the Cocalico area have reason to be proud of these young men. They set their sights on becoming the best and they achieved it.

This is the kind of attainment through teamwork that serves as an inspiration to all of us.

MINERAL DEVELOPMENT ACT OF 1977

HON. PHILIP E. RUPPE

OF MICHIGAN

IN THE HOUSE OF REPRESENTATIVES

Thursday, March 31, 1977

Mr. RUPPE. Mr. Speaker, the Committee on Interior and Insular Affairs, on which I serve, will soon be considering legislation to reform the mining law of 1872. This law presently permits individuals to search for, discover, and acquire title to the so-called hard rock minerals, such as copper, lead, zinc, silver, gold, and uranium, lying within the public domain.

The distinguished chairman of our committee, Mr. UDALL, has introduced legislation, H.R. 5806, which would, in essence, repeal the mining law of 1872 and substitute a completely new Federal leasing system for hard rock mineral development.

Secretary of the Interior Cecil D. Andrus has expressed his support of mining law reform and the Department of the Interior is expected to forward its recommendations to the Congress in the very near future.

The hard rock mining industry, through its national trade association, the American Mining Congress, has drafted legislation to correct many of the outmoded provisions of the mining law, modernize many of its other provisions, and, in general, simplify administration of the current act. It is my understanding that this bill was prepared by a panel of individuals who are extremely knowledgeable in the area of public land mineral law. This bill attempts to follow the recommendations made on the subject by the Public Land Law Review Commission. This bill also takes cognizance of the provisions of the recently enacted Federal Land Policy and Management Act of 1976.

I think that it is important that the recommendations of the mining industry for changes in the mining law be before the Congress and specifically the Committee on Interior and Insular Affairs. It is for that reason I introduced H.R. 5831 yesterday. I am not prepared to endorse any of the several proposals to reform or repeal the mining law at this time. Like many of my colleagues, I look forward to considering the merits of these proposals and I regard it as essential that the viewpoints of all those concerned with changes in our mineral development laws be before our committee as it begins its important work.

A PROPOSAL TO REVISE MEDICARE REQUIREMENTS AFFECTING RURAL HEALTH CARE FACILITIES

HON. MAX BAUCUS

OF MONTANA

IN THE HOUSE OF REPRESENTATIVES

Thursday, March 31, 1977

Mr. BAUCUS. Mr. Speaker, in the last Congress, I introduced legislation to amend title 18 of the Social Security Act as it pertains to rural health care facilities. Despite the lateness of introduction, it was of such importance that nearly 40 colleagues agreed to cosponsor. I am reintroducing it today.

The problem that my amendment addresses is not, I suspect, one of great national concern, but it is of intense concern to health officials both in my district and in selected other districts which have unusually small health facilities serving extremely sparsely populated rural areas. Allow me to provide some background on this problem.

In order to participate in the medicare program, provides and suppliers of health services must comply with specific requirements set forth in the statute and with other requirements pertaining to the health and safety of medicare beneficiaries which the Secretary of Health, Education, and Welfare is authorized by the statute to prescribe.

According to policy established by the Social Security Administration, a hospital is certified for participation in medicare if it meets all statutory requirements and is in substantial compliance with all regulatory requirements; that is, the deficiences do not represent a hazard to patient health and safety, and efforts are being made to correct the deficiencies.

The regulatory requirements are far reaching in scope, ranging from detailed specifications for facilities to the hiring of medical directors in nursing homes. Most of these regulations are necessary and desirable. However, their reasonableness is questionable with regard to extremely small health care facilities located in remote and isolated areas. The requirements do not take into consid-

eration certain problems that are unique to certain rural area facilities; for example, the small number of hospital beds, the scarcity of skilled health personnel, the limited spectrum of services offered, and the geographical isolation of these facilities.

Attempts to comply with HEW regulations in order to get the Federal funds, which many of these rural health facilities find necessary to remain solvent, have resulted in great expense and in some cases, closure of facilities altogether. Recognizing that some health care in isolated rural areas is better than none at all, the Social Security Administration certifies certain access hospitals—so named because failing to permit these hospitals to participate in the medicare program would amount to denying certain beneficiaries access to inpatient care. Most of the access hospitals are small and located in rural areas.

Despite the certification of access hospitals, it became apparent in the early 1970's that although good faith efforts were being made to secure qualified nursing personnel, some rural hospitals were having difficulty complying with the nursing staff requirements. Consequently, an amendment to the Social Security Act was passed which authorized the Secretary of HEW, under certain conditions, to waive the nursing requirement if he found that—

The hospital is located in a rural area and the supply of hospital services in the area is not sufficient to meet the needs of medicare beneficiaries residing therein;

The failure of the institution to qualify as a hospital would seriously reduce the availability of service to beneficiaries therein;

The failure of the institution to qualify as a hospital would seriously reduce the availability of services to beneficiaries; and

The hospital has made and continues to make a good faith effort to comply with the nurse staffing requirement, but compliance is impeded by lack of qualified nursing personnel in the area.

In the last Congress legislation was passed extending for 3 years until January 1, 1979, the Secretary of HEW's authority to waive the 24-hour nursing service requirements for certain rural hospitals. No waiver authority was provided with respect to any other condition of participation or standard relating to health and safety. During the floor debate on this legislation in the House of Representatives, the following was noted:

The present law allowing waivers for the 24-hour registered nurse coverage requirement has made possible for many good and otherwise qualified rural hospitals to continue as providers under medicare. Attracting enough RN's for 24-hour coverage has always been a problem for rural hospitals. Loss of certification as qualified providers under medicare would work a severe hardship on both rural hospitals and patients. Such facilities depend significantly on their patient load covered under these programs. A closing or loss of certification of just one of these hospitals would force an expensive and unneeded burden on the paitent, who might have to travel hundreds of miles to the next available medical facility.

The Senate Committee on Finance was in favor of extending the nursing staff waiver for 1 year only, as it believed the 3-year extension would serve to delay a more permanent solution to the problem. The Senate Finance Committee asked instead that a movement be made toward developing recommendations for legislative changes designed to establish specific rural hospital certification requirements commensurate with staff and facilities in rural areas.

I would like to identify the problems encountered by health officials in sparsely populated areas and to articulate solutions to those problems. My knowledge of this area is limited. I do not sit on a House committee with jurisdiction regarding this area. I do know that this is a serious problem for some isolated areas of the country. This problem must be addressed if adequate high standard health care facilities are to remain open in rural areas. My knowledge of this area stems largely from a hearing I held in my district in early 1976. Over a hundred health professionals, including hospital administrators, nurses, doctors, and nursing home directors from all 23 counties in my district attended. In addition two members of my staff have traveled to several small hospitals in the district to see first-hand the problems which these institutions face.

My statement today will simply present a proposal for providing realistic Federal certification standards which will allow for the continued existence of health facilities in many rural areas.

The legislation which I introduce today is somewhat different than the bill which I introduced during the last Congress. This bill would make permanent the 24-hour nursing waiver after its current extension expires in December of 1978.

Great flexibility is accorded rural health facilities in meeting the health and safety provisions relating to participation under medicare. Under this bill the Secretary of HEW would be required to take into account the geographic location, the scope of services rendered by a particular rural health facility, and the availability of qualified personnel when considering personnel requirements relating to rural health facilities.

Mr. Speaker, I feel compelled to point out one dilemma this bill poses. As I stated earlier, its to protect sick people who need health care facilities in sparsely populated, remotely located rural communities. Of the thousands of hospitals we have in the United States, I suspect that very few—perhaps less than 200—fit my image for facilities which need exemption from certain onerous Federal requirements. Yet, when I introduced a similar bill in the last Congress, I received support from some colleagues and health officials who are concerned about communities and hospitals which probably should not qualify for an exemption.

Thus, while the response last year broadened the base of support for this legislation, it also convinced some people who are concerned about preserving high health standards that my bill would actually reduce the quality of care in all rural areas. Mr. Speaker, that is not my intent, and I am perfectly prepared to sacrifice the broader support for a more narrowly drafted exemption.

Put another way, what I am trying to achieve through this legislation is to provide the Secretary of Health, Education, and Welfare with the discretion to exempt certain hospitals from certain requirements when those requirements are simply too heavy to bear. I am convinced that most rural health officials are making good-faith efforts to supply quality health care, and yet, invariably, they are concerned about the "oppressive" nature of HEW when it seeks compliance with certain regulatory requirements. Yet when I talk with HEW officials, they tell me that they have no discretion in enforcing such requirements. If that is so, my bill would provide them that discretion and thereby reduce the constant fear that local health officials in remotely located hospitals now have of losing Federal funds.

MIXED USE REFORMS

Perhaps the most significant aspect of this legislation is its provision relating to the "mixed use" of acute care and nursing care beds. At present, hospitals do not receive medical reimbursement for patients who are not found by utilization review boards to be in need of acute care facilities. Nursing homes, on the other hand, may qualify for medical reimbursement for those very patients if they meet certain Federal requirements.

If rural hospitals were allowed "mixed use" of their facilities, that is, medical reimbursement for acute-care patients and lesser Federal payment for nursing home patients, the results would be as follows: A higher occupancy rate for the hospitals and thereby lowering the per-patient costs; the possibility of better medical care for some patients who must otherwise be transferred to nursing homes; and the elimination of the need for nursing homes to gear up for more skilled medical care in order to serve the more ill patients being transferred sooner from hospitals and to qualify for medical reimbursement to pay for the costs of serving those patients.

It is my hope that this legislation will provide greater flexibility for certain health facilities—irrespective of whether they are thought of as hospitals or nursing homes—to meet Federal requirements and to provide economically viable health institutions.

Last year some representatives from nursing homes suggested that my bill might undermine their economic opportunities in rural areas. Quite the contrary is my intent. Where such facilities are having difficulty providing the kind of skilled nursing care needed to meet Federal quality requirements, my bill would simply switch that responsibility to a hospital in their community, provided that hospital is interested in providing long-term skilled nursing care.

Another aspect of the mixed-use question worth noting here is that some hospitals are now deterred from providing skilled nursing care because they are required by HEW accounting rules to re-

imburse costs on historical data which may no longer reflect actual costs of the hospital. Let me explain. As I understand it, reimbursement rates established for hospitals providing acute care and skilled nursing care are based on the average costs borne for specific patients. Thus, if the costs were established when half of a hospital's patients were skilled nursing patients, that figure could, in many cases, understate the actual costs borne by a hospital when its percentage of acute nursing patients increases beyond 50 percent.

While my bill may not specifically solve this problem. I do hope the Ways and Means Committee will see fit to address it when it reconsiders health cost control legislation later this year.

CONCLUSION

This legislation will not solve all of the problems which confront remotely located rural health facilities. My purpose for introducing this bill is to draw attention to the unique potential and critical problems facing rural hospitals. It is not intended to lower the quality of health care in rural areas.

In discussions across my district, hospital administrators, doctors, State enforcement officials, and other health providers universally agree that many of the conditions of participation under medicare have improved the quality of health care in rural areas. In virtually every instance, these rural health facilities have made continuing efforts to comply with the conditions of participation.

I am not attempting to create a double standard for rural health facilities. Rather, I am attempting to ensure that adequate health care will continue to be available to all Americans, including those who live in isolated rural areas. Unless Congress addresses this critical situation soon, some small rural health facilities will undoubtedly be forced to close. If that unfortunate event occurs, many rural health care providers will be forced to discontinue service for lack of adequate facilities. This will only compound the serious personnel shortages facing rural areas.

For these reasons I introduced the following bill:

H.R. 5808

A bill to amend medicare provisions as they relate to rural health care facilities

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That section 1861(e) of the Social Security Act is amended by adding the following sentence at the end thereof: "The term 'hospital' also includes a rural health facility of fifty beds or less (whether used exclusively for patients requiring inpatient hospital services or for such patients and patients requiring extended care services), which the Secretary has determined meets the definition relating to a rural area specified in subsection (e), subparagraphs (A) and (B) of this section, and which meets the other requirements of subsection (e), except that—

"(A) with respect to the requirements for nursing services applicable after December 31, 1978, such requirements shall provide for temporary waiver of the requirements, for such period as the Secretary deems appropriate, where (i) the facility's failure to fully comply with the requirements is attributable to a temporary shortage of qualified nursing personnel in the area in which the facility is located, (ii) a registered professional nurse is present on the premises to render or supervise the nursing service provided during at least the regular daytime shift, and (iii) the Secretary determines that he employment of such nursing personnel as are available to the facility during such temporary period will not adversely affect the health and safety of patients;

"(B) with respect to the health and safety requirements promulgated under paragraph (9), such requirements shall be applied by the Secretary to the facilities herein defined in such manner as to assure that personnel requirements take into account the availability of technical personnel and the educational opportunities for technical personnel in the areas in which rural health facilities are located, and the scope of services rendered by such rural health facilities; and regulations shall provide for the continued participation of such facilities where such personnel requirements are not fully met, for such period as the Secretary determines that (i) the facility is making good faith efforts to fully comply with the personnel requirements, and (ii) the employment by the facility of such personnel as are available to the facility will not adversely affect the health and safety of patients; and

"(C) with respect to the fire and safety requirements promulgated under paragraph (9), the Secretary may (i) waive, for such period as be deems appropriate, specific provisions of such requirements which if hardship for a rural health facility and which, if not applied, would not jeopardize the health and safety of patients, and (ii) may accept a facility's compliance with all applicable State codes relating to fire and safety in lieu of compliance with the fire and safety requirements he promulgates under paragraph (9), if he determines that such State has in effect fire and safety codes, imposed by State law, which adequately protect patients."

SEC. 2. Section 1861(e)(9) of the Social Security Act is amended by striking out the period at the end and inserting in lieu thereof the following: "; and with respect to the institutions described in the last sentence of this section, meets such requirements relating to long-term patient care policies, services and programs as the Secretary finds necessary."

SEC. 3. Section 1861(v) of the Social Security Act is amended by adding at the end thereof the following new paragraph:

"(8) Notwithstanding any other provisions of this subsection, the reasonable cost of services furnished in a 'rural health facility' (as defined in subsection (e)) shall be determined without regard to the requirement in subsection (j) relating to a distinct part, and shall be so calculated as to provide proper payment for services rendered to patients requiring inpatient hospital services and services rendered to patients requiring extended care services.".

A TRIBUTE TO FANNIE LOU HAMER

HON. JOHN CONYERS, JR.

OF MICHIGAN

IN THE HOUSE OF REPRESENTATIVES

Thursday, March 31, 1977

Mr. CONYERS. Mr. Speaker, it will be difficult for future generations of Americans to truly understand the life of Fanny Lou Hamer. Born into poverty in 1917 in Ruleville, Miss., the youngest of 20 children, she became an articulate and compassionate spokeswoman for healing and unity in the Nation.

It will be difficult for the coming generations to comprehend and appreciate the struggles that she had to wage against ignorance and hatred. Perhaps they will have the opportunity to see a film of her challenge to the seating of a segregated Mississippi State delegation at the 1964 Democratic National Convention, or hear a recording of her singing "O, Freedom."

Of Fanny Lou Hamer, it may truly be said that her life was its own reward. She had the courage to challenge injustice, to struggle relentlessly for human dignity, and to speak out in a powerful voice touching the hearts of those around her with her vision of a nation united in its respect for the rights of all its citizens.

Each day of Fannie Lou Hamer's life was motivated by the causes and beliefs that she held most dear, and knew to be most important. Her death will be felt by all those who oppose racism and inequity.

LITHUANIA'S INDEPENDENCE DAY

HON. JOSHUA EILBERG

OF PENNSYLVANIA

IN THE HOUSE OF REPRESENTATIVES

Thursday, March 31, 1977

Mr. EILBERG. Mr. Speaker, I am honored to join my fellow colleagues in the House of Representatives in commemorating the 59th anniversary of the Declaration of Independence of Lithuania.

Lithuania, a nation of 3¼ million inhabitants is situated on the shores of the Baltic Sea. Its long and glorious history is rich in culture and in the pursuance of liberty.

The Lithuanian Kingdom was established in 1251. During the middle ages, Lithuania abounded in human freedom and education, contributing greatly to the development of European civilization. Independence was lost, however, in 1795 when it was conquered by Catherine the Great of Russia.

Lithuania remained under the claws of the "great bear to the east" for over a century. During that time, the Russians tried repeatedly to russify the Lithuanian people, but the latter clung to their heritage and refused to adopt the Russian way of life.

Soon after World War I began, Lithuania was overrun by the army of Kaiser Wilhelm. At long last, on February 16, 1918, Lithuania was returned to the Lithuanian people and 2 years later, a treaty of peace was signed between Russia and Lithuania whereby Lithuania was recognized as an independent nation and Russia renounced forever all rights of sovereignty.

On August 1, 1922, Lithuania adopted a constitution predicated on the principles of freedom of speech, assembly, religion, and communication. Lithuania almost immediately joined the League of Nations and systematically instituted sweeping land reforms, increased its industrialization, and enlarged its commitment to education. Independence agreed with Lithuania, as these dramatic changes proved.

But the whole world was changing too, and Lithuania was to be one of the victims of this change. Less than a year after the start of World War II, the Supreme Soviet in Moscow arbitrarily declared Lithuania a constituent republic of the Soviet Union, thus abrogating the Treaty of Peace signed in 1920.

Independence may have been lost once again, but Lithuanians have not given up their dream of a sovereign state. Lithuanian patriots have spoken out about their struggle for freedom despite Soviet attempts to suppress all such communications to the Western World.

The House of Representatives has never recognized the forcible conquest of Lithuania by the Soviet Union. I am proud to have cosponsored House Concurrent Resolution 409 in the last Congress, which stated that "there is no change in the longstanding policy of the United States on nonrecognition of the illegal seizure and annexation by the Soviet Union" of the Baltic nations, and which made clear the Congress would continue not to recognize the Soviet actions.

This summer, the United States will be attending the followup Conference on European Security and Cooperation in Belgrade, Yugoslavia. We have another chance to bring the force of world public opinion and the diplomatic power of the Western nations to bear on the Soviet Union's disregard of the human rights provisions of the Final Act of Helsinki. The Commission on Security and Cooperation in Europe, established by the U.S. Congress last year has documented evidence of the Soviet noncompliance with these provisions.

THE RED TAPE REDUCTION ACT

HON. FRANK HORTON

OF NEW YORK

IN THE HOUSE OF REPRESENTATIVES

Thursday, March 31, 1977

Mr. HORTON. Mr. Speaker, I am today introducing the Red Tape Reduction Act. My bill, a companion bill to one being introduced in the Senate by Senator MCINTYRE, would authorize the President to delay for up to 1 year, the effective date for agency rulemaking. The President could effect the delay, upon request from an agency head, by Executive order. As many of us know, agencies often cite rulemaking deadlines as obstacles to greater public participation in the rulemaking process. Greater public participation in that process and additional time when needed would certainly lessen the number of ill-conceived rules and regulations.

As chairman of the Federal Paperwork Commission, I have seen numerous examples of the problems that can result from unrealistic effective dates specified in legislation. Take, for example, the Employee Retirement Income Security Act of 1974. In this bill, which was intended to safeguard private pensions and promote the availability of sound pension and retirement plans, Congress called on IRS and the Department of Labor to issue regulations within 120 days of enactment. The deadline proved to be totally unworkable. The Department issued regulations which generated mountains of paperwork and demanded the waste of countless man-hours from businesses of all kinds. Ironically, the information required of pension planners proved to be unusable. There are many such examples which I could list.

In most instances, we in the Congress are sufficiently aware of the factors that will determine the ability of an agency to meet a specific deadline. Generally our deadlines are reasonable and can be met. However, we cannot always anticipate all the circumstances that will affect an agency's ability to issue responsible regulations. I submit that we should allow flexibility in the rulemaking process when it can be justified.

The Red Tape Reduction Act, if enacted, would underscore our commitment, and the commitment of the administration to a government that is responsive and efficient. I urge my colleagues in the Congress to support this timely legislation.

A TRIBUTE TO B COMPANY, 2D BATTALION, 108TH INFANTRY, NEW YORK ARMY NATIONAL GUARD

HON. ROBERT C. McEWEN

OF NEW YORK

IN THE HOUSE OF REPRESENTATIVES

Thursday, March 31, 1977

Mr. McEWEN. Mr. Speaker, I take this opportunity to pay tribute to the Reserve components of our military services, and, in particular, to B Company, 2d Battalion, 108th Infantry, New York Army National Guard for being selected to represent the United States in Great Britain this year. I extend my heartiest congratulations to the commanding officer, Lt. Gary R. Benware and to the members of this unit, located in my home city of Ogdensburg and in Malone, both in New York's 30th Congressional District.

With the decreasing strength of active military personnel, our Nation is placing increasing reliance on the Reserve components to defend this great country, should the need arise. In the Revolutionary War, and in every other war in which this Nation has fought, these patriots voluntarily left jobs, homes and families to come to the aid of our country. At great personal sacrifice they are training today to meet the challenge of the future. That the "citizen soldiers" of northern New York are contributing to this effort outstandingly is evident from the accomplishments of B Company.

The trip to England for joint training exercises with British territorial forces from May 28 to June 12 has been designed by the Department of Defense to correlate the U.S. units with their NATO counterparts. This marks the first time an Army National Guard infantry company from New York has been sent outside the Continental United States for training. B Company is one of two infantry companies, out of more than 200 across the Nation, selected by the National Guard Bureau in Washington for this unique training.

B Company's selection was not at random. Last year at Fort Drum, N.Y., where 80,000 Reserve component soldiers conduct annual training, B Company was selected as the "most outstanding rifle company." In the fall of 1976, B Company was rated by a 1st Army inspection team during a weekend training period and found to be outstanding in all of the categories that they were rated.

B Company has earned this recognition and the honor of representing our country abroad. It is with pride that I salute them and wish them good luck in this venture.

THE CONTINUING NATURAL GAS CRISIS

HON. MARY ROSE OAKAR

OF OHIO

IN THE HOUSE OF REPRESENTATIVES

Thursday, March 31, 1977

Ms. OAKAR. Mr. Speaker, I wish to draw attention today to an editorial that appeared in the Cleveland Press on March 26, 1977. The editors of the Press expressed strong concerns over the indifferent attitudes that the chairman of one large gas supplier had expressed with regard to possibility of another severe winter. In a conversation with the Governor of Ohio, James A. Rhodes, Mr. B. J. Clarke of Columbia Gas System, Inc., stated that his firm had no plans to protect against a recurrence of this year's natural gas crisis. In other words, should we be unfortunate enough to experience another harsh winter, there will be additional natural gas emergencies.

The Congress must look closely at this matter and explore ways that we might induce or require fuel suppliers to employ better management and crisis-prevention methods. I do not want the people of Ohio and this great Nation to be forced to shut down their schools, businesses, and factories during another abnormally cold winter season.

The Cleveland Press editorial follows:

COLUMBIA GAS: SAME SONG

Early in February, at the height of the natural gas crisis, 1.2 million workers were idled in the nation.

About 5550,000 layoffs were in Ohio, the worst hit state.

Lack of gas caused many big industries to shut down. Businesses across the state closed or curtailed their hours. School systems told students and teachers to stay home where many of us turned down the thermostat to uncomfortably cold levels.

Those served by Columbia Gas of Ohio, the state's biggest gas supplier, suffered the hardest.

Earlier this week Governor Rhodes called to the Statehouse B. J. Clarke, chairman of Columbia Gas System Inc. Rhodes wanted to know what Columbia plans to do if next winter is as severe as this one.

With one minor exception, Clarke replied that Columbia expects to continue doing what it has been doing.

That response, which could be the blueprint for another disaster, is totally unacceptable.

Luther C. Heckman, head of the Public

Utilities Commission of Ohio, says that a better pipeline system and increased storage capacity are the best ways to get more gas.

But there is no indication that Columbia intends to increase its storage capacity or attempt to gain more control over the pipeline system owned by a sister company, Columbia Gas Transmission.

According to Heckman and an official of the Federal Power Commission, one of Columbia's major problems this past winter was that it "gambled and lost."

Columbia didn't think the winter would be severe and did not prepare for it.

Last fall Columbia sold a large part of its reserve supply of gas, betting it could still get by a normal winter. Columbia lost that bet, with disastrous results.

And now Clarke tells the governor he doesn't intend to do anything much different next winter.

A bristling Rhodes said he wasn't satisfied with that answer, nor are we.

The governor told Clarke to come back next week with a detailed written report.

All Ohioans ought to be interested in whether Columbia intends to change an operating system that obviously does not leave it prepared to serve this state adequately in difficult times.

TORRANCE, CALIF., HONORS ITS SCHOOL EMPLOYEES

HON. ROBERT K. DORNAN

OF CALIFORNIA

IN THE HOUSE OF REPRESENTATIVES

Thursday, March 31, 1977

Mr. DORNAN. Mr. Speaker, I would like to call the attention of the House of Representatives to a fine action on the part of the citizens of Torrance, Calif. On April 22, the Association of Torrance School Administrators will host the sixth annual employees recognition banquet for the retiring employees of the Torrance Unified School District. This year, more than 300 citizens will attend the banquet to let their school employees know that their work and dedication over the years has not been forgotten.

I would like to take this opportunity to join with the people of Torrance in paying tribute to these fine Californians for a job well done.

Among those to be honored are:

Mrs. Ouida M. Edwards, High School Assistant Principal's Secretary.

Mrs. Edna W. Aronson, Elementary School Teacher.

Mr. Jay W. Morgan, High School Assistant Principal.

Mrs. Fern O. Fortney, Stenographer.

Mr. Neil P. Carter, Custodian.

Mr. George W. Donnelly, High School Teacher.

Mrs. Elizabeth Griswold, Elementary School Teacher.

Mr. Kerwin M. Hill.

Mrs. Marie H. Smoyer, Clerk Typist.

Mr. Alex C. Such, Head Custodian.

Mr. Jackson W. Thomas, Master Custodian.

Mr. John Torrico, Custodian.

Mrs. Charles E. Williams, Project Leadman.

Mrs. Dorothy W. Hood, Speech Therapist.

Mrs. Marie C. Icenhauer, Reading Teacher.

Mrs. Elizabeth R. Parrino, Reading Teacher.

Dr. Robert C. Morton, Assistant Superintendent, Personnel.

Mr. Marshall R. Starr, Elementary Counselor.

Mr. Carl B. Edwards, Elementary School Teacher.

Mrs. Frances B. Fox, Elementary School Teacher.

Mrs. Dorothea B. Chandler, Curriculum Consultant.

Mrs. Ethel S. Hoffund, Elementary School Teacher.

Mrs. Virginia S. Lindsey, High School Teacher.

Miss Marion E. Prichard, Elementary School Teacher.

Dr. Wallace B. Magner, Jr., Personnel Coordinator.

Mrs. Helen E. Alter, Senior Stenographer.

Mr. Harvey W. Aton, Grounds Maintenance.

Mr. Oscar Bak, Custodian.

Mrs. Alice E. Brown, Cafeteria Worker.

Mrs. Doris Eleanor Burton, Library Clerk.

Mr. Kenwood E. Christensen, Leadman Mechanic.

Mrs. Dorothy A. Dolan, Cafeteria Worker.

Mr. Virginius D. Gale, Maintenance Mechanic.

Mrs. Lucille R. Gardner, Cafeteria Manager.

Mr. Fred G. Hilton, Assistant Grounds Foreman.

Mr. Richard I. Jenison, Custodian.

Mr. Charley L. McClung, Custodian.

Mr. Earl E. McGrury, Maintenance Mechanic.

Mr. Ray M. Millan, Custodian.

Mr. John E. Mock, Supervisor, Transportation.

Mr. Samuel A. Nelson, Groundsman.

Mr. Bernard B. Parisho, Custodian Foreman.

Mr. Walter E. Pillet, Custodian.

Mrs. Evelyn D. Renz, Elementary School Secretary.

Mrs. Anne M. Scoufos, Housekeeper—Children's Center.

SUMMARY ON PRESIDENTIAL PAY RECOMMENDATIONS

HON. WILLIAM D. FORD

OF MICHIGAN

IN THE HOUSE OF REPRESENTATIVES

Thursday, March 31, 1977

Mr. FORD of Michigan. Mr. Speaker, today I, along with other members of the Ad Hoc Subcommittee on Presidential Recommendations, introduced legislation incorporating the recommendations contained in our report which was issued on March 16, 1977. This bill revises the method by which executive, legislative, and judicial salary adjustments are made and reflects for the most part, the recommendations which have been made by the Members of the House. Following is a brief summary of this legislation:

First. Defers all salary adjustments—quadrennial and comparability—for Members of Congress and the Vice President until beginning of next Congress.

Second. Completely revises section 225 of Federal Salary Act of 1967, as follows:

a. Quadrennial Commission established every 4 years on calendar, rather than fiscal, year basis—1980, 1984, and so on.

b. Members of House and Senators are linked together for pay purposes.

c. Quadrennial Commission must submit its recommendations to President during 7 days of November. President must submit his report to Congress during first 15 days of the new Congress—1981, 1985, and so on.

d. Pay adjustments take effect unless disapproved by either House of Congress. Congress may disapprove all or any portion of recommended rate.

e. Petition may be filed to discharge committee from consideration of a disapproval resolution if committee has not reported such resolution within 15 days after its referral.

f. If majority of Members sign the petition, a privileged motion to discharge committee is in order.

g. After committee has reported—or has been discharged from further consideration of—a disapproval resolution, a privileged motion to consider the resolution is in order.

Third. Provides that Members of Congress, Vice President, Federal judges, and all individuals paid under the executive schedule may not receive an annual comparability increase for any year in which a quadrennial increase occurs.

A SUGGESTION FOR FDA: GET OFF OUR BACKS

HON. GEORGE M. O'BRIEN

OF ILLINOIS

IN THE HOUSE OF REPRESENTATIVES

Thursday, March 31, 1977

Mr. O'BRIEN. Mr. Speaker, since the Food and Drug Administration announced its proposed ban on the sugar-substitute saccharin, the people of this country have risen up with a single voice like no other situation I am aware of.

A remarkable degree of unanimity has also marked the commentary of the Nation's press on the FDA proposed ban.

I would like particularly to draw the attention of the House to the March 18 column of Joe Cappo in the Chicago Daily News. Mr. Cappo, as is his wont, states the problem most succinctly: Get off our backs:

A SUGGESTION FOR FDA: GET OFF OF OUR BACKS

(By Joe Cappo)

The Food and Drug Administration did not go far enough when it proposed to ban saccharin from the market.

If saccharin is dangerous to the health of Americans, no one should have to propose anything. The product should simply be confiscated, yanked off the shelves of all of the stores in the country.

But we haven't seen the FDA do that, have we? No. Instead, it sends up a trial balloon, stating that perhaps saccharin should be banned. I have the impression that, if there is enough ruckus from saccharin users, then the FDA will probably find some excuse for not implementing the proposed ban.

(Maybe that is only wishful thinking. I must admit that I am a saccharin user, not because of any medical reasons, but because I try to save a few calories here and there.)

Some observers have said the research on which the proposed ban is based is a bit weak. The scientists pumped large amounts of saccharin into experimental rats and determined it can cause bladder tumors. Not being a scientist, I cannot dispute the scientific findings, although I wonder why an agency of the U.S. government should base a proposed ban on research conducted by a Canadian laboratory.

I am not going to repeat the old saw about how a person would have to drink 800 cans of diet soda every day in order to duplicate the dosage of saccharin that was administered to rats. There are probably some teenagers around who can consume that much soda.

The question I have is this: Why is the FDA harping on saccharin?

If the FDA were forced to be realistic about the matter, it would have to ban cigarets as being more of a cancer threat than saccharin. Congress has even banned cigaret advertising from radio and television. The Surgeon General requires a special warning to appear on every pack of cigarets and on every advertisement. And yet the FDA has not banned cigarets.

Unfortunately, the FDA is not forced to be realistic. It is charged with enforcing a nebulous rule called the Delaney clause, which commands the agency to ban any food additive that is found to cause cancer in humans or in animals.

Saccharin is only the most recent case. A couple of years ago, another non-nutritive sweetener, cyclamate, was also found to cause cancer in rats. The scientific data in that case also has been disputed, and the matter is still unsettled.

I think the Delaney clause is discriminatory because it singles out food additives that cause cancer. Why doesn't it mention other items that cause cancer? And why should we have special rules about cancer that do not apply to other illnesses?

Heart disease, kidney disease, drunk driving and other things will kill you just as dead as cancer.

I think the best perspective in this situation was put forth by a scientist who worked on the cyclamate data. He compared the heavy dosages fed to the rats with someone driving a car at 150 miles an hour. It is dangerous to drink 800 cans of diet pop a day, and it is dangerous to drive a car at 150 miles an hour.

THE PROBLEM IS EXCESS

At the same time, a prudent person might live to a ripe old age if he or she drove at no faster then 55 miles an hour and drank no more than, say, 200 cans of diet pop every day.

What the FDA and the Delaney clause fail to recognize is that it is not the product itself that causes the harm, it is human excess that causes it.

Saccharin is a beneficial product for many people, particularly diabetics. I'll bet that most diabetics would accept the marginally increased chance of contracting cancer rather than give up their daily use of saccharin. And the choice in this matter should be left to them and their doctors, and not to the FDA.

I am getting more than a little tired of government agencies and the courts grinding out a constant flow of edicts about what we can eat, drink, see or do. And because of that, I am going to cut this column out of the paper and mail it to the Commissioner, Food and Drug Administration, Parklawn Building, 5600 Fishers Ln., Rockville, Md. 20852. And I'm also going to send another copy to my congressman.

How about you?

ERISA HEARINGS CONTINUE

HON. SAM GIBBONS

OF FLORIDA

IN THE HOUSE OF REPRESENTATIVES

Thursday, March 31, 1977

Mr. GIBBONS. Mr. Speaker, today I am announcing for the record the continuation of hearings on the enforcement of the Employee Retirement Income Security Act of 1974 on April 5, at 8:30 a.m., in Cannon House Office Building, room 334. At that time the Wavs and Means Subcommittee on Oversight will resume its examination of how the Teamster Central States Pension Fund has been regulated.

Invited witnesses include the Secretary of Labor and the acting Commissioner of the Internal Revenue Service. The subcommittee is especially interested in the revocation by the IRS of the tax-exempt status of this fund and in developments announced by the agencies on the day before the March 14–15, 1977, hearings of the subcommittee.

The inquiry was initiated by subcommittee member J. J. PICKLE, Democrat of Texas.

The hearing will begin in open session and all testimony, including written statements, will be taken on the record under oath.

CONGRESSIONAL REFORM

HON. ROBERT W. KASTEN, JR.

OF WISCONSIN

IN THE HOUSE OF REPRESENTATIVES

Thursday, March 31, 1977

Mr. KASTEN. Mr. Speaker, almost every opinion poll taken in recent years demonstrates that the American people have become alienated from their Government. Problems facing our country today are far too serious to allow a gulf of suspicion to continue between the people and their elected representatives.

The 95th Congress must reform itself and the procedures by which it operates in order to regain the trust and confidence of the American people.

Adoption of the Code of Ethics was a first step in that direction. I believe, however, that there are several other reforms which are needed before we can convince the people that we are here to serve their interests, not to perpetuate ourselves in office.

Earlier this week, I introduced a constitutional amendment to limit the terms of Congressmen and Senators. Adoption of my amendment would insure that our elected representatives cannot remain in office so long that they lose touch with the people they serve.

Today I am introducing legislation to reform the manner in which pay raises are allowed for Members of Congress and a bill to require a full audit of all expense and personnel records of the House of Representatives.

REQUIRE PAY RAISE VOTE

There was nothing right about the way in which the recent $13,000 pay raise was accomplished. Due to the sensitive nature of the issue, a recorded vote of the House was both necessary and proper.

However, the procedure for increasing congressional salaries had been shrewdly devised so that no Member needed to record his or her vote on the merits of the raise. Since no congressional action was taken to disapprove of the salary increase, it automatically took effect.

Such a procedure makes a mockery of any talk of restoring trust in elected officials. In fact, it denies the most basic element of the American system of government: Accountability to the people.

Mr. Speaker, we cannot allow this back-door pay raise procedure to continue, particularly when another cost-of-living increase is scheduled for October. Accordingly, I am introducing legislation which would require a recorded vote of the membership before any future salary increases, including cost-of-living raises, can become effective.

My bill will also delay implementation of any congressional salary increase until the next Congress. This way, no Member of Congress can benefit from a pay raise until he or she has met the test of the voters.

GREATER ACCOUNTABILITY NEEDED

I also believe it is important that we guard against misuse of public funds by Congressmen. The scandals of the 94th Congress will continue to haunt us if we do not insist upon greater accountability of the tax dollars spent by individual Members.

One of the glaring omissions in the recently approved code of ethics is its failure to require a complete accounting of the tax dollars spent to operate Congress. With Congress spending about $1 million per Member per year, it is imperative to have a full and complete audit of Members' accounts. Congress must be held publicly responsible for its spending practices. These records must be available for public examination.

I am introducing a bill which would require a full and complete audit of all expense and personnel records of individual Members and committees of the House of Representatives. Results of the audit will be made available to the public.

As I mentioned in my opening remarks, I believe it is time for Congress to bridge the gap between its actions and the feelings of the American people. We can only do this if the people believe we are making a serious effort to correct the abuses which have fostered the distrust and alienation in the first place. I believe the reform proposals I have introduced this week will help us accomplish this goal. I urge their prompt consideration and adoption by the House.

ENERGY DEPARTMENT VITAL

HON. EDWARD P. BOLAND

OF MASSACHUSETTS

IN THE HOUSE OF REPRESENTATIVES

Thursday, March 31, 1977

Mr. BOLAND. Mr. Speaker, the Arab oil embargo of 1973 made all Americans acutely aware of a problem that experts had seen for years; that our supply of energy is not keeping up with our ever-increasing demand. In the 3½ years since the oil embargo there have been spot shortages of gasoline and natural gas, electrical blackouts and browncuts, thousands of articles and books on the subject and constantly higher prices for all types of energy. There has not, however, been a single national energy policy. This situation is about to change.

President Carter has sent to the Congress his proposal for reorganization of the various energy agencies. Under this proposal, the more than 50 different Federal agencies that currently handle energy matters will be replaced with a single Department of Energy. This new Department will combine the present

Federal Energy Administration, the Energy Research and Development Administration and the Federal Power Commission under one roof. It will also provide the United States with a comprehensive national energy policy. I believe this reorganization has been needed for a long time and I am one of the sponsors of the President's proposal, now before us, as H.R. 4263.

Over the past few years there have been some fine efforts by companies, local groups, various States, and individuals in the area of energy research and conservation. On the Federal level, however, there has often been confusion and inaction. Private developers and researchers have often been frustrated in their efforts to secure Federal funds and assistance by a morass of complicated, often overlapping programs. Our national energy programs have dashed off in all directions with no central coordination. This new Department of Energy will provide the vital element of coordination. This Department will also supply national leadership in the area of energy development, research and, most importantly, conservation.

Mr. Speaker, this country has faced and overcome many difficult problems in the past and I believe we can find solutions to our energy problem. The answer will not be an easy one and it will involve an effort by every American. The establishment of an Energy Department is just the first step in meeting the energy problem head on. The next step will be the formulation of a national policy that will take all of our energy needs into account and provide a workable program for the future. Nothing less than our way of life is at stake.

At this time I would like to include a recent editorial from the Springfield Daily News that expresses views held by millions of Americans:

CONGRESS AND ENERGY

The President's proposal for a new Department of Energy can be viewed as his most important piece of legislation so far.

By consolidating the government's energy functions under one roof, under the direction of James Schlesinger, the stage will be set for development of a long-range program worthy of its name.

Congress is responding to public opinion and acting on a new code of ethics for Capitol Hill. If there is not the same public demand for an energy program, this does not mean that Congress can afford to procrastinate on this proposal from the President.

If we don't deal with the energy problem while there is still time, it will be too late tomorrow.

THE SAN MARINO HISTORICAL SOCIETY

HON. JOHN H. ROUSSELOT

OF CALIFORNIA

IN THE HOUSE OF REPRESENTATIVES

Thursday, March 31, 1977

Mr. ROUSSELOT. Mr. Speaker, the 1976 American Revolution Bicentennial celebration spurred a sense of pride from sea to shining sea. From the smallest rural community to the largest cities our citizens expressed their feeling for the quality of our land and the accomplishments of our people in redounding glory. My hometown of San Marino, Calif., was no exception to the enthusiasm that brought forth a national exhibition of gratitude for the courage and fortitude of those who secured the blessing of liberty for America. The San Marino Historical Society planted red, white, and blue flowers in the heart of the city and named this colorful display the "Bloomin' Flag."

FOUNDING

The San Marino Historical Society was founded, appropriately enough, on July 4 in 1973 when Mrs. Jack E. Sherwood sent a letter to the editor of the San Marino Tribune proposing the founding of a historical society to honor the Nation's Bicentennial in 1976. Midge Sherwood became the founding president and those who served on the first board were Mrs. Alexander F. Smith, Mrs. Clifford V. Stadler, Mrs. Thomas Paine, Mr. James Carriel, Mrs. Breitkreutz, Dr. Ed Carpenter, Mr. Paul E. Dobbins, and Mr. Donald Duke. With a total of 60 members in 1973, the San Marino Historical Society now has over 300. One of the society's first official acts was to appoint a Bicentennial activities committee and hold a town hall meeting for the purpose of gathering suggestions for the Bicentennial.

BLOOMIN' FLAG

The society launched their Bicentennial salute in November of 1975 with the dedication of a living American flag in flowers. Planted in a 40 feet by 30 feet bed on Huntington Drive at Sierra Madre Boulevard, the flag still stands as a testament to the loyalty felt by the citizens of San Marino to the United States of America.

AWARDS RECEIVED

The society received three awards which I would like to bring to the attention of my colleagues. The Bicentennial Commission of the State of California awarded the society a certificate of recognition "for its founding as a salute to the 200th birthday of the United States of America." In February of 1974, History News, a magazine published by the American Association of State and Local History, cited the San Marino Historical Society as the first historical society in the Nation to form in honor of the Nation's Bicentennial. Finally, in May of 1976, the society recieved a Bicentennial Award of Merit from the Conference of California Historical Societies.

FUTURE PLANS

Mrs. Alexander F. Smith is now presiding as president of the San Marino Historical Society and they continue to remain active in the community.

A recent issue of Grapevine published by the Society relates plans to organize tours of historical points of interest in the city. A training course is planned for the tour leaders who will then make themselves available to interested groups and individuals. The society has also formed a speakers' bureau composed of local citizens who have researched various topics and make presentations at group meetings.

PRESIDENT CARTER SUPPORTS H.R. 3361, THE PUBLIC PARTICIPATION IN FEDERAL AGENCY PROCEEDINGS ACT

HON. EDWARD I. KOCH

OF NEW YORK

IN THE HOUSE OF REPRESENTATIVES

Thursday, March 31, 1977

Mr. KOCH. Mr. Speaker, I am delighted to bring to the special attention of my colleagues the testimony of Barbara A. Babcock, Assistant Attorney General, Civil Division, on H.R. 3361, the Public Participation in Federal Agency Proceedings Act of 1977. In her oral testimony before the House Administrative Law Subcommittee, Ms. Babcock announced the support of the President and of the Department of Justice for this important piece of legislation. As one of the chief House sponsors, I welcome the President's endorsement and I believe the Members of the House, 87 of whom are already cosponsors, will follow the President's lead in committing ourselves toward the opening up of our Federal agencies to direct citizen access.

The text of Ms. Babcock's prepared remarks follow:

H.R. 3361

(Statement of Barbara A. Babcock, Assistant Attorney General, Civil Division, before the Committee on the Judiciary, Subcommittee on Administrative Law and Governmental Relations, House of Representatives)

Dear Mr. Chairman:

As Assistant Attorney General for the Civil Division of the Department of Justice, I welcome the opportunity to lend the Department's support to H.R. 3361, the "Public Participation in Federal Agency Proceedings Act of 1977." The Bill is an important step in implementing the policies espoused by the new Administration: President Carter's ideal of creating an "open government," Attorney General Bell's goal of facilitating "access to justice." We heartily concur with the many distinguished witnesses who, in these and other hearings, emphasized the importance of increased citizen participation in agency proceedings. The practical and symbolic significance of opening agency processes to public patricipation is widely acknowledged. Broader representation increases governmental accountability, expands the constituency regularly appealing to government agencies, and helps to counteract public skepticism and alienation. It also contributes to more informed, better reasoned, decisionmaking.

Unfortunately, the goal of active public participation in agency proceedings has not been adequately realized, largely because of the costs entailed in taking part in such hearings. Actual participation in and access to agency decisionmaking by the public-at-large is minimal. We need far more balanced representation to correct a tendency for segments of the public-at-large to be unrepresented in agency proceedings. H.R. 3361 seeks to remedy this underrepresentation by removing, to some extent, the financial impediment to public participation. The Bill does this in two ways: proposed Section 558a directs agencies to award attorneys' fees and costs to eligible groups or persons who participate in certain administrative proceedings; proposed Section 707 directs courts to award attorneys' fees and costs to qualifying parties who participate

in court proceedings reviewing agency actions.

We regard H.R. 3361 as a reasonable response to a substantial problem affecting administrative and public law. At present, each agency decides whether it has authority to award attorneys' fees and costs to persons acting in the public interest. Determinations of eligibility and amount, if made at all, are rendered without legislative or regulatory guidelines. Inequality of treatment from agency to agency compounds the unfairness of effectively precluding many groups from participation in the administrative processes. H.R. 3361 addresses this problem by authorizing awards and by providing general standards for determining eligibility and amount. At the same time, the Bill allows sufficient flexibility to enable each agency to tailor its implementing regulations to its own special needs. For example, in outlining several criteria for determining whether an applicant will make a substantial contribution to the decisionmaking process, the Bill recognizes the authority of differing agencies to consider a variety of additional relevant factors. Similarly, the Bill provides an open-end definition of the proceedings to which it applies, thereby leaving that decision to agency discretion. The Bill is designed to encourage experimentation and we support its approach, at least in the early stages of implementation.

The FTC's experience with the Magnuson-Moss Act highlights the wisdom of H.R. 3361. In a recent Senate hearing, the Chairman of the Federal Trade Commission, Calvin Collier, testified that the availability of attorneys' fees increased public participation in trade regulation rulemaking proceedings and produced substantial benefits to the effectiveness and integrity of the decisionmaking process. In particular, he recounted a number of specific examples in which financial assistance enabled public interest groups to conduct studies, develop ideas, and present facts and arguments that neither the industry nor agency staff had presented. Based in part on this experience, Mr. Collier praised the contribution of public interest advocates. No agency, no matter how well-intentioned, can be confident that its view adequate represents "the public interest." The public interest is a conglomeration of interest and is best served by the airing of all responsible views.

The results of implementing the FTC program are illuminating in yet another respect. The problems envisioned by the opponents of H.R. 3361 have not materialized under the Bill's counterpart in the Magnuson-Moss Act. Specifically, Mr. Collier noted that the FTC's award program did not cause undue delays in its proceedings. The carefully drafted provisions of H.R. 3361 likewise create little potential for delay. The Bill does not in any way relax legal standing requirements. It minimizes duplication of argument, and allows awards only to those who will contribute substantially to the proceedings. To the extent that the presentation of important and otherwise unrepresented viewpoints leads to longer, and more complete, proceedings, the result can hardly be characterized as undue delay. Indeed, the Bill discourages unwarranted delay, which obviously would prejudice the dilatory party in the eyes of the awarding agency.

The Bill differs from the Magnuson-Moss Act in one critical respect: H.R. 3361 provides for judicial review of award determinations and, in addition, authorizes payment of fees and costs incurred in lawsuits challenging agency actions. Although the Administrative Office of the U.S. Courts questions the wisdom of involving courts in award determinations, the Department of Justice regards these provisions as an improvement over the FTC provision. The availability of judicial review will act as a check against abuses of discretion, preventing, and not simply remedying, poorly-made decisions. Judicial review is necessary also to ensure some degree of uniformity among and within the various agencies.

We agree with Judge Leventhal who, on many occasions, has stated that the proposed legislation will not create an untoward burden on our judicial system. As reflected in the legislative histories of predecessor bills, H.R. 3361 contemplates a narrow and common standard of review, under which the court must determine whether the agency's determination constitutes an abuse of discretion. More importantly, increased public participation will undoubtedly lessen the burdens borne by our courts. More accurate and comprehensive administrative records will avoid the need for repeated remands. In addition, better informed agency decisionmaking may well result in fewer appeals. And though the Bill directs reimbursement for the costs of court litigation, it imposes a function long performed by the judiciary.

We do suggest one clarification to the legislation. H.R. 3361 provides that at the agency level, the "amount and computation" of the award be made "prior to timely participation in the proceeding . . ." The agency may defer its decision temporarily if it provides written reasons why a "prior determination cannot practicably be made." Although the deferral provision is needed to minimize premature and inaccurate computations, the applicant's eligibility for an award generally can and should be made prior to the commencement of the proceeding. We therefore urge that the Bill be amended to make clear that when the deferral procedure is utilized, determinations of eligibility can be made apart from and prior to determinations of amount.

We recognize that the two-step approach proposed may in some cases lead to separate appeals from determinations of eligibility and amount. However, even if both determinations were made at the outset, the ensuing proceeding would often give rise to an appeal from the agency's ruling on the merits. Therefore, an appeal from a deferred determination of the amount of an award could, in many cases, conveniently be consolidated with an appeal from agency action on the merits. On balance, then, we think the improvement effected by the recommended change would outweigh any potential drawbacks.

We would further note that actual implementation of H.R. 3361's award program may perhaps reveal the need for a central mechanism to allocate funds under the Bill. As Chairman Collier indicated earlier, the Bill poses several potential problems: First, there may be difficulties, under the congressional appropriations process, in deciding how to divide the funds. Second, decentralization of authority might cause needless confusion in a program that in time could become an important feature of federal administrative practice. Third, an agency might withhold funds from applicants that oppose its policies, and applicants might compromise their positions in an effort to obtain funds.

Finally, I would like to comment briefly on the costs involved in implementing the proposed legislation. First, it is worth noting that the amount appropriated over the next three years is small in comparison with the tax laws subsidization of business interests that incur litigation expenses. And unlike tax subsidies, awards under H.R. 3361 are not granted indiscriminately. The Bill screens out applicants motivated by economic self-interest and compensates those who seek to represent segments of the public-at-large. The Department of Justice joins President Carter in strongly admonishing that we can ill-afford to ignore the need to facilitate public participation in the administrative processes. It is time we kept our promise of access to justice for all, regardless of wealth or social position. H.R. 3361 is a meaningful step in that direction.

LEGAL FEES REIMBURSEMENT ACT

HON. JAMES T. BROYHILL

OF NORTH CAROLINA

IN THE HOUSE OF REPRESENTATIVES

Thursday, March 31, 1977

Mr. BROYHILL. Mr. Speaker, I am today introducing the Legal Fees Reimbursement Act of 1977. My purpose for introducing this legislation is to correct what I believe to be a serious inequity in the relationship between the American taxpayer and the Internal Revenue Service.

Specifically, my bill provides for payment by the Federal Government of all reasonable legal fees incurred by the taxpayer in legal actions brought by the taxpayer against the Internal Revenue Service, in which the taxpayer prevails.

Our Federal tax laws have become so complicated that it requires the wisdom of Solomon to comprehend them. Indeed, Mr. Speaker, as my colleagues know, the Supreme Court at times has to decide cases where Federal tax courts have interpreted our tax laws differently.

We read all the time of taxpayer complaints that their tax liability depends on who they talk to at their local IRS office for an opinion.

Increasingly, there are disputes between the American taxpayer and the IRS. The IRS, to their credit, has a responsible conference and appeals process within the service which, for the most part, I believe, deals fairly and responsibly with our Nation's taxpayers.

However, after conferences and appeals, if the taxpayer still believes the IRS has inaccurately figured his or her tax liability, the taxpayer is left with three possible options. The taxpayer can accept the judgment of the IRS and pay the additional tax, he can refuse to pay and have his wages garnished or a tax lien put on his property, or, thirdly, he can contest the IRS decision in court. None of these is a particularly attractive alternative. Resolving the matter in a court of law would seem to be the most responsible option but for the fact that the taxpayer feels he does not have a chance against the seemingly unlimited legal resources of the Federal Government.

Furthermore, under present law, if the taxpayer challenges the IRS in court and wins, the court costs and legal fees in many instances would exceed the tax liability in question. In other words, the taxpayer loses money by exercising his right to question the judgment of the IRS.

What happens in most cases is that the taxpayer in disgust simply gives up and pays the disputed tax, realizing that even if he wins in court, he will probably lose monetarily due to legal fees and court costs. Congress should act to correct the obvious imbalance in the relationship between the IRS and the taxpayer. I believe my legislation is the answer for correcting the present situation. Far from encouraging frivolous suits, my bill simply enables the taxpayer to stand before the courts as an equal with the IRS. If the courts deter-

mine the taxpayer's claim is legitimate, the IRS and the Government will assume all court costs and reasonable legal fees. If the taxpayer is wrong, he will naturally assume his own legal fees and court costs.

If this bill is accepted, I believe the taxpayer will feel that the scales of justice have been returned to a position of balance as they should be.

I would hope that my colleagues will give this legislation serious consideration.

IN SUPPORT OF THE RESOLUTION TO ESTABLISH A STANDING COMMITTEE ON INTELLIGENCE IN THE HOUSE OF REPRESENTATIVES

HON. LEE H. HAMILTON

OF INDIANA

IN THE HOUSE OF REPRESENTATIVES

Thursday, March 31, 1977

Mr. HAMILTON. Mr. Speaker, the American public has been shocked by recent allegations of wrongdoing on the part of our intelligence agencies. Plots to assassinate foreign heads-of-state, complicity in the overthrow of foreign governments, and cash payments to foreign officials have grabbed headlines. It appears to some people that the situation is out of control. A very necessary discussion of the appropriate role of our intelligence agencies has begun.

No one can doubt that difficult issues have been raised. The covert activities of our intelligence agencies must be restricted, while their legitimate activities, such as the collection of current information on the strengths and weaknesses of any potential adversary, must be upgraded. The way in which we fund intelligence operations must be overhauled. As things stand, most Members of Congress do not know how much money they are allocating or how the money will be used. Other problems, too numerous to mention here, must be faced immediately and forthrightly.

It is my belief that the beginnings of a solution to these problems are to be found in increased congressional oversight of intelligence operations. Therefore, I wish to express my support for the resolution to establish a standing Committee on Intelligence in the House of Representatives. Such a committee would provide us with the kind of systematic oversight of intelligence operations that has been lacking. It would also complement the existing committee in the Senate.

Let me set out very briefly the outstanding features of the proposed committee.

Membership: Membership, patterned after that of our highly successful Committee on the Budget, would be drawn in equal portions from the Committee on International Relations, the Committee on Armed Services, and all other standing committees. This would insure a broad mix of opinion of expert and layman alike. Members would retain their customary committee assignments, but they would be replaced periodically so that no Member would be unfairly burdened.

Authorization and jurisdiction: The fundamental power of the proposed committee would flow from its mandate to handle the authorizing legislation for all intelligence agencies and all intelligence activities of other agencies. Control of the purse would allow the committee to work its will on intelligence policy in a manner consistent with its responsibilities. The committee would also enjoy exclusive jurisdiction over the Central Intelligence Agency, though it would share jurisdiction over other agencies with other standing committees. This wise division of labor would permit sharply focused inquiries and the uninterrupted use of oversight expertise which has already been developed.

Declassification and covert activities: The proposed committee would not be empowered to declassify any information over the objection of the President. It could, however, take its case for the declassification of any information to the full House. Such a procedure would give it a reasonable say in matters of secrecy now solely within the purview of the President. The committee would also not be empowered to restrict covert activities, though it would have a limited advisory function. The power to advise would be sufficient in this case since it would be backed by the power to authorize expenditures.

I believe that many of the excesses of our intelligence agencies could be checked or corrected by rigorous oversight. The present organization of the House, however, has made this all but impossible. Unlike the Senate, which has produced solid results through its single oversight committee, the House has delegated its oversight duties to several committees and has produced very little. Its recent investigations have been marred by dangerous leaks of information and unending disputes over jurisdiction. It has not responded in an orderly way to problems which have been laid before it.

Mr. Speaker, it is apparent that we must not allow this chaotic state of affairs to continue. We have before us today a resolution which would provide a remedy. Let us act on it as soon as possible. The problem of oversight of intelligence operations will only grow worse the longer we delay.

PHILADELPHIA BEGINS LANGUAGE ORIENTATION PROGRAM FOR FIREFIGHTERS IN SPANISH-SPEAKING AREAS

HON. JOSHUA EILBERG

OF PENNSYLVANIA

IN THE HOUSE OF REPRESENTATIVES

Thursday, March 31, 1977

Mr. EILBERG. Mr. Speaker, Philadelphia Fire Commissioner Joseph R. Rizzo has inaugurated a Spanish language orientation program for the city's firefighters stationed in Spanish-speaking areas of Philadelphia. The program began March 26.

The program is being conducted by Oscar Rosario, chairman of the mayor's Spanish-speaking advisory council, and is focusing on an understanding of key Spanish words and phrases.

The purpose of the project is to enable Philadelphia firemen to communicate with Spanish-speaking Philadelphians when responding to a fire or during inspections in their neighborhoods.

There are two sessions planned for each of the four platoons of the eight fire-fighting units in the Spanish sections Philadelphia. The sessions are an hour long each.

NBC'S 3-HOUR SMEAR OF SENATOR JOSEPH McCARTHY—PART IV

HON. LARRY McDONALD

OF GEORGIA

IN THE HOUSE OF REPRESENTATIVES

Thursday, March 31, 1977

Mr. McDONALD. Mr. Speaker, in the first three parts of my report to my colleagues on the psuedo-documentary produced by NBC to smear the late Senator Joe McCarthy, I dealt primarily with the lies about Senator McCarthy's political activities. Today, however, I would like to present the evidence to refute some of the smears about his personal character.

Early in the 3-hour program Senator McCarthy was depicted as falsifying his war record and of shooting only at coconut trees. Senator McCarthy's former commanding officer, retired Col. Glen L. Todd, was located by the National Enquirer. He told their reporter:

First of all everything was flattened on Guadalcanal before we even got there. There weren't any coconut trees anywhere near us. Besides we were in a war zone, and in a war zone, you don't allow people to go around shooting guns off—especially a machine gun.

Todd went on to say:

I served with Joe McCarthy in a dive bomber squadron during WWII. I was an executive officer part of that time and his commanding officer for the rest. We fought together on Guadalcanal, Bougainville, and Munda in the South Pacific. Mac was a captain and the squadron intelligence officer. And believe me, he was certainly no coward. He was a brave Irishman. And he did a great job for us. He was a hell of a man.

As only some of the interview was used in the excellent article published in the Enquirer, I would like to make available to my colleagues some of the additional statements made by Colonel Todd. He said:

There were no milk runs on Guadalcanal. It was a pretty hot war out there, and at that time we were losing about 30 percent of our planes. We were getting jumped on all the time by Jap Zeros. Our planes were sluggish—could only fly about 120 mph—and the Zeros were highly maneuverable and could zip along at about 300 mph. Those certainly weren't milk runs—but Mac flew on those kind of missions. He didn't have to go out on any missions—wasn't paid to do it, like I was. He did it because I asked him to—and he realized it would make him a better officer.

It was always my feeling that an intelligence officer who never goes into combat can't interrogate pilots who came back from combat. I thought flying a few missions would give Mac a good idea of what people were seeing and doing. That way, when he interrogated flyers, he could do it in a professional manner.

The first Time Mac went up, he went up with me—and, as I said, he did it because I asked him to.

The other missions he flew he did because he wanted to do it. Sometimes I'd see him climbing in the gunner's seat of a Douglas Dauntless like a naughty boy. He knew he shouldn't be there, but he wanted to go.

I don't really know how many missions Joe flew, but I was the one who recommended him for his 2 Air Medals. At that time you could get an Air Medal for every five missions flown—and if you ever flew as a passenger in a hospital plane, that counted toward the five missions. But I didn't count any mission Mac flew unless he got fired on or his plane did some dive bombing.

Since I recommended Mac for 2 Air Medals, I know he flew at least 10 missions—I think the number was 12.

Another of the men who served in World War II with Senator McCarthy, Ken Smedley of Santa Barbara, Calif., told the Enquirer:

Joe McCarthy flew with me on several missions, and I felt just as secure having him back there in the gunners seat as I would have with a regular gunner.

Joe didn't have to fly at all—he wasn't even a gunner. He flew the missions because he was the intelligence officer and he wanted to get a better perspective of what we were being confronted with.

As far as I'm concerned Joe McCarthy always conducted himself as a fine, upstanding officer and gentleman—and he was my friend.

Senator McCarthy received the Distinguished Flying Cross, the Air Medal with four clusters, and the Navy Commendation Medal with a V, which shows that it was awarded for combat operations.

Adm. C. W. Nimitz in awarding the Commendation Medal to Senator McCarthy wrote that it was—

For meritorious and efficient performance of duty as an observer and rear gunner of a dive bomber attached to a Marine scout bombing squadron operating in the Solomon Islands area from September 1, to December 31, 1943. He participated in a large number of combat missions, and in addition to his regular duties, acted as aerial photographer. He obtained excellent photographs of enemy gun positions, despite intense anti-aircraft fire, thereby gaining valuable information which contributed materially to the success of subsequent strikes in the area. Although suffering from a severe leg injury, he refused to be hospitalized and continued to carry out his duties as Intelligence Officer in a highly efficient manner. His courageous devotion to duty was in keeping with the highest traditions of the naval service.

C. W. NIMITZ,
Admiral, U.S. Navy.

Commendation Ribbon Authorized

Similar letters of commendation were written for Senator McCarthy by other commanders of combat forces in the Pacific, including Maj. Gen. H. R. Harmon, of the U.S. Army, who commanded all of the Army, Navy, and Marine aircraft in the Solomon Island area; and Marine Maj. Gen. Field Harris, who was the Marine Corp assistant-commandant—air.

Senator McCarthy's war record is clear. He served his country well when it needed him. It is particularly offensive when a Peter Boyle, a writer and actor in Jane Fonda's anti-American show, aimed at weakening the will of the American troops to fight in Vietnam, denigrates the combat record of a good American.

DR. E. F. SCHUMACHER VISITS CONGRESS

HON. CHARLES ROSE III

OF NORTH CAROLINA

IN THE HOUSE OF REPRESENTATIVES

Thursday, March 31, 1977

Mr. ROSE. Mr. Speaker, on Monday, March 21, the Congressional Clearinghouse on the Future sponsored its third "Dialog on America's Future," and Dr. E. F. Schumacher was our guest.

Concluding a 6-week visit to our country, Dr. Schumacher, a British economist and author of "Small Is Beautiful: Economics as if People Mattered," told us that he believes there is a tremendous interest among our constituents in his concept of intermediate technology.

Dr. Schumacher said:

Political leaders—governors, state legislators, mayors—greeted me at each one of my stops this year. Two years ago only one governor (Brown of California) was interested in what I was saying.

Mr. Speaker, this visit of Dr. Schumacher's has generated much interest in the press. In the Washington Star of March 22, William Delaney wrote an article about our meeting, and Newsweek of March 28, discussed his visit to the United States.

I am pleased to insert these two articles into the RECORD today:

[From Newsweek, Mar. 28, 1977]

MR. SMALL

When he spoke at the Civic Center in Helena, Mont., British economist E. F. Schumacher thought 200 people might come. Instead, 600 showed up, and some had to stand in the hallway to hear him talk. At the Science Museum of Minnesota, he drew enthusiasts from all over the state, and dozens of people were turned away. At a session with California state employees in Sacramento, the audience overflowed onto the floor around Schumacher's lectern, sitting cross-legged like kindergarten students at story time. In fact, almost everywhere he has gone on a 43-day, twelve-state tour of the U.S., Schumacher, who wrote "Small Is Beautiful" three years ago, has attracted large crowds. This week he speaks to more than 100 congressmen in Washington and may get to see Jimmy Carter, who read Schumacher's book a couple of years ago. "I didn't set out to start a movement," he says, slightly puzzled by his fame and following. "Strangely, people took up my ideas."

Perhaps it's not so strange. Schumacher stresses the need to conserve resources and limit economic growth—a message that apparently appeals to a nation that has just experienced a natural-gas crisis and is still in the grip of a serious drought. The rest of Schumacher's message is considerably more controversial—nothing less than a full-scale assault on conventional economic wisdom. Economists, he says, have established material growth as the most important measure of social progress. They assume that a person who consumes more is automatically better off than someone who consumes less. Schumacher, 66, who spent twenty years as chief economist of Britain's National Coal Board, believes economists need a new set of values, and in a brief chapter in his book, he compares the economics of materialism to an economic system he derives from Buddhism. "While the materialist is mainly interested in goods, the Buddhist is mainly interested in liberation," he has written. Since consumption is merely a means to well-being, the aim of the Buddhist should be to obtain maximum well-being with minimum consumption.

The best way to do that, he says, is to develop what he calls "intermediate" or "appropriate" technology—an idea especially useful in the resource-short countries of the developing world. One example: Nigerian villagers use a $16 hand-operated metal-bending device to make agricultural tools; the cheapest machine available to do the same job costs $1,750 and requires electricity. Even in highly developed countries like the U.S., Schumacher maintains that appropriate technologies—solar heating, smaller farms and waste-recycling systems, for example—are needed to stave off energy shortages.

He also believes that industrialized nations must produce more efficient and durable products, preferably by a less automated, less dehumanizing technology.

Colonialization: Schumacher's following is strongest in rural areas, where the determination to live independently of big government and big business runs deepest. In his low-key, witty way, he warns small-town audiences to resist "colonialization by the big metropolitan areas." An example of that trend, he told the Helena crowd, is Montana's practice of exporting timber and sending cattle out of state to be slaughtered—and then importing furniture—and meat. Rather than doing business in a roundabout way like that, Schumacher believes industry should decentralize into smaller, self-contained units.

Schumacher admits that it may be a while before his ideas inspire change in the U.S., where bigger is generally deemed better and growth is an intrinsic part of the business ethic. But he notes that California Gov. Jerry Brown, one of his earliest fans, recently established an Office of Appropriate Technology. A National Center of Appropriate Technology has also been set up in Butte, Mont., and on Schumacher's U.S. tour, dozens of people have requested advice on everything from alternate energy sources to intensive gardening (a French system of deep rooting and tight planting that produces high yields on small plots).

There is a definite religious element to Schumacher's disclosure on the uses of smallness, especially his conviction that a technologically muscle-bound world must get back in touch with its spiritual needs. Schumacher, a convert to Catholicism, delivered a sermon at San Francisco's Grace Cathedral earlier this month. But the Englishman disavows any desire to be America's newest guru. Like Emerson, he emphasizes the old-fashioned virtue of self-reliance and practices what he preaches. He grinds his own flour, bakes his own bread and grows his own vegetables on a 4-acre plot in Caterham, a village 20 miles from London. One of his few concessions to technology is an electric wheelbarrow. But that, says Schumacher, is appropriate technology for an elderly man with a bad back.

[From the Washington Star, Mar. 22, 1977]

THEORY TO "THINK SMALL" DRAWS RAPT AUDIENCE

(By William Delaney)

The author of "Small Is Beautiful," concluding a six-week North American tour by meeting with President Carter at the White House today, reports "an amazing groundswell" of interest in his ideas "from all strata of society—not just the counter-culture types.

"When I came here 2½ years ago," German-born British economist E. F. Schumacher told a group of congressmen yesterday, "only one governor (California's Jerry Brown) was interested. I supposed the country was then still groggy from what I call

the Viet-gate syndrome. Now they're all interested."

At yesterday's midafternoon gathering, sponsored by a bipartisan Capitol Hill study group that calls itself the Congressional Clearinghouse on the Future, an audience of about 50 members of Congress, their spouses and aides listened with obvious interest as the tall, silver-haired Schumacher peppered them with ideas on everything from brickmaking in Nigeria to bakeries in Canada.

The thrust of his argument is that our economies and the technologies they offer are almost invariably geared to giant-scale endeavors that promote even more giantness, are increasingly energy-inefficient and often do not provide what the people—especially the poorest people—really want.

"It costs as much now to ship a brick 200 miles as it does to make it," he said. Yet Schumacher said Britain's brickmakers, with their works concentrated in Bedfordshire, were "appalled" when he suggested that they set up mini-brickworks around the country, saving in transportation costs and dispersing jobs.

Population dispersal, localism and self-sufficiency are key tenets of his philosophy—a philosophy that he told Charles Rose, D-N.C., and leader of the study group, he felt Carter would tend to appreciate, although he said he "hadn't a clue" as to what direction their talk today would take.

Farm-equipment makers are designing $80,000, air-conditioned tractors for the 1980s and 1990s, he told the attentive congressmen, while no attention is being given to designing equipment that would be both affordable and more efficient for the small farmer.

"You see," he added, "how technology is moving away from the people."

In seeking relatively inexpensive alternative energy sources in North Pakistan, something to take advantage of the area's small streams, Schumacher discovered that the last small-scale turbine had been designed in England in 1902. Technology had long ago moved on to provide far bigger, more expensive solutions.

In his brief talk and his response to questions from the congressmen, Schumacher made the following observations:

"In half the country (the United States), people are really worried about water."

"There is in the country so much readiness for voluntary efforts. You need direct human contact in programs like welfare. The government is good at collecting money but not at spending it."

Academics tend to view urbanization as a good force, yet themselves have not adequately treated it as a question. "Millions feel trapped in cities." Only West Germany, with its 12 "high-culture" cities, has had "a proper pattern of settlement."

Decaying urban neighborhoods should be reconstructed by the residents themselves, adapting an idea from developing nations that have discovered that "development" enriched outside, international construction firms.

"The poor people in rich countries pay to the rich in poor countries." Foreign assistance should be "about poverty—not development, but poverty."

"I notice a great deal of uneasiness (toward the 'small is beautiful' concept) with the managers of the big companies. There is very little, as yet, active imagination. Market forces have no imagination."

Schumacher referred several times to the federal government's $3 million National Center for Appropriate Technologies in Butte, Mont., but told the group he felt the role of the government should be to give the movement "a fair wind, to show interest. . . .

"A little money channeled this way wouldn't hurt. But I wouldn't want to see this bureaucratized."

One of few questions for which he did not have a ready answer was that of Albert H. Quie, R-Minn., as to how his ideas could improve education.

But soon he was talking admiringly of the mix of work and learning in China. "Work has to be brought back into the school." He spoke disparagingly of excessively book-oriented education, of huge consolidated schools, and suggested that children and teachers could be making their own furniture, growing their own food.

A SENSIBLE NATIONAL WATER POLLUTION POLICY

HON. RICHARD L. OTTINGER

OF NEW YORK

IN THE HOUSE OF REPRESENTATIVES

Thursday, March 31, 1977

Mr. OTTINGER. Mr. Speaker, the House will soon be asked to decide the fate of the Corps of Engineers program for regulating dredging and filling activities in the Nation's waterways and wetlands.

At present, the corps has the authority, under section 404 of the 1972 Clean Water Act, to regulate by permit dredging and filling operations in all waters of the United States. Under legislation (H.R. 3199) marked up last week by the Public Works Committee, the corps' section 404 authority would be limited to commercially navigable waters, adjacent swamps and wetland areas, and coastal wetlands. This new provision would exclude 98 percent of stream miles and 80 percent of swamps and marshes from Federal protection.

The Public Works Committee bill is expected to reach the House floor next week.

Because of the controversy surrounding the committee's proposed cutback in the section 404 program, the Environmental Study Conference earlier this week sponsored a briefing for congressional staff on the corps' program. Appearing at the ESC briefing were representatives of the agencies and groups that have a strong interest in the 404 issue. I am including for the RECORD copies of information distributed at the briefing by the corps, the Environmental Protection Agency, the National Forest Products Association, and the Natural Resources Defense Council.

I hope this information is helpful to my colleagues in their consideration of the section 404 controversy:

JOINT STATEMENT BY THE CORPS OF ENGINEERS AND ENVIRONMENTAL PROTECTION AGENCY ON SECTION 404

A number of concerns about the Section 404 program have been expressed. Some can be corrected by legislation. Others have little foundation, or are being handled administratively. These concerns are as follows:

A. *Scope of Jurisdiction:* The major expression of opposition to Section 404 has focused on the extent of waters that are subject to its protection. Opponents argue that the program should be limited to the commercially navigable and coastal waters that have been traditionally regulated by the Corps, leaving the responsibility for the remaining lakes, rivers, streams and most of the wetlands to the States. They assert that the Corps lacks expertise to delineate and regulate these additional waters and that its resources will be stretched to such an extent that it will be unable to devote its attention to that narrow category of waters that the Federal government has always protected for navigation. On June 16, 1976, the House of Representatives passed amendments to the Water Act (the Wright Amendment) which would have limited the Corps jurisdiction to commercially navigable and coastal waters plus their adjacent wetlands. However, the Senate refused to concur in this approach, opting instead for amendments that would have retained the broad Federal jurisdiction.

Defense of the broad Federal jurisdiction under Section 404 includes the following points:

(1) Pollution that impacts many forms of commerce is not confined to commercially navigable and coastal waters. Regulation of all waters is required to address pollution at its source.

(2) Even the protection of navigation requires jurisdiction over the tributaries and wetlands that connect to our highways of waterborne commerce.

(3) A roll back in Section 404 jurisdiction will establish a precedent for similar coverage of the Water Act's industrial/municipal permit program even though industries and municipalities have accepted this jurisdiction and are well underway to achieve the effluent limitations imposed in their permits.

(4) Most States and previous Federal programs have failed to adequately regulate aquatic resources as evidenced by the loss of over 50 million acres of wetlands since the nation's formation, with a six million acre loss occurring in the last twenty years.

(5) There is a Federal interest in protecting all waters of the United States, and restoring and maintaining their biological, physical and chemical integrity. The failure of one State to adequately regulate its aquatic resources will adversely affect the resources of other States and the commerce, health and welfare of the Nation.

(6) The Corps has taken administrative steps to handle these additional waters. These include:

The authorization in its regulation of discharges that occur in smaller waters (where flow is less than 5 cfs), provided certain nationwide conditions are met to protect water quality.

The use of areawide general permits with appropriate conditions that authorize categories of discharges in certain designated waters provided those discharges cause minor individual and cumulative environmental impact.

The examination with EPA of various methodologies that can be used to more precisely delineate jurisdiction.

B. *Scope of Review:* Critics of the Section 404 program argue that the scope of review of a permit application includes non water quality related concerns such as wetlands preservation, protection of coastal areas, and endangered species. These concerns are, however, part of the aquatic system and are interrelated with its chemical, physical and biological integrity.

The permit program serves to focus and resolve conflicting national concerns embodied in several Federal Statutes, such as the National Environmental Policy Act, the Endangered Species Act, the Fish & Wildlife Coordination Act, and the Federal Water Act, each of which requires evaluation of particular aspects of the environment during the review of any Federal permit application.

C. *Duplication of Effort:* The Corps regulations recognize that other State and/or local permits or certifications may be required for discharges of dredged or fill material. Provision is made in its regulation for joint Corps-State-local processing of applications or certifications, including joint public notices, public hearings, and environmental impact statements. For non-federal projects, no Section 404 permit is issued if a State or local permit is denied.

A recent, yet uncompleted, survey of existing State programs reveals that only six States have permit programs comparable to Section 404. Section 404 has filled this void in the remaining States, in recent months, and three States (Colorado, Tennessee and Illinois) have asked the Corps to intervene in projects within those States. In each case, the State has indicated that it lacks adequate controls to properly review the activity and to require it to protect aquatic resources from unnecessary degradation or destruction.

D. *Activities Covered:* Several mechanisms have been utilized administratively to regulate Section 404 activities. In addition, and because of misunderstandings that arose during the early stages of the program, the Corps regulation specifically excludes activities that do not involve discharges of dredged or fill material.

The present regulation includes the following provisions with respect to the activities to be regulated or excluded:

Plowing, seeding, harvesting, and cultivating are specifically excluded since these farming, forestry, and ranching activities do not involve discharges of dredged or fill material. (Some activities associated with them, such as road building or levee construction, do involve discharges that can have a deleterious effect on water quality unless performed properly.)

Maintenance, including emergency reconstruction, of fills, such as roads, dams, farm and stock ponds, levees, dikes, and breakwaters, are specifically excluded since these fills have already altered the aquatic system and their maintenance is essential to avoid further alteration.

Bulkheads and fills for property protection less than 500 feet in length are authorized by the regulation, subject to certain specified conditions.

The Corps has prepared a revision to its regulation that is planned for publication in the immediate future. This revision has already been coordinated with the affected Federal agencies, and, in addition to reiterating the above, would accomplish the following:

Authorize through the regulation all discharges of dredged or fill material in streams and impoundments (e.g., most stock and farm ponds) with an average flow of less than 5 cfs, and in natural lakes less than 10 acres, subject to certain specified conditions to protect water quality.

Authorize through the regulation the construction of roads involving discharges of less than 100 cubic yards of material, subject to certain conditions such as the installation of culverts to avoid the disruption of water circulation. According to estimates from the forestry industry, this would eliminate from individual permit requirements at least 90 percent of the forest roads constructed to harvest trees.

E. *Variations in Field Interpretations:* The Corps has decentralized the Section 404 program by assigning its implementation to the 37 District Offices and 11 Division Offices located throughout the Country. This decentralization allows response to the local conditions of each area and enables a closer partnership of review to exist between the Corps and appropriate State and local agencies.

The District's response to local conditions will obviously vary as the local conditions vary. Headquarters guidance is also distributed to insure uniform interpretation of existing policies and laws, and to assist the field offices in responding to the various activities that must be regulated. Some Federal agencies and outside interest groups are assisting the Corps in formulating this guidance. For example, the U.S. Forest Service, through its own initiative, is working with the Corps, EPA, forest and environmental interest groups to formulate specific nationwide guidelines for the evaluation of forest practices involving discharges of dredged or fill material. The Corps and EPA have urged other Federal agencies to assume similar initiatives with respect to their constituents' interests, and to work with it in eliminating misunderstandings about the program.

F. *General Permits:* To relieve potential overregulation, the Corps implemented a general permit program in its regulation to authorize discharges that are minor in nature and that cause insignificant environmental impacts, individually and cumulatively. As of January 28, 1977, 66 general permits had been issued and 93 more in various stages of processing. These general permits include the following activities: roadway fills, logging roads, small impoundments, property and shore protection, and submarine utility lines.

Some have indicated that general permits are a good idea, but may not be legal. Each legislative proposal to amend Section 404 has affirmed the Corps' use of general permits. The legality of the general permit program appears to be sustainable without legislation for two reasons. First, Congress specifically referred to "general permits" in the legislative history to Section 404. Second, a Federal Court has already held with respect to the industrial/municipal permit program administered by EPA under the same Act that it has "wide latitude to rank categories and sub-categories of point sources of different importance and treat them differently within a permit program . . . (and) substantial discretion to use administrative devices, such as area permits to make EPA's burden more manageable". *NRDC. v. Train*, ——; Supp. ——, 7 ERC 1831 (D.D.C., 1975).

The general permit program is new. Some initial confusion can be anticipated. The Corps is sensitive to this situation and has disseminated periodically detailed guidance on the program, including a monthly summary and critique of each general permit that is issued.

STATEMENT ON H.R. 3199 BY THE CLEAN WATER CAMPAIGN, A COALITION OF 21 ENVIRONMENTAL ORGANIZATIONS

H.R. 3199, a bill to amend the Federal Water Pollution Control Act of 1972 (FWPCA), contains several controversial sections which environmentalists vigorously oppose, as well as an authoriztion for funding the construction of sewage treatment plants. The Clean Water Campaign supports funding for sewage treatment plants but opposes H.R. 3199 for the following reasons:

(1) Deliberations over H.R. 3199 are holding up final passage of the Jobs Bill, H.R. 11. The House Public Works Committee has postponed conference on the Jobs Bill until after it takes action on H.R. 3199. In effect, thousands of jobs and billions of dollars are being held hostage by the Committee to controversial, non-urgent amendments to the FWPCA.

(2) Deliberations over H.R. 3199 are holding up additional funding for sewage treatment plants. Although H.R. 3199 would authorize additional funding for sewage treatment plants, the authorization is saddled with other controversial amendments to FWPCA. These controversial amendments have prevented passage of an authorization for the past two years and will continue to do so. According to estimates by the Association of State and Interstate Water Pollution Control Administrators,* approximately 36 states will run out of federal money for the construction of sewage treatment plants by the end of summer 1977. Pollution clean-up and up to 500,000 jobs are affected by this delay. Funding for sewage treatment plants can be added to the final Jobs Bills, as was done in the Senate version, S. 427.

(3) Section 16 of H.R. 3199 would weaken protection of vital wetlands and open a loophole which would allow the disposal of toxic materials in waterways with impunity. Wetlands are the spawning ground and nursery for fish and wildlife, natural water purifiers, and a means of natural flood control. By cutting back federal jurisdiction under Section 404 of FWPCA to approximately 2% of stream miles and 20% of wetlands areas, Section 16 will jeopardize the attainment of clean water and a healthy environment.

(4) Section 13 of H.R. 3199 would extend FWPCA's 1977 requirements for industrial sources, on a case-by-case basis, for two years. This extension is unnecessary, overly broad, and will penalize those dischargers which spent the money necessary to comply. In addition, this section would allow an overly broad extension of FWPCA's 1977 deadline for industries which intend to tie into municipal sewage treatment plants. Although some flexibility is necessary in dealing with industries which do intend to tie in, the exemption in H.R. 3199 is too broad.

(5) Section 12 of H.R. 3199 would allow the delegation of EPA's authority to fund sewage treatment plants to the states without sufficient environmental and fiscal safeguards. It would also remove EPA oversight of state priority lists. In effect, Section 12 creates a block grant program which would weaken the construction grants program and lead to waste of taxpayers' money.

(6) Both the House and the Senate will take up the controversial issues under FWPCA later this year. Other than the authorization for construction of sewage treatment plants, there are no issues in H.R. 3199 which are so urgent that they have to be examined immediately rather than later this year in the context of a major review of FWPCA.

The House Public Works Committee may seek a rule to attach H.R. 3199 to the Jobs Bill, H.R. 11. H.R. 3199 may then be taken to the House floor the week of April 4. The Clean Water Campaign urges the following action:

(1) Oppose attachment of H.R. 3199 to H.R. 11.

(2) Oppose passage of H.R. 3199 and demand immediate conference on the Jobs Bill, H.R. 11. Support provision of funding for sewage treatment plants in the Jobs Bill.

(3) If action is to be taken on H.R. 3199, support amendments to it which will alleviate controversy and better protect the environment. Congressman Edgar has drafted an amendment to Section 16 which would amend Section 404 of FWPCA. This amendment is well-drafted, would alleviate much of the controversy surrounding Section 404, and has the support of environmentalists in the House deliberations Other amendments to Section 12 and 13 may also be introduced.

* States which will run out of funding include: Alabama, Alaska, Arkansas, California, Colorado, Florida, Georgia, Guam, Hawaii, Idaho, Illinois, Indiana, Iowa, Kansas, Maine, Massachusetts, Minnesota, Missouri, Nevada, New Hampshire, New Jersey, New Mexico, North Carolina, Ohio, Oklahoma, Oregon, South Carolina, Tennessee, Texas, Utah, Vermont, Virginia, Washington, West Virginia, Wisconsin, and Wyoming.

PROVISIONS OF THE ELECTRIC UTILITY ACT OF 1977

HON. JOHN D. DINGELL

OF MICHIGAN

IN THE HOUSE OF REPRESENTATIVES

Thursday, March 31, 1977

Mr. DINGELL. Mr. Speaker, today, I am introducing H.R. 5841, a bill to increase the efficiency of the production and use of electric energy, and for other purposes. I am inserting into the RECORD

the following summary of the major provisions of this bill:

SUMMARY OF MAJOR PROVISIONS OF THE ELECTRIC UTILITY ACT OF 1977

The purposes of the Electric Utility Act of 1977 are (1) to increase the efficiency of generation and transmission of electric power through encouragement of competition, through incentives for efficiency and through prescription of reliability standards; (2) to establish a regional planning mechanism for new facilities; (3) to insure that electric utility rates are designed to minimize energy consumption and the need for new generating capacity, and to provide for reasonable rates to electric consumers; and (4) to provide for greater consumer representation in regulatory proceedings and to provide technical and financial assistance to State regulatory authorities.

TITLE I—IMPROVING EFFICIENCY OF, AND PRESERVING COMPETITION IN, GENERATION, AND TRANSMISSION OF ELECTRICITY

The Federal Power Commission is empowered to establish centrally dispatched power pools the membership of which is available to all electric utilities—private, public, cooperative—within a region and to order, when needed, exchanges of energy, interconnection, wheeling, and other transmission services between utilities. Wholesalers of electric energy are required to report anticipated shortages to their wholesale customers and the effects of such shortages are to be distributed equitably.

The FPC, on its own initiative, can suspend rate increases or order interim rates into effect after preliminary hearings. No more than one interim rate may be in effect at any time except under extraordinary circumstances. Automatic adjustment clauses in wholesale rates are prohibited unless they result from an evidentiary hearing which is held at least once every four years and unless the clause is reviewed every two years to insure maximum economies in operations and purchases. Wholesale buyers may audit records of their suppliers to insure compliance with schedules.

The Federal Power Act is amended to allow the FPC, on its own initiative, to order the cessation of any unfair method of competition. The construction of a bulk power facility (one with a generating capacity greater than 200 megawatts) can be subject to an anticompetitive review by the Attorney General and final permission of the FPC.

In order to improve the reliability of the supply of electric energy, the FPC is ordered to, within one year after the date of enactment of this Act, prescribe rules with regard to such reliability. Likewise within one year after the date of enactment of this Act, the FPC is ordered to prescribe rules for the encouragement of cogeneration.

Finally the Federal Power Act is amended to further restrict interlocking directorates of electric utilities.

TITLE II—COORDINATION OF PLANNING OF BULK POWER FACILITIES

Title II requires all utilities regardless of ownership to prepare annual long-range plans specifying their future bulk power facilities. The FPC is ordered to establish planning areas serving all or part of one or more States for the purpose of coordinating the planning of bulk power facilities. A planning area and this council shall report annually to the FPC on the status of bulk power facility plans within its boundaries.

TITLE III—IMPROVING EFFICIENCY OF USE OF ELECTRICITY

Title III applies to electric utilities whose sales of electric energy for purposes other than resale exceed 200 million kilowatthours in a calendar year.

Utilities are required to set rates based on cost of service (with the exception that "lifeline" rates are permitted) and institute time of day rates to industrial and commercial consumers and to residential consumers if reasonable metering costs are paid by the residential consumer. Utilities are required to provide rate information to consumers in a timely and clear manner and are prohibited from charging consumers for certain types of advertising.

State regulated utilities may not raise their rates unless it is done through an evidentiary hearing or through an automatic adjustment clause. Such a clause must be established in an evidentiary hearing at least once every four years and reviewed every two years to insure maximum economies in operations and purchases. The reviewing authority may audit the records of the utilities to insure compliance.

Electric utilities are required to gather certain data to determine the cost of service. Utilities shall implement load management techniques if they are practicable and cost-effective.

Utilities may not increase rates unless they meet all of the required provisions of Title III. State regulatory agencies must declare to the FPC an assumption of authority to determine compliance of State regulated utilities. Absent such a declaration, and until one is made, the FPC shall determine compliance. State regulatory agencies are instructed to arrive at methods for determining cost of service and to consider implementation of load management techniques.

Participation of consumers and State agencies in ratemaking decisions is authorized and financial compensation by the utility for expenses of certain participants is required if the consumer should prevail.

TITLE IV—CONSUMER REPRESENTATION AND ASSISTANCE TO STATE AGENCIES

The Federal Energy Administrator can make grants to State regulatory agencies for the improvement of staff support and for the development of rate reform initiatives. Further grants are provided for consumer participation. The office is also required to aid State regulatory agencies in technical areas such as load management and cost of service determinations.

An Office of Public Counsel is established to aid consumers who might not otherwise be adequately represented in hearings before the FPC and to participate in other matters before other Federal agencies when their activities significantly affect utility matters. The office can also provide compensation to intervenors who cannot afford to pay necessary costs of intervention.

H.R. 4250—A DANGEROUS BILL

HON. JOHN M. ASHBROOK

OF OHIO

IN THE HOUSE OF REPRESENTATIVES

Thursday, March 31, 1977

Mr. ASHBROOK. Mr. Speaker, on March 23 the House defeated H.R. 4250, common situs picketing legislation, on a vote for 205 in favor to 217 opposed. This bill would have legalized secondary boycotts in the construction industry.

Although sponsors of this legislation said it was designed to provide equal treatment for craft and industrial workers, in actuality it went far beyond that. It would have extended to construction unions strike and picketing rights not enjoyed by other unions.

This point is forcefully brought out in a newsletter prepared by Peter A. Cockshaw, editor and publisher of Cockshaw's Construction Labor News and Opinion. Following is Cockshaw's March issue of Construction Labor News and Opinion:

SITUS PICKETING 1977: A DIFFERENT—AND MORE DANGEROUS—BILL

New situs picketing bill gives unions far more power and creates many unforeseen hazards for contractors.

The new situs picketing bill is being sold by labor and its Congressional allies as one which merely gives construction unions equal treatment and simplifies or clarifies earlier versions. Nothing could be more erroneous, however. The bill is actually a PR smokescreen for legislation that dangerously extends the power of unions while it paralyzes the employer through many unforeseen hazards and pitfalls.

H.R. 3500 (Senate bill is S. 924) has little to do with equal treatment. Instead, it grants uncontrolled strike and picketing privileges to construction unions. It gives them powers far beyond any held by industrial unions and beyond any even contemplated during Congress' last go at situs picketing legislation. The new bill, in fact, is a carefully conceived—and well concealed—attempt to (1) force all American construction employees to become dues-paying members of AFL-CIO unions whether they want such representation and whether they work in states with right-to-work laws (vis-a-vis top-down organization), (2) require that American employers aid such unions in completing such membership, and (3) force the entire construction industry to support the economic and political goals of the Building & Construction Trades Department of the AFL-CIO.

This picture of 1977's situs picketing bill is not drawn by a man given to overstatement or carelessness. It is from one of the most respected labor lawyers in the business—Peter G. Nash, partner in the prestigious firm of Vedder, Price, Kaufman, Kammholz & Day. Nash is a labor expert who earlier distinguished himself as Solicitor of the Department of Labor and General Counsel of the National Labor Relations Board. In an exclusive interview with CLN + O, he analyzed and recapped the most treacherous provisos set forth in the newest version of situs legislation.

DEMOLISHING THE "EQUAL TREATMENT" THEORY

"Labor's 'equal treatment' claim is nothing but a ploy to confuse the public and Congress," Nash points out. "The sooner management clears away this smokescreen, the better." Any legislation intended to provide equal treatment for construction unions simply repeals the special construction exception in Section 8(e) and amends Section 8(b)(4)(B) of Taft-Hartley. This would only permit a union having a legitimate dispute with a general contractor to picket not only that general but all his construction subcontractors at a common site.

"Such a proposal would provide equal treatment and, whether good or bad legislation, it is difficult to object to politically," Nash explains. "Because equality has been the announced intention of common situs picketing legislation for years, it isn't surprising that every President and Secretary of Labor since Eisenhower has endorsed the concept and President Carter has committed himself to sign such a bill."

The bill now in Congress, however, starts off by granting unions more-than-equal picketing and striking powers. It uses this as its foundation and then builds and builds and builds from there.

THE THREE BASIC INGREDIENTS OF H.R. 3500

The latest situs bill has three main ingredients to trigger its biggest guns against an

employer. First off, the basic dispute must be with a proper primary person. Such a primary must be "any of several persons who are in the construction industry . . . and are . . . engaged as joint venturers or in the relationship of contractors and subcontractors in such construction . . . at such site."

To clarify, the primary must be in construction, must be a contractor or subcontractor, must be at the site, and must be engaged in construction at the site. This clearly covers all construction contractors and subs and makes no distinction between them (as there is in industrial disputes).

The definition also covers hospitals, manufacturing plants, department stores, petroleum companies, as well as previously protected governmental bodies (towns, counties, cities, states, federal government) and airlines, railroads, farms, etc., when such owners act as their own general.

Therefore, wherever a facility is its own general contractor in building or renovating, it is "in construction" as a "general contractor," "at the site" and engaged "in construction work at the site." So even the above are proper primaries to trigger picketing of an entire site.

In making an exception, H.R. 3500 does prohibit picketing "directed at a person who is not engaged primarily in the construction industry, who, through individuals regularly employed by that person and represented by a labor organization, is installing or servicing products produced by that person or is doing construction work at a facility owned by that person."

This proviso apparently aims to stop construction unions from raiding or interfering with the work of union industrial workers. Note: Industrial facilities are protected only if they have employees doing the construction work, only if they are unionized and only if they work full-time.

PICKETABLE OR STRIKABLE SECONDARIES

The second ingredient is to have properly picketable or strikable secondaries. H.R. 3500 seems to define such a secondary as "any person . . . at the site of construction."

Under this definition, any industrial employer is a picketable and strikable secondary if construction work is being done at his site. This holds true because there is no requirement for the secondary to be involved in the construction itself, merely that he be "at the site of construction." This could also hold true for anyone else who happens to be "at the site," such as material delivery companies, sales representatives of another company and the like.

Under the National Labor Relations Act, each is a "person" and is "at the site" when performing duties for the construction project or for the operation of the facility itself.

THE REAL PERIL IS THE THIRD INGREDIENT

The bill's third requirement—and perhaps the most treacherous—is that an acceptable dispute exists between the union and the primary, and that the union carry out its strike or picketing in an acceptable manner.

"In my opinion," warns attorney Nash, "this is an illusory requirement on two counts." First, nothing in the bill requires that the dispute have anything to do with the construction work itself or with construction employees. Thus a dispute with a proper primary industrial facility could trigger common situs picketing of construction work that happens to share a site with the industrial employer. Second, the bill repeals all union unfair labor practice provisions of Section 8(b) of the Taft-Hartley Act regarding site picketing activity.

It states that "nothing contained in this subsection (b) shall be construed to prohibit any strike . . . or any inducement of any individual employed by any person to strike . . . at the site of construction . . . directed to any person . . . in the construction industry . . . engaged . . . at such site." This is in striking contrast to the Conference Bill which passed both houses of Congress last term, and which began with the words "Nothing contained in clause (B) of this paragraph . . ."

Last term's version of the bill exempted construction unions from only the secondary boycott provisions of Taft-Hartley H.R. 3500, on the other hand, authorizes picketing and striking at a site without regard for subsection 8(b)—that portion of Taft-Hartley containing all but two of the unfair labor practices that apply to all other unions in this country.

"Accordingly," says Nash, "this bill authorizes a union at a construction site to strike or picket in an unlawful manner and for any of the following otherwise unlawful objectives":

In support of a "take-it-or-leave-it" bargaining position.

In support of non-mandatory bargaining demands (e.g., who the employer's bargainers shall be, what work the employer shall or shall not perform, whether or not an employer may sell his business, arbitration of the basic contract, benefits for retirees, etc.).

To force an employer to enter into an 8(e) "hot cargo" agreement.

To require an employer to join an employer organization and be bound by any pact negotiated by it.

To force an employer to stop doing business with another (e.g., to dismiss a supplier, subcontractor, insurance company, bank, law firm, etc.).

To promote featherbedding.

"Accomplishing the above is the real intent of H.R. 3500," says Nash. "The 1975 Conference Bill provided that nothing 'shall be construed to permit a strike . . . in furtherance of a labor dispute, unlawful under this Act.' This year's situs bill contains no such proviso."

Unless bans on strike or picketing activity are described somewhere else in H.R. 3500, a union may picket the primary and all secondaries at a construction site for any reason and by any means. There are few exceptions to this rule, all contain a hidden meaning, and some seek to expand union strike and picket rights rather than restrict them.

This year's situs legislation also omits the "grandfather" clause which was contained in the 1975 version. The bill becomes law 90 days after enactment whereas H.R. 5900 provided an exemption up to one year for projects under construction from time of bill's enactment.

SITUS PICKETING IN ACTION

The full, devastating impact of a situs picketing law can be seen in several examples. Let's assume an industrial employer has expansion work being performed at an existing facility, and he is in no way involved in the work. The union representing employees of the electrical subcontractor strikes and pickets the entire construction site over a wage dispute, and includes within its picketing the separate gates for the industrial employer's employees.

Clearly, any situs picketing law that aims merely to provide equal treatment would require the union to confine its picketing to the subcontractor with whom it is disputing. That picketing certainly could not be expanded to the industrial gates. But under H.R. 3500, both the common construction site picketing and the industrial gate picketing are legal because the construction subcontractor is an appropriate primary "in construction," and the other construction subcontractors and general are appropriate secondaries "at the site." In this way, Nash says, H.R. 3500 gives construction unions "far more power than any industrial unions now have."

Now assume an industrial employer, to avoid shutdown of his business, hires full-time employees, puts them to work on the construction site doing construction work and enters into a contract with a construction union to represent them. No such union-organizing activity would be required of any employer away from a construction site to avoid picketing, but under H.R. 3500 this would be necessary to protect the facility and its business. "The new situs bill thus gives industrial employers strong incentive to hire full-time construction union employees," adds Nash, "granting relief to construction unions from membership unemployment and permanently expanding the union's dues collections. This is hardly 'equal treatment'."

In another example, assume that an industrial employer is acting as his own general contractor on a construction addition to an existing facility. The employer has a wage dispute with a union representing its industrial employees, and that union strikes and pickets both the industrial facility and the gates for his construction subcontractors.

Certainly this would not be allowed off a construction site, but H.R. 3500 sanctions it. Indeed, it may go further and allow the industrial union to follow all the subcontractors to their other construction jobs and picket those sites, to follow all the contractors to their jobs and picket them as well. *Ad infinitum, ad nauseum.*

Also assume that a union on a construction site pickets the general contractor to have a non-union contractor removed. Although no such activity by an industrial union is legal, H.R. 3500 not only allows it, it permits the picketing to spread to all contractors on the entire jobsite, to any industrial employer at that site, to all other sites where the contractors are working, to the industrial employers at those sites, and on and on.

"No industrial union ever dreamed of such power granted by this 'equal treatment' legislation!" Nash exclaims.

SPOILS GO TO THE "PRIVILEGED" CLASS

Stripping the situs picketing bill of its legal complexities, we agree with those who claim it is nothing more than a union organizing device that further elevates union construction workers to a government-favored, privileged class and imposes unreasonable—paralyzing—restraints on the right of employers to conduct business.

The privileges conferred and restrictions imposed by the legislation raise serious concern among all employers. If Congress passes H.R. 3500 and President Carter signs it, then the new Administration will have taken a giant step in the wrong direction. A big—and harmful—step backward.

PETER A. COCKSHAW,
Editor and Publisher.

P.S. As we go to press, H.R. 3500 has been re-numbered 4250 to reflect minor technical changes and the inserting of the 1975 version of the Construction Industry Collective Bargaining Act. Neither the minor technical changes nor the bargaining act soften the impact of the situs provisions discussed above.

TEXAS MUNICIPAL LEAGUE'S WORKMEN'S COMPENSATION FUND

HON. J. J. PICKLE

OF TEXAS

IN THE HOUSE OF REPRESENTATIVES

Thursday, March 31, 1977

Mr. PICKLE. Mr. Speaker, Texas was the first State to establish the Texas Municipal League's Workmen's Compensation Joint Insurance Fund. This unique plan went into effect when the Texas State Legislature passed a law re-

quiring political subdivisions to provide workmen's compensation to their employees. It is a method whereby the municipalities collectively self insure. The fund charges its members 75 percent of the standard workers' compensation insurance premium, and pays out dividends at the end of the year based on each city's experience. This has saved Texas cities a lot of money. I want to share Texas' experience with the rest of the Members by inserting the attached article from Business Insurance, February 21, 1977:

TEXAS LEADS THE WAY, MUNICIPALITIES UNITING FOR SELF-INSURANCE

(By Kathryn McIntyre Roberts)

CHICAGO.—Municipal organizations in states across the country are establishing funds for their members to collectively self-insure for workers' compensation.

Saving money is the incentive for creating the programs. In some states members pay the standard commercial premiums into the fund but they may receive rebates at the end of the year. In others, the members pay reduced premiums into the fund and can expect dividends at the end of the year based on their loss experience.

In some states a search for better loss control services is a factor in the organization of a collective self-insurance fund for workers' compensation.

Although larger cities around the country have already successfully self-insured for workers' compensation, the emerging statewide pools provide the money saving technique to municipalities too small to individually self-insure.

The Assn. of County Commissioners of Alabama established a self-insurers fund for workers' compensation for its members last October. The Alabama League of Muncipalities formed a corporation three months ago to provide a collective self-insurance mechanism for its members.

The Michigan Municipal League, the Maine Municipal Assn. and the Kentucky Municipal League are in the process of organizing similar pools for their members.

In Oregon the major insurance problem for political subdivisions is general liability. A tight market and skyrocketing premiums for the insurance prompted the League of Oregon Cities to hire a consultant to study the situation and make recommendations. Self-insuring for workers' compensation is now also under consideration.

A model, or at the very least an inspiration, to these states is the Texas Municipal League's Workmen's Compensation Joint Insurance Fund. The fund is a unique study in municipalities collectively self-insuring for workers' compensation. It was the first broad-based program in the country. And the league got into it on the ground floor for providing workers' compensation to municipal employes without waiting for insurance companies to act.

Bill Martin, assistant director of the Texas Municipal League (TML), outlined the organization and operation of the fund for Business Insurance.

TML worked with its state legislature in drafting the 1973 law which requires political subdivisions to provide workers compensation to their employes. Prior to 1973, municipalities were given the option of providing the benefit and not all did so. By cooperating with the legislature, the league was able to include in the law a legal basis for municipalities to collectively self-insure the new benefit.

In October 1973, TML hired the Philadelphia consulting firm of Towers, Perrin, Forster & Crosby Inc. for $20,000. The consultants worked with the TML sorting through the alternatives and ultimately drawing up the specifications for the fund.

When workers' compensation became mandatory for larger cities in Texas on July 1, 1974, the TML Workmen's Compensation Joint Insurance Fund had 130 cities enrolled. Another 100 cities joined the fund in the first year.

Now the fund has a membership of almost 300 with $14.8 million in aggregate premium volume, a figure which represents what it would have cost the cities to obtain commercial coverage at standard rates. Implementation of the 1973 law was graduated by the size of city budgets, but all cities must provide workers' compensation by this July.

The fund charges its members 75% of the standard workers' compensation insurance premium, determined by insurance rating procedures. And at the end of the year dividends are paid the members based on each city's experience.

The fund has a service contract with the Texas Employer's Insurance Assn. Under a recently renegotiated contract, the fund pays the firm 9.5% of the aggregate premium volume to administer and service the program. The firm handles claims and provides safety engineering consultation and services.

"The high quality of service Texas Employer's provides is the real strength of our fund," said Mr. Martin.

The TML's fund is averaging a 50% loss ratio. The average loss ratio in the state is 62%. Mr. Martin said the improved loss ratio is saving the member municipalities another 11% of what they would otherwise pay for the insurance. That makes the savings to the cities 36% of what it would cost to commercially insure workers' compensation.

Reinsurance of the fund costs 2.7 percent of the aggregate premium volume. The fund has been reinsured against any one loss exceeding $50,000 and an aggregate loss of more than 68 percent of the standard premium. However, effective July 1, the fund is increasing the catastrophe insurance to $100,000 and the stop/loss to 70 percent. Mr. Martin said the fund was forced to increase the catastrophe risk "because there was no way to buy $50,000 in today's market."

The TML's fund has already undergone an evaluation by the consultants. The $10,000 evaluation, finished in November, resulted in some recommendations for better management reports. The consultants also recommended the league move into self-insuring general liability and fleet auto as soon as possible.

But the fund's trustees "want to ride the current success a little longer before we brave new worlds," according to Mr. Martin. He estimated it will be "a couple of years" before the trustees follow the consultants' advice.

The TML has been more than happy to help other state leagues organize self-insurance funds for their members. A thick packet of information, including the by-laws of the TML's fund, is sent to those who request it.

"We know they are piggy-backing on our experience. But that's okay. Someone had to blaze the way," said Mr. Martin.

The state leagues profiting from TML's experience are quick to admit it. Said O. H. Buddy Sharpless, administrator of the Alabama Assn. of County Commissioners' Self-Insurers Fund, "It would have been a lot more work without Texas as a model. We looked at their by-laws and contracts and modeled ours substantially on theirs."

After five months in operation, the fund now has 27 members out of 67 counties in the state and $350,000 in premiums. Mr. Sharpless predicts there will be 40 members by the end of the year.

The county fund offers its members a 15 percent discount on the standard rates in Alabama, plus possible rebates at the end of the year based on the experience of the fund and the individual counties. Thus far, said Mr. Sharpless, losses have "barely scratched the surface of the claims fund."

The fund has a service contract with Risk Management Service of Alabama. The firm receives 27 percent of the premiums paid into the fund. Of that, 15 percent pays for reinsurance and the other 12 percent pays for handling claims and loss control consultation.

The Alabama League of Cities has taken a slightly different approach. Three months ago it created a separate corporation to provide the mechanism called Municipal Workmen's Compensation Management Co. Inc.

"It's growing by the day," said John Watkins, executive director of the Alabama League. It now has 35 members and $300,000 in premiums. The potential membership is 356, the membership of the league. Mr. Watkins anticipates a majority of the league's members will participate in the fund.

The Municipal Workmen's Compensation Management Co. has its service contract with Risk Management Services of Alabama and has the same fee schedule as the County Commissioners' Fund.

Mr. Watkins said the TML's fund served as a model for the corporation. He noted, however, that the impetus in his league came from a number of mayors who are also businessmen. They had joined association pools to insure their businesses and promoted the idea for municipalities.

The Michigan Municipal League is now enrolling members in its collective self-insurance fund for workers' compensation and hopes it will be in operation on July 1.

Eugene Berrodin, manager of personnel and educational services for the league, said the move was prompted by "difficulty in securing any bids, escalating costs and difficulty in obtaining satisfactory services."

The Michigan Municipal League hopes to involve several hundred of its 470 members. Mr. Berrodin said it's planned to charge the participants the standard Michigan premium and then rebate any unneeded funds every year.

He noted that although some cities in his state have self-insured individually, they are anxious to join the fund having found it hard to handle the paperwork.

Mr. Berrodin stressed the difficulty cities have obtaining loss control services from commercial insurers. He said one city manager in the state told him he sees his workers' compensation insurance agent once a year—when he's selling the insurance.

As elsewhere, Michigan found TML's groundwork beneficial. In addition, the league hired Yeager & Co. of Southfield, Mich. to assist them in creating the program. When the fund is operating, the firm will process claims and provide safety engineering services. The fee is to be negotiated and will depend on the size of the fund, said Mr. Berrodin.

The Maine Municipal Assn. has designed specifications for a self-insurance pool for workers compensation based on TML's program, said Kent Hotham, assistant director of personnel services for the association.

Maine is prepared to launch its fund by the target date of April 1. Self-Insurers Management Corp. of Boston, Mass. is researching rates and securing excess insurance. The Management Corp. is doing the preliminary work at no charge with the agreement that if the association establishes a self-insurance program the firm will be hired on a two-year service contract at 12% of the aggregate premium volume.

Mr. Hotham said the Maine municipalities began to explore collectively self-insuring for workers' compensation a year and a half ago when their pooled policy was terminated by Argonaut Insurance Co. Since then the

municipalities have secured workers' compensation insurance individually

There are 471 members of the Maine Municipal Assn., but many are small cities with limited budgets Mr Hotham said at this point he can't estimate what the response will be to the self-insurers fund

The Kentucky Municipal League has been investigating self-insuring for workers' compensation since October 1976. Since midsummer of 1976, rates for the insurance have jumped 42% in Kentucky, said Mike Amyx, executive director of the league.

In addition, the market is drying up. "We find many smaller communities are finding no local agents willing to sell it. So they have to go to the state's assigned risk pool which is 20% to 25% more than it would cost commercially," said Mr. Amyx.

A 12-member committee of city officials investigating collective self-insurance for the 420 incorporated cities in Kentucky has found TML "very helpful," he said. An administrator of the TML's fund spent a day with the committee to discuss the program.

The Kentucky League is hoping to launch its program in late summer or early fall and anticipates it will be a joint venture with the state's 120 counties. The league has not hired a consultant yet, but Mr. Amyx said they will "very probably evaluate local and national consultants" for the job.

The League of Oregon Cities has hired the San Francisco consulting firm of Warren, McVeigh, Griffin & Huntington to study the state's problem of high costs and a tight market for liability insurance. The consulting firm was hired by the league in cooperation with the Assn. of Oregon Counties, the Oregon School Board Assn. and the Assembly of Community Colleges. The four organizations will share the $18,000 bill for the study which should be completed by the end of April.

Noel Klein, staff associate with the league, said general liability insurance premiums in the state are up 300% to 500% and there are "only one or two companies writing new policies now."

About 700 political subdivisions could be involved if the consultants recommended a self-insurance pool.

Although the high cost of insurance against false arrest and errors and omissions, to name a couple, drove the state organization to hire a consultant, Mr. Klein said, "workers compensation has been a concern too." It will be considered for pooling now also.

COMMUNIST ATTACK ON THOSE UPHOLDING THE FOURTH AMENDMENT

HON. LARRY McDONALD

OF GEORGIA

IN THE HOUSE OF REPRESENTATIVES

Thursday, March 31, 1977

Mr. McDONALD. Mr. Speaker, the Occupational Safety and Health Act—OSHA—is an attack on our free enterprise system in general and businesses in particular. A common criminal is entitled to a jury trial, is protected from unreasonable searches and seizures, is presumed innocent until proven guilty, is provided an attorney at taxpayer expense if he cannot afford one, and may not be convicted on the basis of a vague or undefined law. OSHA denies every one of these constitutional rights to businessmen.

The degree to which a political system protects criminals but punishes productive citizens is a good measure of its degeneration from freedom to collectivism. Unfortunately the Communists seem to understand this better than many of those who allegedly defend free enterprise. Recently, for example, the Communist Party newspaper, the Daily World, leveled an attack on Representative GEORGE HANSEN and an Idaho businessman for their defense of a businessman's right to fourth amendment protection from unreasonable searches and seizures. A three-judge Federal court has declared the inspection provisions of OSHA unconstitutional since it failed to require Government agents to show probable cause and obtain a search warrant as required by the fourth amendment. Apparently, the idea of a businessman retaining constitutional rights is a threat to the Communists.

It is interesting to note that the Daily World identifies the Idaho Congressman fighting OSHA as Orval Hansen, who has not been in Congress since 1974. Nothing like collectivist efficiency.

The article, from the March 16 Daily World, follows:

BIRCHITE, ULTRA'S SUIT COULD KILL USES OF OSHA

(By Frank Carroll)

The latest attack on the Occupational Safety and Health Administration (OSHA) has taken the form of a challenge, led by rightwing Birchite forces against the right to send inspectors into workplaces without a search warrant.

The U.S. Supreme Court has still not ruled on this question. Lower federal courts have ruled in Idaho and three other states that OSHA inspectors must have warrants.

OSHA experts, union activists and the Labor Department all agree that the search warrant requirement would kill the ability of OSHA to protect workers.

The suit in Idaho was brought by a leading Birch Society member.

Rep. Orval Hansen (R-Ida.), rightwing Congressman and William Buckley, rightwing columnist, have joined the attack. Buckley, in a recent column, singled out OSHA as a prime target for elimination.

The U.S. Supreme Court is expected to rule soon on the constitutionality of the "right of entry" provision of the Occupational Safety and Health Act. Meanwhile, Justice William Rehnquist ruled that inspectors can continue until the Supreme Court decides.

OSHA is being defended by Labor Secretary Ray Marshall and by Ms. Eulah Bingham, Undersecretary of Labor-elect for OSHA.

Ms. Bingham, a union supported scientist, will take office in a few days. Marshall has indicated a willingness to get the agency back into shape after years of hamstringing and disruption by former Presidents Nixon and Ford.

But it will take labor support, especially rank-and-file support, and a fightback against the rightwing attackers of the agency, to make OSHA what it should be—a defender of the workers' health and lives.

LITHUANIAN INDEPENDENCE DAY

HON. JAMES J. HOWARD

OF NEW JERSEY

IN THE HOUSE OF REPRESENTATIVES

Thursday, March 31, 1977

Mr. HOWARD. Mr. Speaker, in this time of American consciousness for human rights throughout the world, I feel it appropriate that we in Congress again focus our attention on Lithuania and her courageous people's struggle against foreign domination. February 16, 1977, marked the 59th anniversary of the formation of the Republic of Lithuania, yet that joyous day was saddened with the knowledge that the country is not free.

Much has been said in this body regarding the noble heritage of Lithuania. My purpose here is to rededicate ourselves to the cause of that nation's freedom, as well as the freedom of all men. The tremendous spirit to be free that the Lithuanian people possess in spite of despotic rule by the Soviets serves as a model to all oppressed people of the world. Lithuanians have kept alive the struggle against suppression of their independence and religious and political freedoms and have long been an example of the pursuit of liberty and world peace. We condemn Soviet suppression of their fundamental rights. The United States has consistently refused to sanction the forcible occupation of Lithuania and her Baltic neighbors and I continue to advocate that policy.

The Lithuanian-American Council and the Lithuanian-American community of the United States deserve commendation for their efforts and continued activity in behalf of their brothers who are not so fortunate to enjoy the democracy we Americans so easily take for granted. As we pause to mark this anniversary of Lithuanian independence, let us recognize the contribution of the more than 1 million Americans of Lithuanian descent who have contributed to the development of the United States and to the preservation of its ideals of liberty and freedom and let us not forget those Lithuanian people in their homeland who still struggle for the fundamental liberties under the oppression of the Soviet Union.

LITHUANIAN INDEPENDENCE

HON. NORMAN F. LENT

OF NEW YORK

IN THE HOUSE OF REPRESENTATIVES

Thursday, March 31, 1977

Mr. LENT. Mr. Speaker, I join my colleagues today in commemorating the 59th anniversary of the declaration of independence of Lithuania, and in remembering the subsequent suppression and human suffering which this day also marks.

There is a tendency in this day and age for our people and leaders to concentrate their attention on the global view of issues and problems, and overlook in this approach the individuals and nations who are the actors in the global arena.

The fate of Lithuania and the other Baltic States is a case in point. If our commitment to human rights and our activities today in support of this commitment are to mean anything, then it is important that we stop and remember the painful violations and betrayals which we protest.

In the Baltic region, millions of human beings were brutally displaced when their lands and homes were occupied by the Russian Army. Families were separated, and individuals forcibly relocated in different parts of the Soviet Union. There are tales of horrors which multiply upon themselves—of men and women deported to Siberia and made to cut wood in the dead of winter to heat the homes of soldiers, with scant clothing, little food, no shoes: Those who froze to death were lucky.

Today, we remember and extend our remembrance to the peoples of the Baltic States, with the promise that we shall never forget their courage and their sorrow, and with praise for their endurance.

We must, as we have so often done before, express the hope that those nations of the world who continually violate human rights and ignore individual freedom and initiative, will in the future act to prevent human tragedies such as those experienced by the Baltic peoples.

AEROSAT: THE NEED FOR REEVALUATION AND MAINTENANCE OF INTERNATIONAL COLLABORATION

HON. JOHN W. WYDLER

OF NEW YORK

IN THE HOUSE OF REPRESENTATIVES

Thursday, March 31, 1977

Mr. WYDLER. Mr. Speaker, in deleting authorization for the funding of Aerosat, the proposed aeronautical communications satellite, from H.R. 3965, the Committee on Science and Technology was mindful of the international implications of this program.

Aerosat is truly an international collaborative program to apply space technology to the improvement of aeronautical safety and efficiency in air space management. The United States has 47 percent with the European Space Agency—ESA—possessing an equal share and Canada 6 percent.

When Aerosat was conceived during the early seventies, growth projections for air traffic particularly over the North Atlantic, were quite optimistic. From the vantage point of hindsight, the combination of lags in projected traffic growth together with escalation in program costs, indicates the wisdom of a full review. Current cost projections for the U.S. portion alone were $15.5 million for fiscal year 1978. They were planned to equal $25 million for each of the succeeding 6 years. In addition, from a budgetary standpoint, committing so large a portion of the FAA's R. & D. budget totalling only $85 million, seems a misplacement of priorities. Indeed, funding Aerosat from the FAA's R. & D. budget when, according to NASA, "there are no technological imponderables involved," appears inappropriate.

However, it is important that our foreign partners in the Aerosat program do not perceive our action in any way, to be a lack of interest in maintaining such international cooperation which this program truly represents. The committee's purpose is simply to reevaluate Aerosat in concert with our foreign partners. It is as much in their interest as ours to be assured of both the need and the application of the most cost-effective technology. We understand ESA participants in the Aerosat program will welcome such reevaluation so long as the cooperative machinery is left in place.

The committee recommended authorization of up to $1.5 million for full review of Aerosat and asked that a new plan be submitted for its review prior to the scheduled meeting of the Aerosat Council on May 4, 1977. One example of improved cost effectiveness which could be made available to the Aerosat program is the space shuttle launch vehicle rather than Delta boosters.

Based upon the testimony of the primary beneficiaries of improved over-ocean air traffic control, we must question current Aerosat timing and capability. I understand the desirability of a thorough reevaluation is shared by at least some of the 9 ESA government partners who should not therefore, consider that the United States has acted in an arbitrary manner.

Many of the basic assumptions upon which Aerosat was based have become questionable. It is my hope, however, that the program will be maintained at a low level of effort and cost pending the development of realistic traffic projections. It is equally important that the latest technology for airborne separation assurance, air traffic control surveillance, airborne communications, and perhaps navigation capability, be incorporated in a revised satellite system designed for full operational designation once a suitable test period is completed.

Thank you.

THE DEMONSTRATION FARM ACT OF 1977

HON. GEORGE E. BROWN, JR.

OF CALIFORNIA

IN THE HOUSE OF REPRESENTATIVES

Thursday, March 31, 1977

Mr. BROWN of California. Mr. Speaker, many agricultural issues have been raised in recent months as the harsh, freezing winter and the drought caused various people to look more closely at farming usage of water, and energy. This scrutiny raised concerns about soil erosion, needless waste of water and organic matter, and a dependency on limited, highly priced energy sources.

There is a great deal of on-going research in these areas of concern resulting in the continuing development of new technologies, techniques, and practices which improve conservation and utilization of our fertile topsoil, the quality and quantity of water supplies, energy and organic matter. But these new methods often take 10 to 30 years to reach the farmer out in the field, and it is understandably difficult to encourage a transfer to new technology or practices when so much time and money has been invested in other equipment.

The problem is that improved conservation of these resources is needed as soon as possible. Recent reports on topsoil loss show it at questionable high levels—over the 5 ton/acre maximum acceptable by often as much as 15 to 20 tons/acre—reducing soil fertility and productivity at a measurable rate. The runoff of this sediment into our water bodies increases their pollution which is another strong concern of various groups across the country. Irrigation methods need to be reevaluated with a possible transfer to drip irrigation, solar-energy irrigation pumps, and recycling of waste waters wherever practicable. Organic matter is a source of fuel and fertilizer which should be put to use wherever possible.

My answer to this dilemma of getting research results to the farmer rapidly is demonstration farms. I have therefore introduced the Demonstration Farm Act of 1977. This legislation sets up a system of demonstration farms within each State which would apply new conservation and utilization technologies and practices where the farmers could actually see the new methods in practice. Basically the legislation does this in the following manner:

Sets up an information-gathering system in the USDA to compile all Federal, State, public, and private research projects concerning conservation and utilization of energy, soil, water, and organic matter.

Authorizes the Secretary of Agriculture to give grants to each State Department of Agriculture for the purpose of settting up:

First, one large model farm on State land to demonstrate projects selected from this compilation that address particular State or regional problems and conditions regarding soil loss, energy shortages, climate fluctuations, water shortages, et cetera;

Second, after having been tested on the model farm for no more than 2 years and proved to be practicable, no less than 10 demonstration projects on farms that are already in operation;

Third, the model farms and individual farmers will give tours and keep records of the benefits or problems of the projects, including energy savings, decrease in soil erosion, water savings or quality improvement, and the like. These reports will be given, in a compiled form, to the Congress, the USDA, and the State Departments of Agriculture.

Fourth, the authorization level for this bill is $20 million.

Since the drought the dust-bowl tendencies in the Midwest have pointed out the worsening problems with soil erosion and water shortages. I feel it behooves us to respond immediately with our best ideas and possible solutions. It is the time to get everyone involved. This bill gets the State departments of agriculture working with the USDA Extension Service, the Soil Conservation Service, the agricutural universiti

experiment stations. My hope is that with this increase in communications and cooperation the goal of reaching the farmers as quickly as possible will be furthered. Everyone has something to contribute, and it is time to pull in all our ideas and apply those that are most feasible.

CALIFORNIA'S WATER SHORTAGE

HON. SHIRLEY N. PETTIS

OF CALIFORNIA

IN THE HOUSE OF REPRESENTATIVES

Thursday, March 31, 1977

Mrs. PETTIS. Mr. Speaker, as you are aware, California is currently experiencing a water shortage due to an unseasonably dry winter.

I would like to insert for the RECORD, two recent articles which appeared in California newspapers regarding: The severity of the shortage; what water districts are doing to combat the paucity of water; and why water conservation by Californians is needed.

I am particularly pleased with the Coachella Valley County Water District and the agricultural water users in that area for their efforts. As the article "Along the Western Water Front" indicates, the Coachella Valley is not faced with the water shortage primarily because water always has been recognized as valuable there.

There is no doubt that unless all of California takes water conservation seriously the shortage will continue to be of disastrous proportions.

The articles follow:

[From the Desert Rancher, March 1977]

ALONG THE WESTERN WATER FRONT

The fruits of the labor of 59 years by employes and elected officials of the Coachella Valley County Water District became dramatically apparent this year.

Arid Southern California in general, and the Coachella Valley in particular, is not faced with the water shortage which has parched Northern and Central California primarily because water always has been recognized as valuable here.

Because of this concern, there are now more than 47 million acre feet of Colorado River water in storage behind the nine major dams in the river system. If not another drop of snow falls in the Rockies, California will be able to draw its annual Colorado River entitlement of 4.4 million acre feet for several years and probably will be able to continue to draw more than its basic entitlement at least until 1985 when Arizona is expected to start using its full entitlement.

Farmers in Coachella Valley use approximately 566,300 acre feet of Colorado River water annually for irrigation of more than 55,000 acres. Barring the adoption of irrational mandatory state-wide water rationing, these farmers should have no concern of the availability of an adequate water supply.

It isn't an accident of nature that this water supply is available today. When the Coachella Valley County Water District was organized in 1918, directors began working immediately to obtain Colorado River water for irrigation. It took more than 30 years of political and manual labor before the first drop of Colorado River water was delivered to Coachella Valley farms in 1949.

This district has been extremely active politically in fighting for adequate storage on the river. Ray Rummonds, CVCWD president, also has served as chairman of the Colorado River Board of California for 12 years.

Even today district officials urge conservation of water. According to U.S. Bureau of Reclamation figures, CVCWD beneficially uses and distributes nearly 95 per cent of the Colorado River water it receives at Check Gate 6A near Niland on the Coachella Canal.

Farmers of the Coachella Valley sympathize with the farmers of Central and Northern California, but, due to the adequate supply of water in storage along the Colorado River, they should not be required to cut their water use by 25 per cent. There is no method of delivering Colorado River water to Northern and Central California.

Already, farmers are recognized as being among the most efficient water users in the state and Coachella Valley farmers are some of the most efficient water users among farmers.

The district has, however, offered its annual entitlement of State Water Project water, some 8,000 acre feet, to Kern County this year.

The water normally is destined for urban use in the Coachella Valley, but its immediate use in groundwater basin recharge. Recharged water won't reach the nearest wells for more than 15 years so the district's temporary loss of this urban water supply will have no direct effect and will be hardly detectable in the future.

Good fortune and good planning have assured Coachella Valley residents of at least 100 years of high quality groundwater supply at five times the valley's present population.

According to United States Geological Survey figures, there is 15.7 million acre feet of water in storage in the first 750 feet of the groundwater basin.

Again, this isn't all accidental.

One of the prime reasons CVCWD was formed in 1918 was to conserve the waters of the Whitewater watershed.

As soon as the district was formed, district officials began to obtain the lands in the Whitewater spreading area from the Bureau of Land Management, Southern Pacific and others, now totalling several thousand acres.

If this had not been done those lands now all would be in private ownership and present day water conservation efforts would be for naught.

In the early 1920s, CVCWD adjudicated all the stream flows of the Whitewater and its tributaries, preserving to the present generation those flows to serve Coachella Valley.

As with agricultural users though, urban users should use water wisely.

[From the Los Angeles Times, Mar. 29, 1977]

SOUTHLAND MAY RUN OUT OF WATER BY FALL: RESERVOIRS WILL BE EMPTY IN SEPTEMBER WITHOUT 10% CUTBACK, OFFICIALS SAY

(By W. B. Rood)

Without at least a 10% cut in water use, the reservoirs that form the backbone of Southern California's water supply system will be virtually dry by the end of summer, according to official projections released Monday.

Despite extensive publicity about the drought and appeals for conservation, figures compiled by the Metropolitan Water District show water consumption throughout the Southland is far outstripping expectations.

For March alone, MWD tallies show water use will exceed last year's March total by about 40%.

"Last February, our board asked for a voluntary 10% conservation," said Evan L. Griffith, assistant general manager for MWD, which wholesales water to 27 local agencies serving 11 million people throughout the Southland.

"What happened instead is that district-wide water use went up."

Along with failure of appeals for voluntary conservation, district officials blame unseasonably warm weather for the unexpected jump in demand.

"The hot weather is killing us," Griffith said. "For every degree of temperature rise above the monthly norm, we use an additional 4,000 acre-feet of water."

Whatever the reasons, even those water officials who were saying Southern California would do reasonably well this year are now heeding grim projections.

Perhaps the best evidence of that was the action taken Monday by a committee of the MWD board, which has been reluctant to impose sanctions to achieve a cut in water use.

With only token opposition, the committee approved a measure which would charge local districts double for any water taken in excess of 90% of the amount they used in 1976.

The measure also would allow MWD to reward districts with a $20-per-acre-foot rebate for better than 10% savings as compared to 1976 consumption.

The proposal, which goes before the full MWD board today, would take effect on April 1 and be administered on a month-by-month basis at least through Dec. 31 or until the board believes it is no longer needed.

The board acted after hearing a graphic presentation of how precarious a position MWD is in as a result of the drought.

The district's ability to make it through the summer depends not only on the willingness of water customers to conserve but also on the whims of nature and the capacity of several dozen 40-year-old pumps to endure. MWD has given up its supplies of California Aqueduct water in an effort to make additional supplies available to harder hit Northern California.

To compensate, the district is operating its Colorado River Aqueduct beyond designed capacity. Nine pumps on the river itself and 36 more that force the water to populous areas of Southern California are working full time.

"If one of those pumps goes out—just one—our reservoirs (Lakes Mathews and Skinner plus four state reservoirs to which the district has access) would go to zero storage sometime in July," said MWD's Griffith.

Normally the district operates only eight of its pumps on the Colorado, allowing for maintenance on the out-of-service unit.

"When we went to nine pumps on March 1, we thought Lake Mathews would go up by about 1,000 acre-feet a day. Instead it was going down by 400 a day until the recent rains," Griffith said.

"That's what has scared the hell out of us," said another district official.

Even if the pumps churn on without incident and barring damage to the Colorado River Aqueduct by earthquake—a possibility district officials talk about in whispers—it will be imperative for Southern Californians to conserve.

"Without any conservation, we'll be out of business by September," said James Krieger of MWD's operations branch.

If Southlanders manage to cut their water use by 10%, the picture in September will be better but not rosy.

The combined storage in the district's two main reservoirs, Mathews and Skinner, would be about 100,000 acre feet. At capacity the two hold 225,000.

All but one of the district-tapped state reservoirs, Pyramid Lake, would be virtually dry or severely depleted.

This is the picture that has made MWD dead serious about conservation.

"If in a month or two we don't see any evidence of real conservation, I don't see that we would have any alternative but to

go to mandatory rationing," said one district official.

Another factor which has stirred the MWD board to action was the long-range picture outlined in a letter from General Manager John H. Lauten to the district board.

"Metropolitan has already been advised preliminarily by (the state) Department of Water Resources that the state must give first priority to restoring storage in its now seriously depleted reservoirs," Lauten wrote.

"In the absence of an extremely abundant water year in 1978, Metropolitan may again be requested to substantially reduce its demand on the State Water Project."

In sum, MWD is hoping for 11 million Southlanders to take conservation seriously, 36 pumps to run indefinitely without problems, freedom from serious earthquakes and a better rainfall than anyone can normally expect in the coming water year.

EFFECT OF GOVERNMENT REGULATIONS ON THE STEEL INDUSTRY

HON. GARY A. MYERS

OF PENNSYLVANIA

IN THE HOUSE OF REPRESENTATIVES

Thursday, March 31, 1977

Mr. GARY A. MYERS. Mr. Speaker, the Council on Wage and Price Stability recently announced the results of a study of Federal regulations affecting the steel industry. The report highlights many instances in which Federal regulations have had a deleterious effect on the industry. Because of the importance of the steel industry to the national economy and because Federal regulations may impact on other industries in a similar fashion, I would like to bring to the attention of other Members a summary of the Council study. The summary follows:

COUNCIL ON WAGE AND PRICE STABILITY,
Washington, D.C., January 18, 1977.

COUNCIL ON WAGE AND PRICE STABILITY RELEASES STUDY OF GOVERNMENT REGULATIONS AFFECTING STEEL INDUSTRY

The Council on Wage and Price Stability today released the first of two volumes in a unique and comprehensive compilation and study of all the federal regulations affecting the American steel industry. Volume I, which was nine months in preparation, catalogs and explains all of the federal regulations and policies which affect the manufacture of steel. The catalog provides for the first time and in one place an objective description of the myriad of federal regulatory programs that affect a major industry, and discusses the cumulative impact—positive and negative; primary and secondary—of these independent federal actions.

In announcing the release, Acting Council Director William Lilley III said, "No one really knew how far the federal government had gone in regulating primary heavy manufacturing. Our catalog portrays how a major industry, such as iron and steel, can hardly make even routine decisions without taking into account the directives of some federal agency."

"Steel is an industry whose production procedures are increasingly prescribed by government, whose costs are substantially influenced by government, whose market share exists at the sufferance of government and whose profitability is affected a good deal less by innovation and enterprise than it is by what it must spend to comply with a mushrooming list of federal rules and regulations," Lilley said. He noted five main points which he said the Council staff had drawn from the study:

The volume of federal regulations affecting a single industry like steel is astonishing. Over 5,000 regulations from 27 agencies impact on the steel industry in ways described in the catalog. And, because many of these are quite detailed, that number really does not convey the complexity and extent of government rules. Further, the catalog does not include most state regulations. In many ways the catalog portrays only the tip of the iceberg.

The scope of government intervention is growing by leaps and bounds. While the number of agencies directly affecting the steel industry remained static at 13 from 1950 to 1960, from 1960 to 1965 four new agencies were established. By 1970, five more had been added and between 1970 and 1975, seven additional agencies had been created.

The number and extent of programs creating regulations has also risen as Congress has given new rulemaking powers to existing government offices.

The reach of these regulations has extended more and more into the daily routine of plant operators and workers. Prior to 1970, most regulations, such as those governing taxes and securities, did not interfere in the day-to-day operation of the manufacturing process.

When viewed from the point of impact, regulations are imposed without coordination among the regulating agencies or, indeed, with no coordination among offices of a single agency. Not surprisingly, many of the regulations operate in contradictory ways.

"What appears to us," said Lilley, "is that regulators have no way of knowing what they are actually doing to those they regulate because each deals with only one discrete part of the process, while the industry must deal with all the pieces at once. When we asked federal agencies for lists of their regulations that affected the industry, they told us they were unable to provide them because they simply didn't know what regulations impacted on which industries. Obviously, this approach to regulation, which gives primary emphasis to the statute books and insufficient emphasis to the impact of regulation, makes it very difficult for steel manufacturers or any manufacturer to function efficiency."

The 5,000 or so federal regulations described in the catalog only pertain to the direct manufacturing process. Regulations affecting mining, transportation, and marketing, for example, are not included, and the catalog does not include most state regulations. "A compilation of all the regulations that affect this single industry in all its aspects would be many times longer than the 250-page catalog that we are releasing today," Lilley said.

A mere listing of the growth in agencies or in the number of regulations does not adequately capture the changing nature of the limitations imposed on private sector decisionmakers. The catalog clearly shows the trend from proscriptive regulations (*e.g.*, antitrust laws) to prescriptive regulations (*e.g.*, safety requirements). Federal agencies now employ a variety of regulatory approaches, each intervening differently in the production process. The type of intervention ranges from design-specification standards, performance standards and incentive standards to reporting, disclosure and planning requirements.

The catalog discusses regulatory impact in the following areas: Environmental, Occupational Safety and Health, Discrimination in Employment, Industrial Relations, Antitrust, Foreign Trade, Federal Income Tax and Energy. The Council found that just to understand each of the regulatory programs affecting the steel industry in any one discrete area was a major undertaking in itself.

"What started off as a widely supported effort to accomplish certain socially desirable objectives through regulation has now grown so gigantic that the industry is having an increasingly difficult time accomplishing its most socially beneficial objective, that of producing iron and steel," said Lilley. He continued:

"If the trend in regulatory intervention proceeds at the pace of the past ten years, there is no doubt in our mind that the American steel industry will become increasingly unwilling *and* unable to invest in new, job-creating plants and equipment. This is clearly not the desired result of either the regulations or the regulators, and indeed no single regulation could have that effect. But when each and every regulation, rule and directive is aggregated, when each and every hoop and hurtle is put in one arena, the impact is far more pervasive and overwhelming than the creators of any single regulation can imagine. It is truly a case where the whole is far greater than the sum of the parts.

"Of paramount concern to us is that, if allowed to continue along the present course, the sheer magnitude and complexity of the regulations being imposed on this major industry, or any other, will soon reach a critical mass, where it will become evident to all that the process has finally gotten totally out of control. When that day comes, the public's revulsion over what has been allowed to happen will be vented against *all* regulation, good and bad alike, rather than against the excesses to which the process has been allowed to run."

The second volume of the study, a review of various past attempts to measure the impacts of federal regulations of the steel industry and a proposal of methods to improve these evaluations, has not yet been completed.

ARE WE REALLY THE "SINFUL ARMS MERCHANTS OF THE WORLD"?

HON. DALE MILFORD

OF TEXAS

IN THE HOUSE OF REPRESENTATIVES

Thursday, March 31, 1977

Mr. MILFORD. Mr. Speaker, there is a rising and vocal enthusiasm, seemingly based on some type of divine guidance that would brand the United States as being "sinful and evil" because of our foreign military sales activity.

Seemingly the United States, like the Corinth of old has become corrupt and is now leading the rest of the world to a hell made of cannons, bombs, airplanes, and missiles. A new Paul has come onto the scene with a theme which would have us unilaterally stop these sinful sales. This theme exhibits a gross lack of understanding of an international scheme that has so carefully built faith, trust, and cooperation throughout the free world. This international scheme has made mutual economies and securities of the free world viable.

The real moral issue rests with keeping faith with the sacrifices of the American taxpayer who paid to build a stable international balance of mutual support of economic and military security upon which mutual survival depends.

These other unwitting and superficially moral ideas would destroy that work and drive those markets elsewhere to the degradation of international cooperation at a cost to American aviation and related industries of hundreds of thousands of jobs.

These ideas are tantamount to abandoning a proven and beneficial concept to the predatory invasion of our markets and influence by the dictates of controlled ideologies and economies.

It will be a black day for international stability and economics when we forfeit our position so expensively and painstakingly constructed out of the chaos of World War II.

I refuse to be a passive spectator to the destruction of the victory gained after the victory of the war, both at such a terrible price.

I would be unfaithful of public trust to remain silent on a subject of national debate which has advocates of a direction that very probably would do irreversible harm to our domestic and international economy and politics so vital to these times.

During and after World War II, the Government and citizens of the United States assumed a moral responsibility unprecedented in history. This country of ours, singlehandedly, brought stability to our friends and enemies in a torn world and stayed the encroaching menace of communism. All of this was done at huge cost to the American taxpayer and drain on our resources.

World stability, such as it is, stems from that endeavor and sustains its precarious balance by continued worldwide participation of the United States and its support of our friends and allies as they are establishing their own way to go.

If America were impregnable and totally self sufficient, we could turn inward if that were our choice. But international interdependence for collective security on political, military, and economic fronts is a fact of modern life. And, for the United States, the interdependence of politics, national security, and economics is a fact of international life.

Economic security in this dangerous world is as all important as military security and both go hand in glove. The preeminence of the U.S. position in civil aviation, for one instance, is irrevocably tied to the preeminent position of the United States in the military market and the security of our friends and allies.

The U.S. aviation industry, its jobs, its trade balance, its economics, and its political influence in the free world have a common catalyst in the military sales abroad and ebb or flood as policy encourages military sales to seek their best level in the market.

On moral grounds it must be acknowledged that in the years following World War II, the security of Europe and the Middle and Far East rested with U.S. military and security assistance programs paid for by the American taxpayer, as a price willingly paid for peace and stability of a fragmented world.

As these areas became able, direct assistance was replaced, in a large measure, by arms sales to these countries as they came to look to their own security. Military sales grew:

Because the United States recognized the legitimacy of the needs expressed by these governments in today's uneasy and turbulent world.

Because allies and foreign friends have decided that they need equipment of American manufacturers and services from the U.S. Government and American suppliers to sustain their sovereign purposes.

Because more countries are now economically able to purchase such equipment and services from economies stabilized by U.S. assistance.

Because many sovereign nations prefer to purchase military equipment and services from the United States rather than from other countries for economic and political reasons.

There are a host of other reasons, but let us stop here for a moment and let me give voice to one of my primary concerns that naturally follows from any form of restriction upon these military sales to friends and allies which may drive their markets elsewhere.

Closely tied to international cooperation and U.S. influence abroad has been the immeasurable impact of U.S. preeminence in worldwide air transport and the close day-to-day working alliance brought about by sales and operations of U.S. civil aircraft abroad. The atmosphere for peace, respect, and understanding that arises from this area should not be underestimated. In addition, the economics of the international sales of aeronautical products are second only to agriculture, and clearly the positive factor in trade balance so necessary to afford our continued support of friends and allies whether for selfish or moral reasons.

Domestically we would not have the industry base for that vital civil aviation arena if it were not for the capability to meet related military commitments. Internationally, we would not have the entree to the civil market were it not for the hand in glove military sales, training, and support activities.

To constrain military sales and thus inevitably drive that market elsewhere could be a self-righteous and shallow morality and may well bear bitter fruit;

International cooperation would certainly wither;

The civil aviation market and involvement would decline substantially;

Domestic areospace and air transport industry would suffer severe reverses;

Hundreds of thousands of jobs would be placed in jeopardy; and

The ricochet effect on the entire economy would reach into the smallest production unit in every town of the United States and depress all domestic and foreign markets.

So, in addition to disregarding the worldwide influence gained at great cost to the taxpayer since World War II, on historically unprecedented moral grounds, we would also disregard a primary factor in the U.S. productive enterprise so painstakingly assembled.

From an ideological point of view, we would abandon the proof to the world that the American system is the benefactor of the world to the dictates of controlled ideologies and economies. No moral benefit can be derived from that avenue on any grounds. Certainly, controls and constraints of free enterprise for national purpose are suspect whatever the stripe.

I have no doubts that our competitors, friends, and adversaries, will invest—and are now investing—major resources to capture—and are capturing—the abandoned American political and economic position, a grain or a gulp at a time. We cannot control the arms of the world; we can only influence their source and their use where we remain that source and earn a measure of cooperation for their use. It will be a black day for domestic and international economics and stability when we abandon our position so painstakingly constructed from the chaos of World War II.

TASK FORCE ON FOREIGN SOURCE INCOME

HON. GUY VANDER JAGT

OF MICHIGAN

IN THE HOUSE OF REPRESENTATIVES

Thursday, March 31, 1977

Mr. VANDER JAGT. Mr. Speaker, over the past several months it has been my privilege to serve on the Committee on Ways and Means Task Force on Foreign Source Income. This task force group under the able chairmanship of my esteemed colleague from Illinois, Mr. DAN ROSTENKOWSKI, has worked diligently during its existence in studying the important and difficult issues assigned to it by our distinguished committee chairman, Mr. ULLMAN.

On March 8, 1977 the task force filed its report with the Committee on Ways and Means. Mr. Speaker, I would commend the members of the task force for the conscientious and responsible way in which the group proceeded in fulfilling its mission. The task force chairman, the gentleman from Illinois (Mr. ROSTENKOWSKI), directed our endeavors in a capable and considerate fashion. The quality of the product of our deliberations is largely attributable to his diligent leadership.

The report has dealt with complex and even controversial issues in the important area of the taxation of foreign source income. In submitting our report we acted to encourage the study of its content by interested Members of Congress, tax officials in the executive branch, and the interested public. It is expected that the report will receive consideration in our tax reform deliberations later in this Congress. The task force was not unanimous in the substantive recommendations in the report, but I believe the task force was unanimous in its conviction that it had addressed itself to its assigned task thoroughly and perceptively.

One of the substantive areas where I had views that were divergent to those

expressed in the report related to the taxation of shipping income. And, I would like to comment briefly on that subject at this point.

Mr. Speaker, as a member of the Task Force on Foreign Income, I am concerned that the proposal of the task force with respect to taxation of international shipping would have undesirable international ramifications which would far outweigh any conceivable revenue gains.

Any proposal to change the rules respecting the taxation of international shipping must take into account the effect of such action on tax decisions of other countries and on world trade. While the interests of the United States are paramount, they are so inextricably related to the interests of the rest of the world that they cannot be considered separately.

Opponents of a partial repeal of code section 883(a)(1), which provides for the reciprocal exemption of foreign shipping income, have pointed out many serious consequences of such action. They believe it will almost certainly bring on retaliatory tax measures by other nations that will be detrimental to U.S. shipowners and operators whether they fly the U.S. flag or foreign flags. They believe that such measures would be especially detrimental to U.S. flag ships because they are now only marginally competitive in world commerce, and the added cost of retaliatory taxation in foreign ports would put many of them out of business and thus diminish further the size of the U.S. merchant fleet.

They believe further that the number of U.S. controlled foreign flag ships would also be drastically reduced, if section 883(a)(1) were amended as proposed, because U.S. owners of foreign flag ships would be forced by competition to sell them to foreign interests or to keep their vessels out of U.S. trade.

Should these developments occur, they would, of course, have serious national defense implications, to say nothing of their critical impact in emergencies such as another Arab oil embargo.

Opponents of partial repeal of section 883(a)(1) further point out that the present system of mutual tax forbearance results in what is at least a rough tax equality in international shipping. They state that this has produced an efficient and highly competitive system for shipping the world's goods, of which the ultimate consumer is the beneficiary.

Any such proposal to increase U.S. tax revenue must be weighed against the likelihood of action against U.S. owned shipping by other countries. With the limited information now at hand, the full nature or extent of such retaliation simply cannot be measured.

Finally, Mr. Speaker, foreign relations consequences to the United States must be weighed. The unilateral decisions proposed in the report would undermine the confidence in our Nation's desire for consultation and cooperation with other nations in tax actions affecting their trade. Moreover, it is a serious mistake to embark on a course which would be injurious to the economies of Liberia and Panama—and a possible affront to their national pride—since the shipping adversely affected thereby is predominantly registered in these two countries and is important to them. We have special need for their confidence and trust at this time.

Mr. Speaker, in concluding these brief remarks I would commend again my colleagues on the Task Force on Foreign Source Income for the able way in which they carried out this difficult assignment.

SPACE APPLICATION PROGRAM

HON. OLIN E. TEAGUE

OF TEXAS

IN THE HOUSE OF REPRESENTATIVES

Thursday, March 31, 1977

Mr. TEAGUE. Mr. Speaker, Elizabeth Price, a freelance writer, has recently reviewed the space application program. I am including her analysis in the RECORD for the benefit of my colleagues and general public. The opportunity to improve our quality of life and our economic well-being can be enhanced by taking full advantage of applications of space. The Price article is an eloquent statement defining development of our space program in terms of practical benefits:

BACKGROUNDER ON SCIENCE ON SPACE SHUTTLE/APPLICATIONS

So far, as of Spring 1977, the Space Shuttle—called the Enterprise thanks to Star Trek fans—has only ridden piggyback on top of a Boeing 747. It will not fly on its own power until summer. But once it gets operational in the 1980's, it will provide a laboratory in space for all kinds of science experiments, many of them with both medical and commercial applications to benefit those of us still down here on earth.

While many of the scientific experiments on the first Spacelab—to be fitted into the Shuttle's "cradle" for a summer of 1980 first flight—have been planned by European countries making up the European Space Agency, all the Spacelab operations will still be managed by NASA. (Of the 77 experiments approved in February for the ESA's portion of the Spacelab package, 15 are U.S. designed.)

One of the most innovative types of experiments, with the highest factor of eventual commercial "usability," will be the materials processing investigation begun on Skylab in the early 1970's, using much of the Apollo mission hardware that was left over. (Again, of the above 77, 39 of the European experiments are in this field.)

Dr. James H. Bredt, head of NASA's Division of Space Processing under Special Projects, considers materials processing "of utmost importance to manufacturing and industry, as well as both medical and pure sciences."

When the Spacelab and its "host vessel," the first Orbiter now undergoing preliminary test flights during 1977, orbit the earth at the comparatively low altitude of 150 nautical miles, there will be "null gravity" aboard the ship, almost "zero g."

It is this absence of earth gravity that opens up the possibilities of commercial use of the weightlessness of space. Experiments can be conducted in this near-zero gravity that would be impossible on earth. Additionally, both the returnability of the Shuttle itself, and its experiments, and the relatively cheaper costs of assembling entire laboratories in space will save operational costs all around, and give a positive "cost factor" to several projects.

Entire space stations can be assembled in orbit, with parts rocketed up from earth or manufactured in a different kind of "space factory," at much lower expenditures in weight and thrust than can be achieved if a similar station were built on earth and then launched into space. If some processes can benefit to a measurable degree from weightlessness, the work itself can be done more cheaply in space.

Materials processing has been getting prime attention in NASA's planning during the past two years because of the materials shortages discovered in 1975–76. There was a heightened interest in all ways to alleviate any potential shortage of metals, in particular, and in ways to "work" them into forms for manufacturing. Metallurgy is important in commercial manufacturing of all types, and many of the research developments in space will have almost immediate application in consumer and secondary user engineering processing.

In the weightlessness of space, liquid drops that on earth would settle on the bottom of containers float freely. Gas bubbles formed in liquids stay put right where they grew. Crystals form in ways they never do in the "one g" gravity of earth. New alloys of metal can be made with strength and durability not often achieved in earthbound processes. For these reasons, the science of materials processing makes up a fertile field to be staked out for projects on the first Spacelab flight in 1980 and others into the next decade.

As the pictures of the Space Shuttle have already shown, both newspapers and television are going to find Spacelab (and its Orbiter) vividly picturable. Inside Spacelab there will be large components that can be "modeled" to show on TV and diagram in science supplements—like the space furnace first used in Skylab's small science console—and "micro" forms shown by "one-of-a-kind" crystals formed in space. NASA already has a series of good pictures from Skylab and undoubtedly will make use of the first Spacelab flight for more.

On Skylab I, astronaut Pete Conrad memorialized such crystal formation by discovering that, "Hey, it's blowing a bubble," as he watched a crystal form in an experiment designed to explore the effects of "containerless" solidification of particular metals.

Various nickel alloys (with tin, silver and copper) were melted by an electron beam gun, then allowed to solidify in zero g. Most of them detached themselves from their "pedestals," and solidified while floating free. However, some of them did not—and in research terms this particular experiment might not have been considered an overall success. Instead, in the serendipitous way whereby pure science often leads to something else, if followed out of scientific curiosity or simply in events themselves some of the nickel-silver samples formed INTERNAL voids, unheard of on earth. And one or two of them bubbled up to call forth Conrad's reaction.

Subsequent analysis showed that at the temperature and pressure of the experiment, a metallic gas might be expected to evolve from the alloy, but it had never happened on earth—so the process had never even been named. This particular experiment was not repeated on Skylab flights, but became part of a larger study of "containerless processing."

Since with the lack of gravity, things remain pretty much where they are placed, metals can be "worked" without enclosing them in a container. This results in ease of handling and less contamination than is almost always present in crucibles. Also, for many refractory and reactive materials, there are no crucibles available that can with-

stand temperatures necessary to the "melt" (melting temperature and phase transfer) of such reactive materials. Consequently, this way of achieving solidification is ideal for such materials.

(The extensive attainable vacuum and the abundance of solar energy also enhance vacuum melting in space.)

Solidification depends on a basic attribute of weightlessness that practically eliminates gravity-driven convection. Convection is the transference of heat through a liquid or gas by the actual movement of the fluid—or, as Dr. Bredt puts it, "why heat rises," and causes liquids to bubble and then evaporate. Since the densities of fluids are thus temperature-dependent, reduced convection leads to a reduction in liquid mass transfer—a possibility that has many practical applications of control of solidification processes.

On an orbiting space station—that permanent laboratory envisioned via later Space Shuttle hauls to and from space—conceivably a small manufacturing plant could be set up to treat metals, create alloys, and go further with the search for more useful materials formed with alloys. Density differences in two "inmiscible"—or non-mixing—metals can be overcome to allow them to melt and meld.

One experiment already scheduled for the first Spacelab flight is one called a "drop dynamics" project. (It is a good example, says Dr. Bredt, of a project that has been refined and studied between Skylab and Spacelab by a series of ballistics rocket flights like the Black Brant flights at White Sands Missile Range. These provide about five minutes of low gravity during "coasting." NASA "buys" three of these a year and uses them to plan further, longer-term space studies.)

The drop dynamics experiment module was designed and built by the Jet Propulsion Laboratory responsible for the unmanned science—or part of it—that was on the Viking mission. The module will have a resonant chamber in which acoustic "standing" waves can be "excited" electronically. Radiation pressure formed by the force of these waves will be used to place and manipulate a liquid drop and watch its action. This is called, in the technical jargon NASA uses, a "levitation" apparatus.

Levitation melting is a lab technique used for very small quantities of metals on earth. In space, however, with the possibility of contamination-free and crucibleless melting, much larger quantities of metal can be cast with only small forces to correct the "drift" to the earth-container wall.

Drop dynamics may also have important contributions to make to the sciences of nuclear physics, meteorology and fluid management in space. Dr. Bredt lists improved beryllium crystal production, needed for neutron spectrometers, and the possibility of making hollow glass "balloons" useful in laser fusion. Laser fusion is one of the alternative methods (to magnetic fields) of achieving the heat and containment necessary to the process of nuclear fusion—a 21st century possibility for cheap, safe and abundant energy for electricity, once the 20th century technology is established as feasible.

(It also has led to such intriguing titles as the "International Colloquium on Drops and Bubbles" held in California several years ago as JPL got started with NASA on this research.)

One of the pure research fields tabbed by NASA's Office of Space Technology (OAST) as experimentation to be done in space is the entire field of fluid dynamics. Basic research in this area can lead to improvements in the action of foams and aerosols, to studies in hydrodynamic instability, and to better knowledge of two-phase heat transfer (one of the basic studies in mechanical engineering as applied to sources of energy and mounting costs.)

A minor type of alloy manufacture, also to be studied further on Spacelab, is the solidification of such "eutectic" alloys as copper-aluminum. A eutectic alloy is one in which the liquid phase of transfer freezes to form two solids simultaneously. The second phase of the alloy formation consists of "rods" that act as a fiber-strengthener. On earth, the rods are short because of cutoffs caused by convective stirring. In low gravity casting, the rods grow to be continuous throughout the structure, allowing for reinforcement and mechanical strength in structural alloys. This in turn makes possible the optical fibers that form light guides for laser communications.

Historically, materials processing in space has already caused small revolutions in ways to improve liquid diffusion of zinc and allow "exothermic" brazing of the internal structure of nickel. On the Apollo-Soyuz flight in 1975, studies were carried out on surface-tension induced convection in lead, on synthetic semi-conductors, and on homogeneous solidification of managanese bismuth, a high-strength permanent magnet material.

It was on the Apollo-Soyuz flight also (ASTP for Apollo-Soyuz Test Program), which "capped" the Skylab program by allowing a rendezvous and docking mission between American and Russian astronauts and cosmonauts, that the only biomedical experiment managed by the materials processing division was done.

It was also the most immediately exploitable commercial type of project. NASA did the experiment at the request of the Abbott Laboratories, which has an ongoing research program in blood clotting mechanisms. It has a particular interest in mass culturing of kidney cells to make urokinase, an enzyme that can be used in controlling blood clots.

Experiments on Skylab had found that separation of components within certain materials could be done more easily in "null" gravity than in the heavier weight of earth labs. On ASTP, then, the astronauts conducted preliminary experiments which discovered a much bigger percentage of cells with urokinase—once a group of kidney cells had undergone such separation of components—than had ever been achieved on earth. The separation was done via electrophoresis, another type of process that seems to take place more easily and effectively in space.

DR. EULA BINGHAM, SCIENTIST, TAKES OVER EMBATTLED OSHA

HON. BRUCE F. VENTO

OF MINNESOTA

IN THE HOUSE OF REPRESENTATIVES

Thursday, March 31, 1977

Mr. VENTO. Mr. Speaker, one of the achievements of the Carter administration has been to call topnotch Americans into positions of responsibility to carry out its mission of bringing competence and compassion to our Federal Government.

Members of Congress are well aware of the fact that the Occupational Safety and Health Administration—OSHA—has been under constant fire from all sides, almost from its inception in 1971. What many of us may not know is that Dr. Eula Bingham, a distinguished occupational health scientist from the University of Cincinnati Medical School, is now on board as the Assistant Secretary of Labor for Occupational Safety and Health.

Dr. Bingham takes over an agency which has been plagued with problems, but she comes to her job with the full blessing of both President Jimmy Carter and the Secretary of Labor, Ray Marshall, and the best wishes of the labor movement.

I am inserting several articles about Dr. Bingham, her background, her qualifications, and her views about OSHA in the RECORD:

DEPARTMENT OF LABOR—ANNOUNCEMENT OF INTENTION TO NOMINATE EULA BINGHAM TO BE ASSISTANT SECRETARY FOR OCCUPATIONAL SAFETY AND HEALTH, MARCH 11, 1977

The President today announced that he will nominate Eula Bingham to be Assistant Secretary of Labor (Occupational Safety and Health). Ms. Bingham is an associate professor and associate director of the Department of Environmental Health at the University of Cincinnati School of Medicine.

She was born on July 9, 1929, in Covington, Ky. She received a B.S. degree from Eastern Kentucky University in 1951, and an M.S., in 1952, and a Ph.D., in 1958, from the University of Cincinnati.

Between 1951 and 1961, she was an analytical chemist with a Cincinnati chemical firm and also worked as a research associate and assistant.

Ms. Bingham has been at the University of Cincinnati School of Medicine since 1961 as an assistant professor until 1970, and an associate professor since then. Courses she has taught include physiology for engineers, functional histology and histological technology, and biological effects of air pollutants and chemical carcinogensis.

She served on the National Academy of Sciences' *ad hoc* Lead in Paint Commission in 1974–75; as Chairman of the Labor Department's Standards Advisory Commission on Coke Oven Emissions in 1974–75, and on the Labor Department's Standards Advisory Commission on Carcinogens in 1973

From 1972 to 1976, she served on the Study Section for Safety and Occupational Health of the National Institute for Occupational Safety and Health She was a consultant to the Panel on Vapor Phase Organic Air Pollutants from 1972 to 1975.

Ms. Bingham has served on the Food and Drug Advisory Commission of the Food and Drug Administration and on the Environmental Health Advisory Commission, Science Advisory Board of the Environmental Protection Agency since 1976. She served on the National Air Quality Criteria Advisory Commission in 1975–76.

Ms. Bingham resides in Cincinnati, Ohio

SENATE COMMITTEE QUESTIONS BINGHAM ON SAFETY AND HEALTH PRIORITIES

Eula Bingham, the President's nominee to be Asistant Secretary of Labor for Occupational Safety and Health, tells the Senate Committee on Human Resources that the success of OSHA "can't be measured in numbers of citations and fines." Testifying during nomination hearings March 15, she acknowledges that the solutions to the problems of occupational safety and health "have essentially eluded us" and adds that her first priority at OSHA would be "to enable it to fulfill the real potential of the Act."

Bingham, a scientist and professor of health, was nominated by President Carter on March 11 (1976 DLR 49: A-3). An announcement of her nomination had been expected for weeks after it was known that she had strong support from leaders in the labor movement and had been to a meeting

with Mr Carter. Shortly after the departure of Morton Corn as head of OSHA, Bingham began working at the Labor Department as a special consultant.

Human Resources Committee Harrison Williams (D–NJ) praised Bingham, and although there were references to the controversy surrounding OSHA, the questions posed to the assistant-secretary-designate were friendly.

Bingham identified four major areas of concern related to OSHA:

Remedying what she called a "lack of education" about occupational safety and health;

Increasing the number of trained personnel, namely industrial hygienists and physicians knowledgeable in occupational medicine;

"Breaking the logjam" of occupational health standards at OSHA; and

Simplifying the language of safety standards.

Bingham said she opposes excessive attention to details in standards, such as the correct construction of bathroom stalls or whether a hallway is an inch too narrow. "This isn't what the Act is about. It is a compassionate Act intended to save lives and prevent illnesses," she said.

In response to a question from Williams, the nominee promised to check personally on the progress of an OSHA-commissioned study of industrial talc aimed at determining the asbestos content for purposes of regulation. Williams said manufacturers and users of the talc had a right to know OSHA's intentions concerning the product as soon as possible.

Bingham said she was sympathetic and agreed the agency has an obligation "to take positions on the basis of the available evidence."

She also told Williams that there is a role for OSHA in the regulation of harmful pesticides like kepone and leptophos and promised a written reply on what the agency currently is doing in this area. "It is something of great concern to me because if there is going to be damage, it is irreversible damage" from these agents, she said.

Bingham added that an increase in the number of professionals working in safety and health was an indication of the growing concern with these areas nationwide. She said it was visible not only in industry but in government and labor unions as well.

Williams questioned her on the problems of violations which are repeated and said this was particularly serious with mining operations, "which might be coming to you folks." Williams referred to proposals which would give OSHA responsibility for safety enforcement in mines.

The New Jersey Democrat said there ought to be "a follow up, a stimulant" to ensure that mining companies do not repeatedly violate regulations, and added that he hoped new powers allowing the Government to close mines in such cases would succeed.

Senator Jacob Javits (R–NY) told Bingham she had "an extremely difficult assignment" and said that OSHA was one area where "the administrator is a decisive factor who can make or break the program."

CARTER CHOICE TO HEAD JOB-SAFETY AGENCY EXPECTED TO BE A WOMAN, EULA BINGHAM

WASHINGTON.—President Carter is expected to name a woman professor from the University of Cincinnati to head the government's job safety and health program, which he said he wants run firmly but with "sensitivity" to employers' problems.

Mr. Carter disclosed his intention to put a woman in charge of the Occupational Safety and Health Administration yesterday during a visit to the Labor Department, without saying whom he had in mind. But the nomination is expected to go to 47-year-old Eula Bingham, an associate director of the Institute of Environmental Health at the University of Cincinnati's medical school.

If confirmed by the Senate, she would fill what currently may be one of the toughest federal jobs, running an agency that has been under constant business and labor criticism since it was created by Congress in 1970. Many of OSHA's health standards have been challenged in court, and opponents in Congress have sought to chip away its authority. A three-judge court in Idaho recently ruled that federal safety inspections were unconstitutional: the ruling has been appealed to the U.S. Supreme Court.

The President told a crowd of about 1,000 federal employes in the Labor Department lobby that the job-safety program "has the best prospect of improving the lives of workers" of "all the beneficial legislation that has been passed by Congress in recent years."

"ENFORCE LAW RIGIDLY"

He said he wants to "enforce the law rigidly" with "no backing down on the concept." But he noted the program has drawn the "most adverse" reactions from business and said it should be run with a "minimum" number of regulations and a "maximum" amount of common sense.

His statement that he will nominate a woman to head OSHA drew applause from the Labor Department employes.

Mr. Carter's visit, and a second talk he made yesterday at the Commerce Department, were designed to quell the fears of federal workers about his plans to reduce the size and complexity of government. In his remarks, and in answering questions, he urged the workers to play an active role in streamlining the federal bureaucracy.

"I'm very serious about cutting down on excess regulations," he said, and in making Cabinet members read all regulations. But he assured his Labor Department audience he isn't "trying to abolish the preparation of regulations," adding: "I don't want any of you to be afraid of change."

ELIMINATE DUPLICATE FORMS

Mr. Carter said he hopes that Cabinet departments soon will agree to use the same federal information-gathering forms and to eliminate duplicate forms. He said he favors a greater voice for states and cities in administering federal programs and will meet with all 50 governors Feb. 28 to discuss the subject.

Later, at the Commerce Department, he told 2,000 employes that "it's time for us to root out" U.S. participation in the Arab boycott, which he termed a violation of "the constitutional rights of Jewish citizens" and "personally obnoxious to me."

Supporters of Mrs. Bingham for the OSHA job declare she is well-suited to step into the sensitive government job. "She is extremely competent, with a fantastic sense of humor, who is hard as nails," declares Sheldon Samuels, health director for the AFL–CIO's Industrial Union Department.

She has had considerable experience in dealing with the OSHA bureaucracy, having chaired an advisory committee that recommended stiff standards to control emissions from coke ovens in the steel industry. And she was a member of another advisory committee that drafted standards for controlling job exposures to cancer-causing substances.

Mrs. Bingham has a particular interest in the hazards women face at work. Last year she organized and helped conduct one of the first conferences on occupational hazards faced by women in the workplace. Much of her professional research has involved environmental health questions, particularly occupational cancer.

Despite her scientific background, some business groups fear that Mrs. Bingham lacks the administrative experience necessary to manage OSHA. Based on her committee's recommendations for stiff, expensive coke-oven controls—which were scaled down by the Labor Department—they're concerned she would be more responsive to complaints from labor groups than she will be understanding of the problems business faces in complying with federal safety and health regulations.

She would replace Morton Corn, who resigned as head of OSHA Jan. 20 to return to the University of Pittsburgh.

MARSHALL ASSURES UAW OF ACTION ON JOB SAFETY

(By Helen Dewar)

Labor Secretary Ray Marshall told the United Auto Workers yesterday that the Carter administration is strongly committed to simplification and vigorous enforcement of occupational health and safety rules.

Addressing the concluding session of a three-day UAW legislative conference here, Marshall acknowledged "a lot of trouble" with enforcing job safety rules in the past but said criticism shouldn't undermine the program.

In attempting to draw a distinction between the approach of the Carter administration and previous ones toward carrying out the Occupational Safety and Health Act of 1970, which seeks to enforce minimum standards for worker protection, he said:

"We believe in these laws and we're going to try to make them work. There have been people in the past who did not believe in them and therefore did not try to make them work. It's difficult to administer a law you don't really believe in."

At the same time, the government must be "practical and pragmatic" and not build up expectations that it can achieve more than is possible, Marshall said. Hence the government must simplify its safety and health regulations and then "try to really make them work," he added.

The program, administered by the Labor Department, has been criticized by industry as unduly burdensome and by labor as ineffectual. Marshall conceded that "some ridiculous things" were done under OSHA but said some of the criticism stemmed from an "organized campaign" to discredit the purpose of the program, which he described as "absolutely essential."

FEDERAL FINGERS IN TOO MANY PIES

HON. EDWARD J. DERWINSKI

OF ILLINOIS

IN THE HOUSE OF REPRESENTATIVES

Thursday, March 31, 1977

Mr. DERWINSKI. Mr. Speaker, Jack Mabley, a featured columnist of the Chicago Tribune, properly addresses the subject of Government intervention in his column of March 30. At a time when the President attempts to reform Government operations by reducing the size and scope of the Federal agencies and departments, his comments are especially appropriate.

Jack Mabley is not an "ivory tower" columnist. He has served as an official of a local municipality and speaks with practical experience. His article follows:

FEDERAL FINGERS IN TOO MANY PIES

(By Jack Mabley)

The storm had blown away, the sun was shining, and I was feeling good Tuesday morning—until I read the financial pages.

More big problems ahead. Too much wheat. Too much corn. No place to store the grain. Too much milk. Too much milk? Didn't the President just boost the price support to farmers?

What has happened to the law of supply and demand?

The government is repealing it, nibbling it to death.

In the last six months we've been swamped with poor-mouthing from the grain states. Drought, erosion, disaster, or too much rain. Always one or the other. So what have we got this spring? The biggest wheat surplus in two decades.

And there is literally no place to put it. The storage bins are already full, China and Russia don't want it. Bakeries can bake just so many loaves of bread. So they're going to stack it on the ground and put tarps over it and let the rats and weather eat it from the ground up.

The Secretary of Agriculture and his troops will find some way to make sure the farmers don't lose any money. They'll lend them money to build more storage bins or pay them to pile the wheat in their barnyards.

A milk surplus? The first thing I read in the new National Observer is "A fantastic glut of butter, cheese, and non-fat dry milk is piling up in Uncle Sam's larder. Milk output is bubbling to the highest levels in 23 years. . . . So are supermarket prices for these commodities going down? Hardly. They're going up—by U.S. Government decree."

You see, Carter made this promise to the farmers during the campaign. . . .

Recall the poor-mouthing from Florida when the frost hit the orange trees? Well, it turned out they had a three-month supply of o.j. sitting in cold storage, and the crops weren't severely damaged. But the price will go up in the stores.

Coffee . . . enough said.

I'm probably being incredibly naive in suggesting the country reached greatness when the law of supply and demand operated and the government was minimally involved in sticking its nose in everybody's business.

If there was a short supply of dairy products, prices went up, and more families went into dairy farming. If too many farmers produced too much milk, prices went down, and inefficient producers went into another line of work. The market, not the government called the shots.

There were hardships and injustices, but no system is perfect. The alternative is increasing government management, and it isn't working because we are locked into ruinous inflation and wide unemployment.

Government experts could destroy me in a debate—until we got to the checkout counter at the market.

Recently the Sunday Tribune carried a help-wanted ad for "PROGRAM ANALYST [Women's Activities Advisor]. The Agency for International Development has a need for someone to provide guidance and leadership to various programs concerned with enhancing the status of women in less developed countries, with particular emphasis on their participation in socio-economic affairs, their development as a human resource within the labor market, and their participation in trade union affairs."

Applicants were directed to a Washington federal agency. The pay scale is $28,725 to $37,347, depending on qualifications.

Eugene L. Kurowski, president of Central Business Administration, Inc., 2636 W. Marquette Rd., read this ad, cried a little, then shot off a letter to our two U.S. senators [unanswered to date].

Mr. Kurowski's firm employs the equivalent of 21.6 full-time people. Not one of them is paid a salary equal to that in the ad.

The company pays about $73,500 in payroll taxes. Half this amount will go to the person who wins the job in the ad.

"All our employes are skilled, technically qualified, trained, experienced, and productive," Kurowski wrote his senators. "The most frustrating thing I face daily is the knowledge that inflation continues to erode buying power. In the battle of inflation, we are the troops in the trenches.

"Our real enemy is the federal government, and in particular agencies like this. They add to federal deficit spending and their ill-conceived programs. In the war over inflation the biggest weapon against us is our tax dollar. Something is wrong."

And getting wronger by the day, Senators and Mr. Carter.

TRIBUTE TO RALPH F. DE MARCO, A MAN WHO SERVED THE PEOPLE

HON. MARIO BIAGGI

OF NEW YORK

IN THE HOUSE OF REPRESENTATIVES

Thursday, March 31, 1977

Mr. BIAGGI. Mr. Speaker, on March 19, 1977, Queens County, New York City lost an adopted son, who became one of its great leaders. The Astoria section of Queens lost a community father. Their people lost a brother. I lost a colleague in service, who was my very dear friend.

Ralph F. DeMarco was a man of the people. He was part of their family and their neighborhood. His ideals were their example and his achievements were in part their own. He worked for the people. He guided them and provided for them. He served their needs and their causes. He represented his people. Their concerns were his. They were important and he did something about them. And he loved his people. He gave so unselfishly of himself to others. He was gifted with the goodness and the talents to do so.

Born in Italy in 1908, Ralph DeMarco was brought to his beloved Astoria at the age of 2. He was another immigrant who destiny placed among us. But Ralph DeMarco went on to accomplishment, and to touch and affect all who knew him and so very many others. He was to serve Astoria for over half a century. His life was replete with distinctions. He assumed many positions of honor, and was accorded the praise of his fellow men and women many times over.

Ralph DeMarco believed in civic duty. At an early age, he saw the necessity to organize and to lead, in order to render service to the nighborhood he valued and be of assistance to those in need. Just 24 years of age, Ralph founded the Taminent Regular Democratic Club in Astoria, which has become a fountain of development and progress for the community His attributes and abilities supported him through 22 years as the club executive member, and 23 years as their district leader. Mr. DeMarco went on to serve and lead the party he respected by becoming vice chairman of the Queens County democratic organization's executive board. He was holding that office and serving 60 thousand people as district leader at the time of his death.

Prompted by devotion to duty and dedication to civil service, Ralph DeMarco left a successful business to work as executive secretary to three presidents of the Borough of Queens. He gave a total of 12 years of service in that capacity. Ralph also capably served his borough as director of neighborhood community services. The city of New York had the benefit of his labor as deputy commissioner of the department of sanitation. He held nationwide stature as a delegate to the National Democratic Conventions in 1972 and 1976.

The Elks and the Knights of Columbus called him a brother. The governing boards of St. John's Hospital and Elmhurst City Hospital enjoyed his expertise.

Ralph had a special concern for our youth. He was particularly devoted to Scouting and the Scouts had much admiration for him. The Boy Scouts of America gave him their highest civilian award. The Queens County Boy Scouts accorded him their top honors for founding Troop No. 473, which is sponsored and supported by the Taminent Club.

The American Legion convention regarded him as the Outstanding Adult Scouter. He was also a member of the board of directors of the Boys Club of Queens County. District No. 1 of the Queensboro Federation of Parents Club, Inc., honored him with their annual community service award. Ralph DeMarco had made his mark, and so successfully, in many walks of life. He had given more of his adult years to public service than many people together experience in their lifetimes.

We know that the memory of Ralph DeMarco will live on in the hearts of all the people he cared about. We can take comfort in the fact that his legacy is preserved in the numerous opportunities and good works he was personally responsible for.

He will surely be missed. We hope that his like can come again.

We have the example of his virtue, and how he used it in life, to give us the inspiration to go on to finish his work. We have the fervent hope that he will be rewarded in the hereafter in at least equal measure to all that he gave to his brethren.

We appreciate that his spirit survives within his loving family. His devoted wife, Mary DeMarco, was the jewel of his life. We trust that God will shower her with His love and the strength to carry on as Ralph would want her to. His three daughters were so dear to him. Their pride should be so special in having shared so much of his love and example. His children's families were a source of great joy to him. He was so fond of them. The grandchildren gave him many happy and treasured moments. To all of them, Gloria and Ed Aloise, and their sons, Mike and Ed; Carol and John Scarno, and their children, Michelle, Drew, and Ralph; Jeanette and Daniel Longo, and their children, Daniel, Lisa, and Jay, we extend our warmest wishes that they will enjoy happiness and prosperity as Ralph DeMarco would have wanted.

May he truly be blessed and rest in peace. His work is done.

PERIODIC PHYSICAL EXAMINATION ACT OF 1977

HON. WILLIAM S. COHEN

OF MAINE

IN THE HOUSE OF REPRESENTATIVES

Thursday, March 31, 1977

Mr. COHEN. Mr. Speaker, I am very pleased to introduce legislation entitled "The Periodic Physical Examination Act of 1977."

Health care has become the second largest expenditure in the United States. During fiscal year 1976, $139.3 billion was spent for treatment after illness occurred.

Clearly, our country needs to give more attention to preventive medicine. Medical problems resulting from poor diet or careless behavior are all too common. Studies have shown that self-imposed risks—such as excessive eating, smoking, or drinking—are important underlying factors in each of the five major causes of death between the ages of 1 and 70.

Americans need to take more personal responsibility for their own health. Yet, many people lack the medical sophistication necessary to recognize key symptoms of illness and disease that, if diagnosed early, can be treated.

The periodic physical examination has long been recognized for its value in enabling the physician to identify health problems early enough to help the patient. A recent study concluded that annual checkups, directed at preventable diseases, can lower the mortality rates for those diseases by as much as 50 percent.

Although the main purpose of these exams is to discover potentially preventable diseases, exams that fail to find any medical abnormalities also provide comfort and reassurance to individuals concerned about their health.

Furthermore, regular checkups keep physicians aware of thier patients' medical histories while providing the patients with a means to discuss physical and emotional problems that have been bothering them.

Americans, however, give too little attention to this preventive measure. As rising health costs discourage many people from visiting their doctor periodically, people must be encouraged and motivated to take better care of themselves. My bill would help achieve that goal.

This proposal would first provide tax incentives for individuals to have periodic physical exams. The tax relief could come either by credit or deduction, depending on which option would benefit each taxpayer.

The relief would cover the taxpayer's expenditures for periodic physical exams, as well as that portion of the taxpayer's insurance premium attributable to this care, and would require such verification as the Secretary of the Treasury determines to be necessary.

The credit would be available for all appropriate expenses, in the amount of 20 percent of the total expenditures, subject to a limitation of $200 per family tax return, or $50 per individual, or the total tax liability of the taxpayer, whichever of the three is less.

The deduction, on the other hand, covers the entire cost of the examination up to a total of $500 per return, or $250 per individual, whichever is less. The deduction is an adjustment to gross income, rather than an itemized deduction. Nevertheless, if the taxpayer chooses to itemize, the expenses of the exam which exceed the limitations in this bill may be applied to the 3-percent adjusted gross income floor in computing additional medical deductions.

I hope that private insurance companies and employee health care plans will soon offer physical exams as a part of their basic health care package. Certainly, as we in Congress consider the issue of national health insurance, no program should be approved without a section dealing with physical examinations for all.

As a step in this direction, my bill also amends the Federal health care programs of medicare and medicaid to cover periodic physical examinations. The poor, the old, and the disabled encounter the greatest health risks in our society. Every step should be taken to assure that they receive periodic physical examinations.

In order for a physical exam to qualify under this bill, it must include those routine diagnostic or preventive health services which the Secretary of Health, Education, and Welfare determines to be reasonable and necessary for the maintenance of health, or prevention of illness in individuals. This may include the measurement of blood pressure, height, and weight; screening for tuberculosis, anemia, and common hearing and sight disorders; urinalysis; routine immunzation; and chest X-rays for individuals 20 years of age or older.

The expenses of the exam would qualify for coverage by medicare and medicaid, or appropriate tax relief, provided the exam occurred no more frequently than outlined in the statute. For example, an individual would be eligible for tax relief for the cost of one examination between the ages of 5 and 9, 10 and 14, 15 and 19. Beginning at age 20, this interval would be decreased as age increased until the individual reached 51. From that time onward, the individual would be eligible for tax aid for a physical exam every year. The interval between exams was drawn from information presented to the Subcommittee on Retirement and Employee Benefits of the House Post Office and Civil Service Committee when hearings were held on the subject in December 1976.

The exception to this routine would be for women of child-bearing age or older seeking gynecologic services. Women 14 years of age and older would be eligible on a yearly basis for a pelvic examination, pap smear, breast examination, and any other test determined appropriate by the Secretary of Health, Education, and Welfare.

The legislation that I am introducing today will encourage people to take preventive health measures by providing tax incentives for individual expenditures and coverage of these services under Federal health programs. This bill would not only help protect individuals from disease and premature death, but it would also help hold down the Nation's soaring medical bills.

It is unfortunate that our tax system is the only mechanism now available to encourage people to look after their own health. While it is not the role of the Government to dictate lifestyles, it is the proper role of the Government to educate our citizens and to promote good health aggressively. This bill provides an important step toward the goal shared by Congress, the administration, and the health consumer—a healthier life at a lower cost. Our entire society has a stake in the health of each individual. And we can best help those who help themselves.

THE NATIONAL ENERGY POLICY PARADOX

HON. GEORGE E. BROWN, JR.

OF CALIFORNIA

IN THE HOUSE OF REPRESENTATIVES

Thursday, March 31, 1977

Mr. BROWN of California. Mr. Speaker, as the date of President Carter's energy message to the Congress approaches, many of us have been reminded of the many, varied, and complex issues which surround a national energy policy and program. The newspapers contain previews of this Presidential energy message every day, but these are obviously only bits and pieces of what must be a major package. One subject that has not been discussed, at least publicly, has been the need for a national policy to encourage decentralization of energy systems and energy policymaking, and the encouragement of small scale energy systems. This policy is clearly in the best interests of the Nation, yet it is not all clear to me how the Federal Government will encourage it. This is the national energy policy paradox.

There have been efforts to develop programs that would encourage regional diversity and small scale energy technologies. As one of those who has consistently argued for such programs, I must say that they have been resisted by the executive branch, at least in the past. Among the initiatives the Congress has taken to encourage decentralization and small scale technologies are proposals for States to administer Federal programs, as contained in the EPCA and ECPA bills, and proposals for State-run energy extension services, as contained in the fiscal year 1977 ERDA authorization bill. Also contained in the ERDA authorization bill is a small grants program for appropriate technology, in which I have some pride of authorship.

Another initiative is the solar energy package that many Members of Con-

gress have supported, where we attempt to encourage solar energy across the board in the agencies and operations of the Federal Government. Still other examples can be found in efforts to encourage small businesses, and local governments to enter the energy field. While this activity is commendable, it is still only a very small part of a national energy policy that has, at least up to now, emphasized large-scale, capital intensive, energy production facilities.

The most recent sign that Federal policy may be changing was contained in the announcement of a site for the Solar Energy Research Institute—SERI. This announcement stated:

> It has been decided that by far the most effective way to encourage widespread use of solar energy is through a regionally diversified effort.

This decision is a significant policy shift from past ERDA practices, and if applied to other energy technologies, could represent a fundamental shift in Federal policy.

One of the most articulate advocates of the decentralized approach is Amory Lovins, who is a widely published and quoted physicist who works with the Friends of the Earth. Because his arguments are quite convincing, I wish to place in his testimony of last December to the President's Council on Environmental Quality in the CONGRESSIONAL RECORD at this time.

The statement follows:

STATEMENT BY AMORY B. LOVINS, CONSULTANT PHYSICIST AND BRITISH REPRESENTATIVE, FRIENDS OF THE EARTH, INC.

(President's Council on Environmental Quality, hearings on "Environment and Conservation in Energy Research and Development" (Austin, TX), December 14–16, 1976.)

I can perhaps best contribute to these hearings not by using these brief opening remarks to describe the many simple, small-scale end-use and supply technologies that excite me, but rather to suggest how they can fit together, in a broader context of energy and social goals, to make a coherent policy greater than the sum of its parts. I should therefore like to summarize a hopeful view of our energy future on which many analysts of diverse views, in many countries, have recently begun to converge. The arguments are set out more fully in the October issue of Foreign Affairs and in a technical backup paper for the October Oak Ridge symposium. Reserving details for our discussion, I shall briefly sketch for you two hypothetical energy paths that a country such as this one might follow over the next 50 years. These paths are not forecasts nor precise recommendations, but rather a qualitative vehicle for ideas of broad international relevance.

Most governments still view the energy problem as how to meet the expanding needs of a dynamic economy. The solution normally proposed is "Strength Through Exhaustion"—that is, pushing hard on all domestic fuel resources, whether oil, gas, coal, or uranium. Increasingly remote and fragile places are to be ransacked, at ever greater risk and cost, for increasingly elusive fuels. These are then to be converted into premium forms—fluids and, increasingly, electricity—in ever more costly, complex, enormous, and centralized facilities.

The threat that this approach poses to the values, wild places, communities, and living things that many of us cherish—and even to essential life-support systems—is all too apparent. But it is only one of the reasons that this policy is unwise and unworkable. Another is that at least half our energy growth in the next few decades would be lost in conversions before it every got to us. The efficiency of the fuel chain would plummet. Moreover, while we would have superabundant electrical supply options, costing three-fourths of our total energy investment, we would still be seriously short of fluid fuels.

Even more pragmatically, this policy, even if it is technically and managerially and politically feasible, still cannot be pursued because it costs too much. This is because it relies on energy systems of extraordinary capital intensity. Building a complete energy system to deliver a new kilowatt of energy to your doorstep costs about ten times as much capital investment with synthetic-fuel or Arctic or offshore technologies as with the traditional energy technologies on which our society is built. Electrical technologies, especially nuclear ones, cost about a hundred times as much to build as those traditional direct-fuel technologies. The big, complex energy systems are thus looking increasingly like future technologies whose time has passed. In the US, just the next decade of the heavily electrified Project Independence would cost over a trillion of today's dollars. This would require the energy sector to consume its traditional quarter of all our discretionary investment—plus about two-thirds of all the rest. We couldn't even afford to build the things that were supposed to *use* all that energy—let alone the investments needed to employ all the people disemployed by energy-intensive black boxes.

Such a massive and inflationary diversion of resources into the energy sector would require a strong central authority with power to override any objections. Operating the unforgiving high technologies would require a bureaucratized technical elite, politically remote from the people they served. Even as political and economic power became more concentrated, the energy system's vulnerability to being turned off by a few people would increase, requiring stringent social controls. Centralized energy systems would allocate energy and its side-effects inequitably to different groups of people at opposite ends of the transmission line or pipeline, adding interregional conflict to the centrifugal politics of central authority versus local autonomy. Lest citizens somehow choose "wrong," democratic process would have to be replaced by elitist technocracy, "we the people" by "we the experts." Thus not only the economic but also the structural and political costs of traditional energy policy would prove unsupportable. And over all these threats would loom the transcendent threat of nuclear violence and coercion in a world dependent on international commerce in atomic bomb materials measured in tens of thousands of bombs' worth per year. The impact of human fallibility and malice on nuclear systems would, I believe, quickly corrode humane values and could destroy humanity itself.

There is, fortunately, another possible energy path that offers us an escape from these appalling problems: a path that is quicker, cheaper, more useful in dealing with inflation and unemployment, and environmentally and socially very attractive: a path of which I expect we shall be hearing much more under a Carter Administration. Such a path does not rest on the traditional belief that the more energy we use the better off we are. Instead it considers that energy is a means, not an end: hence that how much energy we use to accomplish our social goals is a measure less of our success than of our failure. We should seek to do the job with an elegant frugality of energy and trouble, using our best technologies to wring as much social function as possible out of each unit of energy we use. In this sense there is ample evidence that North Americans could at least treble (and Europeans double) their energy efficiency over the next 50 years or so. This could be done through technical improvements alone, or, for those who consider today's values and institutions imperfect, through some combination of technical and social changes. In poor countries too, the quickest and most practical way to improve well-being is often to increase the efficiency of such mundane devices as stoves, so that scarce fuels can be used to maximum effect.

Even in the most industrialized countries, such as the US and Japan, diverse and relatively simple technologies that rely on renewable energy flows would suffice, with no technical breakthroughs whatever, to meet virtually all energy needs in about 50 years. A substantial fraction—upwards of a third in the U.S, for example—could be met in this way by the turn of the century. In poor countries, and especially in the rural villages, the renewable technologies, adaptable and oriented toward real human needs, could have a profound impact even more quickly.

Surprisingly, these renewable energy systems would be cheaper than the big high technologies which we would otherwise have to use in the long run to do the same tasks, because renewable sources matched in scale to end-use needs do not suffer from the pervasive diseconomies of large scale. Big systems, for example, cannot be mass-produced; they have such expensive distribution systems that you are probably paying twice as much to have your electricity delivered as to generate it; they are often more unreliable (and most expensively so) than small systems; and, because of their long lead times, they suffer especially from interest, escalation, mistimed demand forecasts, and wage pressures. Big systems, incidentally, also magnify the likelihood and size of mistakes, and stifle innovation because they are too big for technologists to play with.

Moving to renewable, appropriate energy sources certainly does not imply building huge solar-electric stations in the desert or in space, and indeed need not imply any solar-electric systems of any kind, but only solar heat, conversion of organic wastes (chiefly from forestry and agriculture) to clean fuels for vehicles, and modest amounts of wind (mainly in non-electrical systems). Such simple, proven technologies, usable promptly without long development lags, plus our presently installed hydroelectric capacity, are all we need—*if* we match the quality of energy supplied to the quality needed for the tasks at hand. Some 58 percent of our end-use energy needs are in the form of heat, 34 percent below and 24 percent above the boiling point of water. A further 34 percent is liquid fuels for transport. The end uses that really require electricity and can use its high quality to advantage are only about 8 percent of all US end use. These limited premium uses are already so oversupplied that the US doesn't really need any central power stations at all! Electricity is a special, very costly form of energy: Americans typically pay already from about $50 to over $120 per barrel-equivalent for it, and will soon pay far more. Electricity is the last kind of energy we need more of, because we couldn't use more of it in ways that would let us get our money's worth out of it. It would have to be used inappropriately for low-grade purposes like heating buildings. That would be rather like cutting butter with a chainsaw—which is expensive, inelegant, messy, and dangerous.

I believe we can plan now for an orderly transition to living within our energy income, even with only those renewable sources that are already available at reasonable cost. Redirecting our effort at the margin will free

disproportionate resources, and will let us take advantage of the big systems we already have without multiplying them further. Matching energy supply in both scale and quality to end-use needs can then virtually eliminate distribution and conversion losses respectively. But this transition (or indeed any other) will take a long time—perhaps 50 years—so we must build a bridge to our energy-income economy by using fossil fuels (including modest amounts of coal), briefly and sparingly, to buy time. We know how to do this much more cleanly and efficiently than now, with technologies flexibly designed so that as the smaller renewable technologies come along we can plug them into an appropriately scaled infrastructure. I have particularly in mind cogeneration, district heating, fluidized-bed boiler backfits, and the smaller-scale coal conversion systems such as the flash processes and supercritical gas extraction.

Because the energy systems we need, both ultimate and transitional, are much smaller and simpler than conventional ones, they are quicker, cheaper, and more certain to work right. Their environmental and political costs are very low. A soft energy path, like any other, does entail substantial social problems in using pluralistic consumer choice of a myriad small devices and refinements to substitute in function for large, difficult projects under central management. But these problems can be addressed more pleasantly, more plausibly, and more consistently with traditional values than can the much more intractable alternative social problems of centrism, autarchy, technocracy, and vulnerability.

A "soft" energy path also promotes a world psychological climate of denuclearization, in which it comes to be viewed as a mark of national immaturity to have or desire either reactors or bombs. I believe that unilateral action by the US to encourage soft energy technologies at home and abroad, in tandem with new initiatives for nonproliferation and strategic arms reduction, could withdraw the political support without which foreign nuclear programs cannot survive, and could thus go very far to put the nuclear genie back into the bottle. But this shift of policy is urgent; we must stop passing the buck before our clients start passing the bombs.

The choice is indeed urgent. Every dollar, every bit of sweat and technical talent and political commitment, every barrel of irreplaceable cheap oil that we devote to the very demanding high technologies is a resource that we cannot use to pursue the elements of a soft energy path urgently enough to make them work together properly before our fossil-fuel bridge has been burned. In this sense, technologies like nuclear power are not only unnecessary but a positive encumbrance, for they foreclose other and more attractive options. The two energy paths, though not technically incompatible, are institutionally and culturally incompatible and logistically competitive. We must, with due deliberate speed, choose one or the other, before one has foreclosed the other or before nuclear proliferation has foreclosed both. We should use fossil fuels—sparingly—to capitalize a transition as nearly as possible straight to our ultimate energy-income technologies, because we won't have another chance to get there. Recognizing that no energy future is free of social problems, we must choose which kinds of social problems we want. And to gain a fuller understanding of the very wide range of choice available to us, we must work backwards from our long-term goals to see how to get there, so discovering the potential for radically different paths that would be invisible to anyone working forwards in time through incremental ad-hocracy.

I believe that the soft path would be largely self-implementing through ordinary market and social processes once we had taken a few important initial steps, including removing familiar non-market institutional barriers to conservation and soft technologies, resubsidies now given to fuel and power sectors, moving the more than $10 billion a year in vigorously enforcing antitrust laws, and pricing energy at a level consistent with its long-run replacement cost by means of a severance royalty. Phasing in these measures can, I believe, be both equitable and beneficial to the economy.

I do not pretend that such steps will be easy; only easier than not taking them. But if properly handled they can have enormous political appeal, for the soft energy path, rather than trading off one constituency against another, offers advantages for everyone: jobs for the unemployed, capital for businesspeople, environmental protection for conservationists, enhanced national security for the military, opportunities for small business to innovate and for big business to refit, exciting technologies for the secular, a rebirth of spiritual values for the religious, world equity and order for globalists, energy independence for isolationists, civil rights for liberals, states' rights for conservatives. Though a hard energy path is consistent with the interests of a few powerful American institutions, a soft path is consistent with far more strands of convergent social change at the grassroots. It goes with, not across, our political grain.

Unfortunately, few ERDA officials are equipped to consider soft-path concepts, for their paradigm rests not on the thermodynamic structure of end use but rather on assumed energy—GNP correlations (which responsible energy modellers now consider fictitious). ERDA still does not even acknowledge that paths can be exclusive: the official position is that we can and must do everything at once, even though ERDA's own scenarios show the contrary, and manifestly any choice of RD&D priorities retards some options while advancing others.

In a recent critique of my *Foreign Affairs* paper, ERDA inexplicably clings to these bizarre remnants of ERDA-48 while conceding that decentralized energy systems deserve in-house study (which I am helping to set up), that small transitional coal technologies have been slighted, and that central electrification has been overemphasized. These concessions are welcome, but have come at a glacial pace. ERDA still lacks staff able to appreciate scale issues and end-use orientation. It might therefore be useful for me to sketch some of the changes I would like to see in ERDA during 1977:

1. Slim down the agency to the activities its title describes by putting bomb production in the Department of Defense, civilian materials production in an independent agency, and bomb research somewhere else (perhaps the Arms Control and Disarmament Agency, and certainly not the University of California).

2. Reorganize the ERDA administrative branches by thermodynamic category of end use rather than by technological sector.

3. Decentralize the ERDA working divisions across the country.

4. Replace nearly all the top three layers of ERDA officials.

5. Drastically reduce ERDA overheads, not only internal but external: for example, a friend in the fluidized-bed business reports that just responding to an ERDA RFP would have cost him $2 million, more than it would have cost to build the device.

6. Shift emphasis (within or outside ERDA) in many areas, including fluidized-bed combustion, from research and development to demonstration and application. ERDA is currently retarding, rather than speeding, commercialization of some important systems.

7. Redirect resources devoted to fission (except work on the terminal phase of the program), space-satellite solar systems, and other obvious turkeys, and reduce many programs (such as fusion, big coal-gas plants, solar-thermal electric, and MHD) to a much lower level. I expect that with greatly increased emphasis on conservation and soft solar technologies, the resulting ERDA budget would total perhaps $0.5–1 billion.

8. Try to shift ERDA's emphasis from complexity to simplicity. This will entail a shift of contracting away from large war and aerospace corporations, which will have to find ways of recycling themselves without ERDA bailouts. An example of what worries me here is the way Boeing-Vertol is building subway cars in Boston. Their first design for a door had 1300 parts. With difficulty they sweated this down to about 300, and there is a small chance that the doors might work, but the technologists have just become so sophisticated that they can't design a door any more. The real centers of innovation for the kinds of systems we need are now small groups and individuals, not high-technology corporations.

9. Make sociopolitical assessments of proposed technologies as integral a part of ERDA's planning process as environmental assessments are supposed to be.

10. Open the entire ERDA process to the public in a substantive rather than merely a formalistic way.

11. Set up a ratproof procedure for monitoring dissent within ERDA so as to prevent the suppression of uncongenial views and of differing perceptions of what the energy problem is.

12. Greatly strengthen ERDA's interagency, State, local, and grassroots liaison while removing ERDA's improper (and probably illegal) promotional role.

13. Emphasize work on scale issues by appointing a Deputy Administrator for Small Systems, with special responsibility for making ERDA staff think about scale, centralization, electrification, and associated sociopolitical issues.

14. Severely restrict ERDA's use of elaborate computer models, most of which are fatuous or irrelevant or both. All the really important policy questions facing ERDA today can probably be addressed for less than $10,000 each on the back of a large envelope.

15. Reconsider the role of the 100,000-odd employees of the National Laboratories and of the appropriateness of running those labs via universities and corporations as at present.

16. Reconsider whether ERDA is necessary.

In such brief remarks I cannot do justice to the richness of the technical background, but only suggest some holistic perspectives that ERDA now lacks, to the detriment of its mission. I hope, though, I have conveyed the impression that the basic issues in energy strategy, far from being too complex and technical for ordinary people to understand, are on the contrary too simple and political for experts to understand. Only by concentrating on these simple, yet powerful concepts can we learn, as Robert Frost did, that taking the road less travelled by can make all the difference.

BALANCED AUTO EMISSION STANDARDS: DINGELL-BROYHILL AND RIEGLE-GRIFFIN

HON. JOHN D. DINGELL

OF MICHIGAN

IN THE HOUSE OF REPRESENTATIVES

Thursday, March 31, 1977

Mr. DINGELL. Mr. Speaker, Congressman BROYHILL and I are providing Mem-

bers of Congress with detailed rationale supporting the schedule of clean air automobile emisson control standards contained in H.R. 4444, Mobile Source Emission Control Amendments of 1977, the Dingell-Broyhill bill.

We are seeking, along with over 80 cosponsors of our bill in the House, additional cosponsors to insure the enactment of reasonable, balanced, and achievable motor vehicle pollution control levels for the Clean Air Act. Inextricably linked to the standards contained in our legislation is the important factor of timing, that is, when can these standards be met so that autos can operate at our stringent levels without the performance of the car being impaired while autos reach mandated improvements in auto fuel economy. Important to this timing factor is that emission control technology be in place and available to manufacturers, technology that will not drive the cost of purchase and maintenance for consumers beyond affordable prices.

The cosponsors of H.R. 4444, and identical House bills, believe the following schedule and timetable of emission standards, and rationale for these standards, would insure balance to achieve environmental, economic, and energy conservation goals. Supporting us in this effort are the United Auto Workers, AFL–CIO, the automobile manufacturers, dealers, suppliers and distributors, parts manufacturers, parts retailers, parts suppliers, and repair garages along with numerous automobile and transportation associations, investment houses, and air, water, and ground carriers. We also are seeking support in the Senate to the identical companion bill to H.R. 4444, S. 919, as introduced by Senators DON RIEGLE and ROBERT GRIFFIN.

The rationale for our legislation follows:

RATIONALE FOR AUTOMOBILE EMISSION CONTROL STANDARDS IN THE DINGELL-BROYHILL (H.R. 4444) AND RIEGLE-GRIFFIN (S. 919) MOBILE SOURCE EMISSION CONTROL AMENDMENTS OF 1977 TO THE CLEAN AIR ACT OF 1970

	gpm
Hydrocarbons HC	
1978–79	1.5
1980–81	0.41
1982 and thereafter	0.41
Carbon monoxide CO	
1978–79	15.0
1980–81	9.0
1982 and thereafter	9.0
Oxides of Nitrogen NO_x	
1978–79	2.0
1980–81	2.0
1982 and thereafter	1.0–2.0

1978–79 STANDARDS

Each of the auto emission schedules approved in legislation during the 94th Congress by the Senate, the House, and the Conference Committee provided for standards of 1.5/15/2.0 for 1978 models. Congress recognized in the 1976 Conference Amendments to the Clean Air Act that the statutory standards required by the current law for 1978 models were unnecessarily stringent and infeasible. Both government agencies and the motor vehicle manufacturers reasonably assumed that the emission standards for 1978, as agreed to by the Conference Committee, would become the applicable emissions standards when the Clean Air Act Amendments were passed by the 95th Congress.

With respect to 1979 standards, the yearlong certification proces for the 1979 models will begin in mid-summer of 1977—just three months away. All the lead-time problems which faced the industry for upcoming 1978 models are almost upon the industry for 1979 models. Therefore, the public interest, business and labor will best be served by an extension of the 1977 standards through the 1979 model year. Also, keeping standards of 1.5/15/2.0 for 1979 would allow the nation to continue to maximize fuel economy gains. It is essential that the standards be set for at least two year intervals to ensure certainty in the manufacturing cycle.

1980–81 STANDARDS

Autos already have made major contributions towards obtaining clean air goals. As older cars are replaced with new, cleaner burning cars, the pollution clean up by autos rapidly progresses.

Beyond 1979, as the domestic and foreign manufacturers have recently testified at Congressional hearings, the disadvantages in meeting excessively stringent standards include fuel economy penalties, higher costs to the consumer (increased equipment and maintenance costs), and at least initially, poorer driveability of and performance and reduced model availability. The impact of these disadvantages, which would result if auto emission standards were too stringent or tighter than the Dingell-Broyhill/Riegle-Griffin standards, must be weighed against the fact that analytical data available shows there also would be statistically insignificant improvements in the nation's ambient air quality. Congress has previously agreed that the statutory standards must be changed. New standards must truly be cost-beneficial and implemented at the proper time when advanced automotive emission control technology is available.

For 1980 and subsequent models, hydrocarbons (HC) will be controlled at the .41 gpm level called for by current law. The Federal Motor Vehicle Goals Study, or "300 Day Study," shows that it would make very little difference in air quality gains to wait the year or two it would take to integrate technology which would alleviate the fuel economy penalty in moving to more stringent hydrocarbon control. However, of the three pollutants, automotive hydrocarbon emissions are strongly implicated in smog formation; and if any clean-up should be accelerated, it is agreed that hydrocarbon control should be given the priority, as it is in the Dingell-Broyhill/Riegle-Griffin bills.

The carbon monoxide (CO) standard for 1980 and subsequent models should be 9.0 grams/mile. The recent "300 Day Study" of the Department of Transportation shows that air quality goals can be met and exceeded with this standard, and that minimal improvement would result from the statutory 3.4 gpm standard. For example, as compared with 1971–73, projected 1990 air concentration levels of CO would be 80 percent lower with a 9.0 grams/mile standard, or 83 percent lower with a 3.4 grams/mile standard. On the other hand, imposing the lower standard would put a particular burden on cars with small engines, and those are the ones that will be needed to achieve desired fuel economy goals. It should also be noted that use of a more stringent standard is not an effective way to solve the problem of cars which are not properly maintained in use, and thus emit high CO levels.

The 9 grams per mile carbon monoxide standard reflects recent evidence that today's California carbon monoxide standard of 9 gpm, which has been adopted by the California Air Resources Board for the long term, is more than adequate to protect public health. This is significant, because this CO level permits the operation of three-way catalyst technology to achieve low NOx levels while still providing more fuel-efficient operation.

1982 AND THEREAFTER STANDARDS

With regard to NOx, the ultimate level which represents the best tradeoff between fuel economy and air quality will fall within the 1 to 2 gram per mile range. Not enough is known at this point to specify the precise standard. Therefore, the Administrator of EPA would be given the authority to adjust the standard within this range. There is substantial argument over what level of NOx control is needed for public health reasons. When vehicles are controlled to levels as stringent as 2 grams per mile NOx, as they are today, stationary sources become the major NO_x emitters. The Motor Vehicle Goals or "300 Day Study" identified five strategies to control NOx in the atmosphere, each of which would be more cost-effective than reducing auto emissions below 2 grams per mile.

There are many unsettled questions regarding the control of oxides of nitrogen (NOx). Recent technological developments (such as those used by Volvo) indicate that the recommended level of 1.0 grams/mile can be achieved, but considerable additional work is needed if that technology is ever to be made sufficiently applicable to a wide range of cars. In fact, there is some question whether that standard will actually be needed to protect public health. Therefore, the EPA Administrator should be given authority to revise the NOx standard, up to 2.0 grams/mile, unless he determines that would endanger public health.

NOx control also presents special problems for many engines, such as diesels, which can help conserve energy. Thus, the identical Dingell-Broyhill/Riegle-Griffin bills propose that the EPA Administrator could permit a NOx level up to 2.0 grams/mile for specific categories of cars if that is necessary for them to achieve substantial energy savings. Here again, the higher NOx level would not be permitted if the Administrator determines that would endanger public health.

SOLAR ENERGY AND INDUSTRIAL PARKS

HON. EDWARD J. PATTEN

OF NEW JERSEY

IN THE HOUSE OF REPRESENTATIVES

Thursday, March 31, 1977

Mr. PATTEN. Mr. Speaker, solar energy has thus far been generally associated with residential homes and not with large-scale industry and generating stations. Mr. David S. Steiner of the Sudler Construction Co. and Bell Laboratories are doing something to change that association.

Mr. Steiner, at an environmental awards luncheon, announced a proposal submitted to ERDA which would develop solar heating for the Bell Laboratories building in the 287 Industrial Park in Piscataway, N.J. This is an exciting plan and if successful, could lay the groundwork for the utilization of solar technology in industrial buildings.

I commend to my colleagues the remarks of Mr. Steiner on the environment, energy conservation and the role of the industrial park in those areas. Also to follow is an article which appeared in the Home News on the proposal:

REMARKS MADE BY DAVID S. STEINER

Over the years we have worked at our business, often in the belief that our best efforts will be recognized, not by our peers or investors, but by the communities where we operate.

As many of you know the Sudler Companies operate in 14 states, and we have learned that many jurisdictions have many differing views of what we are trying to do or what we are doing.

I think we all remember when an industry moved into town after finding a piece of land near the railroad tracks for its factory and began life in the community by stoking up its furnaces, tossing a layer of ash over the entire area and called it prosperity.

By contrast, today, if one comes to town, it has to deal with all of us, and once it starts up, it takes a lot of advertising to let potential work force know jobs are waiting in their hometowns.

We earnestly try, in these sometimes complicated times, to find the keys that open doors to a better future for all of us, and our effort in Piscataway, we think is a landmark.

A yardstick by which all future office and industrial parks will be measured.

The industries of today have become part of the total landscape without marring it for the clustering of industries in a controlled environment, in a campus setting which makes them good and attractive neighbors, is a far cry from what once was.

That we have in some measure succeeded in achieving our goal to bring a valuable asset to the Piscataway community; let me repeat, is a sign of our coming of age.

A sign that private industry, business and financial interests and local government have led the way to discovering we are not antagonists, but good neighbors working for a common goal.

In sense we are creating a new ecological system where each element contributes to the health and growth of the others, and in that environment we all prosper.

Candidly I must admit we sometimes differ, but because we believe in what we are doing, because we believe our office and industrial parks are assets to the communities and to their economic viability, we persevere.

Seriously, I believe we are on the threshold of a new day, for those of you who won awards for sharing our concerns for environmental planning.

There can be no denying the significant contributions you are making by bringing your expertise in your fields to save the land, water and the air we breathe.

As pragmatists you understand the price exacted by any type of progress and have said you are willing to foot some of the bills.

Up to now there has been an understandable difference between environmentalists; governmental agencies and we in the private sector, especially as developers, builders and financiers.

Events have narrowed our options so we cannot any longer ignore what the other is doing and let them go it alone.

The last meeting of the OPEC nations and their decision to once more raise the price of oil emphasizes how defenseless we are as our energy needs continue to climb faster than the prices.

Here in the Northeastern United States, and particularly New Jersey, which daily becomes more dependent on Middle East oil as domestic sources go to other markets, the problem becomes more acute.

It is imperative for us to find workable alternatives, so we cannot let government do it alone but must instead enter a creative partnership in developing alternatives to the reliance on dwindling energy sources.

We intend to become one of those partners with a project for utilizing solar heating in our Corporate Park 287 complex.

We have submitted a proposal to the United States Energy Research and Development Administration, in response to its request for demonstration projects, that would use the building presently occupied by Bell Laboratories Inc. as the test bed.

To date information on operation of solar heating has been sparse and generally limited to residential buildings, so to those of us in the industrial and office park field, a whole new body of information that does not exist will become available

Beyond the mechanics of the system is the added excitement of helping to play a part in solving national problems brought on by the present energy crisis.

The coin is more than two-sided, for our goals, individually, corporately, nationally, are to develop alternate sources of energy, to husband what we have and at the same time live in harmony with our world, and to be worried about the environment.

When through your collective efforts Corporate Park 287 won the award presented by American industrial properties report "for sound environmental planning" we knew it was a commitment to change.

Undoubtedly we will find other solutions as time passes and we learn more, but for the present, where saving even one gallon of oil is meaningful, we must be among the leaders, we must take the next step forward.

We have no other choice.

[From Home News, Jan. 13, 1977]

INDUSTRIAL PARK SEEKS SOLAR GRANT

(By Rudy Larini)

PISCATAWAY.—The Bell Laboratories, Inc., facility on Route 287 may become the model for the industrial application of solar energy in the northeastern United States.

The Sudler Construction Co., which built Corporate Park 287 in which Bell Laboratories is located, is the only industrial park in the Northeast to have applied for a portion of the $7.5 million to be distributed by the federal Energy Research and Development Administration (ERDA) for solar energy projects, according to a spokesman for the firm.

Former Morris County Assemblywoman Rosemarie Totaro, a consultant to Sudler, said some 300 applications have been submitted nationwide for the solar energy grants ERDA is expected to award in March. However, only four applications have been submitted by industrial parks, she said.

The Bell Laboratories project is expected to cost between $250,000 and $300,000 and is to provide heat for roughly a third of the 230,000-square-foot building. It also would supply about half the hot water needed at the facility, including that used in the cafeteria for the 1,100 company employees.

Plans for the solar energy project were unveiled yesterday when Sudler received an environmenal award from American Industrial Properties Report, an industrial development journal which annually chooses six industrial parks throughout the Nation which exemplify sound environmental planning.

The journal's criteria for the award include that the park be an asset to the community, architecturally pleasing and blend with its surroundings.

David Steiner, executive vice president of Sudler, urged the Federal and State Governments to approve pending legislation which would exempt the purchase and installation of solar heating systems from sales and local property taxes.

If the Federal Government approves the grant for Bell Laboratories, Steiner said Sudler would pay for the installation and Bell professionals would supervise the engineering maintenance.

Acceptance of the Federal grant would entitle ERDA to monitor the operation of the solar-heating system once a month for five years and use the results to encourage other industries to employ solar energy for part of their energy requirements.

Installation of the solar-heating system would take approximately six to eight months once the project is approved, according to Wayne Bonhag, a representative of the Solaron Corp. of Colorado, which manufactures the system.

Twenty-eight solar-heat-collecting panels, covering 5,600 square feet, would be installed on the roof of the Bell Laboratories building.

The system would use air rather than water as the heat-transfer medium, thereby eliminating the problems of corrosion and freezing.

The system is designed to provide hot water year-round and heat during the winter. The facility's existing electrical heating system would be used during periods of prolonged cloudiness, although the solar system would have a stone heat storage area underground.

DEPOSIT ON BEVERAGE CONTAINERS

HON. JAMES M. JEFFORDS

OF VERMONT

IN THE HOUSE OF REPRESENTATIVES

Thursday, March 31, 1977

Mr. JEFFORDS. Mr. Speaker, the issue of requiring a deposit on beverage containers as a means of conserving energy and material resources, creating jobs, and bringing about consumer savings is one which is increasingly becoming the focus of attention by both the public and by various legislative bodies throughout the country. As my colleagues may recall, last November the citizens of the States of Maine and Michigan voted overwhelmingly for a beverage container deposit system, joining the States of Oregon, Vermont, and South Dakota, which have had similar laws for quite some time. Additionally, the EPA guidelines requiring deposit systems on all Federal facilities is being implemented shortly, having already started at Fort Knox with good success to date.

The degree of public acceptance of deposit systems is evidenced by a public opinion survey performed for the Federal Energy Administration which indicates that 73 percent of the American public is in favor of a national deposit system. Many State legislatures are now considering their own deposit laws, and the chances of passage are extremely good in many of them. An example is Massachusetts, where the proponents of this legislation recently received the endorsement of a group of the most prestigious economists in the country, including Nobel Laureates Paul A. Samuelson, institute professor and professor of economics at the Massachusetts Institute of Technology, and Kenneth J. Arrow, James Bryant Conant university professor at Harvard University.

I am submitting for the RECORD a listing and a statement issued by these distinguished individuals.

STATEMENT

We, the undersigned economists of Massachusetts, urge the passage of a bill before the Massachusetts Legislature that would

require deposits on beverage containers (S. 73). We strongly support the passage of this legislation for one or more of the following reasons:

1. Litter would be substantially reduced.

This conclusion is supported by experience in Oregon as a result of similar legislation.

2. Solid waste disposal costs would be lessened.

Returnable containers would result in substantial savings to our cities and towns. A bottle that is recycled represents a bottle that did not have to be disposed of.

3. It would lead to conservation of scarce materials.

A U.S. Environmental Protection Agency study has found that a national bottle bill would lead to an annual saving by 1980 of .5 tons of aluminum, 1.5 million tons of steel, and 7 million tons of glass. And the National Commission on Supplies and Shortages has recommended mandatory deposits on beverage containers.

4. It would result in savings of energy.

A study commissioned by the U.S. Federal Energy Administration (FEA) found that national bottle legislation would result in an annual saving by 1982 of approximately 150 trillion British thermal units. This saving is equivalent to some 73,000 barrels of oil daily.

5. Beverage prices would not increase.

While opponents of the bottle bill have argued that it would lead to an increase in effective beverage prices, a recent, well-documented study published by the Federal Reserve Bank of Boston concludes that an increase is unlikely and that, if it did indeed take place, it would be negligible. The FEA study supports this finding on a national basis. In addition, a 1975 League of Women Voters survey demonstrates that in markets where both refillable and nonrefillable beverage containers are available simultaneously, beverages in refillable containers are less expensive.

Furthermore, the Federal Reserve Bank of Boston study indicates that the bottle bill would have a positive impact on employment in the commonwealth, both in terms of number of jobs and payroll. Indeed, the study suggests that the introduction of nonrefillable bottles into Massachusetts led to a loss of jobs and also points out that the bottle bill might lead to the development of an in-state recycling industry. By contrast, the argument that this bill would be detrimental to Massachusetts employment, an argument not supported by evidence, has been set forth in propaganda largely influenced by out-of-state interests whose sudden devotion to Massachusetts employment should be questioned by any intelligent citizen.

We feel that the bottle bill will have a positive impact on the economy of Massachusetts.

PUBLIC JOBS

HON. LEE H. HAMILTON

OF INDIANA

IN THE HOUSE OF REPRESENTATIVES

Thursday, March 31, 1977

Mr. HAMILTON. Mr. Speaker, I would like to insert my Washington Report for March 30, 1977, into the CONGRESSIONAL RECORD:

PUBLIC JOBS

A most challenging task confronting today's policymakers is the creation of 19 million new jobs in the next four years. Such a task is clearly risky, but the costs of failure are great. Apart from the personal tragedy of joblessness, each percentage point of unemployment means a huge loss to the nation's output of goods and services.

Maximum efforts must be made to create new jobs in the private sector even though it will take some time before an expanding economy provides jobs for all who want them. In the meantime public jobs programs will be necessary. There is, however, a heated debate on the effectiveness of such programs. Some persons argue that many of the 7.8 million Americans who are unemployed can be put back to work in this way. Others say that public jobs are no good.

The present job programs are aimed both at cyclical unemployment, which is caused by an economic recession, and at structural unemployment, which affects the untrained and unskilled even in good times. Cyclical unemployment can be reduced by economic stimulation, but structural unemployment requires special training and placement efforts.

These are the major federal jobs programs:

Public Service Jobs: Under this program, federal money is used to pay the salaries of workers on local and state government payrolls. Approximately $2.7 billion will be spent this year on some 310,000 such workers. President Carter has asked Congress to raise this sum to $3.4 billion and bring 290,000 more workers into the program.

Critics contend that public service jobs are "make-work" and are usually offered to persons who would have been paid by local and state governments anyway. They also point out that the wages (often about $3.40 per hour) draw unskilled workers away from the private sector. Proponents of public service jobs claim that these problems can be resolved with careful, long-range planning. The problem, thy say, is one of correlating the need for service with the supply of workers who require employment assistance.

Public Works Jobs: Under this program, $2 billion has been allocated to communities for the repair and construction of schools, municipal buildings, parks and other projects. President Carter has proposed an additional $2 billion. Besides improving community facilities, the program provides work in the hard-hit construction industry. The Congressional Budget Office estimates that between 16,000 and 46,000 workers are hired for each $1 billion spent.

Critics of public works jobs complain that it takes so long for projects to get underway that very little is really done to create jobs. They also point out that the jobs created go only to skilled tradesmen. Proponents of public works jobs contend that the economy benefits quickly even though the money is not spent immediately. They make the point that qualifying projects must be ready to begin within ninety days.

Countercyclical Assistance: Under the countercyclical revenue sharing program, funds are paid to localities with especially high rates of unemployment to be used in any way local officials choose. The theory is that the extra funds aid the local economy and keep the local governments from having to lay off workers. This $1.15 billion program is estimated to create or protect 40,000 to 77,000 jobs. President Carter has asked Congress for an additional $925 million to expand the program.

Training Programs: There are relatively few federal programs designed to counsel and train people and provide summer jobs. The existing programs include the Comprehensive Employment and Training Act, summer jobs for teenagers and the Job Corps. There are

also special programs for native Americans, migrant workers and Vietnam veterans. President Carter is proposing an expansion of the Job Corps and the creation of new programs to maintain and improve public parks and community facilities.

Aside from these programs, various tax incentives are also being suggested to encourage job creation in the private sector. There is, however, considerable controversy over the size and the nature of the tax credits. Furthermore, most of the experts agree that tax reduction is a very indirect and cumbersome way to create jobs.

Obviously there are many problems in putting the unemployed back to work, either directly on a government payroll or indirectly in other public or not-for-profit groups. Public service jobs are expensive and they do require some growth in the public sector. But with unemployment compensation now running about $17 billion a year, the choices are not quite so simple. Anything that can be done to get people off welfare and back to work has to be beneficial.

CHEMICAL WARFARE

HON. RICHARD T. SCHULZE

OF PENNSYLVANIA

IN THE HOUSE OF REPRESENTATIVES

Thursday, March 31, 1977

Mr. SCHULZE. Mr. Speaker, on March 21, I introduced a concurrent resolution with respect to a moratorium on the further production of lethal chemical weapons, including the so-called binary weapons, and the destruction of a specified amount of lethal chemical mustard gas. Joining me in this legislation are 25 cosponsors whose names appear at the end of this statement.

The resolution was also introduced in the Senate by the distinguished gentleman from Connecticut, the Honorable LOWELL WEICKER.

The response to the Schulze-Weicker initiative has been quite encouraging. Many have indicated their interest and support for this proposal. In fact, a very interesting article on this subject appeared in the March 25 issue of the Christian Science Monitor. I offer the article for inclusion in the RECORD.

[From the Christian Science Monitor]

TO HALT THE NERVE-GAS RACE

Is President Carter as serious as he seems about checking the arms race? If he is, he will take up the initiative of two congressional Republicans toward halting a particularly grisly part of that race—chemical weapons including the nerve gases that are freshly in the news.

Early in the week came a report of renewed Pentagon efforts to develop nerve-gas weapons and defenses against them in the face of a reported growth in Soviet nerve-gas capability. Then came the previously scheduled proposal by Senator Weicker of Connecticut and Representative Schulze of Pennsylvania for the destruction of a 3,000-ton stockpile of mustard gas as well as a three-year moratorium on the production of new nerve or mustard weapons.

No one should object to prudent research on defense against all possible weapons. But Mr. Weicker and Mr. Schulze are on the right track in calling on the United States to make a firm gesture of its sincerity in seeking an international ban on the production as well as use of chemical weapons. They call on both houses of Congress for a non-binding resolution urging the President for action on the moratorium. We call on the President to move ahead speedily on such a moratorium. (The U.S. already rightly subscribes to the Geneva Protocol against the first use of chemical weapons and to a later international instrument against both the production and use of biological weapons.)

During the three years—a period which would not present a threat to U.S. security—the Soviet Union and other countries would be challenged to give similar evidence of their sincerity in checking the chemical arms race. Third-world nations would have this example to discourage them in the proliferation of these weapons—a cheaper and tempting alternative to joining the nuclear club.

As Senator Weicker pointed out, the road toward nuclear control is long and hard. Chemical weapons control is on a smaller scale—so far—and is achievable. But not if no one takes the first step.

Mr. Speaker, if the United States is ever going to take the leadership role in total nuclear disarmament—as the Carter administration has pledged—it must direct initial efforts at a level where success is attainable. My resolution is an attempt to begin the process toward meaningful international agreements on arms control and disarmament. Today, there is a possibility to begin that process. We should make that possibility a reality. I invite my colleagues to join in this effort by cosponsoring this resolution.

The list of cosponsors and the text of the resolution follow:

LIST OF COSPONSORS

Mr. Schulze, Mr. Anderson of Illinois, Mr. AuCoin, Mr. Bedell, Mr. Blouin, Mr. Cochran, Mr. Corcoran, Mr. Coughlin, Mr. Drinan, Mr. Edgar, Mrs. Fenwick, Mr. Gradison, Mr. Hagedorn, Mr. Kastenmeier, Mr. Kostmayer, Mr. Leach, Mr. Lehman, Mr. Long, Mr. McKinney, Mr. Ottinger, Mr. Pattison, Mr. Pressler, Mrs. Schroeder, Mr. Simon, Mr. Vento, Mr. Walker, and Mrs. Meyner.

H. CON. RES. 185

A concurrent resolution to urge the President to reduce the risk of chemical warfare

Resolved by the House of Representatives (the Senate concurring), That the Congress finds that—

(1) the policy of the United States is not to make first use of lethal and incapacitating chemical weapons in war;

(2) in 1972 the United States signed the Convention on the Prohibition of the Development, Production, and Stockpiling of Bacteriological (Biological) and Toxin Weapons and on their Destruction, and such Convention declared that "each State Party to the Convention affirms the recognized objective of effective prohibition of chemical weapons and, to this end, undertakes to continue negotiations in good faith with a view to reaching early agreement on effective measures for the prohibition of their development, production, and stockpiling and for their destruction";

(3) in 1975 the United States ratified the Geneva protocol prohibiting the use of chemical and biological weapons in warfare; and

(4) the United States supports the continuing negotiations being conducted by the Conference of the Committee on Disarmament toward this end of an effective chemical weapons treaty.

SEC. 2. It is the sense of the Congress that—

(1) the President should declare a moratorium of three years on the further United States manufacture of lethal and incapacitating nerve and mustard agents and the so-called binary agents;

(2) the President, as a sign of good faith to the world, should order the destruction of three thousand tons of lethal chemical mustard agents from existing United States stockpiles over the three years of such moratorium, and invite interested international organizations, such as the Conference of the Committee on Disarmament to send delegations to view the destruction process;

(3) the President should invite the Union of Soviet Socialist Republics and other nations which possess quantities of lethal chemical weapons to indicate their sincerity in seeking a chemical weapons treaty by following the example of the United States, and should urge the Third World Nations to refrain from seeking the introduction of chemical weapons into their arsenals; and

(4) the President should urge the participants of the Conference of the Committee on Disarmament to rapidly conclude an international treaty banning the manufacture and possession of lethal chemical weapons. Such a treaty, in order to be meaningful, should provide for the destruction of existing stocks and production facilities over a specified period of time. Such a treaty must also provide independent, international procedures for verifying the disposal of stocks and facilities, investigating and challenging suspect activities, and establishing on-site inspections.

SACCHARIN—WHO DECIDES

HON. JAMES M. COLLINS

OF TEXAS

IN THE HOUSE OF REPRESENTATIVES

Thursday, March 31, 1977

Mr. COLLINS of Texas. Mr. Speaker, the common man and woman of the United States deserve to be heard. The saccharin ban edict marks another step toward loss of individual rights. Washington headlines human rights, yet the bureaucrats want to dominate and destroy the rights of each individual whether they live in Carrollton, Richardson, Farmers Branch, Plano, or Irving.

America was built on the independence of each person to think and decide for themselves. Yet step by step, law by law, regulation by regulation, the all-powerful Federal Government is deciding every move in a person's life.

If one of my neighbors in Dallas wants to use saccharin, I think he has the right to use it. If he wants to walk barefoot in the winter, that is his right. If he wants to walk to work, he should be allowed to do so. If he wants to eat saccharin instead of sugar, that is his right.

Last night I read an interesting one page editorial in this week's U.S. News & World Report. Written by Marvin Stone it asks "Why Ban Saccharin?" Here are some key sections:

How capricious does our Government intend to be—and how far can it be allowed to go—in limiting freedom of choice by individual citizens?

That question is at the heart of the controversy over saccharin, which the Food and Drug Administration proposes to ban because of evidence that it is a cancer-causing agent in force-fed Canadian rats.

Saccharin is the only noncaloric sweetener still legal in this country and is used by virtually every American—in tooth paste, soft drinks, canned fruits and vegetables,

gelatin mixes, candy, chewing gum, medicines.

Since its discovery in 1879, saccharin never has been known to produce cancer in humans, so it is not surprising that the FDA has fallen under attack as being arrogant, absurd, unscientific and irrational.

From the start, the whole saccharin mess has been surrounded by a hypocrisy on the part of the Government. What is wrong with allowing Americans to make themselves aware of the arguments for and against the use of saccharin and then leaving them alone to make a free choice—much as they now are free to make a choice whether to smoke tobacco or, for that matter, whether to take the risk of driving on highways that claim 45,000 lives a year?

Surely people in Washington have learned by now that, when common sense has fled from Congress and the bureaucracy, public outrage soon surfaces, and sometimes prevails. Prohibition of whisky, well intentioned as it may have seemed, failed as unenforceable. More recently, seat belts with ignition underlocks provoked a citizen revolt strong enough to force repeal.

Americans need not be treated like a mindless mass, with the most personal decisions stuffed down people's throats through restrictive legislation.

The proper approach with saccharin is to tell people in plain English what may be the risk of using it, and let the people decide for themselves whether the risk is worth taking.

WHAT AMERICA MEANS TO ME

HON. CHARLES ROSE III

OF NORTH CAROLINA

IN THE HOUSE OF REPRESENTATIVES

Thursday, March 31, 1977

Mr. ROSE. Mr. Speaker, each year the Veterans of Foreign Wars of the United States and its Ladies Auxiliary sponsor a Voice of Democracy Scholarship Program in our Nation's secondary schools. This takes the form of a nationwide broadcast scriptwriting contest open to all 10th, 11th and 12th grade students. Contestants submit a 3 to 5 minute broadcast script recorded on a magnetic tape. This year's theme was "What America Means to Me."

Winners are selected from each State and this group then competes here in Washington for a $10,000 scholarship to the school of his or her choice and other scholarships ranging from $5,000 to $1,500.

I am very proud that this year's winner from North Carolina is Ms. Alfreda Jones of Maxton, N.C., in my Seventh Congressional District. Freda is the daughter of Mr. and Mrs. James A. Jones of Maxton. She is 17 years old, and an 11th grader at Prospect High School in Maxton.

The transcript of her winning broadcast script follows:

WHAT AMERICA MEANS TO ME

(By Alfreda Jones)

America—land of plenty, shelter for the insecure, refuge for the homeless; America—land of the free and home of the brave—lifts her mighty torch in salute to all those yearning to be free; those who served to make her great. Clad in her royal garments, she is an empire unto herself. Sure, she has had problems, inner struggles, turmoils, still America remains proud and erect. Founded on a base of freedom, America has moved steadily through some of the most trying times any nation has ever come face to face with and has overcome obstacles never thought conquerable. Through two-hundred years Americans have fought for the cause of freedom, struggling to maintain the respect due a great country by constantly striving to work for the betterment of its economic situation. I have a duty to aid my country in the many successful and unsuccessful experimental struggles in government, religion, the sciences, medicine and education.

America has remained a nation of struggles in a government for the people, of the people, and by the people. Such great documents as the Emancipation Proclamation, the Constitution, and the Bill of Rights have helped to form our present democratic government. I am proud to say that America has a government that is absolutely run by her people.

In addition to this, I take great pride and admiration in the courageous efforts of man to maintain his right to worship freely. Americans have nourished their religious beliefs to such an extent that they have survived through such confrontations as drugism, alcoholism, crime, and political manipulations, to name only a few. The trials and tribulations suffered and endured by religion are potent enough to ruin and destroy most organizations, but religion as a secular way of life is gradually becoming a stronger lifeline for Americans to hang on to. Due to the great missionary and evangelistic efforts of our nation, religion has become prevalent in many remote parts of the world; and in this we take great pride.

Furthermore, we as Americans, can enjoy the many battling advancements made in the numerous fields of science, one of which includes medicine. I find myself frequently looking back with amazement at the persistence of medicine to overcome and annihilate so many dreaded diseases in its endeavors for advancement. If only we as present day Americans could feel a small bit of the triumph that was felt when some of the most beneficial accomplishments were made, or the tragedy felt when so many hours and years of hard work were found to be useless in the end.

Can you imagine the will and determination that it took to pick up the pieces and return to the starting point with the knowledge that there might be a similar reoccurrence? This strong-willed determination and perseverance extended through all the various fields and phases of the scientific world. Fortunately, America had produced men who were willing to give untiringly of themselves if it meant some small contribution to the betterment of our great country.

Yet, I am still awesomely struck by the accomplishments and failures that education has encountered in its many experimentations to educate the masses of America. Educationally, America has truly advanced from the days of walking three miles to borrow a book• and inadequately heated schoolhouses—to the days of air-conditioned schools and books for everyone. Education is valued more highly now than ever before as a result of man's continuous yearning for knowledge of himself and the world around him.

A nation of rights, responsibilities, security, freedom, and liberty—a country exploring broader horizons in every aspect imaginable; millions of brave men and women, past and present; and all the events that have occurred because of them and their bold determination to improve the standards of our country—this is what America means to me; and for this I love you, America, for to me YOU are my life.

SENATE COMMITTEE MEETINGS

Title IV of Senate Resolution 4, agreed to by the Senate on February 4, 1977, calls for establishment of a system for a computerized schedule of all meetings and hearings of Senate committees, subcommittees, joint committees, and committees of conference. This title requires all such committees to notify the Office of the Senate Daily Digest—designated by the Rules Committee—of the time, place, and purpose of all meetings when scheduled, and any cancellations or changes in meetings as they occur.

As an interim procedure until the computerization of this information becomes operational, the office of the Senate Daily Digest will prepare such information daily for printing in the Extensions of Remarks section of the CONGRESSIONAL RECORD.

Any changes in committee scheduling will be indicated by placement of an asterisk to the left of the name of the unit conducting such meetings.

Meetings scheduled for Monday, April 4, 1977, may be found in the Daily Digest section of today's RECORD.

The schedule follows:

MEETINGS SCHEDULED

APRIL 4

9:30 a.m.

Commerce, Science, and Transportation
Aviation Subcommittee
To resume hearings on bills proposing regulatory reform of the air transportation industry, including S. 292 and S. 689.
5110 Dirksen Building

10:00 a.m.

Appropriations
HUD-Independent Agencies Subcommittee
To resume hearings on proposed budget estimates for fiscal year 1978 for the Department of the Treasury, on funds for New York City financing.
1318 Dirksen Building

Appropriations
Public Works Subcommittee
To continue hearings on proposed budget estimates for fiscal year 1978 for public works projects, to hear Members of Congress and public witnesses.
1114 Dirksen Building

Banking, Housing and Urban Affairs
To continue markup on S. 69 and S. 92, to amend and extend the Export Administration Act.
5302 Dirksen Building

Budget
To mark up proposed first concurrent resolution setting forth recommended levels of total budget outlays, Federal revenues, and new budget authority.
357 Russell Building

Commerce, Science, and Transportation
To hold hearings on S. 263, to provide for interim regulatory reform of the Interstate Commerce Commission, Federal Trade Commission, Federal Power Commission, Federal Communications Commission, Civil Aeronautics Board, Federal Maritime Commission, and Consumer Product Safety Commission.
235 Russell Building

Energy and Natural Resources
Subcommittee on Energy Conservation and Regulation
To hold oversight hearings to determine the status of national efforts in energy conservation.
3110 Dirksen Building

Energy and Natural Resources
Subcommittee on Energy Research and Development

To resume hearings on proposed authorizations for fiscal year 1978 for the Energy Research and Development Administration.
S-407, Capitol

Governmental Affairs
Energy, Nuclear Proliferation, and Federal Services Subcommittee
To hold hearings to release an Office of Technology Assessment report entitled "Nuclear Proliferation and Safeguards."
3302 Dirksen Building

Human Resources
Subcommittee on Labor
To hold oversight hearings on the administration of the Black Lung Benefits program.
Until 2:00 p.m. 4232 Dirksen Building

Human Resources
Subcommittee on Child and Human Development
To hold hearings on S. 961, to promote the healthy development of children who would benefit from adoption by facilitating their placement in adoptive homes.
Until: 1:00 p.m. 2228 Dirksen Building

2:00 p.m.
Appropriations
Public Works Subcommittee
To continue hearings on proposed budget estimates for fiscal year 1978 for public works projects, to hear Members of Congress and public witnesses.
1114 Dirksen Building

3:30 p.m.
Foreign Relations
To receive a briefing (in school session) from officials of the Central Intelligence Agency on the general world situation.
S-116, Capitol

APRIL 5

9:30 a.m.
Appropriations
Interior Subcommittee
To resume hearings on proposed budget estimates for fiscal year 1978 for the Forest Service.
1114 Dirksen Building

Commerce, Science, and Transportation
Surface Transportation Subcommittee
To hold hearings on S. 562, the proposed Union Station Improvement Act.
235 Russell Building

Select Small Business
Monopoly Subcommittee
To resume hearings on alleged restrictive and anticompetitive practices in the eye glass industry.
424 Russell Building

10:00 a.m.
Appropriations
HUD-Independent Agencies Subcommittee
To continue hearings on proposed budget estimates for fiscal year 1978 for the Consumer Product Safety Commission.
1224 Dirksen Building

Appropriations
Public Works Subcommittee
To continue hearings on proposed budget estimates for fiscal year 1978 for public works projects, to hear Members of Congress and public witnesses.
1114 Dirksen Building

Budget
To mark up proposed first concurrent resolution setting forth recommended levels of total budget outlays, Federal revenues, and new budget authority.
357 Russell Building

Joint Economic Committee
To resume hearings on a recent study prepared by the University of Wisconsin on food chain stores' profits and prices.
318 Russell Building

Energy and Natural Resources
Subcommittee on Energy Production and Supply
To resume hearings on S. 977, to conserve gas and oil by fostering increased utilization of coal in electric generating facilities and in major industrial installations.
3110 Dirksen Building

Energy and Natural Resources
Subcommittee on Energy Research and Development
To continue hearings on proposed authorizations for fiscal year 1978 for the Energy Research and Development Administration.
S-407, Capitol

Governmental Affairs
Intergovernmental Relations Subcommittee
To hold hearings on S. 904, to establish a center within OMB to provide current information on Federal domestic assistance programs.
3302 Dirksen Building

Human Resources
To consider S. 855, to authorize funds for fiscal year 1978 for activities of the National Science Foundation S. 755, extending through fiscal year 1978 all expiring health programs under the Public Health Service Act and the Community Health Centers Act.
Until 11:30 a.m. 4232 Dirksen Building

Rules and Administration
To resume consideration of S. Res.'s 5 through 12, proposing several changes in the Senate rules, principally with regard to Rule XXII (cloture).
301 Russell Building

Select Committee on Intelligence
Subcommittee on the Budget
To hold hearings on the question of public disclosure of funding levels authorized for Government intelligence activities.
2228 Dirksen Building

Special Aging
To hold hearings on the impact on older Americans of rising energy costs.
1202 Dirksen Building

10:30 a.m.
Commerce, Science, and Transportation
To hold a business meeting.
5110 Dirksen Building

11:00 a.m.
Select Ethics
Business meeting (open with immediate vote to get into closed session) to discuss committee organization.
1417 Dirksen Building

2:00 p.m.
Appropriations
Public Works Subcommittee
To continue hearings on proposed budget estimates for fiscal year 1978 for public works projects, to hear Members of Congress and public witnesses.
1114 Dirksen Building

Commerce, Science, and Transportation
Science, Technology, and Space Subcommittee
To consider S. 365, authorizing funds for fiscal year 1978 for NASA.
235 Russell Building

APRIL 6

9:00 a.m.
Energy and Natural Resources
Parks and Recreation Subcommittee
To hold hearings on S. 393, the proposed Montana Wilderness Study Act.
Room to be announced

9:30 a.m.
Appropriations
Interior Subcommittee
To resume hearings on proposed budget estimates for fiscal year 1978 for the Department of the Interior, to hear congressional witnesses.
1114 Dirksen Building

Banking, Housing and Urban Affairs
To hold a hearing on the nomination of Harold Marvin Williams, of California, to be a member of the Securities and Exchange Commission.
5302 Dirksen Building

Commerce, Science, and Transportation
Communications Subcommittee
To hold oversight hearings on rural telecommunications policy.
235 Russell Building

Commerce, Science, and Transportation
Aviation Subcommittee
To continue hearings on bills proposing regulatory reform in the air transportation industry, including S. 292 and S. 689.
5110 Dirksen Building

Human Resources
Subcommittee on Child and Human Development
To hold oversight hearings on extension of the Child Abuse and Prevention Treatment Act (Public Law 93-247).
Until 12:00 noon 4200 Dirksen Building

Human Resources
Health and Scientific Research Subcommittee
To hold hearings on benefits from and technological uses of genetic engineering-Deoxyribonucleic Acid (DNA) research.
Until 3:00 p.m. 6202 Dirksen Building

Select Small Business
Monopoly Subcommittee
To continue hearings on alleged restrictive and anticompetitive practices in the eye glass industry.
424 Russell Building

10:00 a.m.
Agriculture, Nutrition, and Forestry
To hold hearings on the nominations of Rupert Cutler, of Michigan, Dale Ernest Hathaway, of the District of Columbia, and Robert Haldeman Meyer, of California, each to be an Assistant Secretary of Agriculture; to be followed by consideration of these nominations and that of Howard W. Hjort, of the District of Columbia, all to be Members of the Board of Directors of the Commodity Credit Corporation.
324 Russell Building

Appropriations
Foreign Operations Subcommittee
To resume hearings on proposed budget estimates for fiscal year 1978 for foreign aid programs, to hear public witnesses.
1318 Dirksen Building

Appropriations
HUD-Independent Agencies Subcommittee
To resume hearings on proposed budget estimates for fiscal year 1978 for the Consumer Product Safety Commission, Office of Consumer Affairs, and Consumer Information Center.
Room to be announced

Appropriations
Public Works Subcommittee
To continue hearings on proposed budget estimates for fiscal year 1978 for public works projects, to hear Members of Congress and public witnesses.
1114 Dirksen Building

Banking, Housing, and Urban Affairs
To mark up S. 305, to require issuers of registered securities to keep accurate records, and to prohibit the payment of overseas bribes by any U.S. business concern.
5302 Dirksen Building

Budget
To mark up proposed first concurrent resolution setting forth recommended levels of total budget outlays, Federal revenues, and new budget authority.
357 Russell Building

Energy and Natural Resources
Subcommittee on Energy Conservation and Regulation
To continue oversight hearings to determine status of national efforts in energy conservation.
3110 Dirksen Building

Governmental Affairs
Subcommittee on Energy, Nuclear Proliferation, and Federal Services
To continue hearings on S. 897, to strengthen U.S. policies on nuclear nonproliferation, and to reorganize certain nuclear export functions.
3302 Dirksen Building

Human Resources
Subcommittee on Labor
To continue oversight hearings on the administration of the Black Lung Benefits program.
Until: 1:00 p.m. 4332 Dirksen Building

Select Committee on Intelligence
Subcommittee on the Budget
To hold hearings on the question of public disclosure of funding levels authorized for Government intelligence activities.
2228 Dirksen Building

2:30 p.m.
Foreign Relations
Subcommittee on African Affairs
To meet in closed session to receive a briefing from officials of the Central Intelligence Agency on internationalization of local conflicts in Africa.
S-116, Capitol

APRIL 7

9:30 a.m.
Banking, Housing, and Urban Affair
To hold a hearing on the nomination of Chester Crawford McGuire, of California, to be an Assistant Secretary of Housing and Urban Development.
5302 Dirksen Building

Commerce, Science and Transportation
Aviation Subcommittee
To continue hearings on bills proposing regulatory reform in the air transportation industry, including S. 292 and S. 689.
5110 Dirksen Building

10:00 a.m.
Appropriations
Military Construction Subcommittee
To resume hearings on proposed budget estimates for fiscal year 1978 for military construction programs, on funds for NATO and classified programs.
S-146, Capitol

Commerce, Science, and Transportation
Merchant Marine and Tourism Subcommittee
To hold hearings on S. 1019, to authorize funds for fiscal years 1978 and 1979 for certain maritime programs.
235 Russell Building

Energy and Natural Resources
Subcommittee on Energy Production and Supply
To continue hearings on S. 977, to conserve gas and oil by fostering increased utilization of coal in electric generating facilities and in major industrial installations.
3110 Dirksen Building

Select Intelligence
To hold a closed hearing on proposed fiscal year 1978 authorizations for Government intelligence activities.
S-407, Capitol

Special Aging
To continue hearings on the impact on older Americans of rising energy costs.
1224 Dirksen Building

2:00 p.m.
Commerce, Science, and Transportation
To hold hearings on the nomination of Dr. Frank Press, of Massachusetts, to be Director of the Office of Science and Technology Policy.
5110 Dirksen Building

APRIL 8

9:00 a.m.
Government Affairs
To continue hearings on S. 826, to establish a Department of Energy in the Federal Government to direct a coordinated national energy policy.
Until: 5 p.m. 3302 Dirksen Building

APRIL 18

10:00 a.m.
Appropriations
HUD-Independent Agencies Subcommittee
To resume hearings on proposed budget estimates for fiscal year 1978 for the Department of Housing and Urban Development and Independent Agencies, to hear public witnesses.
1318 Dirksen Building

Environment and Public Works
Water Resources Subcommittee
To resume hearings on national water policy in view of current drought situations.
4200 Dirksen Building

Judiciary
To hold hearings on S. 825, to foster competition and consumer protection policies in the development of product standards.
2228 Dirksen Building

APRIL 19

9:30 a.m.
Appropriations
Interior Subcommittee
To resume hearings on proposed budget estimates for fiscal year 1978 for the Department of the Interior and Related Agencies, to hear public witnesses.
1114 Dirksen Building

Appropriations
Transportation Subcommittee
To resume hearings on proposed budget estimates for fiscal year 1978 for the Federal Aviation Administration.
1224 Dirksen Building

Commerce, Science, and Technology
Science, Technology, and Space Subcommittee
To hold hearings on S. 126, to establish an Earthquake Hazards Reduction Program.
5110 Dirksen Building

Environment and Public Works
To resume hearings on the proposed replacement of Lock and Dam 26, Alton, Ill.
4200 Dirksen Building

10:00 a.m.
Banking, Housing, and Urban Affairs.
To hold hearings on proposed housing and community development legislation with a view to reporting its final recommendations thereon to the Budget Committee by May 15.
5302 Dirksen Building

Consumer Subcommittee
To hold oversight hearings on activities of the Consumer Product Safety Commission.
235 Russell Building

Energy and Natural Resources
To resume hearings on S. 9, to establish a policy for the management of oil and natural gas in the Outer Continental Shelf.

Governmental Affairs
Subcommittee on Reports, Accounting and Management
To hold hearings to review the processes by which accounting and auditing practices and procedures, promulgated or approved by the Federal Government, are established.
3302 Dirksen Building

Judiciary
To continue hearings on S. 825, to foster competition and consumer protection policies in the development of product standards.
2228 Dirksen Building

3:00 p.m.
Appropriations
HUD-Independent Agencies Subcommittee
To continue hearings on proposed budget estimates for fiscal year 1978 for the Department of Housing and Urban Development, to hear public witnesses.
1318 Dirksen Building

APRIL 20

9:30 a.m.
Environment and Public Works
Water Resources Subcommittee
To continue hearings on the proposed replacement of Lock and Dam 26, Alton, Ill.
4200 Dirksen Building

10:00 a.m.
Appropriations
Interior Subcommittee
To continue hearings on proposed budget estimates for fiscal year 1978 for the Department of the Interior and related agencies, to hear public witnesses.
1114 Dirksen Building

Banking, Housing, and Urban Affairs
To continue hearings on proposed housing and community development legislation with a view to reporting its final recommendations thereon to the Budget Committee by May 15.
5302 Dirksen Building

Commerce, Science, and Technology
Consumer Subcommittee
To continue oversight hearings on activities of the Consumer Product Safety Commission.
235 Russell Building

Judiciary
To continue hearings on S. 825, to foster competition and consumer protection policies in the development of product standards.
2228 Dirksen Building

Select Small Business
To hold hearings on S. 972, to authorize the Small Business Administration to make grants to support the development and operation of small business development centers.
424 Russell Building

APRIL 21

10:00 a.m.
Appropriations
Interior Subcommittee
To continue hearings on proposed budget estimates for fiscal year 1978 for the Department of the Interior and related agencies, to hear public witnesses.
1114 Dirksen Building

Banking, Housing, and Urban Affairs
To continue hearings on proposed housing and community development legislation with a view to reporting its final recommendations thereon to the Budget Committee by May 15.
5302 Dirksen Building

Commerce, Science, and Technology
Consumer Subcommittee
To continue oversight hearings on activities of the Consumer Product Safety Commission.
5110 Dirksen Building

Energy and Natural Resources
Subcommittee on Parks and Recreation
To hold hearings on S. 658, to designate certain lands in Oregon for inclusion in the National Wilderness Preservation System.
Room to be announced

Governmental Affairs
Subcommittee on Reports, Accounting and and Management
To continue hearings to review the processes by which accounting and auditing practices and procedures, promulgated or approved by the Federal Government, are established.
3302 Dirksen Building

APRIL 22

10:00 a.m.
Banking, Housing, and Urban Affairs
To continue hearings on proposed housing and community development legislation with a view to reporting its final recommendations thereon to the Budget Committee by May 15.
5302 Dirksen Building

APRIL 25

10:00 a.m.
Banking, Housing, and Urban Affairs
Consumer Affairs Subcommittee
To hold hearings on S. 656, S. 918, and S. 1130, to amend the Consumer Protection Act to prohibit abusive practices by independent debt collectors.
5302 Dirksen Building
Commerce, Science, and Transportation
Merchant Marine and Tourism Subcommittee
To hold hearings on proposed budget estimates for fiscal year 1978 for the Coast Guard.
5110 Dirksen Building
Energy and Natural Resources
To resume hearings on S. 9, to establish a policy for the management of oil and natural gas in the Outer Continental Shelf.
3110 Dirksen Building
Judiciary
To resume hearings on S. 825, to foster competition and consumer protection policies in the development of product standards.
2228 Dirksen Building

APRIL 26

9:30 a.m.
Select Small Business
To hold hearings on problems of small business as they relate to product liability.
1202 Dirksen Building
Select Small Business
To resume hearings on S. 972, to authorize the Small Business Administration to make grants to support the development and operation of small business development centers.
424 Russell Building

10:00 a.m.
Appropriations
Transportation Subcommittee
To resume hearings on proposed budget estimates for fiscal year 1978 for the Urban Mass Transportation Administration.
1224 Dirksen Building
Banking, Housing and Urban Affairs
Consumer Affairs Subcommittee
To continue hearings on S. 656, S. 918, and S. 1130, to amend the Consumer Protection Act to prohibit abusive practices by independent debt collectors.
5302 Dirksen Building
Commerce, Science, and Transportation
Merchant Marine and Tourism Subcommittee
To hold hearings to receive testimony in connection with delays and congestion occurring at U.S. airports-of-entry.
235 Russell Building

2:00 p.m.

SENATE—*Friday, April 1, 1977*

(Legislative day of Monday, February 21, 1977)

The Senate met at 9:15 a.m., on the expiration of the recess, and was called to order by Hon. JAMES B. ALLEN, a Senator from the State of Alabama.

PRAYER

The Chaplain, the Reverend Edward L. R. Elson, D.D., offered the following prayer:

Shed Thy light upon our work, O Lord, that at the close of day we may have no regrets. Save us from false choices and from artificial poses and pretensions. May Thy spirit find a dwelling place in our hearts where love reigns supreme and outlasts all transient thoughts and emotions. And may the Lord of the Passover and the Lord of Palm Sunday rule over us and all the nations of the Earth, to the glory of Thy holy name. Amen.

APPOINTMENT OF ACTING PRESIDENT PRO TEMPORE

The PRESIDING OFFICER. The clerk will please read a communication to the Senate from the President pro tempore (Mr. EASTLAND).

The legislative clerk read the following letter:

U.S. SENATE,
PRESIDENT PRO TEMPORE,
Washington, D.C., April 7, 1977.

To the Senate:

Being temporarily absent from the Senate on official duties, I appoint Hon. JAMES B. ALLEN, a Senator from the State of Alabama, to perform the duties of the Chair during my absence.

JAMES O. EASTLAND,
President pro tempore.

Mr. ALLEN thereupon took the chair as Acting President pro tempore.

The ACTING PRESIDENT pro tempore. The Chair recognizes the distinguished majority leader.

THE JOURNAL

Mr. ROBERT C. BYRD. Mr. President, I ask unanimous consent that the Journal of the proceedings of yesterday, Thursday, March 31, 1977, be approved.

The ACTING PRESIDENT pro tempore. Without objection, it is so ordered.

COMMITTEE MEETINGS

Mr. ROBERT C. BYRD. Mr. President, I ask unanimous consent that all committees may be authorized to meet during the session of the Senate today.

Mr. BAKER. Mr. President, reserving the right to object, and I will not object, I advised the majority leader when we spoke of this matter just a moment ago that while until now I have consistently objected to committees meeting after that time when they are permitted under the rules to meet, since committees have the first 2 hours of the session to meet anyway, which would be until 11:15 a.m., and we turn to the final vote on this matter at 11:30; and since the only matter pending during the intervening time would be the amendment of this Senator, I have elected not to object to the meeting of committees today.

The ACTING PRESIDENT pro tempore. The Chair hearing no objection, it is so ordered.

EXECUTIVE SESSION

Mr. ROBERT C. BYRD. Mr. President, there are several nominations on the Executive Calendar under "New Reports" that have been cleared on both sides. I ask unanimous consent that the Senate go into executive session to consider nominations on the Executive Calendar beginning with "New Reports."

The ACTING PRESIDENT pro tempore. Without objection, the Senate will go into executive session to consider certain measures on the Executive Calendar starting with "New Reports," and the clerk will state the first nomination on the calendar.

SMALL BUSINESS ADMINISTRATION

The assistant legislative clerk read the nomination of Arthur Vernon Weaver, Jr., of Arkansas, to be Administrator of the Small Business Administration.

The ACTING PRESIDENT pro tempore. Is there objection to the confirmation of the nomination?

Mr. BAKER. Mr. President, reserving the right to object, there is no objection. For the information of the majority leader, the following nominations on the Executive Calendar, two under the Department of Defense and two under HEW, I also have no objection to.

The ACTING PRESIDENT pro tempore. Without objection, the nomination is confirmed.

DEPARTMENT OF DEFENSE

The assistant legislative clerk read the nomination of William James Perry, of California, to be Director of Defense Research and Engineering.

The ACTING PRESIDENT pro tempore. Is there objection to the confirmation of the nomination? Without objection, the nomination is confirmed.

The assistant legislative clerk read the nomination of David Emerson Mann, of Maryland, to be Assistant Secretary of the Navy.

The ACTING PRESIDENT pro tempore. Without objection, the nomination is confirmed.

DEPARTMENT OF HEALTH, EDUCATION, AND WELFARE

The assistant legislative clerk read the nomination of Mary Berry, of Colorado, to be Assistant Secretary for Education.

The ACTING PRESIDENT pro tempore. Without objection, the nomination is confirmed.

The assistant legislative clerk read the nomination of Ernest LeRoy Boyer, of New York, to be Commissioner of Education.

The ACTING PRESIDENT pro tempore. Without objection, the nomination is confirmed.

Mr. ROBERT C. BYRD. Mr. President, I ask unanimous consent that the President be immediately notified of the confirmation of the nominations.

The ACTING PRESIDENT pro tempore. Without objection, the President will be notified.

LEGISLATIVE SESSION

Mr. ROBERT C. BYRD. Mr. President, I ask unanimous consent that the Senate resume legislative business.

The ACTING PRESIDENT pro tempore. Without objection, it is so ordered.

The distinguished minority leader is recognized.

PLUTONIUM AND FOREIGN POLICY

Mr. BAKER. Mr. President, I would like to draw the attention of my colleagues to J. W. Anderson's column in this morning's Washington Post. This column, which is entitled "The Politics of Plutonium," discusses the chances that the United States will be able to successfully dissuade our allies from pursuing the breeder reactor-plutonium option.

When the United States did not go ahead with the SST, it did not stop France and Great Britain from building the Concorde. The opinion expressed in this column is that our forgoing the plutonium option will have the same effectiveness.

Indeed, our self-denial of plutonium as an energy option could force other countries to pursue it more vigorously because they will realize that the United States will not be able to maintain its role as a reliable supplier of nuclear fuel.

Mr. President, I urge my colleagues to carefully consider the realism of the United States crossing plutonium recycling and the breeder reactor from its list of energy options on the basis that it will cause the rest of the world to follow. I ask unanimous consent that this Washington Post column be printed in the RECORD.

There being no objection, the article was ordered to be printed in the RECORD, as follows:

THE POLITICS OF PLUTONIUM

(By J. W. Anderson)

The plutonium breeder reactor has a lot in common with the Concorde, the supersonic jet, as a device for souring this country's relations with Europe. In political terms the chief difference between the two is that the breeder reactor touches immensely greater national interests. If American nuclear policies are not managed with very great skill, they will inflict a degree of damage of which the surprisingly bitter row over Concorde provides only the mildest warning.

Once upon a time people thought that technology would tie nations together, because of the need for scientific cooperation and massive investments. That happy thought turns out to have been a bit too optimistic. The United States now seems to be in the process of changing its mind about plutonium as a commercial fuel. The U.S. government is beginning to discourage the dispersal of this technology around the world. That's the issue in the Carter administration's attempt to interrupt the sale of West German plutonium equipment to Brazil.

Consider the parallel with Concorde. The United States chose not to build it—but the British and French partnership decided differently. Now the machine is in the air, and it wants to land in New York. Americans complain about the noise, but Europeans consider that objection to be hardly more than a veil for crass commerical protectionism plus, perhaps, a strain of resentment at a technology that does not have the American flag stamped on it. The issues here are really rather minor: costs, noise levels and whether your trip to Europe takes eight hours or four. But the politics of the landing rights has become disproportionately divisive.

Unlike Concorde, energy technology touches national necessities of the first order. Europeans sharply point out that the United States enjoys the luxury of reconsidering plutonium only because—unlike Europe—this country has vast reserves of coal and plenty of uranium. Plutonium is derived from uranium. But the magic of the breeder reactor is that it produces about 70 times as much energy, per pound of uranium, as the uranium-fueled light water reactors now producing electricity in this country. There's a price to be paid for this magic—plutonium as a fuel is vastly more dangerous than uranium.

Europe is prepared to take that risk. Europeans now see the breeder reactor as the ultimate answer to their dependence on foreign fuel sources. Which foreign sources? For one, the United States which, to be candid, has given other nations reason to be cautious about its reliability.

The United States has been the Europeans' main supplier of enriched uranium for the present generation of commercial reactors. But recently the United States has been vague and noncommittal about its plans for expanding its uranium exports. There has also been increasing strain over the controls that the United States wants to put on the fuel that it sells—controls that Europeans consider unnecessary and demeaning. Because of these uncertainties and disagreements, Europe has now begun to buy enriched uranium from the Soviet Union which, as one European official puts it, is much more flexible.

But this choice between American and Russian supplies only reinforces the Europeans' intense desire to unhook themselves from both of the superpowers—and to use their own great command of technology to achieve both independence and security of supply. The major European powers have already gone a very long way in their commitment to the development of plutonium breeder reactors. France and Britain have both had experimental breeders running since the 1960s. Germany has one in operation now, and there's another under construction in Italy. As for the much bigger commercial breeders, France has now decided to go ahead with the world's first—the 1200 megawatt Superphenix. A 1300 megawatt breeder is under design in Britain.

These prototypes demonstrate the European command over the technology. But here we come back to the Concorde analogy again. They won't be competitive, in economic terms, unless they are widely used. There is going to be fierce pressure on European governments to export these machines to help pay for the enormous development costs. The German sale of the plutonium reprocessing plant to Brazil isn't the last of these cases. It's more likely to be only the first.

American ideas on the subject currently run strongly in favor of U.S. guarantees to deliver enriched uranium to Europe, in order to make plutoniuum reprocessing unnecessary. But Europeans fear that U.S. policy might be subject to change with each successive President, and that internationalization of the reprocessing plants will only dilute their own control.

The United States still has time to back away from the plutonium breeder. But it's too late for Americans to persuade Europe (or, for that matter, Japan) to come with them. At this point, the only realistic goal for U.S. policy is to try to limit the worldwide traffic in plutonium to those countries with very large requirements for electric power—and with proven records in weapons control. That much of a policy is necessary, but even going that far threatens an unpleasantly high level of friction between this country and Europe.

Advanced technologies, it turns out, quickly become national symbols of deep emotional force. If you doubt it, keep watching Concorde.

ORDER OF BUSINESS

Mr. BAKER. Mr. President, I have no other request or requirement for my time. Therefore, I yield back the remainder of my time under the standing order.

Mr. ROBERT C. BYRD. Mr. President, I yield back the remainder of my time.

The ACTING PRESIDENT pro tempore. At this time, in accordance with the previous order, the Chair recognizes the distinguished senior Senator from Utah (Mr. GARN) for not to exceed 15 minutes.

THE CLEAN AIR ACT AMENDMENTS

Mr. GARN. Mr. President, as most Senators know, I took an active interest in clean air legislation during the last session of Congress. I have been accused of killing the Clean Air Act amendments, and I plead guilty of trying to understand the legislation thrust before us at the end of the session last year. If my insistence on deliberation killed the bill, I am ready to take the blame or the credit.

I have also been accused of killing the amendments at the behest of the auto industry. To that charge I must plead not guilty. At the time I filibustered against the bill, I had not even talked with representatives of the auto industry. I have since, and I have told them that even if the bill had been perfectly satisfactory to them, I would have acted exactly as I did.

The fact is that I felt then, and still feel, that the legislation which came out of the House-Senate conference last fall would have had serious adverse impacts on employment, on economic growth, on energy consumption, and even on health. The exact limits of those impacts I was not ever able to get anyone to tell me.

Under the circumstances, it seemed best to kill the bill, and try again this year.

During that debate, the distinguished Senator from Maine, chairman of the responsible subcommittee of the Public Works Committee, now the Committee on Environment and Public Works, stood on the floor and warned that there would be no quick fix this year for the auto industry. He pointed out that unless there is some relaxation in the statutory emission limits, the manufacturers will be faced, later this year, with the choice between shutting down and manufacturing autos that cannot legally be sold.

The Senator from Maine has been as good as his word. There has been no quick fix for autos. There may not even be a moderately rapid fix for autos. I invite the attention of the Senate to the following points:

First. The Easter recess is upon us, and the Environment and Public Works Committee has not yet reported out a bill. It appeared that markup would be completed this week, perhaps yesterday, until the committee adopted an amendment which is displeasing to the so-called environmentalists. I will have more to say about that later;

Second. The companion bill is still in subcommittee in the House, where, after 2 months work, I am informed that 7 of the bill's 59 sections have been marked up. Of the seven completed, six are not controversial, and the other is the bill's title. I have been told that it will not go to the floor of the House before June;

Third. The two bills are very different in approach. Indeed, they are quite similar to the versions passed by the two Houses last year, which resulted in a very long and somewhat acrimonious conference, out of which came a bill which could not pass the Congress. Thus, even after both Houses have acted, delay is likely;

Fourth. At this time, we do not know what position the new administration is going to take on questions of clean air. The new Administrator of the Environmental Protection Agency has said that he cannot predict when EPA's position will be ready. I have been informed by other sources that no position on air will be included in President Carter's environmental message, which is expected at any moment;

Fifth. Nor have we seen the details of the Carter energy proposal, although we are told that it will change our lifestyle radically. In view of the close connection between pollution control and energy consumption, the energy policy is certain to demand consideration in dealing with questions of air quality;

Sixth. There is increasing uncertainty about environmentalist support for the bill. As noted above, the Senate committee on Wednesday adopted an amendment dealing with nonattainment, which is apparently very unsatisfactory to those opposed to any relaxation in air quality standards. The amendment is complex, and I do not pretend to understand it. But the fact remains that some kind of relief in nonattainment areas is essential in view of statutory deadlines now in force. It appears to me that whatever level of relief there is someone is going to be unhappy. If there is enough relief, the environmentalists will oppose it; if there is not enough, every Governor and mayor in the country will oppose it. The possibilities for delay are endless.

All of which leads me to the following conclusion. It is time to separate legislation dealing with mobile and stationary sources of pollution. At the present time, there is no reason whatever to consider them together. Indeed, issues related to one make it impossible to deal rationally with the other. We are continually faced with a situation where a little relief from the regulatory straitjacket is offered to one group here, and a little to another group there, the price always being support for a total package which is really acceptable to no one, and unfair to the American people. In my view, Mr. President, the time has come to stop the charade. Let us split the bill into two parts. It may be that the Senate can hold the feet of the auto companies to the fire. If they can, that is fine. I am a cosponsor of the Riegle-Griffin bills, which are similar to the House-passed Dingell-Broyhill amendment last year; I understand that Senator MUSKIE does not like their approach, but I am willing to take my chances on the floor. If the auto companies are unable to persuade the Congress that they deserve relief, so be it.

On the other hand, we could then get down to the serious problems of the stationary sources. This year the big stickler appears to be nonattainment. Incidentally, no one seems to have noticed this problem last year. But the problem of prevention of significant deterioration has not yet been solved either. And I am sure that as the President's environmental and energy messages are delivered, issues such as coal conversion, clean coal, tall stacks, intermittent sources, and many others will be taken up. Let us deal with them in terms of stationary sources, and not tied up with questions of auto emissions.

Obviously, the legislative outlook for comprehensive clean air legislation is not impossibly dark. No one should be willing to say at this point that there will be no comprehensive bill this year. But at the same time, Mr. President, I believe it would not be possible to say that of course there will be a bill this year. In view of the uncertainty, which is growing every day, let us separate the two kinds of polluters, and deal with them on their own terms.

It is rather interesting, with the time delay that we have experienced, that just about a year ago Senator Moss, the former senior Senator from Utah, and I proposed an amendment that would have asked for a 1-year study of this nondegradation problem so that the Senate could act on the basis of facts and not on the basis of emotion. Everybody said we could not afford that kind of delay, so our amendment was defeated. But 1 year has passed. If this Senate had listened to us a year ago, we would now have completed our 1-year study and then could have made the decision on a rational basis rather than the emotion of whether the auto industry needs a quick fix, whether the environmentalists think it is good or bad, or mayors, Governors, whoever was involved. It looks like it will be months, if at all, before we achieve a bill this year.

I just wanted to remind the Senate of that fact, where they turned down our request for a 1-year study. The 1-year has very nearly passed. We might have been able to make some intelligent decisions on this matter. In the meantime, to tie the two types of pollutors together, auto emissions—mobile sources and stationary sources, does not make a great deal of sense to me. It seems to me we should consider dealing with the automobile problem immediately so that they can meet their production schedules for their 1978 models without laying off thousands if not hundreds of thousands of people, canceling orders in their procurement process. If they do not know whether their cars will meet the 1978 standards or not, let us deal with that.

Let us finally get back to dealing with the stationary sources on a reasonable, factual basis and take time to consider that adequately so that we do not cause massive economic problems in this country, particularly in the energy-rich West.

Mr. President, that concludes my remarks.

ROUTINE MORNING BUSINESS

The ACTING PRESIDENT pro tempore. At this time, in accordance with the previous order, there will be a period for the transaction of routine morning business not to extend beyond 9:45, with speeches by the Senators limited to 2 minutes.

Is there morning business to be transacted?

AMBASSADOR MIKE MANSFIELD

Mr. ROBERT C. BYRD. Mr. President, the press has recently reported that President Carter has selected former Senate Majority Leader Mike Mansfield for the very important post of Ambassador to Japan, our major ally in the Pacific. The Washington Post has indicated that formal announcement will be made following normal diplomatic and security clearances.

I know that every Senator on both sides of the aisle would join me in applauding such an appointment. Mike Mansfield is eminently qualified for any ambassadorial post, but he is especially well qualified for an assignment in the Far East. His deep and absorbing interest in the history of the development of the nations in the Pacific and eastern regions is well known to those of us who have served with him in the Senate.

As a professor of Far Eastern history at the University of Montana before he came to Government, Mike Mansfield began what was a lifetime commitment to better relations between the United States and the nations of the Pacific. While he served in the Congress of the United States, he was able to give his colleagues and the Nation the benefit of his deep understanding and knowledge about the people and the governments in that part of the world.

No American alive today is more highly respected, more dedicated to decency and honor, in government and be-

tween governments, or more experienced in diplomacy.

Mike Mansfield's many years here as a Senator and as a majority leader prepared him well to represent this Nation to the other countries of the world. The President has stated that he wished to make diplomatic appointments on the basis of background, knowledge, understanding and experience, rather than as a reward for political assistance. Certainly, the appointment of Senator Mansfield to this very sensitive post would be an excellent example of the value of that new and commendable approach to foreign relations. I look forward to the time when we in the Senate can officially applaud the appointment of former Majority Leader Mike Mansfield through the advice and consent process.

Mr. BAKER addressed the Chair.

The PRESIDING OFFICER (Mr. CLARK). The Senator from Tennessee is recognized.

Mr. BAKER. Mr. President, I rise only to express my profound agreement with the remarks by the distinguished majority leader. Senator Mansfield served us long and faithfully as majority leader in this body. He was in the chair now occupied so ably by the distinguished Senator from West Virginia when I came to the Senate in January of 1967. My wife's father was in this chair at that time. I saw and observed the good, close, cordial, effective, sometimes energetic relationship, both in agreement and disagreement, between them. I am even vain enough to suggest that the Senate prospered and benefited from that relationship. I even confess to an admiration for it and an aspiration that it should continue in the future.

I think the President chose well in choosing Senator Mansfield to represent us in Japan. I think the Japanese will profit from that, as we shall certainly profit from it. So I commend the President of the United States for that nomination. I look forward to an early, prompt, and enthusiastic confirmation of Ambassador Mansfield's appointment.

The PRESIDING OFFICER. Is there further morning business?

Mr. ROBERT C. BYRD. Mr. President, I thank the distinguished minority leader for his remarks. I am sure they will be highly appreciated by our former majority leader and continuing friend, Mike Mansfield, and Mrs. Mansfield.

Mr. President, I suggest the absence of a quorum.

The PRESIDING OFFICER. The clerk will call the roll.

The assistant legislative clerk proceeded to call the roll.

Mr. ROBERT C. BYRD. Mr. President, I ask unanimous consent that the order for the quorum call be rescinded.

The PRESIDING OFFICER. Without objection, it is so ordered.

CONSIDERATION OF CERTAIN MEASURES ON THE UNANIMOUS-CONSENT CALENDAR

Mr. ROBERT C. BYRD. Mr. President, there are six measures on the Unanimous-Consent Calendar. The first one is being held for a budget waiver. The remaining five were cleared yesterday. They were put on the Consent Calendar and appear there this morning. No objections have been received from this side of the aisle. I ask unanimous consent, if there have been no objections received from the other side of the aisle, that the Senate proceed to the consideration of Calendar Orders numbered 63 through 67 on the Unanimous-Consent Calendar.

The PRESIDING OFFICER. Is there objection?

Mr. BAKER. Mr. President, reserving the right to object, I shall not object. I certainly agree we should dispose of those items at this time. I am happy to see this many items on the Unanimous-Consent Calendar, which means that they have gone over so that all Members are apprised of them and apprised of the fact that they may be disposed of in this way.

I wonder about Calendar Order No. 61. My calendar shows it was held for a typographical correction.

Mr. ROBERT C. BYRD. My calendar shows both a typographical error amendment needed and budget waiver.

Mr. BAKER. I thank the majority leader.

The PRESIDING OFFICER. Is there objection? The Chair hears none. It is so ordered.

EXPENDITURES FOR THE SELECT COMMITTEE ON INDIAN AFFAIRS

The Senate proceeded to consider the resolution (S. Res. 102) authorizing expenditures by the Select Committee on Indian Affairs, which had been reported from the Committee on Rules and Administration with amendments as follows:

On page 1, line 6, strike "March" and insert "April";

On page 1, line 7, strike "$617,400" and insert "$484,000";

So as to make the resolution read:

Resolved, That in carrying out the duties and functions imposed on it by section 105 of S. Res. 4, Ninety-fifth Congress, agreed to February 4 (legislative day, February 1), 1977, and in exercising the authority conferred on it by such section, the Select Committee on Indian Affairs is authorized from April 1, 1977, through February 28, 1978, to expend not to exceed $484,000 from the contingent fund of the Senate, of which amount not to exceed $25,000 may be expended for the procurement of the services of individual consultants or organizations thereof (as authorized by section 202(i) of the Legislative Reorganization Act of 1946, as amended).

SEC. 2. Expenses of the select committee under this resolution shall be paid from the contingent fund of the Senate upon vouchers approved by the chairman of the select committee, except that vouchers shall not be required for the disbursement of salaries of employees paid at an annual rate.

The amendments were agreed to.

The resolution, as amended, was agreed to.

Mr. ROBERT C. BYRD. Mr. President, I ask unanimous consent to have printed in the RECORD an excerpt from the report (No. 95–74), explaining the purposes of the measure.

There being no objection, the excerpt was ordered to be printed in the RECORD, as follows:

Senate Resolution 102 as referred would authorize the Select Committee on Indian Affairs from March 1, 1977, through February 28, 1978, to expend not to exceed $617,400 in carrying out the duties and functions imposed on it by section 105 of Senate Resolution 4, 95th Congress, agreed to February 4, 1977. Not to exceed $25,000 of that amount would be available to the select committee for the procurement of the services of individual consultants or organizations thereof.

At the request of the Committee on Rules and Administration, the select committee reconsidered its original budget of $617,400. During reconsideration, the select committee reduced its request by $89,400 for the 12-month period—from $617,400 to $528,000.

The Committee on Rules and Administration has amended Senate Resolution 102 to provide the select committee with $484,000 for the 11-month period from April 1, 1977, through February 28, 1978, which amount is the revised request of $528,000 reduced by $44,000 or one-twelfth.

The Select Committee on Indian Affairs was established to conduct a study of any and all matters pertaining to problems of Indians, including but not liimted to, Indian land management and trust responsibilities, Indian education, health, special services, and loan programs, and Indian claims against the United States.

The select committee is composed of five members, who are appointed by the President of the Senate—three from the majority party and two from the minority party. Pursuant to Senate Resolution 4, the select committee will cease to exist at the close of the 95th Congress and, effective with the commencement of the 96th Congress, its jurisdiction and duties will be transferred to the Committee on Human Resources.

ADDITIONAL EXPENDITURES BY THE COMMITTEE ON APPROPRIATIONS

The resolution (S. Res. 113) authorizing additional expenditures by the Committee on Appropriations for routine purposes, was considered, and agreed to, as follows:

Resolved, That the Committee on Appropriations is authorized to expend from the contingent fund of the Senate, during the Ninety-fifth Congress, $250,000, in addition to the amount, and for the same purposes, specified in section 134(a) of the Legislative Reorganization Act of 1946, as amended.

Mr. ROBERT C. BYRD. Mr. President, I ask unanimous consent to have printed in the RECORD an excerpt from the report (No. 95–75), explaining the purposes of the measure.

There being no objection, the excerpt was ordered to be printed in the RECORD, as follows:

Section 134(a) of the Legislative Reorganization Act of 1946 (Public Law 601 79th Congress, 60 Stat. 812, August 2, 1946) authorized each standing committee of the Senate to expend not to exceed $10,000 per Congress for routine purposes.

Senate Resolution 113 would authorize the Committee on Appropriations to expend from the contingent fund of the Senate, during the 95th Congress, $250,000 in addition to the amount, and for the same purposes, specified in said section 134(a).

An explanation for the request is expressed in a joint letter addressed to Senator Howard W. Cannon, chairman of the Committee on Rules and Administration, by Senator John L. McClellan, chairman, and Senator Milton

R. Young, ranking minority member, of the Committee on Appropriations, which letter is as follows:

U.S. SENATE,
COMMITTEE ON APPROPRIATIONS,
Washington, D.C., March 16, 1977.

Hon. HOWARD W. CANNON,
Chairman, Committee on Rules and Administration, U.S. Senate, Washington, D.C.

DEAR MR. CHAIRMAN: Yesterday, the Appropriations Committee reported an original resolution to provide authority for the expenditure of $250,000 by this committee from the contingent fund of the Senate. The resolution, S. Res. 113, was referred to your Committee.

Under the Legislative Reorganization Act of 1946, the Committee on Appropriations has a $10,000 expense fund for each Congress which the committee utilizes primarily for the payment of billings for hearing transcripts. It has been necessary to secure supplemental authority each year to enable the committee to pay for hearing transcripts and to otherwise meet our obligations mandated by the Budget and Impoundment Control Act.

The funds authorized for this committee for the 95th Congress will soon be expended. An additional $250,000 is requested for expenditures for the preparation of verbatim transcripts of hearings, computer services and routine expenditures. Under the circumstances, it is necessary to secure an additional authorization at this time, and it would be very much appreciated if your committee would act favorably on Senate Resolution 113.

Senator Milton R. Young, ranking minority member of the committee joins me in this request.

With kindest personal regards, I am

Sincerely,

JOHN L. MCCLELLAN,
Chairman.
MILTON R. YOUNG,
Ranking Minority Member.

DEVELOPMENTS IN AGING: 1976

The resolution (S. Res. 119) authorizing additional copies of the report entitled "Developments in Aging: 1976," was considered and agreed to, as follows:

Resolved, That there be printed for the use of the Special Committee on Aging one thousand one hundred and sixty additional copies of its report to the Senate entitled "Developments in Aging: 1976" (Part One).

Mr. ROBERT C. BYRD. Mr. President, I ask unanimous consent to have printed in the RECORD an excerpt from the report (No. 95–76), explaining the purpose of the measure.

There being no objection, the excerpt was ordered to be printed in the RECORD, as follows:

Senate Resolution 119 would authorize the printing for the use of the Special Committee on Aging of 1,160 additional copies of part 1 of its report to the Senate entitled "Developments in Aging: 1976".

The printing-cost estimate, supplied by the Public Printer, is as follows:

Printing-cost estimate

1,160 additional copies, at $965.30 per thousand $1,119.75

A letter in support of Senate Resolution 119 addressed to Senator Howard W. Cannon, chairman of the Committee on Rules and Administration, by Senator Frank Church, chairman of the Special Committee on Aging, is as follows:

U.S. SENATE,
SPECIAL COMMITTEE ON AGING,
Washington, D.C., March 18, 1977.

Hon. HOWARD W. CANNON,
Chairman, Committee on Rules and Administration, U.S. Senate, Washington, D.C.

DEAR MR. CHAIRMAN: Pursuant to Senate Resolution 373, agreed to March 1, 1976, the Special Committee on Aging will report to the Senate on March 31, 1977, Senate Resolution 119, introduced on this date, will provide an additional 1,160 copies of the report, "Developments in Aging: 1976" (part 1).

The cost estimate provided by the Government Printing Office is in the amount of $965.30 per additional thousand copies.

Demand for copies of this annual report of the committee always far exceeds the number of copies provided by a resolution. Copies are distributed to Members of Congress and to libraries, and the Superintendent of Documents offers copies for sale.

Your consideration of this resolution will be appreciated.

With best wishes,

Sincerely,

FRANK CHURCH,
Chairman.

EXPENDITURES BY THE COMMITTEE ON RULES AND ADMINISTRATION

The resolution (S. Res. 128) authorizing additional expenditures by the Committee on Rules and Administration for routine purposes, was considered and agreed to, as follows:

Resolved, That the Committee on Rules and Administration is authorized to expend from the contingent fund of the Senate, during the Ninety-fifth Congress, $20,000 in addition to the amount, and for the same purposes, specified in section 134(a) of the Legislative Reorganization Act of 1946.

Mr. ROBERT C. BYRD. Mr. President, I ask unanimous consent to have printed in the RECORD an excerpt from the report (No. 95–77), explaining the purposes of the measure.

There being no objection, the excerpt was ordered to be printed in the RECORD, as follows:

Section 134(a) of the Legislative Reorganization Act of 1946 (Public Law 601, 79th Congress, 60 Stat. 812, August 2, 1946) authorized each standing committee of the Senate to expend not to exceed $10,000 per Congress for routine purposes.

Senate Resolution 128 would authorize the Committee on Rules and Administration to expend from the contingent fund of the Senate, during the 95th Congress, $20,000 in addition to the amount, and for the same purposes, specified in said section 134(a).

TRIBUTES TO GERALD R. FORD

The concurrent resolution (H. Con. Res. 157) authorizing the printing of a compilation of tributes by Members of the House in the Halls of Congress to commemorate the years of service of the Honorable Gerald R. Ford, was considered and agreed to.

Mr. ROBERT C. BYRD. Mr. President, I ask unanimous consent to have printed in the RECORD an excerpt from the report (No. 95–78), explaining the purposes of the measure.

There being no objection, the excerpt was ordered to be printed in the RECORD, as follows:

House Concurrent Resolution 157 would provide (1) that a compilation of tributes by Members of the House in the Halls of Congress to commemorate the years of service of the Honorable Gerald R. Ford be printed, with an appropriate illustration, as a House document; and (2) that there be printed and bound, as directed by the Joint Committee on Printing, 1,500 additional copies of such document, which would be distributed under the direction of the Honorable John J. Rhodes.

The printing-cost estimate, supplied by the Public Printer, is as follows:

Printing-cost estimate

To print as a document (1,500 copies)	$16,280.50
1,500 additional copies, at $5,031.47	7,547.20
Total estimated cost, H. Con. Res. 157	23,827.70

Mr. ROBERT C. BYRD. Mr. President, I ask unanimous consent to reconsider en bloc the votes by which the resolutions were adopted.

Mr. BAKER. I move to lay that motion on the table.

The motion to lay on the table was agreed to.

UNIVERSAL REGISTRATION

Mr. ALLEN. Mr. President, the administration has proposed a bill to provide for what it euphemistically calls universal registration.

Actually, the bill will provide for universal nonregistration, because it is to provide, as I understand it, that prospective voters do not have to register in advance in order to be allowed to vote. They can go to the polling booth on election day, identify themselves through some method such as a driver's license, social security card, some sort of ID card, and be allowed to vote if they are 18 years of age or over.

It is simple, indeed, under the present law for a person to register to vote. All he has to do is to be at least 18 years of age and present his body, present himself to the registrars, and vote.

No literacy test is required, no tests of any sort, and why that is not simple enough, I do not understand.

I believe that this bill gives more cause for concern about the future of our Republic than any bill that has been introduced in the Congress during the time that I have been in the Senate.

Someone has said that democracy can last only to the point when the people realize that they can appropriate from the public treasury benefits to themselves in ever-increasing amounts.

There is no need for this proposed law. I suggest that it will have strong opposition in committee and on the floor.

What this would do would be, particularly in a big city, to allow those who are interested in having people vote to clean out every skid row hotel, every street corner, every pool room, every beer joint, every X-rated movie house, every massage parlor, and herd these people to the polls and vote them like sheep. We can imagine that people so herded to the polls would have very little interest in fiscal responsibility. They would be

not at all interested in curbing permissiveness.

I feel that this proposed law presents a real danger to the future of our Republic. We would have multiple voting. There would be nothing to prevent a person voting many times.

So the potential for fraud is enormous.

I assure the Senate that this is a bad bill and I hope it will be defeated.

MESSAGES FROM THE PRESIDENT

Messages from the President of the United States were communicated to the Senate by Mr. Chirdon, one of his secretaries.

EXECUTIVE MESSAGES REFERRED

As in executive session, the Presiding Officer laid before the Senate messages from the President of the United States submitting sundry nominations which were referred to the Committee on Armed Services.

(The nominations received today are printed at the end of the Senate proceedings.)

MESSAGES FROM THE HOUSE

At 12:13 p.m., a message from the House of Representatives delivered by Mr. Berry, one of its reading clerks, announced that the House has passed the following bills, in which it requests the concurrence of the Senate:

H.R. 4895. An act to amend the Strategic and Critical Materials Stock Piling Act, and for other purposes;

H.R. 4974. An act to amend the Public Health Service Act to authorize appropriations for fiscal year 1978 for health planning and related programs;

H.R. 4975. An act to amend the Public Health Service Act to authorize appropriations for fiscal year 1978 for biomedical research and related programs; and

H.R. 4976. An act to amend the Public Health Service Act, the Community Mental Health Centers Act, title V of the Social Security Act, and the program of assistance for home health services to authorize appropriations for fiscal year 1978 for health services programs, and for other purposes.

The message also announced that, pursuant to the provisions of section 1, Public Law 689, 84th Congress, as amended, the Speaker has appointed Mr. BOB WILSON, Mr. FINDLEY, Mr. EDWARDS of Alabama, and Mr. WHITEHURST as members of the U.S. Group of the North Atlantic Assembly on the part of the House.

The message further announced that, pursuant to the provisions of section 204(b), Public Law 94–141, the Speaker has appointed Mr. PATTEN, Mr. PICKLE, and Mr. BYRON as members of the delegation to attend the Conference of the Interparliamentary Union in Canberra, Australia, from April 10 to April 16, 1977, on the part of the House.

REPORTS OF COMMITTEES

The following reports of committees were submitted:

By Mr. RIBICOFF, from the Committee on Governmental Affairs:

Special report entitled "Report on Legislative and Review Activities of the Committee on Post Office and Civil Service" (Rept. No. 95–82).

EXECUTIVE REPORTS OF COMMITTEES

As in executive session, the following executive reports of committees were submitted:

By Mr. JACKSON, from the Committee on Energy and Natural Resources:

Robert L. Herbst, of Minnesota, to be Assistant Secretary for Fish and Wildlife, Department of the Interior.

Guy Richard Martin, of Alaska, to be an Assistant Secretary of the Interior.

(The above nominations were reported with the recommendation that they be confirmed, subject to the nominees' commitment to respond to requests to appear and testify before any duly constituted committee of the Senate.)

HOUSE BILLS REFERRED

The following bills were read twice by their titles and referred as indicated:

H.R. 4895. An act to amend the Strategic and Critical Materials Stock Piling Act, and for other purposes; to the Committee on Armed Services.

H.R. 4974. An act to amend the Public Health Service Act to authorize appropriations for fiscal year 1978 for health planning and related programs; to the Committee on Human Resources.

H.R. 4975. An act to amend the Public Health Service Act to authorize appropriations for fiscal year 1978 for biomedical research and related programs; to the Committee on Human Resources.

H.R. 4976. An act to amend the Public Health Service Act, the Community Mental Health Centers Act, title V of the Social Security Act, and the program of assistance for home health services to authorize appropriations for fiscal year 1978 for health services programs, and for other purposes; to the Committee on Human Resources.

INTRODUCTION OF BILLS AND JOINT RESOLUTIONS

The following bills and joint resolutions were introduced, read the first time and, by unanimous consent, the second time, and referred as indicated:

By Mr. NELSON:

S. 1206. A bill to provide temporary authority to the Administrator of the Small Business Administration to facilitate water conservation practices and emergency actions to mitigate the impacts of the 1976–77 drought; to the Select Committee on Small Business.

By Mr. PACKWOOD (for himself, Mr. HATFIELD, and Mr. STEVENS):

S. 1207. A bill to provide for a series of regional presidential primary elections; to the Committee on Rules and Administration.

By Mr. ZORINSKY:

S. 1208. A bill for the relief of Fernando de la Rama and Carmen de la Rama; to the Committee on the Judiciary.

By Mr. PROXMIRE (for himself and Mr. PERCY):

S. 1209. A bill to reorganize the executive branch of the Government by consolidation of functions and to increase efficiency and coordination in the area of disaster assistance, emergency preparedness, mobilization readiness, and for other purposes; to the Committee on Governmental Affairs.

By Mr. STENNIS (for himself and Mr. TOWER) (by request):

S. 1210. A bill to authorize appropriations during the fiscal year 1978, for procurement of aircraft, missiles, naval vessels, tracked combat vehicles, torpedoes, and other weapons, and research, development, test, and evaluation for the Armed Forces and to prescribe the authorized personnel strength for each active duty component and of the Selected Reserve of each Reserve component of the Armed Forces and of civilian personnel of the Department of Defense, and to authorize the military training student loads, and for other purposes; to the Committee on Armed Services.

S. 1211. A bill to authorize appropriations during the fiscal year 1979, for procurement of aircraft, missiles, naval vessels, tracked combat vehicles, torpedoes, and other weapons, development, test, and evaluation for the Armed Forces and to prescribe the authorized personnel strength for each active duty component and of the Selected Reserve of each Reserve component of the Armed Forces and of civilian personnel of the Department of Defense, and to authorize the military training student loads, and for other purposes; to the Committee on Armed Services.

By Mr. MATSUNAGA:

S. 1212. A bill for the relief of Maria Elena Jumalon; to the Committee on the Judiciary.

S. 1213. A bill to provide for an emergency program of reforestation projects, and for other purposes; to the Committee on Agriculture, Nutrition, and Forestry.

By Mr. ABOUREZK (for himself, Mr. MCGOVERN, and Mr. HUMPHREY):

S. 1214. A bill to establish standards for the placement of Indian children in foster or adoptive homes, to prevent the break-up of Indian families, and for other purposes; to the Select Committee on Indian Affairs.

By Mr. ABOUREZK (for himself, Mr. BURDICK, Mr. GRAVEL, Mr. DECONCINI, and Mr. JACKSON):

S. 1215. A bill to provide for grants to Indian-controlled postsecondary educational institutions, and for other purposes; to the Select Committee on Indian Affairs.

By Mr. ABOUREZK (by request):

S. 1216. A bill relating to the distribution of certain funds appropriated to pay a judgment in favor of the Delaware Tribe of Indians in Indian Claims Commission docket numbered 298, and for other purposes; to the Select Committee on Indian Affairs.

By Mr. KENNEDY:

S. 1217. A bill to regulate activities involving recombinant deoxyribonucleic acid; to the Committee on Human Resources.

By Mr. BAYH:

S. 1218. A bill to amend the Juvenile and Delinquency Prevention Act of 1974, and for other purposes; to the Committee on the Judiciary.

STATEMENTS ON INTRODUCED BILLS AND JOINT RESOLUTIONS

By Mr. NELSON:

S. 1206. A bill to provide temporary authority to the Administrator of the Small Business Administration to facilitate water conservation practices and emergency actions to mitigate the impacts of the 1976–77 drought; to the Select Committee on Small Business.

SMALL BUSINESS EMERGENCY DROUGHT DISASTER LOAN ACT OF 1977

Mr. NELSON. Mr. President, I am introducing today, by request of the administration, a bill to provide low cost small business loans to drought disaster victims.

The bill would create a temporary loan

program which would expire at the end of this fiscal year, September 30, 1977. Eligible small firms must demonstrate that drought conditions have caused at least a 20-percent reduction in normal business levels as determined over not more than the 5 preceeding fiscal years. In addition, the Small Business Administration must determine that the firm will suffer substantial economic injury without assistance under the program. Firms must be in drought designated areas as determined by the President, the Secretary of Agriculture, or the SBA Administrator.

Loans could be made for normal business purposes or for improving water conservation practices or to rehabilitate, replace, or augment water supply facilities adversely affected by the 1976–77 drought.

Fifty million dollars is the requested authorization for this program.

I ask unanimous consent that this bill and a section-by-section analysis be printed in the RECORD.

There being no objection, the bill and material were ordered to be printed in the RECORD, as follows:

S. 1206

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That this Act may be cited as the "Small Business Emergency Drought Disaster Loan Act of 1977".

SEC. 2. (a) The Small Business Administration may make direct loans to small business concerns as defined by Section 3 of the Small Business Act and regulations thereunder for the following purposes:

(1) To remedy the effects of actual or prospective substantial economic injury resulting from the 1976–77 drought in drought-designated areas as determined by the President, the Secretary of Agiriculture, or the Administrator of the Small Business Administration.

(2) For short-term projects to improve water conservation practices or to rehabilitate, replace, or augment water supply facilities adversely affected by the 1976–77 drought in drought-designated areas as determined by the President, the Secretary of Agriculture, or the Administrator of the Small Business Administration.

(b) Such loans are subject to the following conditions:

(1) the interest rate for Section 2(a)(1) loans shall be at a rate of not less than 5 percent per annum; for loans under Section 2(a)(2) the interest rate shall be as established for Section 7(b)(1) loans under the Small Business Act;

(2) no loan may be made for a period exceeding 30 years;

(3) to be eligible for loans based upon claims of economic injury, a small business concern must demonstrate that its level of business activity is, or is expected to be, not less than 20 percent below the normal level of business activity for a period not exceeding the preceding 5 fiscal years. The Administration must also determine that such concern has suffered or is likely to suffer substantial economic injury without assistance under the Act;

(4) loan applications must be submitted and approved before October 1, 1977.

(c) Any funds to be used for purposes of assistance under Section 2(a)(1) or Section 2(a)(2) must be committed before October 1, 1977. In addition, the short-term projects for which these loan proceeds may be used must be completed by November 30, 1977, unless, under special circumstances or hardship, the Administrator of the Small Business Administration allows a project completion extension.

SEC. 3. The Administrator of the Small Business Administration may designate any area in the United States as an emergency drought impact area if he finds that a major and continuing adverse drought condition exists and is expected to continue, and such condition is causing significant hardships on the affected areas. Provisions of this Act apply to drought disaster areas currently designated under existing law, as well as those to be designated pursuant to this Act.

SEC. 4. Insofar as possible and if not expressly changed by any provisions of this Act, the provisions of the Small Business Act applicable to loans authorized by sections 7(b)(1) and 7(b)(2) of the Small Business Act and the rules and regulations relating thereto shall apply to loans made under this Act.

SEC. 5. The National Environmental Protection Act of 1969, as amended, shall be implemented to the fullest extent consistent with but subject to the time constraints imposed by this Act, and the Administrator of the Small Business Administration, when making the final determination regarding an application for assistance hereunder, shall give consideration to the environmental consequences determined within that period.

SEC. 6. Thereby authorized to be appropriated to the revolving fund established by section 4(c)(1)(A) of the Small Business Act the sum of $50,000,000.

STATEMENT OF NEED AND PURPOSE

The Small Business Administration's Emergency Drought Disaster Loan Program is to be established as part of a coordinated, multi-agency Presidential initiative to facilitate water conservation practices and to provide immediate relief from the impact of the 1976–77 drought.

The program will also provide emergency drought assistance loans to assist small business concerns to overcome the impact of actual or prospective economic injury suffered as a result of drought. Eligibility requires an actual or expected decrease in business activity of at least 20 percent below normal levels.

Its primary purpose is emergency drought loan assistance to aid water conservation and to improve or augment existing water supply facilities to avert future adverse impact of droughts on small concerns.

Small business concerns in both currently-designated drought disaster areas and areas to be designated by the President or the Secretary of Agriculture or the Administrator of the Small Business Administration will become eligible for this emergency drought assistance.

Actual or prospective loss loans will be made to small concerns at 5-percent interest for a period up to 30 years. Loans for other purposes authorized by this bill will be at the current 6⅝-percent interest per annum for a period up to 30 years.

Emergency loan applications may not be accepted after September 30, 1977. Funds for drought disaster assistance under the Act must be committed before October 1, 1977. Project measures authorized under this bill must be completed by November 30, 1977, unless due to special circumstances SBA's Administrator makes an exception.

An additional $50 million appropriation is being requested from Congress to fund this new program.

SECTION-BY-SECTION ANALYSIS

SECTION 1

Purpose clause and provision for citation of the Act.

SECTION 2

Section 2(a)(1) establishes an economic injury disaster loan (EIDL) program (similar to SBA's 7(b)(2) program).

Section 2(a)(2) establishes a direct loan program for water conservation and drought disaster assistance (similar to SBA's 7(b)(1) program).

Section 2(b) provides terms for the assistance to be granted. Loans are to be at 5 percent interest under Section 2(a)(1) and at a comparable interest rate of 6⅝% under Section 2(a)(2) for a period not to exceed 30 years. Section 2(b)(3) provides that small business concerns must experience a 20 percent reduction in normal business activity to qualify for EIDL assistance under this Act.

Section 2(b)(4) establishes a September 30, 1977 deadline for loan applications and approvals under this Act.

Section 2(c) provides that loan funds for programs under this Act must be committed pursuant to an approved application before October 1, 1977. The mandatory project completion date for projects funded under this Act is November 30, 1977, unless in consideration of hardship, the Administrator extends the completion deadline.

SECTION 3

Provides for declaration of drought disaster areas by SBA's Administrator, and application of this Act's provisions to current drought disasters and drought disaster designated pursuant to this Act.

SECTION 4

Makes available the provisions of the Small Business Act applicable to loans authorized by Sections 7(b)(1) and 7(b)(2) of the Small Business Act and the rules and regulations of the Agency relating thereto for purposes of administering this Act.

SECTION 5

Requires that the National Environmental Protection Act be fully implemented consistent with the time constraints of this Act.

SECTION 6

Provides an authorization for an appropriation of $50 million to the disaster loan fund of the Small Business Act for the purposes of this Act.

U.S. SMALL BUSINESS ADMINISTRATION,
Washington, D.C., March 28, 1977

Hon. GAYLORD NELSON,
Chairman, Select Committee on Small Business, U.S. Senate, Washington, D.C.

DEAR MR. CHAIRMAN: Enclosed is a copy of proposed legislation "To provide temporary authority to the Administrator of the Small Business Administration to facilitate water conservation practices and emergency actions to mitigate the impacts of the 1976–77 drought" which the Agency is today transmitting to the President of the Senate and the Speaker of the House of Representatives.

I trust that this Presidential initiative will receive your favorable consideration and support.

Sincerely,

WILLIAM T. GENNETTI,
For ROGER H. JONES,
Acting Administrator

U.S. SMALL BUSINESS ADMINISTRATION,
Washington, D.C., March 25, 1977

Hon. THOMAS P. O'NEILL, Jr.,
Speaker of the House of Representatives, Washington, D.C.

DEAR MR. SPEAKER: I am enclosing for your consideration and appropriate reference a bill "To provide temporary authority to the Administrator of the Small Business Administration to facilitate water conservation practices and emergency actions to mitigate the impacts of the 1976–77 drought."

On March 23, 1977, the President announced a number of administrative actions and legislative proposals to extend immediate assistance to those suffering serious human and economic costs because of the severe drought in the Western and Plains States. In accordance with the President's message, the Small Business Administration

is hereby submitting a proposed draft bill to provide small business concerns with:

(1) Emergency drought assistance loans to help overcome the impact of actual or prospective economic injury suffered as a result of drought. Such loans will bear a 5 percent interest rate to the borrower.

(2) Loans for short-term projects to improve water conservation, and loans to improve or augment existing water supply facilities to avert the future adverse impact of droughts. Such loans will be made at a uniform interest rate (currently 6⅝ percent) comparable to all SBA 7(b) loans.

Small business concerns in both currently-designated drought disaster areas and areas to be designated by the President or the Secretary of Agriculture or the Administrator of the Small Business Administration will become eligible for up to $50 million in emergency drought assistance.

The Office of Management and Budget has indicated that the enactment of this measure would be in accord with the program of the President.

Sincerely,

ROBERT H. JONES,
Acting Administrator.

Enclosure.

By Mr. PACKWOOD (for himself, Mr. HATFIELD, and Mr. STEVENS):

S. 1207. A bill to provide for a series of regional Presidential primary elections; to the Committee on Rules and Administration.

PRESIDENTIAL REGIONAL PRIMARIES ACT

Mr. PACKWOOD. Mr. President, in 1968, I asked for the adoption of a new approach to conducting Presidential preference primaries. Nearly a decade of neglect later, the number of States holding primaries has increased to 30. Though there is no logical sequence of primary dates or uniformity of election results, candidates for the highest office in our land are expected to compete for the attention of the voters in all of these States.

The competition requires huge amounts of money. President Ford spent over $1.5 million on travel expenses just during the 1976 primary season. This amounted to 18 percent of his total campaign expenditures. Other candidates spent similar amounts simply because there is no rational sequence in which the States hold their primaries. This also contributed to gross inefficiencies in the purchase of media for political advertising. Media markets very seldom end abruptly at the borders of a State. For example, radio, television, and newspaper advertising purchased for New York voters reached nonvoters in New Jersey, Connecticut, Rhode Island, and other States, all at considerable expense. In 1972, $21 million was spent on radio and television spots just during the primary season.

States on opposite sides of the Nation hold their primaries on the same day. On May 4, candidates were expected to compete in Alabama, District of Columbia, Indiana, Mississippi, and South Dakota. On May 25, five primaries extended from Oregon to Arkansas. On June 8, three major primaries were held in California, New Jersey, and Ohio, and these examples are not atypical.

Physical and mental exhaustion, frequent burdens of any campaign for public office, are greatly intensified by duplicative plane rides, institutional food, and uncomfortable hotels. Older or physically handicapped candidates drop off the pace in the earliest primaries.

We no longer choose our President by his character, intelligence, and stands on issues, but by whether, after 30 primaries on 15 different dates, he can still stand at all.

Reporting procedures have become the most recent burden. Both 30 and 10 days prior to each State primary, the Federal Elections Commission requires financial disclosure of campaign receipts and expenditures. In 1976, this meant high salaried accountants closed out the books for both the Ford and Carter campaigns 27 times during the 100-day primary season, thus adding to the duplication and expense.

This expenditure of money and manpower would be worthwhile if it facilitated more candidate exposure to the public, but it does not. Too much time is spent in airplanes or taxis to and from airplanes. Visits to individual States only allow enough time to meet with members of the local press, stage a few "attention-getters" and remind the voter asking a tough question, "I have a plane to catch." To the extent that our present primary system wastes the candidates' resources, the public is denied essential access to its present and future leaders.

I propose we stop this waste. I propose we streamline the process of selecting Presidential nominees. The legislation I reintroduce today is very simple. It would establish five regions. The regions I have drawn up can be generally described as New England, the Great Lakes area, the Southeast, the Great Plains, and the West. My plan would establish five dates on which States could hold their Presidential preference primaries. The States would retain the decision as to whether to hold a primary, but once they choose to do so, it would be held on the same date as other primaries in that region. If these regions had been established in 1976, no region would have had more than seven State primaries on the designated date, or fewer than five.

State officials would also continue to officiate their State's primary, except that the results would be required to conform to a Federal standard developed by the Federal Election Commission.

The sequence of regional primaries would be determined by lot. The plan calls for the first primary to be held on the second Tuesday in March. A drawing would be held 70 days prior to that date to determine which region would hold its primary. This same procedure would be followed for the succeeding primaries to be held on the second Tuesday of April, May, June, and July of Presidential election years.

I ask my colleagues to support this concept—not necessarily the bill's specifics, the dates to hold primaries or the makeup of a particular region, but its concept. We must not lose sight of its intent by focusing on the specifics. The proposal, no matter how it evolves, must further the goals of democracy. It must provide an efficient elections process which minimizes wasted expenses and, more importantly, focuses more widespread and penetrating public exposure on the candidates.

I ask unanimous consent that the text of this bill be printed at this point in the RECORD.

There being no objection, the bill was ordered to be printed in the RECORD, as follows:

S. 1207

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That this Act may be cited as the "Presidential Regional Primaries Act".

FINDINGS

SEC. 2. The Congress finds that—

(1) the proliferation of elections held by States for the expression of a preference for the nomination of individuals for election to the office of President subjects candidates for nomination for election to such office to physical exhaustion, danger, and inordinate expense;

(2) there is no uniformity among State laws with respect to the effect of such elections on delegates to the nominating conventions held by political parties;

(3) the confusion caused by this lack of uniformity in state laws gives rise to cynicism, frustration, and distrust of the nomination process;

(4) the national nominating conventions held by political parties constitute an integral part of the process by which the President is chosen by the people of the United States; and

(5) in order to protect the integrity of the Presidential election process and provide for the general welfare of the Nation, it is necessary to require states which conduct presidential primaries to conduct them in accordance with an organized, regional scheme for all such primaries.

ESTABLISHMENT OF REGIONAL PRIMARIES
